REGISTRATION AS ACCOUNT HOLDER TO E-FILE AND PAY BY GIRO**

This Practice Direction is issued by the Registrar under Rule 78B(1) of the Trade Marks Rules, to specify the procedure for applying to the Registrar to be registered as an account holder.

This Practice Direction will come into effect on 1 January 2006.

Any person who wishes to use eTrademarks to effect a transaction and make payment by GIRO must register with the Intellectual Property Office of Singapore (IPOS) as an Account Holder. Approval is at the sole discretion of IPOS. Upon approval, an eTrademarks account will be created in the name of the person and the person will receive a User ID and Password.

To register, access IPOS address at <http://www.ipos.gov.sg> and [download the eTrademarks Account Holder Registration Form](#).

The person may appoint an Administrator to administer and manage his eTrademarks Account through the eTrademarks "[Maintenance of Authorised Representatives](#)" service.

The responsibilities of the Administrator are as follows:

- appointment of one or more Representatives to access eTrademarks and make payment by GIRO on behalf of the Account Holder;
- updating of the particulars of the Representatives; and
- removal of any Representative's rights to access eTrademarks and make payment by GIRO on behalf of the Account Holder.

These responsibilities are to be conducted through the eTrademarks "Maintenance of Authorised Representatives" service.

Please note that all Authorized Representatives must be CPF account holders with SingPass. The Authorized Representatives are required to sign in using their SingPass to ensure security for GIRO deductions for the online transactions. If the person does not have a GIRO account with IPOS, please complete the [GIRO Application Form](#) and submit it to IPOS.

The completed eTrademarks Account Holder Registration Form and GIRO Application Form should be mailed or couriered to the Intellectual Property Office of Singapore with the address 51 Bras Basah Road #04-01 Plaza By The Park Singapore 189554 and attentioned to Mrs Ang-Ong Bee Lian. stereos, electric sensors, home and office electrical power automation systems comprising wireless controllers; communication apparatus, instruments and equipment for near field communication (NFC), namely electronic key cards, key fobs, near field communication (NFC) tags, near field communication (NFC) technology-enabled readers and integrated circuits for near field communication (NFC) applications; computer anti-virus and anti-spam software; computer chips, software, and hardware for wireless power transfer for use in charging vehicles; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in devices such as network switches, engine control modules, cat-scan machines, industrial automation controllers, avionics and wireless handsets; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in industrial, consumer and automotive applications; computer hardware and computer software for transferring, storing, converting and displaying medical device data; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID and NFC chips and tags; computer software for charging smart phones, tablets, and mobile electronic devices; computer software for enabling functionality of safety and testing systems, apparatus and equipment; computer software for enabling functionality of sensors for use in automotive, consumer, industrial and medical applications; computer software for managing computer networks; computer software for tracking; computer software, hardware and chipsets for use with wireless communication apparatuses, consumer electronic devices, smart phones, digital cameras, IP cameras, drones, unmanned aerial vehicles (UAVS) and wearable mobile computers; computer peripherals for processing digital signals, for processing background data and information on computer operating systems, for tracking user activity and location, for enabling activation by speech and touch and for detecting sensory cues and launching applications that correspond to specific sensory cues and computer software, hardware and chipsets for use with these goods; computer software, hardware, and chipsets for streaming music and for synchronizing audio speakers in consumer electronics devices; computer software, namely compilers, linkers, support software to assist in the development of stand-alone programs, and software for assisting in the development of object oriented software applications, such as database systems; computer software, namely operating systems, board support packages (BSPS), virtualization technology software, hypervisor software, embedded software, applications programming interface (API) software, software libraries used to create other computer software; applications software for automotive, consumer, health care, medical, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications, protocol stacks, configuration software, and optimization software; content filtering software, namely, computer software for controlling content made available to a user; control plane software; data plane software; data processing apparatus and software for enabling, controlling, managing and monitoring all aspects of a paperless payment and/or access system employing RFID (radio frequency identification) and/or NFC (near field communication) technology, including allowing users to recharge their payment accounts remotely; deep packet inspection software; downloadable computer software for developing computer hardware and software for chipsets for wireless devices; enterprise security software for use in apparatus for computer network and other networking devices to provide network security;

