REGISTRATION AS ACCOUNT HOLDER TO E-FILE AND PAY BY GIRO**

This Practice Direction is issued by the Registrar under Rule 78B(1) of the Trade Marks Rules, to specify the procedure for applying to the Registrar to be registered as an account holder.

This Practice Direction will come into effect on 1 January 2006.

Any person who wishes to use eTrademarks to effect a transaction and make payment by GIRO must register with the Intellectual Property Office of Singapore (IPOS) as an Account Holder. Approval is at the sole discretion of IPOS. Upon approval, an eTrademarks account will be created in the name of the person and the person will receive a User ID and Password.

To register, access IPOS address at <http://www.ipos.gov.sg> and [download the eTrademarks Account Holder Registration Form](#).

The person may appoint an Administrator to administer and manage his eTrademarks Account through the eTrademarks "[Maintenance of Authorised Representatives](#)" service.

The responsibilities of the Administrator are as follows:

- appointment of one or more Representatives to access eTrademarks and make payment by GIRO on behalf of the Account Holder;
- updating of the particulars of the Representatives; and
- removal of any Representative's rights to access eTrademarks and make payment by GIRO on behalf of the Account Holder.

These responsibilities are to be conducted through the eTrademarks "Maintenance of Authorised Representatives" service.

Please note that all Authorized Representatives must be CPF account holders with SingPass. The Authorized Representatives are required to sign in using their SingPass to ensure security for GIRO deductions for the online transactions. If the person does not have a GIRO account with IPOS, please complete the [GIRO Application Form](#) and submit it to IPOS.

The completed eTrademarks Account Holder Registration Form and GIRO Application Form should be mailed or couriered to the Intellectual Property Office of Singapore with the address 51 Bras Basah Road #04-01 Plaza By The Park Singapore 189554 and attentioned to Mrs Ang-Ong Bee Lian. data transmitters; radar antennas, satellite transmitters and receivers, power converters and transponders; electronic equipment for civil and military purposes; equipment for electric and electronic tracking, capture and monitoring, and for determining and locating geographical locations; equipment for radar image-based airborne ground monitoring and surveillance, and systems consisting thereof; steering and navigation equipment and systems consisting thereof; fixed or portable computers, telecommunications apparatus and equipment; computer servers, servers and data storage apparatus, computer workstations, modems; wireless and satellite-based hardware and software for on-board data networks; multi-platform interfaces, including hardware and software therefor; equipment for processing geographical information and systems consisting thereof, in particular satellite systems, GPS; apparatus and equipment for capturing, compressing, transmission, analysis and reproduction of satellite images and aerial photographs; equipment for transmission of images through digital radio and systems consisting thereof; hardware and software (recorded/stored programs) for determining the position, observation and monitoring of specific geographical locations; monitoring and control hardware and software (recorded/stored programs); position determination, observation and monitoring equipment, and systems consisting thereof, for specific geographical locations; storage media for data and user terminals (computer terminals) for position determination, navigation, for navigation databases, for radar or satellite navigation, radio navigation and for subsequent applications; mapping information (hardware and software), safety and emergency equipment, instruments and apparatus, research (other than for medical purposes) and life-saving equipment, instruments and apparatus; electric or electronic instruments and apparatus for reception, processing and/or transmission of navigation signals and elements and components therefor; hardware and software for telecommunications and radio networks, hardware and software for digital telecommunications networks; electric apparatus (hardware and software) for providing telecommunications and radio networks through wire, cable, optical fibre, radio or satellite; apparatus for communicating, transmission and reception of speech, images, data and multimedia data; network applications, in particular apparatus for computer networks, and systems consisting thereof for internet networks; devices and equipment and apparatus consisting thereof for the transmission of messages, information, data, sound and images through waves, cable, optical fibre, telephone, satellite, terminals, telecommunications networks and computer networks; telecommunications and desktop automation terminals for military applications; software programs in a computer-readable format, provided on magnetic or optical media or in a downloadable format for use with the aforesaid goods; software programs for secure communications and for facilitating the authentication, examination, recording and analysis of business relations and transactions using a system of controlled access rights and notifications, equipment and stations consisting thereof for satellite telecommunications, in particular in air vehicles; software (recorded/stored programs) for communications and radio communications networks for the transmission of data through wire, cable, optical fibre, radio or satellite; software (recorded/stored programs) for encryption and decryption; simulation, model creation, testing and experimental software; servers for modelling, simulating, testing and experiments in connection with civil and military operations; software for planning, capturing, processing and disseminating intelligence information and data, solely in the fields of secret service information and geography, for defense and security purposes; software (recorded/stored programs) for providing access to an electronic messaging service; transmission security software for intranet and internet data terminals, operating stations and terminals for presenting information in graphic and text form; equipment for the secure processing of information; secure telecommunications

