REGISTRATION AS ACCOUNT HOLDER TO E-FILE AND PAY BY GIRO**

This Practice Direction is issued by the Registrar under Rule 78B(1) of the Trade Marks Rules, to specify the procedure for applying to the Registrar to be registered as an account holder.

This Practice Direction will come into effect on 1 January 2006.

Any person who wishes to use eTrademarks to effect a transaction and make payment by GIRO must register with the Intellectual Property Office of Singapore (IPOS) as an Account Holder. Approval is at the sole discretion of IPOS. Upon approval, an eTrademarks account will be created in the name of the person and the person will receive a User ID and Password.

To register, access IPOS address at <http://www.ipos.gov.sg> and [download the eTrademarks Account Holder Registration Form](#).

The person may appoint an Administrator to administer and manage his eTrademarks Account through the eTrademarks "[Maintenance of Authorised Representatives](#)" service.

The responsibilities of the Administrator are as follows:

- appointment of one or more Representatives to access eTrademarks and make payment by GIRO on behalf of the Account Holder;
- updating of the particulars of the Representatives; and
- removal of any Representative's rights to access eTrademarks and make payment by GIRO on behalf of the Account Holder.

These responsibilities are to be conducted through the eTrademarks "Maintenance of Authorised Representatives" service.

Please note that all Authorized Representatives must be CPF account holders with SingPass. The Authorized Representatives are required to sign in using their SingPass to ensure security for GIRO deductions for the online transactions. If the person does not have a GIRO account with IPOS, please complete the [GIRO Application Form](#) and submit it to IPOS.

The completed eTrademarks Account Holder Registration Form and GIRO Application Form should be mailed or couriered to the Intellectual Property Office of Singapore with the address 51 Bras Basah Road #04-01 Plaza By The Park Singapore 189554 and attentioned to Mrs Ang-Ong Bee Lian. Fax submissions are not acceptable.

The trade mark is a movement mark, as shown in the representations attached to the application. It is composed of 50 sequences (1 to 50) that lasts 10 seconds in total. The starting point is an orange triangle that multiplies to show an increasing number of orange and grey triangles and triangular arrow devices which start to overlap (frames 1 through 15); the triangles/arrow devices then appear to gradually turn into a group of runners viewed from the side (frames 16 to 18), then from both the front and from the side (frames 19 to 37), then the runners appear to gradually become orange and grey triangles and triangular arrow devices (frames 38 to 47) and the number of triangles/arrow devices gradually decreases until finally there is a single orange triangle (frame 48). A FWD logo then appears, leaving the final orange triangle from frame 48 in the center of the letter D in the FWD logo (frame 49). In the final sequence (frame 50), on the right side of the FWD logo, three runners appear viewed from the front, the

central runner is orange and two side runners are in grey.

Electronic data processing equipment; computer hardware; integrated

circuits; microprocessors; processors [central processing units]; chips [integrated circuits]; semiconductor intellectual property cores; system-on-chip devices; micro-controllers; electronic chips; data processors; interfaces for computers; printed circuit boards; electronic circuit boards; telephones; mobile computing devices, including portable computers, laptop computers, notebook computers, subnotebook computers, ultra-mobile computers, tablet computers, Internet tablet computers, personal portable computers, personal digital assistants, personal digital assistants with integrated mobile telephone functionality, mobile telephones, smart phones, handheld computers, GPS navigation devices and personal media players; servers; electronic sensors; smart devices namely smart cards, smart card readers, smart meters, smart remote controllers, smart wrist bands, smart watches, smart watch phones and smart pens; wearable mobile devices; wearable computers; set top boxes; modems; integrated receiver devices; video encoders and transcoders; electronic book readers; data terminals; electronic devices that send and receive data in a connected network; computer software; computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, microcontrollers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; computer software used in, and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; microprocessor design file software; computer software used in servers; operating system software; web services software; security and cryptographic software; software for prototyping, developing and managing micro-processor and micro-controllerbased devices; hardware for prototyping, developing and managing micro-processor and micro-controller-based devices; development boards, baseboards and breadboards for prototyping and developing micro-controller-based devices; software development toolchains; software development kits; compilers; electronic components comprising of databases hosting re-useable libraries of components for building hardware, middleware, micro-processors, micro-controllers, system-on-chip devices and internet-of-things devices; linear actuators (electric); networking and connectivity hardware and software; wireless connectivity hardware and software; digital signal processors; displays, display controllers, touchscreens; sensors; data storage devices; audio devices; cameras; accelerometers; digital compasses; inclinometers; smart cards; electronic publications (downloadable or streamable) all relating to electronic equipment, computer hardware and computer software, integrated circuit based devices and internet-of-things devices.

