REGISTRATION AS ACCOUNT HOLDER TO E-FILE AND PAY BY GIRO**

This Practice Direction is issued by the Registrar under Rule 78B(1) of the Trade Marks Rules, to specify the procedure for applying to the Registrar to be registered as an account holder.

This Practice Direction will come into effect on 1 January 2006.

Any person who wishes to use eTrademarks to effect a transaction and make payment by GIRO must register with the Intellectual Property Office of Singapore (IPOS) as an Account Holder. Approval is at the sole discretion of IPOS. Upon approval, an eTrademarks account will be created in the name of the person and the person will receive a User ID and Password.

To register, access IPOS address at <http://www.ipos.gov.sg> and [download the eTrademarks Account Holder Registration Form](#).

The person may appoint an Administrator to administer and manage his eTrademarks Account through the eTrademarks "[Maintenance of Authorised Representatives](#)" service.

The responsibilities of the Administrator are as follows:

- appointment of one or more Representatives to access eTrademarks and make payment by GIRO on behalf of the Account Holder;
- updating of the particulars of the Representatives; and
- removal of any Representative's rights to access eTrademarks and make payment by GIRO on behalf of the Account Holder.

These responsibilities are to be conducted through the eTrademarks "Maintenance of Authorised Representatives" service.

Please note that all Authorized Representatives must be CPF account holders with SingPass. The Authorized Representatives are required to sign in using their SingPass to ensure security for GIRO deductions for the online transactions. If the person does not have a GIRO account with IPOS, please complete the [GIRO Application Form](#) and submit it to IPOS.

The completed eTrademarks Account Holder Registration Form and GIRO Application Form should be mailed or couriered to the Intellectual Property Office of Singapore with the address 51 Bras Basah Road #04-01 Plaza By The Park Singapore 189554 and attentioned to Mrs Ang-Ong Bee Lian. Fax submissions are not acceptable.

Application Published for Opposition Purposes Under The Trade Marks Act (Cap.332, 2005 Ed.)

Registration has been applied for in the respect of the following Trade Marks under the provisions of the Trade Marks Act (Cap. 332, 2005 Ed.)

OPPOSITION

Any person who wishes to oppose the registration of any of the marks published in the class groups which follow may within two months from the date of this journal file a Notice of Opposition on Form TM 11 (fee \$374 and Service Bureau charges).

Formal opposition should not be filed until after reasonable notice has been given to the Applicant for registration so as to afford him an opportunity of withdrawing his application before the expenses of preparing the Notice of Opposition are incurred. Failure to give such notice will be taken into account in considering any application by an Opponent for an Order for Costs if the opposition is uncontested by the Applicant.

apparatus; Recording material bearing computer programmes; Electrical data output apparatus for computers; Magnetic tapes for visual electronic computers; Computer programs stored on magnetic materials; Magnetic discs for storing computer programmes; Data being electrically recorded for computers; Computer installations for the storage of data; Recorded computer programs in the form of tapes; Visual display apparatus for use with computers; Data recording materials for use with computers; Computer software for processing digital images; Computer controlled fuel dispensing instruments; Computer controlled automatic testing apparatus; Units adapted for the storage of computer disks; Computer networks for the communication of data; Magnetic tape for recording computer programmes; Computer programs for use in telecommunications; Recorded computer programs in the form of cards; Computer controlled workstations for data entry; Computer programs for designing control systems; Computer programs relating to computer networks; Recorded computer programs in the form of disks; Computer programs for use in fitting spectacles; Recorded computer programs in the form of wires; Computer programs for testing computer hardware; Computer software for wireless content delivery; Computer programs relating to financial matters; Computer programs relating to motorcycle racing; Simulation software for use in digital computers; Electronic memories comprising computer programs; Computer programs for use in database management; Computer systems designed for project management; Data processing apparatus for use with computers; Computer programs for use in fluid flow analysis; Electronic data apparatus for use with computers; Magnetic cards for recording computer programmes; Computer programs for use in desk top publishing; Magnetic tapes for recording computer programmes; Semiconductor memories being computer programmes; Computer controlled apparatus for voting systems; Recording discs for use with computer programmes; Computer apparatus for recording telephone calls; Computer discs containing business documentation; Printed circuit boards for mounting in computers; Magnetic discs for recording computer programmes; Computer programs relating to housing management; Computer software for use in controlling machines; Computer hardware publications in electronic form; Pre-recorded data carriers for use with computers; Storage file units for computer program recording; Computer installations for the processing of data; Computer apparatus for computer aided engineering; Boxes adapted for storing computer software disks; Computer programs relating to local area networks; Computer apparatus for use with computer networks; Computer programs for management of manufacturing; Computer apparatus for use in local area networks; Plastic insulated cables (electric) for computers; Computer programs in the field of design analysis; Graphic printers for use with computing apparatus; Computer programs for producing computer graphics; Computer programs for electronic image processing; Record carriers for computer programmes (optical); Paging interface apparatus for use with computers; Computer programs for use by travel organisations; Training guides in the form of a computer program; Computer hardware for use with drilling apparatus; Image processing apparatus for personal computers; Keyboards for entering information into computers; Computer programs for analysing computer hardware; Electronic memories for the input of computer data; Microprocessor based computer compatible apparatus; Recorded computer programs for scientific research; Personal computers for use with video game devices; Computer hardware for use with drilling instrument; Training manuals in the form of a computer program; Electronic publications recorded on computer media; Computer software programs for database management; Personal computers incorporating computer software; Computer programs for use as searching directories;