devices and equipment consisting thereof; software for synchronizing secure data between a remote data station or a remote device and a fixed or remote data station or a device of this kind; electric and electronic instruments and equipment (audio and visual apparatus) for displaying reports, analysis and measurement results, in particular in the form of graphs, tables and charts, being the outcome of analyzing and monitoring the performance of navigation signals and/or data; computer software (recorded/stored programs) for examining and identifying space segments in two or three dimensions; sensors and communications apparatus and equipment; industrial geoproduction systems, consisting of software and hardware for a digital process chain for generating satellite, aerial or terrestrial images and 3D data; software for the field of satellite imaging and data; data processing equipment, in particular using satellites; computer software for processing and analyzing photographs, including aerial and satellite photographs; computer software for stereographic projections, digital terrain models, orthophotos and thematic maps; database management software, including for stereographic reproduction, for storing, preparing, processing and analyzing drawings, depictions, photographs, maps, aerial and satellite images and surface models; apparatus for processing, analysis, reproduction and storage with the aid of images generated by satellites; computers and computer software for industrial purposes, namely for the fire service and the government, in connection with operational systems, client management, installation management systems, geographical information systems, CAD systems, real-time display systems and mobile systems, and the configuration thereof, for use with suitable computer hardware; database management software, in particular for stereographic reproduction, for storing, creating, processing and analyzing drawings, images, photographs, graphic representations, aerial and satellite images and surface models; data carriers for computer software (computer programs), computer files and software packages, for stereographic reproduction and for storing, creating, processing and analyzing surface models, images and photographs; satellites; satellite navigation systems; satellites for scientific purposes, in particular satellites for terrestrial observation and radar satellites; remote control apparatus; aerial imaging sensors; broadcasting systems; electric and electronic apparatus for generating digital topographical models; databases containing digital topographical models (software); software packages for processing and evaluating photographs, including aerial and satellite images; software packages for stereographic reproduction, for creating digital terrain models, for orthophotos and for thematic maps; computer files and software packages featuring geographical, geological, cartographic and topographical content; computer files and software packages featuring terrain representations and digital maps; satellites; satellite communications apparatus and instruments; terminals for satellite communications; communications apparatus and instruments; telephone apparatus, teleprinters and facsimile transmission machines; data processing and transmission apparatus and instruments; computer terminals including keyboards, visual display units and printers; communications and transmission systems, apparatus, instruments and computer software and peripheral devices for providing and managing news, information about weather, sporting events and other information applications, including the internet; systems consisting of computer hardware and software, communications and transmission apparatus and instruments for facilitating real-time communications between users and providers via the internet; computer software for facilitating and for operating business systems, including business systems via the internet and the world wide web; computer software for simulating and analyzing satellite communications systems; computer software programs for operating and managing satellite communications systems; television, audiovisual, video, sound recording and sound reproduction