firewall software; integrated networking, security, and collaboration software; internet security software; intrusion detection and prevention software; load balancing software; VPN (virtual private network) operating software; integrated circuits, computer hardware and software for signal processing in wireless communication apparatuses, consumer electronics devices, portable media devices, mobile gaming devices, pocket computing devices, and smart phones; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers; recording discs; computer network interfaces devices; electronic, electro technical and electromagnetic modules; data processing equipment; data storage apparatus; interfaces for computers; smart cards; smart card integrated circuits; RFID chips and tags; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID chips and tags; contactless smart cards; dual interface smart cards; dual interface integrated circuits that provide a link between contactless cards and contact cards; writers and readers for wireless transmission to and from transponder chips; electronic apparatus for writing and reading of wireless transmission to and from transponder chips; computer programs for controlling transmission of data to and reading of data from transponder chips; data processing machines for fare determination using transponder chips; encoded smart cards; computer hardware, software and peripheral devices used for access control and authentication purposes; wearable activity trackers; wearable computer peripherals; smartphones; wearable telecommunication apparatus; multicore processors; application-specific integrated circuits (ASICs); integrated circuits embedded with software; signal processors; digital signal processors (DSPs); vector processors; vector signal processors; communications processors; network processors used in network and telecommunications equipment; application-specific hardware accelerators; wireless baseband processors; base stations on a chip, namely wireless base stations on a chip; integrated circuits, namely system basis chips and systems on a chip (SOC); multicore microcontrollers; semiconductor chip sets comprised primarily of semiconductor chips; integrated circuit modules in the form of semiconductor packages and packaging, namely redistributed chip packaging (RCP), and systems-in-package (SiP); radio frequency (RF) power transistors; radio frequency semiconductors; sensors, namely, inertial sensors, pressure sensors, magnetic sensors, touch sensors all for use in automotive, consumer, and industrial applications; proximity sensors; radar sensors; capacitive sensors; acceleration sensors; gyro sensors; sensors for computer interfaces featuring software, firmware and electronic integrated circuit chips; sensor systems comprised of sensors, computer software, microprocessors, microcontrollers, and logic or wireless protocols for enabling functionality of sensors for use in automotive, consumer, and industrial applications; electronic test instruments for developing and testing microprocessor-based systems; semiconductor memories; semiconductor devices, microcontrollers, integrated circuits, circuit boards, chipsets, all for management of operating frequency, voltage and power, optimization of static and dynamic power, power management, power optimization or power reduction; semiconductors, sensors and software for use in automotive, consumer, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications; semiconductors and software for use in healthcare and medical applications; semiconductors, sensors and software for use in wireless connectivity, battery management, smart grid, smart metering applications, engine control units (ECUs) and tire pressure monitoring systems (TPMS); microcontrollers, firmware, sensors, and radio frequency (RF) and analog circuitry devices for use with energy efficient wireless chargers; printed circuit boards namely evaluation boards and

reference design kits consisting of software for semiconductors, sensors and software; semiconductors and software for use in portable medical devices, diagnostic and patient monitoring devices, therapy devices, and medical imaging devices; computer application software, namely, computer software for use in applications for multimedia, graphics video, audio and numerically intensive computations; computer network switching software; computer convergence network software; computer network collaboration software; computer software for assessing the quality of service; network access software; networking software for operation of chipsets; networking software for content processing; computer software, namely, firmware, applications and development tools, for use in network content processing; failover prevention software; stateful packet inspection software; stateful application inspection software; enterprise security software; wireless radio controller software; command line management software; voice over IP software; video over IP software; networking and security software for use with unified threat management equipment, apparatus for computer network, integrated access devices, routers, switches, controllers, base stations, hubs, and security appliances; utility software for facilitating computer use at remote locations and for facilitating communications among mobile users over networks; computer software for providing security to remote users and for implementing computer, software, and network security measures for remote users; component-based software modeling tool featuring a graphical user interface, automatic code generators and built-in knowledge-base for use in the rapid design, development, implementation, verification and optimization of embedded applications; software for use in developing other software titles; downloadable, searchable electronic publications, namely reference manuals, user guides, application notes and product specifications on the subject of semiconductors, sensors and software; user manuals in electronic format supplied with the foregoing.