Electronic memories comprising computer programmes; Record carriers for computer programmes (magnetic); Computer programs for the petrochemical industries; Installations for use in forming computer networks; Computer software for analysing market information; Computer programs for use as reporting directories; Magnetic tape drives for storing computer programs; Cards for use with computers (encoded or magnetic); Computer hardware for use with drilling operations; Computer programs for electronic design automation; Computer programs for use in computer-aided design; Computer programs for use with facsimile apparatus; Input apparatus for transferring data to computers; Computer programs stored on magnetic data carriers; Computer based control apparatus for machine tools; Television display monitors for use with computers; Computer programs relating to computer aided design; Computer software for processing market information; Computer workstations (apparatus and installations); Computer based control apparatus for assembly lines; Electronic memories for the output of computer data; Paper handling devices (parts of computer printers); Paper feed apparatus for use with computer printers; Communication devices for linking computer networks; Magnetic cards for the storage of computer programs; Computers for managing control devices for aircraft; Apparatus for data communications between computers; Television display apparatus for use with computers; Apparatus for inputting information into a computer; Computer apparatus for computer aided manufacturing; Electronic memories incorporating computer programs; Materials bearing computer programs in encoded form; Apparatus for receiving information from a computer; Data storage devices for recording computer programs; Materials for carrying computer data in optical form; Computer programs for integrated circuit diagnostics; Computer installations for the communication of data; Credit card encoding machines [computer peripherals]; Electronic memories for the storage of computer data; Credit card encoding machines [computer peripherals]; Computer software for processing digital music files; Computer controllers for operating sound instruments; Industrial controls incorporating computer apparatus; Audiovisual display apparatus for use with computers; Apparatus for computer numerical control of machines; Computer programs recorded on magnetic data carriers; Operating computer software for main frame computers; Electrical control apparatus being computer operated; Installations for use in the networking of computers; Electronic control apparatus for computer programmes; Input apparatus for transferring data from computers; Electronic memories for the control of computer data; Computer games programs recorded on tapes (software); Electronic printing apparatus for use with computers; Paper guiding apparatus (parts of computer printers); Computer programs recorded on data storage materials; Devices for linking terminals on a computer apparatus; Broadband data interconnecting computer installations; Credit card embossing machines [computer peripherals]; Computer software programs for spreadsheet management; Mobile work stations (computer, other than furniture); Technical literature in the form of computer programs; Computer programs in the field of communication links; Computer programs for editing images, sound and video; Computer controllers for operating lighting apparatus; Apparatus for use in communications between computers; Electronic print out apparatus for use with computers; Process control units using process control computers; Personal computer software applications, downloadable; Electrical print out apparatus for use with computers; Materials for carrying computer data in magnetic form; Computer games programmes downloaded via the internet; Computer programs in the field of molecular modelling; Cartridges for toner (unfilled) for use with computers; Boxes adapted for transporting computer software disks; Electrical data input

apparatus for use with computers; Electronic data input apparatus for use with computers; Computer programs for the creation of elementary cells; Computer programs for designing printed circuit boards; Computer programs recorded in computer accessible form; Computer software for authorising access to data bases; Navigation apparatus for vehicles [on-board computers]; Personal computer work stations (electronic apparatus); Navigation apparatus for vehicles [on-board computers]; Magnetic carriers for the storage of computer programs; Paper feeding apparatus for use with computer printers; Navigation apparatus for vehicles [on-board computers]; Navigation apparatus for vehicles [on-board computers]; Memory cartridges on which computer programs are stored; Electronic memory units for bearing computer programmes; Computer installations for the control of machine tools; Tape units for backing up computer data storage devices; Apparatus controlled by computers for analysing samples; Computer programs for use in computer aided engineering; Integrated circuit cards storing computer game programs; Computer programs relating to the training of personnel; Optical discs bearing machine readable computer program; Electronic data output apparatus for use with computers; Computer programs for use in defining machineable parts; Tape units for backing up computer data storage systems; Recorded computer programs in the form of punched cards; Anti-glare filters for televisions and computer monitors; Computer apparatus having speech generation capabilities; Computer software for controlling self-service terminals; Memory devices bearing programmes for use with computers; Machine readable materials for bearing computer programs; Paper strips bearing punched (encoded) computer programs; Paper bearing computer programs in machine readable form; Magnetic recording apparatus bearing computer programmes; Magnetic recording materials bearing computer programmes; Machine readable carriers for stored computer programmes; Computer apparatus for the management of telephone calls; Input apparatus for use with computers for handling data; Computer controlled mechanisms for coin operated lockers; Anti-glare filters for televisions and computer monitors; Computer programs for use in developing computer programs; Computer programs for use in computer-aided manufacturing; Computer based electrophoresis image processing apparatus; Programs for setting up performance analysis in computers; Electronic apparatus for linking televisions to computers; Computer software to maintain and operate computer system; Interactive entertainment software for use with computers; Semiconductor memory cartridges being computer programmes; Computer controlled telecommunications exchange apparatus; Computer programs for use with structured system analysis; Remote control apparatus connected by modems to computers; Magnetic supports containing recorded computer programmes; Installations for the remote loading of computer software; Digital interactive video adaptors for use with computers; Interactive entertainment software for use with computers; Machine readable material for bearing computer programmes; Computer apparatus for the transmission of telephone calls; Computer installations for the control of laundry machines; Computer software for application and database integration; Articles adapted for use in the ducting of computer cables; Paper being magnetic discs for recording computer programs; Tapes bearing computer programmes in machine readable form; Electronic components for the storage of computer programs; Solid-state electrical apparatus for storing computer data; Electronic visual display apparatus for use with computers; Articles adapted for use in the support of computer cables; Electrically punched (encoded) cards for use with computers; Electric devices for transmission of data between computers; Computer software for creating and editing music and sounds; Computer programs for establishing pump operating schedules; Cartridges of

