data storage media containing flight and navigation instructions for helicopters, rotorcraft and drones; optical or infrared detection equipment and apparatus; thermal imagers; observation instruments and systems comprising thereof; infrared surveillance and tracking equipment and systems comprising thereof, in especially location systems; secure observation and reconnaissance equipment and systems comprising thereof; heliborne surveillance equipment and systems comprising thereof; airborne surveillance equipment and systems comprising thereof; day/night surveillance equipment and systems comprising thereof; high precision optical devices; encoders or decoders, digital sound and image data transmitters; telemetry, remote control, radio altimetry and proximity and approach apparatus and instruments for use in the field of aeronautics and space and in aeronautics and space instruments; detection apparatus and instruments, radars, lidars, electro-optica sensors; computer security systems; radar antennas, satellite transmitters and receiver, converters and transponders; electronic equipment for civilian and military use; electrical and electronic tracking, detection and monitoring and geo-location and geo-localization equipment; electrical and electronic equipment for radio location and radio navigation; radar imagery-based airborne ground surveillance and reconnaissance equipment and systems comprising thereof; sensors for aircrafts without crew; instruments for maritime, land, air and space navigation; guidance and navigation equipment and systems comprising thereof, fixed or portable computer, electronic and telecommunication apparatus and equipment included in this Class, computer servers, servers and data storage devices, computer workstations, modems; computers; memories (data storage); display screens; wireless and satellite-based hardware and software for onboard data networks; multi-platform interfaces, including the hardware and software therefor; media for the storage of data and user terminals for the determination of position, mapping information, course guidance for land, aerial, marine or submarine vehicles; geographic information processing equipment and systems comprising thereof, especially satellite systems, gps; apparatus and equipment for the acquisition, compression, transmission, analysis and restoration of satellite images and aerial photographs; image transmission equipment by digital radio link and systems comprising thereof; optical components and parts; spatial optic apparatus, equipment and instruments; optical apparatus, equipment and instruments for aerial reconnaissance aircraft; guidance, radio-control and automatic pilot equipment and apparatus; hardware and software (recorded/stored programs) for position determination, monitoring and surveillance in specific geographical areas; monitoring and control hardware and software (recorded/stored programs), position determination, monitoring and surveillance equipment and systems comprising thereof in specific geographical areas, media for the storage of data and user terminals (computer terminals) for determination of position, navigation, navigation databases, radar or satellite navigation, radio navigation and for the following applications: mapping information, security and emergency equipment, instruments and apparatus, research (other than for medical use) and lifesaving equipment, instruments and apparatus; media for the storage of data and user terminals for the determination of position, mapping information, route/course guidance for land and airborne vehicles; electrical or electronic instruments and apparatus for the reception, processing and/or transmission of navigation signals and their elements and component parts; electric and electronic apparatus and instruments for the review, analysis and performance monitoring of navigation data and navigation signals and their parts and components; electric and electronic apparatus and instruments for the measurement, verification, checking, testing and monitoring of positions and the associated navigation data; computer software (recorded/stored programs) for the measurement, verification, checking, testing and monitoring of positions and the associated navigation data; satellite localization and satellite navigation appliances and equipment comprising them; telecommunication and radio communication apparatus, hardware and software for telecommunication and radio communication networks, hardware and software for digital telecommunication networks; communication and radio communication networks by wire, cable, fiber optics, radio or satellite; servers of call centers, multiplexers, demultiplexers, electrical and electronic apparatus and instruments for controlling and administering networks; receivers

CLASS : 9—cont.