apparatus and instruments; apparatus and instruments for storing, recording, reproduction, retrieval, reading and transmission of data, images, sound and other information; apparatus and instruments for broadcasting, transmission, reception, processing, duplicating, encoding and decoding of digital and satellite signals; parts and components for all the aforesaid goods; daytime and night-time sights and attachments and targeting apparatus for observation purposes; electronic apparatus and software for target recognition, target identification and target tracking, and for fire control and ballistic correction; sighting apparatus with gyroscopically stabilized biaxial sighting lines, photogrammetric film cameras; electrooptical surveillance and observation apparatus and systems, and software therefor, in particular evaluation and display software for use on land, on water, in the air and in space; optical and optoelectronic components and assemblies for controlling self-propelled weapons carriers for use in the air, on water and on land; optical and optoelectronic components for controlling rockets; periscope systems for use in air, water and land vehicles, submarine periscopes; optoelectronic mast systems; optoelectronic mast systems for submarines, including control consoles, and software required therefor, in particular image processing software; apparatus for the line of sight direction stabilization on the basis of control signals from mechanical, optical or fibre-optic gyroscopes, accelerometers or from image evaluation algorithms; periscopes with direction-stabilized line of sight for use on land, on water and in the air; gyroscopically and inertially stabilized or scene-based stabilized commander's periscopes and electrooptical observation, monitoring and targeting systems, and driver vision systems, driver assistance systems, situational awareness systems for armored vehicles; optoelectronic sensors for air defense systems featuring TV assemblies, thermal imaging apparatus, laser rangefinding apparatus and laser target illuminators (laser designators); laser rangefinders, laser target illuminators and laser warning systems; laser altimeters, in particular including for use in space; electrooptical surveillance cameras and vision equipment, and stabilized multi-sensor platforms for manned and unmanned air vehicles, land vehicles and water vehicles; tactical and strategic observation, monitoring and surveillance apparatus with multi-sensor equipment for air vehicles; missile warning sensors for use on water, on land and in the air; laser warning systems; thermal imaging apparatus and systems and daytime vision apparatus and systems for use on land, on water and in the air; imaging electrooptical apparatus and systems in the near infrared (NIR) and short-wave infrared (SWIR) areas for use on land, on water and in the air; thermal imaging apparatus and imaging apparatus in the near infrared (NIR) and short-wave infrared (SWIR) areas for aircraft, helicopters, battle tanks, armored personnel carriers, armored scout vehicles and other armored vehicles and ships; gyroscopically stabilized commander's periscopes with integrated thermal imaging apparatus; submarine periscopes and optoelectronic mast systems with integrated laser rangefinding, laser target illuminators and integrated thermal imaging apparatus and integrated line of sight direction stabilization, in particular with an integrated image processing platform and high-level algorithms, including image fusion and tracking; electrooptical observation and monitoring systems, stationary and mobile, for applications on land, on water, in the air and in space; software and programs for operating and controlling apparatus and systems, and for data and image processing; sensors for position regulation and orbit control, in particular for satellites, optical instruments for terrestrial observation and for observing other natural or technical objects in space, star and solar sensors; rendezvous and docking sensors for aerospace, multispectral imaging apparatus; focal plane devices (optics); electronic apparatus and computers for aerospace; inertial and gyro sensors; power supply apparatus; solar installations; apparatus for recording,