Class 16

Printed materials all relating to electronic equipment, computer hardware and computer software, integrated circuit based devices and internet-of-things devices; instruction manuals relating to design and development of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; user and development manuals all relating to the design and development of computer hardware and computer

software, integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; printed materials concerning the performance and technical characteristics of computer hardware and computer software, integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; brochures relating to the design and development of computer hardware and computer software, integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; instruction manuals and user and development manuals relating to design and development of software for prototyping, developing and managing micro-processor and micro-controller-based devices, hardware for prototyping, developing and managing micro-processor and micro-controller-based devices, development boards, baseboards and breadboards for prototyping and developing micro-controller-based devices, and software development toolchains, software development kits; instruction manuals and user and development manuals relating to design and development of compilers, actuators, motors, communications modules and chipsets, networking and connectivity hardware and software, wireless connectivity hardware and software, databases hosting re-useable libraries of components for building hardware, middleware, micro-processors, micro-controllers, system-on-chip devices and internet-of-things devices; instruction manuals and user and development manuals relating to design and development of digital signal processors, displays, display controllers, touchscreens, electro-mechanical machines, robots, sensors, data storage devices, audio devices, cameras, accelerometers, digital compasses, inclinometers, smart cards, internet-of-things devices; printed materials concerning the performance and technical characteristics of software for prototyping, developing and managing micro-processor and micro-controller-based devices, hardware for prototyping, developing and managing micro-processor and micro-controller-based devices, development boards, baseboards and breadboards for prototyping and developing micro-controller-based devices, and software development toolchains, software development kits; printed materials concerning the performance and technical characteristics of compilers, actuators, motors, communications modules and chipsets, networking and connectivity hardware and software, wireless connectivity hardware and software, databases hosting re-useable libraries of components for building hardware, middleware, micro-processors, micro-controllers, system-on-chip devices and internet-of-things devices; printed materials concerning the performance and technical characteristics of digital signal processors, displays, display controllers, touchscreens, electro-mechanical machines, robots, sensors, data storage devices, audio devices, cameras, accelerometers, digital compasses, inclinometers, smart cards, internet-of-things devices; brochures relating to design and development of software for prototyping, developing and managing micro-processor and micro-controller-based devices, hardware for prototyping, developing and managing micro-processor and micro-controller-based devices, development boards, baseboards and breadboards for prototyping and developing micro-controller-

based devices, and software development toolchains, software development kits; brochures relating to design and development of compilers, actuators, motors, communications modules and chipsets, networking and connectivity hardware and software, wireless connectivity hardware and software, databases hosting re-useable libraries of components for building hardware, middleware, micro-processors, micro-controllers, system-on-chip devices and internet-of-things devices; brochures relating to design and development of digital signal processors, displays, display controllers, touchscreens, electro-mechanical machines, robots, sensors, data storage devices, audio devices, cameras, accelerometers, digital compasses, inclinometers, smart cards, internet-of-things devices.

Class 42

Research, development, design, all relating to electronic equipment, computer hardware, internet-of-things devices, integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; technical consultancy and technical support services in relation to development and design of electronic equipment, computer hardware, internet-of-things devices, integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, architecture extensions to semiconductor intellectual property cores, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services, all relating to computer software; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores and architecture extensions to semiconductor intellectual property cores, macro cells, system-on-chip devices, micro-controllers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; research, development, design, technical consultancy and technical support services, all relating to computer software used in servers, operating system software, web services software, and security and cryptographic software; research, development, design, all relating to software for prototyping, developing and managing micro-processor and micro-controller-based devices, hardware for prototyping and developing micro-controller-based devices, development boards, baseboards and breadboards for prototyping, developing and managing micro-processor and micro-controller-based devices, and software development toolchains, software development kits; technical consultancy and technical support services in relation to development and design of software for prototyping, developing and managing micro-processor and micro-controller-based devices, hardware for prototyping and developing micro-controller-based devices, development boards, baseboards and breadboards for prototyping, developing and managing micro-processor and micro-controller-based devices, and software development toolchains, software development kits; research, development, design, all relating to compilers,

actuators, motors, communications modules and chipsets, networking and connectivity hardware and software, wireless connectivity hardware and software, databases hosting re-useable libraries of components for building hardware, middleware, micro-processors, micro-controllers, system-on-chip devices and internet-of-things devices; technical consultancy and technical support services in relation to development and design of compilers, actuators, motors, communications modules and chipsets, networking and connectivity hardware and software, wireless connectivity hardware and software, databases hosting re-useable libraries of components for building hardware, middleware, micro-processors, micro-controllers, system-on-chip devices and internet-of-things devices; research, development, design, all relating to digital signal processors, displays, display controllers, touchscreens, electro-mechanical machines, robots, sensors, data storage devices, audio devices, cameras, accelerometers, digital compasses, inclinometers, smart cards; technical consultancy and technical support services in relation to development and design of digital signal processors, displays, display controllers, touchscreens, electro-mechanical machines, robots, sensors, data storage devices, audio devices, cameras, accelerometers, digital compasses, inclinometers, smart cards.