Class 38

Providing information in the field of telecommunications and telecommunications information relating to wireless communications and mobile technologies; consulting in the field of telecommunication services, namely, transmission of voice, data, and documents via telecommunications networks.

Class 42

Providing information in the field of computers, computer software and computer systems; providing information in the field of design and development of computer data networking; providing information in the field of network security and computer security; design for others of integrated circuits, semiconductors, microprocessors, computer hardware and software, and communications software and networks; developing, designing and testing semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software, electro technical and electromagnetic modules and their parts and building elements, data storage apparatuses, interfaces, smart cards, controllers for smart cards, controllers for RFID chips and tags for others; computer software development in the field of mobile applications; design and development of wireless communications systems for transmission and reception of voice, data and video; design and development of battery charging technology; design and development of data networking systems; design and development of network security and computer security systems; design and development of computer hardware and software for the operation and control of drones; design and development of computer hardware and software for the operation and control of robots; design and development of computer hardware and software for the operation and control of automobiles; cloud computing

featuring software for transferring, storing converting and displaying medical device data; developing wireless power transfer technology for use in charging vehicles; platform as a service (PAAS) featuring computer software platforms for use in developing, programming, building, and prototyping IOT (internet of things) devices; platform as a service (PAAS) featuring computer software platforms for wireless acquisition, transmission, conversion and storage of medical device data; providing technical information relating to the design and development of semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software; consulting in the field of telecommunications technology; design and development of wireless communications systems for authentication purposes; providing temporary use of online non-downloadable software applications, development software platforms and software development tools that enable software developers to develop, program, build, and prototype software for integrated circuits, chips and data processing equipment; computer programming services; research and design of antennas for scanning, reading and interpreting RFID chips and tags; research and design of NFC (near field communications) apparatus, instruments and equipment; advisory services in relation to all the abovementioned services.

calibration instruments; radio apparatuses; radio frequency wattmeters; broadband analog radio frequency wattmeters; radio frequency power measuring devices; digital signal measuring devices; radio frequency display units; radio frequency power sensors; radio frequency wattmeters and antenna analyzers for measuring and analyzing the radio frequency power and power wave from a radio frequency transmission line serving antennas and other devices primarily used for radio frequency measuring; air-cooled termination cabinets for radio frequency transmission lines; electrical apparatus, namely, coaxial electrical line terminations; radio frequency signal boosters; electrical multicouplers and individual channels therefore; electronic equipment, namely, radio frequency filters, filter networks, and duplexers; instruments for absorbing high frequency electrical power, including coaxial load resistors, and absorption type instruments for measuring such power, namely, wattmeters, comprising coaxial resistors; radio frequency power monitor/alarm for high frequency coaxial transmission equipment; software analysis tools for radio frequency data capture and storage; radio frequency analysis products namely, radio frequency data recorders and radio frequency signal generators; radio frequency diagnostic system in the field of semiconductor manufacturing for measuring the voltage, current, and phase angle of a radio frequency signal, comprising sensors and electronic modules; radio frequency diagnostic system comprising sensors and electronic modules for measuring radio frequency signal power and strength; electronic telecommunications measuring and testing device namely, a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter for use in evaluating, measuring, and analyzing radio frequency signal strength, direction, frequency, harmonic and bandwidth characteristics, as well as to assess the match characteristics of antennas, and to measure the transmission parameters of antenna; optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems; apparatus for signaling, namely, converters; apparatus for measuring, namely, antenna parameter measuring apparatus; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electronic combiners for connecting antennas and receivers, RF power amplifiers, and RF repeaters; distributed antenna systems (DAS); apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of, antennas, radio receivers, digital signal processors; telecommunication apparatus and equipment, namely, distributed antenna systems comprised of antennas, amplifiers receivers, digital signal processors; apparatus and equipment for wireless networks, cellular and wireless telephone communication, namely, distributed antenna systems, comprised of antennas, amplifiers receivers, digital signal processors; head-ends; remote optic units; amplifiers for wireless communications; base station interface unit; DAS management system; optical distribution unit; optical expansion unit; add-on remote unit (RU) in an optical fiber-based distributed antenna system (DAS); scientific apparatus and instruments; optical apparatus and instruments; measuring apparatus and instruments; signaling apparatus and instruments; apparatus and instruments for conducting electricity; apparatus and instruments for switching electricity; apparatus and instruments for transforming electricity; apparatus and instruments for accumulating electricity; apparatus and instruments for regulating electricity; apparatus and instruments for controlling electricity; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power