transmission, processing or reproduction of sound or images, and software therefor for controlling, recording, transmission, evaluation and processing of images or data; machine-readable data carriers; microwave switches, DC converters, laser transmitters and receivers, electronic amplifiers, power amplifiers; satellite transmitters and receivers for analogue and digital signals; data processing apparatus and computers, and their peripheral devices, disk drives, scanners and screens therefor, and installations consisting of data processing apparatus and computers; keyboards and printers; computer programs for providing real-time, multimedia, multi-sensor and multi-user communications via computer networks; magnetic data carriers; communications systems and systems for receiving and reproducing terrestrial signals and satellite signals, consisting of electric and electronic apparatus and instruments for communications, keyboards and printers; computer programs for providing real-time, multimedia, multi-sensor and multi-user communications via computer networks; magnetic data carriers; laser communications terminals; hardware and software for sensor data fusion, including databases and the object world; hardware and software for augmented reality and virtual reality applications, including presentation media, monitors, tablets and smartglasses; hardware and software for displaying maps and positions; jammers; signal generators; direction finding and position finding apparatus for ships, land vehicles, aircraft, helicopters and drones; electromagnetic, ultraviolet and infrared-based self-defense systems for ships, land vehicles, aircraft and helicopters; apparatus for guided and directional infrared counter measures (DIRCM); directional IR and lasers (DIRCM) for defending against missile attacks on airborne platforms; databases for identifying electronic threats; apparatus and systems for signal encryption and decryption, and test apparatus therefor; IFF (identification friend or foe) receivers (transponders) on airborne platforms; IFF query systems (secondary radars) on ships and land-based platforms; electric, electronic and optical apparatus and systems consisting thereof for assistance in conditions of restricted visibility and for detecting enemy fire; antennas, transmitters and receivers for wide-band data transmission; hardware and software for mission planning and evaluation for airborne platforms; hardware and software for capturing maintenance and diagnostic data from airborne platforms; information technology and audiovisual apparatus; communications equipment; antennas and antennas installations being communications apparatus; apparatus for line of sight stabilization; Satcom antennas, data loggers; apparatus for recording conversations; detectors, rangefinders, rangefinding apparatus, binoculars, spyglasses, telescopes, filters (photography), photovoltaic cells, computer programs, global positioning system (GPS) apparatus, downloadable computer programs, calipers, directional compasses, correcting lenses (optics), lasers (not for medical purposes), close-up lenses, surveyors' levels, lenses, instruments containing eyepieces, eyepieces, optical apparatus, instruments and equipment, periscopes, prisms, transmitters of electronic signals, stands for photographic apparatus and cameras, telescopes, surveying apparatus, sighting telescopes; electronic and optical spyholes for doors and peepholes (magnifying lenses) for doors; helmet target tracking systems and helmet display systems for use in air, land and water vehicles; multispectral landing aids (optical apparatus and instruments) for helicopters; laser target illumination systems for combat aircraft; sensor platforms for military air vehicles equipped with electrooptical and radar sensors; driver vision apparatus; boresight equipment, namely optical and electrooptical adjustment equipment, residual light intensifiers; storage bags and cases for the aforesaid goods, and software for all the aforesaid goods; systems consisting of monitoring instruments and apparatus to be fitted on fences; laser rangefinders; apparatus for target marking (targeting pods); UCM (uncooled modules) being night vision attachments, including software and map/position

display; computer software for encryption, electronic encryption apparatus.

Class 12

Vehicles; apparatus for locomotion by land, air or water; helicopters, rotorcraft; drones; vehicles, including military vehicles, for transport; side cars; pick-ups; vehicles and side cars for signal and radio surveillance, location and jamming; jamming and surveillance vehicles; spare parts and accessories for all the aforesaid goods; air vehicles; space vehicles; transport devices adapted for satellites, telecommunications transmission satellites, earth and space observation systems, consisting primarily of space stations equipped with optical measuring and signalling apparatus and instruments; space transport systems, consisting primarily of space vehicles with equipment for payload retention; vehicles, and parts and accessories therefor; masts for ships; roof boxes; vehicles for electronic warfare.

Class 13

Weapons; ammunition and projectiles; explosives; fireworks; firearms, small arms, guns, and parts for the aforesaid goods; directional infrared and laser counter measures (DIRCM) for defense against missile attacks on airborne platforms; sighting devices; firing control installations; smoke projectiles; seeker heads, weapons and apparatus for self-defense; sights, other than telescopic sights, for artillery; sights, other than telescopic sights, for firearms; storage bags and cases for the aforesaid goods; daytime and night-time sights and attachments and target apparatus for firearms.

