Air traffic control systems for civil and military purposes, namely, short, medium and long range primary radars; secondary radars; computers; radar data extractors; simulators for air traffic control; radio communication apparatus for ground-air-ground radio communications; tridimensional radars for air surveillance; coast and low altitude surveillance radars; radars for automatic fire control; terrestrial surface-air missile radar apparatus for point defence and for battle point; air-air missile radar apparatus air defence radar for interception, analysis and jamming of radar signals; laser and radar sighting and tracking apparatus; laser apparatus; searching and tracking naval radars; telecommunication systems, namely, telephone networks and exchanges; transmission apparatus, namely, large telephonic multiplex stations, and microwave links; systems for retail information, namely, general purpose minicomputers; railway and underground signalling, turnkey railway and underground transport systems; satellites, space stations, satellite ground stations and space platforms used for telecommunications, television transmissions, data transmission, meteorology purposes, and terminals therefore, either movable or stationary, and parts therefore; surveying, weighing and measuring apparatus and instruments, namely, directional compasses, altimeters, aerometers, ammeters, barometers, chronographs, clinometers, odometers, speedometers, pressure gauges, thermometers not for medical use, pyrometers, scales, metric converters, meteorology radiometers, interferometer probes for atmospheric studies and ultraviolet spectrometers for astrophysical research electric, scientific, teaching and nautical apparatus and instruments, namely, batteries, battery chargers, computer software and radar instruments for earth observation, launching and retrieval of satellites, telecommunications meteorology, environmental management and image transmission, reception and processing mobile cellular telephones with repeaters and user terminals, electronic converters, electrical transformers, pressure vessels and pressurized reactors in the nature of electrical controllers for automatically actuating turbines, charge regulators for use in photovoltaic units, nuclear reactors, magnets, semiconductors, computer operating systems and electromechanical controls for use in computer operating system using motor drive and control system technology for the operation of equipment in plants and naval systems, electromechanical circuit devices, namely, circuit breakers and electrical contactors for circuits, electrical and computer cables, electromechanical actuators used for automatic train control for the automatic operation of a brake valve, electrical controllers and electric switchers, high capacity electrical power supply, electric resistors for thermal dissipation, environmental control apparatus, namely, photovoltaic modules for electricity generation and electrochemical fuel cells, laboratory robots for remote maintenance operations, high dexterity laboratory

CLASS 9—(cont.)

robots for applications in the nuclear, airspace, civil defence, marine and remote or hazardous environment sectors and for use in the transfer and inspecting of remote controlled mobile platforms, command control and guidance electronics for missile weapon systems, namely, sensors and radars, simulators for air traffic control, radio communication apparatus for ground-air-ground radio communications, laser, radar and ultrasonic object detectors for use on vehicles, transmission apparatus, namely, large telephonic multiplex stations and microwave links, electro-optical space instruments; namely, radiation counters used in satellites, satellite borne atmospheric x-ray-ray sensors, electro-optic altitude sensors for satellites, electronic sensors for monitoring automatic navigation and maintenance operations in space, altitude sensors for use on satellites and space exploration vehicles; calculating machines, calculators, data processors and computers, computerized and non-computerized test equipment for meteorology, namely, micro hardness testers, embedding and cutting to prepare material samples; automation systems for field artillery, consisting of electronic command control and communication apparatus for operation at group and battery level, automatic drawing and refrigerant charging units and printers and bar code scanners for use in monitoring and processing refrigerant status of specific refrigerant unit, electric supply cables and temperature meters for use with cryogenic pumps; analog; airborne systems and light and medium anti-aircraft guns for barrel or turret mounting consisting of aiming optics, laser range finders, control electronics, drive servers and night sight systems, namely, optoelectronic fire control systems for battle tanks consisting of aiming optics, laser range finders and digital computers, artillery fire control systems for local control of guns and anti-aircraft, comprised of optical sights, data introduction panels, on-board computers, hydraulic drives and radar stations, simulated trainer and flight simulators for training with anti-aircraft guns; computer to computer mortar-firing data and printer-recorders used with such computers, on-board gyroscopes for spin correction, propulsion jet deflectors for trajectory correction, hydraulic servo unit to actuate flight direction units, on-board missile guidance aids for infra-red sensors, environmental monitoring and management systems consisting of sensors and probes which send the sensed data to computers and programs for processing this information for environmental and civil defence use, synthetic aperture and microwave sensor radar systems for monitoring the terrestrial environment, photographic, cinematographic and optical apparatus and instruments, namely, periscopes, thermal cameras for general observation and battlefield, airborne and shipboard observation and aiming, surveillance detection and target pursuit guidance systems comprising infra-red sensors, optical heads working in the range of visible radiation, interlocked supports, computers with searching algorithms, tracking, switchboards, electro-optic micro sensors for avionics use in aiding navigation, observation and aiming for airborne surveillance, airborne environmental sensing and monitoring, thermal imagery systems for remote observation and aiming for missile tracking, naval electro-optical line of sight, all-weather surveillance of security-sensitive areas and line of sight observation for vehicular use, and video display and cable for use in connection with these devices, panoramic periscopic laser sights for tanks, ballistic digital microprocessors for fire controls, gunner, commander and loader control panels for controlling tank attitude, cross wind presence, power and temperature-sensitivity, thermal sighting units with laser range-finders for battlefield observation, tv cameras for artificial vision and sensors with real time image processing for robotics applications used for safety operations and handling suspicious or dangerous objects, optical monitors and video camera units for observation of in-space crystallization, modular units to control experimentation with optically transparent particles, robotic video camera units for space-vehicle utilization, featuring rendezvous and docking, vision, guidance, inspection and monitoring, spectrometers for study of celestial bodies, photographic lenses, cameras, lens mounts, microscopes, telescopes, spy glasses and binoculars, oscillographic and electronic scanners, infrared night vision apparatus for observation at night or in limited visibility conditions. optical systems permitting microscopic illumination and filming of fluids under examination, satellite-borne aluminium plane mirrors and baffles, opto-electronic fire controls for anti-aircraft, terrestrial, airborne and navy artillery, high vacuum coating systems for capacitors and accessories therefore, namely optical monitors, data loggers and machines and instruments for testing materials, namely, units for contactless testing and checking production quality, hardness, surfaces and dimensions, computerized systems to overlay video maps and digitized images with graphic plotter displays, computer programs for graphic editing of maps, computer graphic