amplifiers, and radio frequency repeaters; apparatus for recording of sound; apparatus for recording of images; apparatus for transmission of sound; apparatus for transmission of images; apparatus for the transmission of data; apparatus for the reproduction of images; apparatus for the reproduction of sound; optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems; apparatus for measuring, namely, antenna parameter measuring apparatus; apparatus for signaling, namely, converters; magnetic data carriers, recording discs; compact discs; dvds; digital recording media; calculating machines; data processing equipment; computers; electricity measuring instruments; electric power distribution machines; electrical power control apparatus; rotary converters; phase modifiers; calibration devices; radio-frequency power meters; electronic telecommunications measuring and testing devices namely, a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter for use in evaluating, measuring, and analyzing radio frequency signal strength, direction, frequency, harmonic and bandwidth characteristics, as well as to assess the match characteristics of antennas, and to measure the transmission parameters of antennas.

Class 37

Installation, repair, and maintenance services for radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, monitors, sensors, tower top amplifiers, signal boosters, and analyzers; installation, repair, and maintenance services for distributed antenna systems (DAS); repair and maintenance services for apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure; installation, repair, and maintenance services for distributed antenna systems (DAS) products, namely, antennas, radio receivers, digital signal processors, head-ends, remote optic units, amplifiers for wireless communications, base station interface unit, DAS management system, optical distribution unit, optical expansion unit, and add on-remote; installation, repair, and maintenance services for radio frequency communication systems.

Class 38

Telecommunications; telecommunications services, namely, consulting; telecommunications consultancy services in the fields of wireless networks, wireless and cellular telecommunications; providing information in the field of communication services, namely, transmission of voice, audio, visual images and data by wireless networks, fibre optic networks, ethernet networks, and/or by wireless and cellular telephones; digital and analogue network telecommunication services; wireless telecommunications services, namely, providing wireless network services; telecommunications network services, namely, communication via fibre optic, ethernet or wireless networks; providing telecommunication connections to a global computer network or the Internet; providing telecommunication access services to a wireless network.

Class 40

Custom manufacture of custom radio frequency (RF) data capture, storage, and analysis products, namely, RF data recorders, RF signal generators, and software analysis tools to order and/or specification of others; custom manufacture of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, monitors, sensors, tower top amplifiers, signal boosters, analyzers, testing machines and instruments, power

distribution or control machines or apparatuses, and electric or magnetic meters and testers to the order and/or specification of others; custom manufacture of distributed antenna systems (DAS) to the order and/or specification of others; custom manufacture of apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure to the order and/or specification of others; custom manufacture of distributed antenna systems (DAS) products, namely, antennas, radio receivers, digital signal processors, head-ends, remote optic units, amplifiers for wireless communications, base station interface unit, DAS management system, optical distribution unit, optical expansion unit, and add on-remote to the order and/or specification of others.

Class 42

Design of radio frequency (RF) data capture, storage, and analysis products, namely, RF data recorders, RF signal generators, and software analysis tools for others; design of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, monitors, sensors, tower top amplifiers, signal boosters, analyzers, testing machines and instruments, power distribution or control machines or apparatuses, and electric or magnetic meters and testers to the order and/or specification of others; design of distributed antenna systems (DAS) to the order and/or specification of others; design of apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure to the order and/or specification of others; design of distributed antenna systems (DAS) products, namely, antennas, radio receivers, digital signal processors, head-ends, remote optic units, amplifiers for wireless communications, base station interface unit, DAS management system, optical distribution unit, optical expansion unit, and add on-remote to the order and/or specification of others; design of radio frequency (RF) data capture, storage, and analysis products, namely, RF data recorders, RF signal generators, and software analysis tools; design of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, monitors, sensors, tower top amplifiers, signal boosters, analyzers, testing machines and instruments, power distribution or control machines or apparatuses, and electric or magnetic meters and testers; design of distributed antenna systems (DAS); design of apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure; design of distributed antenna systems (DAS) products, namely, antennas, radio receivers, digital signal processors, head-ends, remote optic units, amplifiers for wireless communications, base station interface unit, DAS management system, optical distribution unit, optical expansion unit, and add on-remote; design and development of optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems; design and development of apparatuses for signaling, namely, converters; design and development of apparatuses for measuring, namely, antenna parameter measuring apparatuses; design and development of apparatuses and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers; design and development of radio frequency repeaters; design and development of computer hardware and software.