Class 37

Building construction; installation, repair and maintenance of control stations for mission preparation, mission execution and mission follow-up for manned and unmanned air vehicles; installation and maintenance of data processing apparatus and computer hardware; consultancy in connection with all the aforesaid services; adjustment, commissioning, repair and maintenance services for the restoration of electrooptical apparatus; maintenance and repair of electrooptical apparatus and installations for others; rental of tools for building and construction purposes; installation and maintenance of vehicles and installations and systems for electronic warfare; installation and maintenance of radar systems on vehicles, ships and fixed installations; installation, cleaning, repair and maintenance of apparatus for electronic warfare and for radar systems; repair, maintenance and installation in connection with all of the following goods: scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments, optical instruments and enhancers and parts therefor, microscopes, magnifying glasses and reading glasses, telescopes, spotting scopes, binoculars and spyglasses, spectacles and loupes, safety eyewear, spectacle lenses, thermal imaging apparatus, night-vision apparatus, thermal image recorders for night-vision purposes, night-vision goggles, telescopes, sighting telescopes, interference and polarization filters, photographic recording, projecting and magnifying lenses, image intensifiers, image intensifier tubes, lens hoods, condensers, mirrors, prisms, objective and ocular lenses, observation eyepieces, photogrammetric cameras, digital cameras, digital cameras with an integrated laser rangefinder and a ballistics information system, measuring instruments, measuring apparatus and parts therefor, in particular for geodetic and nautical purposes, rangefinders, laser rangefinders, optical sights for firearms and astronomical telescopes, reflex

sights, daytime and night-time sights, precision gauges, optical parts for headlights.

Class 38

Telecommunications; operation and rental of telecommunications equipment, in particular for radio and television; collection and delivery of messages by electronic mail, delivery of messages by electronic media; providing of mailboxes; communications, transmission of images and sounds, in particular via computer; transmission of information and data via online services and the internet for the compilation, delivery and dissemination of messages, rental of telecommunications apparatus; information in the field of telecommunications; communications by computer terminals; electronic display services (telecommunications); providing of access to connections to a global data network via telecommunications services; providing of access to electronic databases and information research centres, including for drawings, images, photographs, graphic representations, aerial and satellite images, surface models; communications in connection with data transmission on computer networks; providing of access to databases via the internet; (computerized) transmission of data and images, including for global communications networks (the internet) or for private or restricted access networks (intranets); providing of user access to service providers on a global computer network; computerized transmission of messages and images, in particular high and ultra-high resolution images, and geographical information; satellite-assisted transmission of messages and images, in particular high and ultra-high resolution images, and geographical information; providing of access to databases, in particular image databases containing images generated with the aid of satellites or antennas, transmission of data sets containing global digital topographical models and geographical information; providing of access to databases and information research centres, including for aerial and satellite images, geographical, geological, cartographic and topographical data, terrain displays and digital maps; communication services; satellite communications; telecommunication services; speech and data transmission; telex and facsimile communication services; providing of access to communications information, drafting of reports and consultancy in connection with the aforesaid services, included in this class; message collection and transmission; maritime radio via radio satellite (radio services); remote transmission of information (including websites), computer programs and other data; providing of user access to the internet and to other online systems; communications and transmission via the internet; communication services for facilitating real-time online communications between internet users and content providers; broadcasting and transmission of data, images, sound, graphics and other information; computerized message and image transmission; electronic mail services; digital and satellite transmission; leasing and sub-leasing of broadband and uplink connection services; consultancy and information in connection with the aforesaid services; information services in connection with telecommunications and satellite communications; on-board wireless and satellite data networks, namely transmission of data between linked computer systems; communications by computer networks; information in connection with the provision of access to electronic messaging systems; providing of access and leasing of access time to computers.

Class 41

Education; provision of training; entertainment; sporting and cultural activities; providing training regarding the operation of control stations for mission preparation, mission execution and mission follow-up for manned and unmanned air vehicles, provision of training, and training; information about educational or entertainment events; film production; digital

imaging (photo editing); publication of books, arranging and conducting of colloquiums in the field of the use of satellite data and products derived therefrom; arranging and conducting of conferences in the field of the use of satellite data and products derived therefrom; arranging and conducting of meetings in the field of the use of satellite data and products derived therefrom; arranging and conducting of seminars in the field of the use of satellite data and products derived therefrom; photography, organization of exhibitions for cultural or educational purposes; photographic reporting; publication of texts, other than for advertising purposes, in the field of the use of satellite data and products derived therefrom; electronic publication of books and periodicals in the field of the use of satellite data and products derived therefrom; publication of books; rental of books; film production; rental of motion pictures; rental of sound recordings; arranging and conducting of colloquiums, conferences or congresses; organization and conducting of exhibitions for cultural or educational purposes; electronic publication of books and magazines online; instruction, providing of training and training information in connection with satellite communications and telecommunications, included in this class; providing of online publications from databases on the internet, and entertainment services; electronic publishing; consultancy and information in connection with the aforesaid services; information in connection with sporting events; providing of training regarding the operation of control stations.