magnetic tape for recording computer programs; Electrically punched (encoded) tapes for use with computers; Optical discs for bearing machine readable computer program; Installations for the remote unloading of computer software; Computer programs used for electronic cash register systems; Computer software for use in programming facsimile machines; Computer software for use in programming facsimile machines; Computer programs relating to the creation of graphic images; Computer operated controls for mechanical handling apparatus; Computer software for use in processing semiconductor wafers; Audiovisual display apparatus adapted for use with computers; Computer terminals for use with debit cards at point of sale; Joysticks for use with computers, other than for video games; Computer software designed to estimate resource requirements; Computer game software for use on mobile and cellular phones; Joysticks for use with computers, other than for video games; Cursor control devices for use with computer display systems; Data carriers for computers having software recorded thereon; Computer controlled installations of video display apparatus; Computer apparatus adapted for use with visual display units; Joysticks for use with computers, other than for video games; Computer programs for the rating of plate fin heat exchangers; Recorded computer programs in the form of punched paper tapes; Apparatus for collecting encoded data for supply to computers; Computer terminals for use with credit cards at point of sale; Computer programs for the design of plate fin heat exchangers; Circuit boards for use in the emulation of computer terminals; Computer programs for monitoring computer systems performance; Materials bearing data in encoded form for use with computers; Computer aided design instruments for laser machining systems; Computer programs for dynamic simulation of oil well drilling; Computer programs for using the internet and the worldwide web; Computer games programs downloaded via the internet (software); Computer software for communication between computer processes; Acoustic receivers for telephonic communication with computers; Apparatus for controlling the operation of machines (computer); Materials bearing computer programs in magnetic (encoded) form; Solid-state electrical apparatus for storing computer programs; Computer terminals for use with encoded cards at point of sale; Computer installations incorporating a central processing unit; Insert cards (printed circuit boards) being parts of computers; Computer software adapted for use in the operation of computers; Data processing programmes for editing in computer aided design; Computer programs for automating molecular biological processes; Interface instruments for computer control of knitting machines; Computer programs recorded on diskettes for producing lettering; Computer terminals for use with magnetic cards at point of sale; Telecommunications apparatus for transferring data to computers; Solid-state electrical apparatus for storing computer programmes; Computer programs relating to the manipulation of graphic images; Computer programs for providing a graphical presentation of data; Computer programs for the analysis of data processing procedures; Personal computers for use with coin operated video game devices; Electronic data carriers with computer programs (machine script); Paper cards bearing computer programmes in machine readable form; Computer programs for the enabling of access or entrance control; Computer programs for the analysis of data processing efficiency; Computer controlled apparatus for testing printed circuit boards; Recording materials for the storage of digital computer programs; Fibre optics communications installations for use with computers; Computer programs for the control of telecommunication apparatus; Computer programs for the evaluation of thermal radiation levels; Electronic devices for the transmission of data between computers; Data terminals for the entry of data to a central computer system; Data processing programmes