Computer programs for connecting remotely to computers or computer networks; software; wireless controllers to remotely monitor and control the function and status of other electrical, electronic, and mechanical devices or systems; software and applications for mobile devices; network operating system programs; privacy protection software; communication software for connecting computer network users; computer software for use in computer access control; computer programmes [programs], recorded; computer software for the processing of positioning data; mobile apps; character verification instruments; computer software for the dissemination of positioning data; computer software applications, downloadable; computer programmes relating to local area networks; application software for social networking services via internet; cards encoded to access computer software; cloud network monitoring software; computer programs for the enabling of access or entrance control; computer application software for mobile telephones; computer groupware; computer software for administration of local area networks; wireless controllers to remotely monitor and control the function and status of security systems; application software; computer application software for mobile phones; computer software for testing vulnerability in computers and computer networks; computer software for the monitoring of computer systems; downloadable computer security software; computer programs for accessing and using the internet; authentication software; communication software for connecting global computer networks; computer software; application software for cloud computing services; software to control building environmental, access and security systems; downloadable software; information technology and audiovisual equipment; computer software for mobile applications that enable interaction and interface between vehicles and mobile devices; computer application software; process controlling software; application software for wireless devices; computer software for the remote control of security apparatus; electronic control systems; computer software for wireless network communications; security software; downloadable cloud computing software; decoders; software for network and device security; communication software; computer software for wireless content delivery; computer firewall software; computer antivirus software; computer application software for use in implementing the internet of things [IoT]; computer software for application and database integration; computer software for the detection of threats to computer networks; computer software for the creation of firewalls; cloud computing software; computer application software for use with wearable computer devices; adaptive software; mobile software; computer software for authorising

access to data bases; firmware.

Class 38

Live transmissions accessible via home pages on the internet [webcam]; providing user access to the internet (services providers); transmission of electronic mail [e-mail data services]; communication of information by electronic means; e-mail data services; transmission of user-generated content via the internet; wireless broadband communication services; providing high speed access to computer and communication networks; communication services, namely, electronic transmission of data and documents among users of computers; transmission of data and information by computer and electronic communication means; transmission of data via the internet; communication via virtual private networks; provision of internet access services; provision of communication facilities for the interchange of data by electronic means; transmission of information via computers connected to the same telematic network; collection and delivery of messages by electronic mail; providing of access to telecommunication warehousing services; transmission of information by computer; telecommunications routing and junction services; wireless electronic transmission of images; providing multiple-user access to a global computer network; providing multiple use access to global computer information networks for the transfer and dissemination of a wide range of information; electronic network communications; electronic data interchange services; communication services over computer networks; transmission of information via wireless or cable networks; transfer of data by telecommunications; provision of telecommunication access and links to computer databases and to the internet; information transmission services via digital networks; providing multiple user dial-up and dedicated access to the internet; digital network telecommunications services; electronic transmission of data; providing telecommunications connections to the internet; data transmission services between networked computer systems; communication services provided electronically; transmission of data by electronic means; providing access to computer networks; computer communications for the transmission of information; on-line communication services; internet service provider services; provision of access to electronic messaging systems; communication of information by computer; worldwide computer network access services; providing access to information via the internet; providing telecommunications connections to databases; consultancy services relating to data communications; provision of wireless application protocol services including those utilising a secure communications channel; distribution of data or audio visual images via a global computer network or the internet; electrical data transmission over a global remote data processing network, including the internet; telecommunications services provided by means of optical fibre networks; provision of telecommunications access to databases and the internet; wire agency [communication] services; telecommunication services; communication network consultancy; data communication services accessible by password; provision of access to content, websites and portals; transmission of videos, movies, pictures, images, text, photos, games, user-generated content, audio content, and information via the internet; transmission of information via national and international networks; providing information relating to wireless communication; wireless transfer of data via the internet; transferring information and data via computer networks and the internet; local area networks (operation of -); providing user access to global computer networks; transmission of information by electronic communications networks; transfer of information and data via online services and the internet; communication by computer; provision of access to internet protocol tv; transmission of messages, data and content via the internet and other