Class 42

Scientific and technological services and research and design relating thereto; industrial analysis and research services; design and development of computer hardware and software; technological consultancy in connection with electrooptical apparatus, monitoring apparatus and monitoring installations; creation (design) of electrooptical apparatus, monitoring apparatus and monitoring installations; setting up (calibration) of electrooptical apparatus, monitoring apparatus and monitoring installations; design of ballistic information systems; scientific and technological services and scientific and technological consultancy in connection with all of the following goods: scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments, optical instruments and enhancers and parts therefor, microscopes, magnifying glasses and reading glasses, telescopes, spotting scopes, binoculars and spyglasses, spectacles and loupes, safety eyewear, spectacle lenses, thermal imaging apparatus, night-vision apparatus, thermal image recorders for night-vision purposes, night-vision goggles, telescopes, sighting telescopes, interference and polarization filters, photographic recording, projecting and magnifying lenses, image intensifiers, image intensifier tubes, lens hoods, condensers, mirrors, prisms, objective and ocular lenses, observation eyepieces, photogrammetric cameras, digital cameras, digital cameras with an integrated laser rangefinder and a ballistics information system, measuring instruments, measuring apparatus and parts therefor, in particular for geodetic and nautical purposes, rangefinders, laser rangefinders, optical sights for firearms and astronomical telescopes, reflex sights, daytime and night-time sights, precision gauges, optical parts for headlights; testing, checking, analysis and/or monitoring of signals in connection with vehicles, apparatus for locomotion by land, air or water, in particular helicopters, rotorcraft and drones; development, optimization, checking and trialling of the performance of methods, algorithms, processing and software modules for the computerized processing of signals in connection with vehicles, apparatus for locomotion by land, air or water, in particular helicopters, rotorcraft and drones; testing, trialling, analysis and/or monitoring of algorithms for data generation systems; engineering in the field of

monitoring and checking performance parameters in connection with vehicles, apparatus for locomotion by land, air or water, in particular helicopters, rotorcraft and drones; engineering in the field of signal testing; engineering in the field of developing algorithms and methods for the computerized processing of signals; scientific appraisals and assessments for creating and/or presenting results, in particular in the form of research reports, graphs, tables and charts; scientific and technological services and research and design relating thereto provided by engineers in the fields of data processing, data analysis and data conversion; development (design, preparation) and updating of programs for computer bases; research and development and calibration of telecommunications networks and radio communications networks in connection with vehicles, apparatus for locomotion by land, air or water, in particular helicopters, rotorcraft and drones; design, development and updating (for others) of software (recorded programs) for managing, administering, designing, configuring and securing local or remote communications networks for the transmission of speech, images, data or multimedia data in connection with vehicles, apparatus for locomotion by land, air or water, in particular helicopters, rotorcraft and drones; design, preparation and updating (for others) of software (recorded programs) for designing, preparing, managing and securing access to computer networks and IP (internet protocol) networks; design and development of control stations, comprising application-specific computer software, computer hardware and communications apparatus for mission preparation, mission execution and mission follow-up for manned and unmanned air vehicles; design and development of application-specific computer software and computer hardware for use in control stations for mission preparation, mission execution and mission follow-up for manned and unmanned air vehicles; design and development of computer hardware and software for radar apparatus; computer aided scientific analysis services for evaluation of aerial or satellite images (monochromatic or multispectral); physics (research), engineering or information technology services in connection with computerized services regarding the processing of aerial or satellite images (monochromatic or multispectral), development of databases of global digital topographical models; scientific and technological services, namely providing of terrestrial observation data generated with the aid of satellites, precise relief measurement, precise weather measurements, measurement physics (characterization of objects observed on the ground as a function of their spectral signatures, atmospheric influence, geometric and radiometric model depictions using on-board cameras); scientific and research applications, studies and projects with the purpose of developing and validating geodata in connection with digital topographical models; research and design in the field of satellite images, and exploitation of corresponding data, namely development of methods for processing corresponding data, namely development of methods for processing data from observation satellites, preparation of processing protocols for using satellite data to generate geographical information, and engineering in the field of programming aerial images from a network of observation satellites; industrial analysis and research services in the fields of displaying images through satellite and using the data in connection therewith; industrial analysis and research services based on digital topographical models for applications in the field of processing and orthorectification of other geodata, mapping, creation of models of geophysical processes on earth, calculation of wave propagation in the field of telecommunications, and logistical and safety applications in transport (aerospace, vehicles); design and development of computers and software; recovery of computer databases; environmental protection consultancy; technological consultancy and/or computer consultancy featuring EDP regarding the planning of crisis interventions; technological consultancy and/or computer consultancy featuring EDP regarding defense and security policy