for archiving in computer aided design; Videotext computer terminals incorporating alphanumeric keyboards; Computer programs in machine readable form recorded on paper tape; Computer programs relating to the creation of photographic images; Computer programs for the analysis of data processing performance; Paper tapes and cards bearing punched (encoded) computer programs; Computer game software downloadable from a global computer network; Computer apparatus for the measurement of brakes on motor vehicles; Network software applications being downloadable computer programs; Computer programs for the control of telecommunication instruments; Computer controlled installations of liquid crystal display screens; Computer hardware for use in computer-assisted software engineering; Computer programs for simulating the trading in futures and options; Computer programs for the management of the manufacturing processes; Computer software for communicating purposes between microcomputers; Computer based development apparatus for testing electronic circuits; Computer based apparatus for use in the enhancement of video signals; Data storage media (other than paper) for recording computer programs; Mosaic-type heads for impact printing machines for use with computers; Materials bearing information in magnetic form for use with computers; Data carriers incorporating computer programs written in machine code; Computer aided teleprinter apparatus having word processing functions; Apparatus for protecting computers from electrical power supply faults; Interactive computers for use in certifying airport security personnel; Computer based apparatus for the implementation of electronic circuits; Computer apparatus for the measurement of suspension on motor vehicles; Computer utility programs [program performs computer maintenance work]; Computer programs in machine readable form recorded on electronic media; Computer programmes (programs) and recorded software distributed online; Computer based development apparatus for testing printed circuit boards; Machine readable computer programs for use in the reproduction of music; Electrical connectors for connecting laptop computers to telephone lines; Computer based apparatus for designing the layout of electronic circuits; Telecommunications apparatus for transmitting data for use with computers; Devices for converting image information to digital signals for computers; Electronic data processing apparatus for the storage of computer programs; Data terminals for the communication of data to a central computer system; Fibre optics communications apparatus for use with computer work stations; Computer based apparatus for the implementation of printed circuit boards; Computer software for controlling and managing access server applications; Computer software for controlling and managing access server applications; Cash registers, calculating machines, data processing equipment, computers; Computer based development apparatus for the design of electronic circuits; Computer software for controlling the operation of audio and video devices; Computer programs for use in processing data relating to financial records; Programs written on data carriers for processing encoded data on computers; Electrical communications apparatus for use with interconnecting computers; Computer programs for connecting remotely to computers or computer networks; Computer software for organizing and viewing digital images and photographs; Computer based apparatus for designing the layout of printed circuit boards; Interfaces between application programs and firmware on real-time computers; Computer controlled apparatus for furnishing voice responses to data inputs; Simulators incorporating digital computers for industrial training purposes; Computer based development apparatus for the design of printed circuit boards; Computer programs for use with computer integrated manufacturing installations; Educational materials in the form of computer programmes for teaching languages; Computer apparatus for use in monitoring biochemical

reactions (for medical use); Computer software to enable the transmission of photographs to mobile telephones; Computer apparatus for the measurement of exhaust gas emissions on motor vehicles; Miniature hard disk drive storage units on a plug-in card being computer apparatus; Computer controlled electro-mechanical apparatus for automatically dispensing products; Downloadable computer game software via a global computer network and wireless devices; Computer programs for searching remotely for content on computers and computer networks; Computer controlled electro-mechanical instruments for automatically dispensing products; Computer apparatus for use in monitoring biochemical reactions (other than for medical use); Computer programs for searching the contents of computers and computer networks by remote control; Video game computer programs for use with game apparatus not requiring a separate means of display; LAN [local area network] computer cards for connecting portable computer devices to computer networks; Racks and mountings specifically adapted for use with audio, visual, computer and telecommunications equipment; Operating and user instructions stored in digital form for computers and computer software, in particular on floppy disks or CD-ROM.

Data being magnetically recorded for computers; Circuit boards for use with computer keyboards; Memory devices for use with computer apparatus; Recording material bearing computer programmes; Electrical data output apparatus for computers; Magnetic tapes for visual electronic computers; Computer programs stored on magnetic materials; Magnetic discs for storing computer programmes; Data being electrically recorded for computers; Computer installations for the storage of data; Recorded computer programs in the form of tapes; Visual display apparatus for use with computers; Data recording materials for use with computers; Computer software for processing digital images; Computer controlled fuel dispensing instruments; Computer controlled automatic testing apparatus; Units adapted for the storage of computer disks; Computer networks for the communication of data; Magnetic tape for recording computer programmes; Computer programs for use in telecommunications; Recorded computer programs in the form of cards; Computer controlled workstations for data entry; Computer programs for designing control systems; Computer programs relating to computer networks; Recorded computer programs in the form of disks; Computer programs for use in fitting spectacles; Recorded computer programs in the form of wires; Computer programs for testing computer hardware; Computer software for wireless content delivery; Computer programs relating to financial matters; Computer programs relating to motorcycle racing; Simulation software for use in digital computers; Electronic memories comprising computer programs; Computer programs for use in database management; Computer systems designed for project management; Data processing apparatus for use with computers; Computer programs for use in fluid flow analysis; Electronic data apparatus for use with computers; Magnetic cards for recording computer programmes; Computer programs for use in desk top publishing; Magnetic tapes for recording computer programmes; Semiconductor memories being computer programmes; Computer controlled apparatus for voting systems; Recording discs for use with computer programmes; Computer apparatus for recording telephone calls; Computer discs containing business documentation; Printed circuit boards for mounting in computers; Magnetic discs for recording computer programmes; Computer programs relating to housing management; Computer software for use in controlling machines; Computer hardware publications in electronic form; Pre-recorded data carriers for use with computers; Storage file units for computer program recording; Computer installations for the processing of data; Computer apparatus for computer aided engineering; Boxes adapted for storing computer software disks; Computer programs relating to local area networks; Computer apparatus for use with computer networks; Computer programs for management of manufacturing; Computer apparatus for use in local area networks; Plastic insulated cables (electric) for computers; Computer programs in the field of design analysis; Graphic printers for use with computing apparatus; Computer programs for producing computer graphics; Computer programs for electronic image processing; Record carriers for computer programmes (optical); Paging interface apparatus for use with computers; Computer programs for use by travel organisations; Training guides in the form of a computer program; Computer hardware for use with drilling apparatus; Image processing apparatus for personal computers; Keyboards for entering information into computers; Computer programs for analysing computer hardware; Electronic memories for the input of computer data; Microprocessor based computer compatible apparatus; Recorded computer programs for scientific research; Personal computers for use with video game devices; Computer hardware for use with drilling instrument; Training manuals in the form of a computer program; Electronic publications recorded on computer media; Computer software