communications networks; wireless electronic transmission of data; communications services for the exchange of data in electronic form; consulting services in the field of electronic communications; providing frame relay connectivity services for data transfer; transmission of digital files; provision of on-line communications services; transmission of information via computer networks; providing multiple-user access to a global computer information network; transmission of information on-line; telecommunications services provided via fiber optic, wireless and cable networks; digital transmission of data via the internet; electronic communications services; audio, video and multimedia broadcasting via the internet and other communications networks; electronic communications consultancy; communications by fibre optic networks; providing electronic telecommunication connections; telecommunications services, namely providing fiber optic network services; internet services providers (isps); transmission of information between computers and workstations; providing access to the internet and other communications networks; internet based telecommunication services; operating of electronic communications networks; on-line information services relating to telecommunications; communications services provided over the internet; provision of access to television via decoding apparatus; provision of electronic data links; wireless transfer of data via wireless application protocols; electronic transmission and retransmission of sounds, images, documents, messages and data; wireless communications services; transmission of data, audio, video and multimedia files, including downloadable files and files streamed over a global computer network; transmission of data via isdn lines; rental of access time to a database server; providing access to and leasing access time to computer networks; automatic transfer of digital data using telecommunications channels; rental of access time to global computer networks; high bit-rate data transmission services for telecommunication network operators; streaming of data; providing telecommunications connections to a global computer network or databases; providing access to data in computer networks; information services relating to electronic communication networks; secure e-mail services; communications via multinational telecommunication networks; access to content, websites and portals; providing access to electronic communications networks and electronic databases; transmission of written communications (electronic -); communication services between data banks; wireless transfer of data via digital mobile telephony; data communication services; provision of electronic communication links; communication services for the transmission of information by electronic means; telecommunications services between computer networks; communication services for the transmission of information; operating of electronic communications systems; transmission of information by electronic means; computer communications services for the transmission of information; providing access to electronic communications networks; data communication services accessible by access code; telecommunications services provided via the internet, intranet and extranet; mobile telecommunication network services; computer data transmission services; transmission of database information via telecommunications networks; communications by computer terminals; electronic transmission of instant messages and data; voice over internet protocol [voip] communication services; mobile communications services; remote transmission of data by means of telecommunications; providing access to global computer networks and other computer networks; internet access services; telecommunication of information (including web pages); providing computer access to communication networks; provision of central switching services for electronic communications networks; providing access to telecommunication networks; data communication by electronic means; provision of access to the internet for others; information services relating

to broadcasting; providing access to information via data networks; providing telecommunications connections to the internet or databases; computer communication services; wireless electronic transmission of facsimiles; telecommunications services for the distribution of data; transmission of data through the use of electronic image processing by telephone link; provision of access to an electronic on-line network for information retrieval; secure transmission of data, sound or images; providing access to a global computer network for the transfer and dissemination of information; providing access to a global computer information network; data transmission; telecommunication services provided via internet platforms and portals; secured data, sound and image transmission services; providing virtual private network (VPN) services; transmission of data or audio visual images via a global computer network or the internet; computer communication and internet access; transmission of digital information; provision of access to computer networks and the internet; data transmission and data broadcasting; advisory and consultancy services relating to wireless communications and wireless communications equipment; telematic [data communication] services; electronic transmission of information (services for the -); communications via a global computer network or the internet; transmission of audio and video content via computer networks; providing access to information on the internet; providing telecommunications connections to a global communication network or databases.