(telecommunications), electronic and radioelectric signal transmission apparatus; satellites for scientific use and satellites designed to receive and transmit radio electric signals; computer terminals, communication terminals, fixed or mobile computer terminals or communication terminals; apparatus for communicating, transmitting, receiving voice, image, data and multimedia data; network appliances, in especially gateways, and systems comprising thereof for internet gateways; items of basic equipment for and access interfaces to internet protocol (ip) networks; appliances and equipment comprising thereof and apparatus for the transmission of messages, information, data, sound and images over the airwaves, via cable, via fiber optics, via telephone, via satellite, via terminals, via telecommunication networks and via computer networks; telecommunications and desktop automation terminals for military applications; telephony apparatus, mobile telephones, cordless telephones, radio paging apparatus and equipment, faxes, pdas (personal digital assistants), mobile devices for internet access, spare parts for the abovementioned goods to allow communications and to conduct secure transactions and online business; software programs in a format exploitable by computer provided on magnetic or optical media or in a downloadable format to be used with the aforementioned products, software programs for secure communications and enabling one to authenticate, check, record and analyze business relationships and transactions via a system of controlled access rights and notifications, satellite telecommunications equipment and satellite telecommunications station comprising thereof, especially in aircraft; software, software (recorded/stored programs) for communication and radio communication networks for transmission of data via wire, cable, via fiber optics, via radio or via satellite; software, software (recorded/stored programs) for the management, administration, architecture management, configuration and protection of local or remote networks for voice, image and data; apparatus and software (recorded/stored programs) for securing of access to computer networks and to internet protocol (ip) networks; software (recorded/stored programs) for encryption and decryption; software (recorded/stored programs) for encoding and decoding; software (recorded/stored programs) for the architecture, administration and securing of access to computer networks and to internet protocol (ip) networks; simulation, modeling, testing and experimentation software; servers for modeling simulation, testing and experimentation of civilian and military operations; software (recorded/stored programs) for computers for the development, optimization and performance analysis of methods and algorithms as well as processors (central processing units) and software modules for the processing and/or generation of navigation signals and/or data pertaining to navigation or cartography; software designed to perform the functions of planning, acquisition, processing and dissemination of intelligence information and data exclusively in the areas of intelligence and geography, for the purpose of defense and safety, software for digital radio networks giving the user access to voice services and data such as group communications in relay mode, individual calls, short messages and localization and transmission of data, all these products for digital radio networks; software (recorded/stored programs) for the provision of access to an electronic messaging service; transaction security software for intranet and internet data terminals, operating stations and terminals for presenting information graphically and textually; secure information processing equipment; computer software; secure telecommunications appliances and equipment comprising thereof; electronic handheld devices for the wireless receipt and/or transmission of secure data, especially messages, and electrical and electronic apparatus and equipment allowing the user to save or manage personal information; software for the redirection of secure messages, internet e-mail and/or other data to one or more electronic handheld devices from a database stored in or associated with a personal computer or a server; software for the synchronization of secure data between a remote station or device and a fixed or remote station or device; electrical and electronic apparatus and instruments especially computers, processors (central processing units) of data and software (recorded/stored programs) for computers for the development, optimization and performance analysis of methods and algorithms as well as processors (central processing units) and software modules for the processing and/or generation of navigation signals and/or data pertaining to navigation; electrical and/or electronic apparatus, electrical and/or electronic instruments and equipment for displaying reports, analyses and measurement results, in especially in the form of graphics, tables and charts resulting from the analysis of performance and the monitoring of performance of navigation signals and/or data; electrical or electronic apparatus and instruments used for examining and identifying space segments in two dimensions or in three dimensions; computer

CLASS : 9—cont.