programs for database management; Personal computers incorporating computer software; Computer programs for use as searching directories; Electronic memories comprising computer programmes; Record carriers for computer programmes (magnetic); Computer programs for the petrochemical industries; Installations for use in forming computer networks; Computer software for analysing market information; Computer programs for use as reporting directories; Magnetic tape drives for storing computer programs; Cards for use with computers (encoded or magnetic); Computer hardware for use with drilling operations; Computer programs for electronic design automation; Computer programs for use in computer-aided design; Computer programs for use with facsimile apparatus; Input apparatus for transferring data to computers; Computer programs stored on magnetic data carriers; Computer based control apparatus for machine tools; Television display monitors for use with computers; Computer programs relating to computer aided design; Computer software for processing market information; Computer workstations (apparatus and installations); Computer based control apparatus for assembly lines; Electronic memories for the output of computer data; Paper handling devices (parts of computer printers); Paper feed apparatus for use with computer printers; Communication devices for linking computer networks; Magnetic cards for the storage of computer programs; Computers for managing control devices for aircraft; Apparatus for data communications between computers; Television display apparatus for use with computers; Apparatus for inputting information into a computer; Computer apparatus for computer aided manufacturing; Electronic memories incorporating computer programs; Materials bearing computer programs in encoded form; Apparatus for receiving information from a computer; Data storage devices for recording computer programs; Materials for carrying computer data in optical form; Computer programs for integrated circuit diagnostics; Computer installations for the communication of data; Credit card encoding machines [computer peripherals]; Electronic memories for the storage of computer data; Credit card encoding machines [computer peripherals]; Computer software for processing digital music files; Computer controllers for operating sound instruments; Industrial controls incorporating computer apparatus; Audiovisual display apparatus for use with computers; Apparatus for computer numerical control of machines; Computer programs recorded on magnetic data carriers; Operating computer software for main frame computers; Electrical control apparatus being computer operated; Installations for use in the networking of computers; Electronic control apparatus for computer programmes; Input apparatus for transferring data from computers; Electronic memories for the control of computer data; Computer games programs recorded on tapes (software); Electronic printing apparatus for use with computers; Paper guiding apparatus (parts of computer printers); Computer programs recorded on data storage materials; Devices for linking terminals on a computer apparatus; Broadband data interconnecting computer installations; Credit card embossing machines [computer peripherals]; Computer software programs for spreadsheet management; Mobile work stations (computer, other than furniture); Technical literature in the form of computer programs; Computer programs in the field of communication links; Computer programs for editing images, sound and video; Computer controllers for operating lighting apparatus; Apparatus for use in communications between computers; Electronic print out apparatus for use with computers; Process control units using process control computers; Personal computer software applications, downloadable; Electrical print out apparatus for use with computers; Materials for carrying computer data in magnetic form; Computer games programmes downloaded via the internet; Computer programs in the field of molecular

modelling; Cartridges for toner (unfilled) for use with computers; Boxes adapted for transporting computer software disks; Electrical data input apparatus for use with computers; Electronic data input apparatus for use with computers; Computer programs for the creation of elementary cells; Computer programs for designing printed circuit boards; Computer programs recorded in computer accessible form; Computer software for authorising access to data bases; Navigation apparatus for vehicles [on-board computers]; Personal computer work stations (electronic apparatus); Navigation apparatus for vehicles [on-board computers]; Magnetic carriers for the storage of computer programs; Paper feeding apparatus for use with computer printers; Navigation apparatus for vehicles [on-board computers]; Navigation apparatus for vehicles [on-board computers]; Memory cartridges on which computer programs are stored; Electronic memory units for bearing computer programmes; Computer installations for the control of machine tools; Tape units for backing up computer data storage devices; Apparatus controlled by computers for analysing samples; Computer programs for use in computer aided engineering; Integrated circuit cards storing computer game programs; Computer programs relating to the training of personnel; Optical discs bearing machine readable computer program; Electronic data output apparatus for use with computers; Computer programs for use in defining machineable parts; Tape units for backing up computer data storage systems; Recorded computer programs in the form of punched cards; Anti-glare filters for televisions and computer monitors; Computer apparatus having speech generation capabilities; Computer software for controlling self-service terminals; Memory devices bearing programmes for use with computers; Machine readable materials for bearing computer programs; Paper strips bearing punched (encoded) computer programs; Paper bearing computer programs in machine readable form; Magnetic recording apparatus bearing computer programmes; Magnetic recording materials bearing computer programmes; Machine readable carriers for stored computer programmes; Computer apparatus for the management of telephone calls; Input apparatus for use with computers for handling data; Computer controlled mechanisms for coin operated lockers; Anti-glare filters for televisions and computer monitors; Computer programs for use in developing computer programs; Computer programs for use in computer-aided manufacturing; Computer based electrophoresis image processing apparatus; Programs for setting up performance analysis in computers; Electronic apparatus for linking televisions to computers; Computer software to maintain and operate computer system; Interactive entertainment software for use with computers; Semiconductor memory cartridges being computer programmes; Computer controlled telecommunications exchange apparatus; Computer programs for use with structured system analysis; Remote control apparatus connected by modems to computers; Magnetic supports containing recorded computer programmes; Installations for the remote loading of computer software; Digital interactive video adaptors for use with computers; Interactive entertainment software for use with computers; Machine readable material for bearing computer programmes; Computer apparatus for the transmission of telephone calls; Computer installations for the control of laundry machines; Computer software for application and database integration; Articles adapted for use in the ducting of computer cables; Paper being magnetic discs for recording computer programs; Tapes bearing computer programmes in machine readable form; Electronic components for the storage of computer programs; Solid-state electrical apparatus for storing computer data; Electronic visual display apparatus for use with computers; Articles adapted for use in the support of computer cables; Electrically punched (encoded) cards for use with computers; Electric devices for transmission of data between computers;