Class 41

Education and instruction; arranging of displays for educational purposes; conducting training seminars for clients; video library services; arranging and conducting of symposiums; provision of instruction relating to data processing; training services relating to data communications; publishing services (including electronic publishing services); organisation and holding of fairs for cultural or educational purposes; demonstration [for instructional purposes]; organisation of congresses and conferences for cultural and educational purposes; organisation of seminars relating to training; organisation of seminars relating to education; training in the operation of computer programs; training services provided via simulators; publishing services carried out by computerised means; providing on-line videos, not downloadable; education services relating to the application of computer systems; arranging and conducting conferences and seminars; arranging, conducting and organisation of conferences; training in the development of software systems; arrangement of conferences for educational purposes; training of personnel to ensure maximum security protection; provision of computer related training courses; training services relating to computer systems; arranging and conducting of training seminars; educational services relating to information technology; instructional services relating to data processing; providing online courses of instruction; electronic publication of educational and training guides; arranging of lectures; arranging and conducting educational conferences; fetes (organisation of -) for educational purposes; arranging of training courses; organisation of courses using distance learning methods; conducting of exhibitions for educational purposes; training in the use of data processing programs; organisation of conferences, exhibitions and competitions; workshops for educational purposes; training services relating to the installation of computer controlled test systems; training in the operation of computerised systems; arranging of workshops and seminars; conducting of seminars and congresses; electronic data processing training; training services relating to computer-aided testing; education services relating to the application of computer software; arranging, conducting and organisation of workshops; arranging,

conducting and organisation of symposiums; workshops for training purposes; providing online training seminars; arranging of conferences; training courses relating to computer software; provision of online training; organisation of seminars; arranging and conducting of seminars and workshops; arranging of exhibitions for educational purposes; seminars; organisation of webinars; audio-visual display presentation services for educational purposes; arranging of demonstrations for training purposes; training services relating to the maintenance of computer controlled test systems; education and training in the field of electronic data processing; training relating to data processing techniques; organisation of seminars and conferences; arranging of presentations for educational purposes; arranging, conducting and organisation of seminars; providing computer assisted courses of instruction; education services relating to computer systems; organisation of training courses; provision of education on-line from a computer database or via the internet or extranets; arrangement of conventions for educational purposes; training in the use and operation of data processors; audio-visual display presentations; arranging of displays for training purposes; arranging of demonstrations for educational purposes; conducting of educational events; arranging and conducting of seminars; arranging and conducting of lectures; arrangement of seminars for educational purposes; arranging, conducting and organisation of congresses; training services relating to the repair of computer controlled test systems; conducting of educational courses; arranging of exhibitions for training purposes; training services in the field of computer software development; arranging of conventions for training purposes; training in the operation of software systems; programming [scheduling of programs] on a global computer network.

Class 42

Engineering services relating to the design of electronic systems; monitoring of computer systems to detect breakdowns; computer system design; troubleshooting of computer hardware and software problems; design and development of networks; analysis and evaluation of product design; database design and development; technical services for the downloading of software; programming of operating software for accessing and using a cloud computing network; design services relating to the development of computerised information processing systems; design services relating to data transmission test tools; internet walled garden services; digital watermarking; development of computer firmware; computer diagnostic services; programming of internet security programs; design of data storage systems; design and development of firmware systems; administration of mail servers; consultancy and information services relating to computer system integration; troubleshooting in the nature of diagnosing problems with consumer electronics; backup services for computer hard drive data; product design and development; design services relating to data processing tools; consultancy in the field of security software; configuration of computer networks by software; development of data processing apparatus; computer security services for protection against illegal network access, computer software technical support services, and IT security services in the nature of computer virus protection and recovery of computer data; consultancy relating to the design and development of computer software programs; computer software consultancy; diagnosis of faults in computer software; design services relating to the creation of networks; data recovery services; design of software for multimedia data storing and recalling; creation of control programs for electric operation control and drive modules; design and development of software for importing and managing data; comparative analysis studies of the efficiency of computer systems; diagnosing computer hardware problems using software; design