software (recorded/stored programs) used for examining and identifying space segments in two dimensions or in three dimensions; apparatus for monitoring flight parameters, especially navigation and piloting software (recorded/stored programs) for helicopters, rotorcraft and drones, communication equipment and systems comprising thereof and communication antennas for aircraft; recording equipment and systems comprising thereof for apparatus for locomotion by land, air or water; autoflight control equipment and systems comprising thereof; test devices (real time systems) for conducting tests on electronic samples and parts, especially on data input, recording, process and display devices and apparatus, data bus, data transmission equipment and systems comprising thereof, analogue-digital and digital-analogue converters, program prototypes, simulators for the simulation of mechanical, electrical and electronic functional processes, linking and chaining modules, data analyzers and changeover switches, selector switches and coordinator switches, interface equipment or programs, in especially analogue, digital and discrete data bus interface equipment or programs; control equipment for test equipment and browsable programs, recorded on data carriers for such control equipment; browsable test programs, recorded on data carriers; instruments and computer hardware and software for the simulation of electronic samples and mechanical, electrical and electronic function processes; electrical and electronic display equipment for preparing and conducting tests on electronic samples and for processing the test results; software, namely databank software for managing tests on electronic samples for checking the configuration of the test system and definition of the test system; computer hardware and software for establishing test documents; computer hardware and software for the connection of test internet and/or via local networks; instruments and installations comprising them for testing vehicles and apparatus for locomotion by land, air and water; sensors and communication apparatus and equipment; sighting telescopes for firearms; telescopes, binoculars, telescopic spectacles; protective spectacles, including spectacles for protection against lasers; distance measuring devices, including laser distance measuring devices, digital magnetic compasses; reconnaissance cameras, aerial photography equipment; aerial cameras; periscope systems; stabilized sensor platforms; night vision devices, residual light intensifiers (amplifiers); laser target illuminators; software to assess, monitor and control data security within information technology networks; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking (supervision), life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; industrial geoproduction system composed of a digital processing chain for producing satellite, aerial or terrestrial images, data in 3d; magnetic data carriers, recording discs; automatic vending machines and mechanisms for coin-operated apparatus; cash registers, calculating machines, data processing equipment and computers; fire-extinguishing apparatus; aerials; tape-recorders; magnetic tape units (for computers); magnetic tapes; videotapes; film cameras; video cameras; compact discs (audio-video); optical compact discs; magnetic disks; optical disks; gramophone records; optical data media; magnetic data media: transmitting sets (telecommunication); software exclusively for the field of satellite imaging and data; apparatus for processing data, in particular via satellite; apparatus for simulating the development of infrastructure; apparatus for creating and updating development plans and maps and for observing parcels of agricultural land and optimizing crop development and the monitoring thereof; compact disc players; optical character readers; computer software (recorded programs); games software; computer programs (downloadable software); packaged software for processing and analyzing photographs, such as aerial shots, satellite or terrestrial shots; apparatus for processing data, in particular from satellites; packaged software for stereographic reproduction, for preparing digital terrain models, for modeling in 3d, ortho, orthoimages and thematic maps; computerized files and software packages with geographic, geologic, cartographic and topographic data; computer files and packaged software containing reproductions of terrain and digital maps; equipment for databases and for access to databases; computer software for processing and analyzing photographs such as aerial and satellite photographs; computer software for stereographic projections, digital land models, orthoimages and thematic maps; computerized files and software for geography, geology and topography; computerized files and software for ground mapping and digital maps; satellite navigation equipment; satellites for scientific purpose, in particular earth observation satellites; apparatus for processing, analysis, reproduction and storage of images, aerial or satellite photograph; computer hardware; database equipment; database access equipment; data base management software such

CLASS : 9—cont.

as for stereographic reproduction, for storage, preparation, treatment and analysis of drawings, images, photos, charts, aerial and satellite photographs, surface models; data carriers for computer software, computerized files and software packages, all containing or for stereographic reproduction, for storage, preparation, treatment and analysis of surface models, images and photos; data processing apparatus, in particular from satellites; carriers for dark plates (photography); compact disk players; software (recorded programs); optical mirrors (optics); satellite navigation systems; satellites for scientific purposes, in particular earth observation satellites and radar satellites; remote control apparatus; airborne sensors; transmitters (telecommunication); apparatus for processing, analysis, reproduction and storage of satellites images; electric and electronic apparatus to generate digital elevation models; digital elevation models databases (software); computers and computer software for industries, namely, fire and government, relating to operational systems, customer management, asset management systems, geographical information systems, computer aided design, real-time visualization and mobile systems and configuration of the same for usage on appropriate computer hardware; all included in class 9.