Computer software for creating and editing music and sounds; Computer programs for establishing pump operating schedules; Cartridges of magnetic tape for recording computer programs; Electrically punched (encoded) tapes for use with computers; Optical discs for bearing machine readable computer program; Installations for the remote unloading of computer software; Computer programs used for electronic cash register systems; Computer software for use in programming facsimile machines; Computer software for use in programming facsimile machines; Computer programs relating to the creation of graphic images; Computer operated controls for mechanical handling apparatus; Computer software for use in processing semiconductor wafers; Audiovisual display apparatus adapted for use with computers; Computer terminals for use with debit cards at point of sale; Joysticks for use with computers, other than for video games; Computer software designed to estimate resource requirements; Computer game software for use on mobile and cellular phones; Joysticks for use with computers, other than for video games; Cursor control devices for use with computer display systems; Data carriers for computers having software recorded thereon; Computer controlled installations of video display apparatus; Computer apparatus adapted for use with visual display units; Joysticks for use with computers, other than for video games; Computer programs for the rating of plate fin heat exchangers; Recorded computer programs in the form of punched paper tapes; Apparatus for collecting encoded data for supply to computers; Computer terminals for use with credit cards at point of sale; Computer programs for the design of plate fin heat exchangers; Circuit boards for use in the emulation of computer terminals; Computer programs for monitoring computer systems performance; Materials bearing data in encoded form for use with computers; Computer aided design instruments for laser machining systems; Computer programs for dynamic simulation of oil well drilling; Computer programs for using the internet and the worldwide web; Computer games programs downloaded via the internet (software); Computer software for communication between computer processes; Acoustic receivers for telephonic communication with computers; Apparatus for controlling the operation of machines (computer); Materials bearing computer programs in magnetic (encoded) form; Solid-state electrical apparatus for storing computer programs; Computer terminals for use with encoded cards at point of sale; Computer installations incorporating a central processing unit; Insert cards (printed circuit boards) being parts of computers; Computer software adapted for use in the operation of computers; Data processing programmes for editing in computer aided design; Computer programs for automating molecular biological processes; Interface instruments for computer control of knitting machines; Computer programs recorded on diskettes for producing lettering; Computer terminals for use with magnetic cards at point of sale; Telecommunications apparatus for transferring data to computers; Solid-state electrical apparatus for storing computer programmes; Computer programs relating to the manipulation of graphic images; Computer programs for providing a graphical presentation of data; Computer programs for the analysis of data processing procedures; Personal computers for use with coin operated video game devices; Electronic data carriers with computer programs (machine script); Paper cards bearing computer programmes in machine readable form; Computer programs for the enabling of access or entrance control; Computer programs for the analysis of data processing efficiency; Computer controlled apparatus for testing printed circuit boards; Recording materials for the storage of digital computer programs; Fibre optics communications installations for use with computers; Computer programs for the control of telecommunication apparatus; Computer programs for the evaluation of thermal radiation levels; Electronic devices