and development of computer software for reading, transmitting and organising data; design and development of operating software for accessing and using a cloud computing network; consultancy services for designing information systems; design and development of testing and analysis methods; design of computer databases; design and development of telecommunications networks; development of computer software for use with computer-controlled switching systems; application service provider [asp], namely, hosting computer software applications of others; consultancy in the field of computer system integration; internet security consultancy; design of data processing apparatus; electronic data storage and data back-up services; design and development of electronic data security systems; design and development of software for database management; conducting of quality control tests; monitoring of computer systems for detecting unauthorized access or data breach; hiring of computer firmware; creation, updating and adapting of computer programs; programming of operating software for computer networks and servers; software design and development; professional consultancy relating to computer security; research in the field of data processing technology; design of hardware for processing and distribution of multimedia contents; information services relating to the development of computer networks; development of systems for the transmission of data; monitoring of network systems; comparative analysis studies of the performance of computer systems; design and development of computer firmware; installation of firmware; technological advisory services relating to data processing; computer security consultancy; designing computer software for controlling self-service terminals; development and testing of computing methods, algorithms and software; maintenance of software for internet access; computer system design and development; development of technologies for the protection of electronic networks; research relating to security; design and development of computer software for process control; maintenance of data processing software; remote server administration; software engineering; computer system analysis; development of computer systems; data security consultancy; computer firewall services; providing online information about the design and development of computer software, systems and networks; computer programming for data processing and communication systems; design of operating system software; programming of software for internet platforms; design and development of wireless computer networks; technological services and design relating thereto; analytical services relating to computers; design and development of antivirus software; provision of security services for computer networks, computer access and computerised transactions; computer virus protection services; testing of electronic data processing systems; advisory services relating to computer systems design; providing technical advice relating to computer security software; server administration; installation and maintenance of internet access software; data security services; configuration of computer firmware; rental of internet security programs; design and development of systems for data input, output, processing, display and storage; anti-spamming services [computer security services]; software creation; surveys (conducting -); computer services namely electronic data storage; computer programming services for electronic data security; electronic data back-up; providing information about the design and development of computer software, systems and networks; design of hardware for compression and decompression of multimedia contents; consumer product safety testing; design and development of data display systems; computer network design for others; consulting in the field of cloud computing networks and applications; computer programming services for data warehousing; development of systems for the processing of data; consumer product safety testing and consultation; data migration services; temporary electronic storage of information and data; computer

analysis; design and development of operating system software; configuration of computer systems and networks; information technology support services; maintenance of computer software relating to computer security and prevention of computer risks; design of hardware for multimedia data storing and recalling; analysis and evaluation of product development; data encryption and decoding services; technical data analysis services including computer security threat analysis for protecting data; integration of computer systems and networks; electronic data storage; data security services [firewalls]; development of computer software for use with programmable controllers; installation and maintenance of database software; design and testing of new products; design and development of data storage systems; design and development of electronic database software; design of information systems; design services for data processing systems; safety technological testing services; design of hardware for data and multimedia content conversion from and to different protocols; software customisation services; consultancy in the field of computer system analysis; administration of user rights in computer networks; design and development of wireless data transmission apparatus; design and development of data processing apparatus; creation of control programs for automated measurement, assembly, adjustment, and related visualisation; online data storage; design and development of data entry systems; design and development of data processing systems; writing of control programs; creation, maintenance and adaptation of software; development of software for secure network operations; computer security services for protection against illegal network access; technological services for the downloading of digital data; development of computer based networks; installation and actualisation of programs for data processing; computer network configuration services; computer system monitoring services; design services relating to integrated circuits; software development, programming and implementation; engineering services relating to automatic data processing; off-site data backup; monitoring of computer systems by remote access; computer security services in the nature of administering digital certificates; design and development of wireless data transmission apparatus, instruments and equipment; cloud computing; design and development of internet security programs; computer network services; data back-up services; updating of memory banks of computer systems; engineering consultancy relating to data processing; computer security threat analysis for protecting data; design and development of operating software for computer networks and servers; design services relating to data processing test tools; computer security system monitoring services; development of systems for the storage of data; consultancy services relating to quality control; configuration of computer software; design, development and implementation of software; updating of computer software relating to computer security and prevention of computer risks.

Class 45

On-line social networking services; online social networking services accessible by means of downloadable mobile applications; monitoring of security systems; providing authentication of personal identification information [identification verification services]; licensing of databases; licensing of computer software [legal services]; electronic monitoring services for security purposes; safety, security and enforcement services; advisory services relating to consumers rights [legal advice]; security assessment of risks; legal information services relating to consumer rights; identity validation services; licensing [legal services] in the framework of software publishing; information services relating to safety; licensing of technology; consultancy relating to computer software licensing; licensing of wireless communication system; computer licensing.