operations; conversion of data and computer programs (other than physical conversion); design of computer software; technical project studies; field measurement; surveying of oil fields; geological surveys; geological research; analysis for crude oil and natural gas production; land surveying; conducting crude oil exploration; urban planning; computer programming; creation and maintenance of websites for others; geological prospecting; research services in the field of cartographic products, land coverage maps and land registries; technical information and research services provided by engineers in connection with the presentation of images generated with the aid of satellites, in particular geographical images, geographical maps and topographical base maps consisting of images generated with the aid of satellites or antennas; technical information and research services provided by engineers in connection with the following products: images generated with the aid of satellites, in particular geographical images, geographical maps and topographical base maps consisting of images generated with the aid of satellites or antennas, design and development of computer software in the field of cartography; technical consultancy in the field of cartography; technological processing and evaluation of aerial or satellite images (monochromatic or multispectral) being a service for research institutes or for others; creation of maps and terrain sections, propagation localization of electromagnetic waves, in digital form; technological processing and analysis in connection with stereoscopic images; computer programming for industrial purposes, namely for the fire service, the police and the government, in connection with operational systems, client management, installation management systems, geographical information systems, CAD systems, real-time display systems and mobile systems, and the configuration thereof, for use with suitable computer hardware; design and development of systems, apparatus and instruments for providing satellite communications and telecommunications; design and development of computer software and systems, computer infrastructures for operating satellite communications and telecommunications equipment, and for managing satellite communications and telecommunications; design and development of computer software, computer systems, computer infrastructures, communications and transmission apparatus, instruments, systems and infrastructures, all for use in connection with news, information about weather, sporting events, business services and other information applications and internet applications; design and development of databases and user interfaces for managing interactive content; engineering project management services, computer project management in the field of EDP and IT project management for information and internet applications; technical support, namely technological consultancy in connection with the operation, management and maintenance of satellite communications and telecommunications apparatus and systems; technical support, namely technological consultancy in connection with the operation, management and maintenance of satellite communications and telecommunications; technical support, namely technological consultancy in connection with the operation, management and maintenance of information and internet application systems; technical support in connection with computer software for information and internet applications; computer design services; programming; rental of computer hardware, computer software and computer peripheral devices; maintenance and updating of computer software; creation and maintenance of websites; information and consultancy in connection with all the aforesaid; weather information services; encryption, decryption and authentication of information, messages and data; computer programming; updating and maintenance of databases; rental of computer apparatus and computer software; technical design and technical planning of telecommunications equipment, IT services for apparatus for electronic warfare and for radar systems; rental of measuring apparatus for testing

the environment and measuring electromagnetic compatibility (EMC measurements) and services relating thereto; digital imaging (IT services); digital imaging (graphics); development of online publications from internet databases.