for the transmission of data between computers; Data terminals for the entry of data to a central computer system; Data processing programmes for archiving in computer aided design; Videotext computer terminals incorporating alphanumeric keyboards; Computer programs in machine readable form recorded on paper tape; Computer programs relating to the creation of photographic images; Computer programs for the analysis of data processing performance; Paper tapes and cards bearing punched (encoded) computer programs; Computer game software downloadable from a global computer network; Computer apparatus for the measurement of brakes on motor vehicles; Network software applications being downloadable computer programs; Computer programs for the control of telecommunication instruments; Computer controlled installations of liquid crystal display screens; Computer hardware for use in computer-assisted software engineering; Computer programs for simulating the trading in futures and options; Computer programs for the management of the manufacturing processes; Computer software for communicating purposes between microcomputers; Computer based development apparatus for testing electronic circuits; Computer based apparatus for use in the enhancement of video signals; Data storage media (other than paper) for recording computer programs; Mosaic-type heads for impact printing machines for use with computers; Materials bearing information in magnetic form for use with computers; Data carriers incorporating computer programs written in machine code; Computer aided teleprinter apparatus having word processing functions; Apparatus for protecting computers from electrical power supply faults; Interactive computers for use in certifying airport security personnel; Computer based apparatus for the implementation of electronic circuits; Computer apparatus for the measurement of suspension on motor vehicles; Computer utility programs [program performs computer maintenance work]; Computer programs in machine readable form recorded on electronic media; Computer programmes (programs) and recorded software distributed online; Computer based development apparatus for testing printed circuit boards; Machine readable computer programs for use in the reproduction of music; Electrical connectors for connecting laptop computers to telephone lines; Computer based apparatus for designing the layout of electronic circuits; Telecommunications apparatus for transmitting data for use with computers; Devices for converting image information to digital signals for computers; Electronic data processing apparatus for the storage of computer programs; Data terminals for the communication of data to a central computer system; Fibre optics communications apparatus for use with computer work stations; Computer based apparatus for the implementation of printed circuit boards; Computer software for controlling and managing access server applications; Computer software for controlling and managing access server applications; Cash registers, calculating machines, data processing equipment, computers; Computer based development apparatus for the design of electronic circuits; Computer software for controlling the operation of audio and video devices; Computer programs for use in processing data relating to financial records; Programs written on data carriers for processing encoded data on computers; Electrical communications apparatus for use with interconnecting computers; Computer programs for connecting remotely to computers or computer networks; Computer software for organizing and viewing digital images and photographs; Computer based apparatus for designing the layout of printed circuit boards; Interfaces between application programs and firmware on real-time computers; Computer controlled apparatus for furnishing voice responses to data inputs; Simulators incorporating digital computers for industrial training purposes; Computer based development apparatus for the design of printed circuit boards; Computer programs for use with computer integrated manufacturing installations;

Educational materials in the form of computer programmes for teaching languages; Computer apparatus for use in monitoring biochemical reactions (for medical use); Computer software to enable the transmission of photographs to mobile telephones; Computer apparatus for the measurement of exhaust gas emissions on motor vehicles; Miniature hard disk drive storage units on a plug-in card being computer apparatus; Computer controlled electro-mechanical apparatus for automatically dispensing products; Downloadable computer game software via a global computer network and wireless devices; Computer programs for searching remotely for content on computers and computer networks; Computer controlled electro-mechanical instruments for automatically dispensing products; Computer apparatus for use in monitoring biochemical reactions (other than for medical use); Computer programs for searching the contents of computers and computer networks by remote control; Video game computer programs for use with game apparatus not requiring a separate means of display; LAN [local area network] computer cards for connecting portable computer devices to computer networks; Racks and mountings specifically adapted for use with audio, visual, computer and telecommunications equipment; Operating and user instructions stored in digital form for computers and computer software, in particular on floppy disks or CD-ROM.

transmission, analysis and restoration of satellite images and aerial photographs; image transmission equipment by digital radio link and systems comprising thereof; optical components and parts; spatial optic apparatus, equipment and instruments; optical apparatus, equipment and instruments for aerial reconnaissance aircraft; guidance, radio-control and automatic pilot equipment and apparatus; hardware and software (recorded/stored programs) for position determination, monitoring and surveillance in specific geographical areas; monitoring and control hardware and software (recorded/stored programs), position determination, monitoring and surveillance equipment and systems comprising thereof in specific geographical areas, media for the storage of data and user terminals (computer terminals) for determination of position, navigation, navigation databases, radar or satellite navigation, radio navigation and for the following applications; mapping information, security and emergency equipment, instruments and apparatus, research (other than for medical use) and lifesaving equipment, instruments and apparatus; media for the storage of data and user terminals for the determination of position, mapping information, route/course guidance for land and airborne vehicles; electrical or electronic instruments and apparatus for the reception, processing and/or transmission of navigation signals and their elements and component parts; electric and electronic apparatus and instruments for the review, analysis and performance monitoring of navigation data and navigation signals and their parts and components; electric and electronic apparatus and instruments for the measurement, verification, checking, testing and monitoring of positions and the associated navigation data; computer software (recorded/stored programs) for the measurement, verification, checking, testing and monitoring of positions and the associated navigation data; satellite localization and satellite navigation appliances and equipment comprising them; telecommunication and radio communication apparatus, hardware and software for telecommunication and radio communication networks, hardware and software for digital telecommunication networks; communication and radio communication networks by wire, cable, fiber optics, radio or satellite; servers of call centers, multiplexers, demultiplexers, electrical and electronic apparatus and instruments for controlling and administering networks; receivers (telecommunications), electronic and radioelectric signal transmission apparatus; satellites for scientific use and satellites designed to receive and transmit radio electric signals; computer terminals, communication terminals, fixed or mobile computer terminals or communication terminals; apparatus for communicating, transmitting, receiving voice, image, data and multimedia data; network appliances, in especially gateways, and systems comprising thereof for Internet gateways; apparatus for use in Internet Protocol (IP) communications networks; interface Internet protocol (IP) network modems, network routers, hard disk drives and computer chips; appliances and equipment comprising thereof and apparatus for the transmission of messages, information, data, sound and images over the airwaves, via cable, via fiber optics, via telephone, via satellite, via terminals, via telecommunication networks and via computer networks; telecommunications and desktop automation terminals for military applications; telephony apparatus, mobile telephones, cordless telephones, radio paging apparatus and equipment, faxes, PDAs (personal digital assistants), mobile devices for Internet access, spare parts for the abovementioned goods to allow communications and to conduct secure transactions and online business; software programs in a format exploitable by computer provided on magnetic or optical media or in a downloadable format to be used with the aforementioned products, software programs for secure communications and enabling one to authenticate, check, record and analyze business relationships and transactions via a system of controlled access rights and notifications,

satellite telecommunications equipment and satellite telecommunications stations comprising thereof, especially in aircraft; software, software (recorded/stored programs) for communication and radio communication networks for transmission of data via wire, cable, via fiber optics, via radio or via satellite; software, software (recorded/stored programs) for the management, administration, architecture management, configuration and protection of local or remote networks for voice, image and data; apparatus and software (recorded/stored programs) for securing of access to computer networks and to Internet protocol (IP) networks; software (recorded/stored programs) for encryption and decryption; software (recorded/stored programs) for encoding and decoding; software (recorded/stored programs) for the architecture, administration and securing of access to computer networks and to Internet protocol (IP) networks; simulation, modeling, testing and experimentation software; servers for modelling simulation, testing and experimentation of civilian and military operations; software (recorded/stored programs) for computers for the development, optimization and performance analysis of methods and algorithms as well as processors (central processing units) and software modules for the processing and/or generation of navigation signals and/or data pertaining to navigation or cartography; software designed to perform the functions of planning, acquisition, processing and dissemination of intelligence information and data exclusively in the areas of intelligence and geography, for the purpose of defense and safety, software for digital radio networks giving the user access to voice services and data such as group communications in relay mode, individual calls, short messages and localization and transmission of data, all these products for digital radio networks; software (recorded/stored programs) for the provision of access to an electronic messaging service; transaction security software for intranet and Internet data terminals, operating stations and terminals for presenting information graphically and textually; secure information processing equipment; computer software; secure telecommunications appliances and equipment comprising thereof; electronic handheld devices for the wireless receipt and/or transmission of secure data, especially messages, and electrical and electronic apparatus and equipment allowing the user to save or manage personal information; software for the redirection of secure messages, Internet e-mail and/or other data to one or more electronic handheld devices from a database stored in or associated with a personal computer or a server; software for the synchronization of secure data between a remote station or device and a fixed or remote station or device; electrical and electronic apparatus and instruments especially computers, processors (central processing units) of data and software (recorded/stored programs) for computers for the development, optimization and performance analysis of methods and algorithms as well as processors (central processing units) and software modules for the processing and/or generation of navigation signals and/or data pertaining to navigation; electrical and/or electronic apparatus, electrical and/or electronic instruments and equipment for displaying reports, analyses and measurement results, in especially in the form of graphics, tables and charts resulting from the analysis of performance and the monitoring of performance of navigation signals and/or data; electrical or electronic apparatus and instruments used for examining and identifying space segments in two dimensions or in three dimensions; computer software (recorded/stored programs) used for examining and identifying space segments in two dimensions or in three dimensions; apparatus for monitoring flight parameters, especially navigation and piloting software (recorded/stored programs) for helicopters, rotorcraft and drones, communication equipment and systems comprising thereof and communication antennas for aircraft; recording equipment and systems comprising thereof for apparatus for locomotion by land, air or water; autoflight control equipment and systems comprising thereof; test

devices (real time systems) for conducting tests on electronic samples and parts, especially on data input, recording, process and display devices and apparatus, data bus, data transmission equipment and systems comprising thereof, analogue-digital and digital-analogue converters, program prototypes, simulators for the simulation of mechanical, electrical and electronic functional processes, linking and chaining modules, data analyzers and changeover switches, selector switches and coordinator switches, interface equipment or programs, in especially analogue, digital and discrete data bus interface equipment or programs; control equipment for test equipment and browsable programs, recorded on data carriers for such control equipment; browsable test programs, recorded on data carriers; instruments and computer hardware and software for the simulation of electronic samples and mechanical, electrical and electronic function processes; electrical and electronic display equipment for preparing and conducting tests on electronic samples and for processing the test results; software, namely databank software for managing tests on electronic samples for checking the configuration of the test system and definition of the test system; computer hardware and software for establishing test documents; computer hardware and software for the connection of test Internet and/or via local networks; instruments and installations comprising them for testing vehicles and apparatus for locomotion by land, air and water; sensors and communication apparatus and equipment; sighting telescopes for firearms; telescopes, binoculars, telescopic spectacles; protective spectacles, including spectacles for protection against lasers; distance measuring devices, including laser distance measuring devices, digital magnetic compasses; reconnaissance cameras, aerial photography equipment; aerial cameras; periscope systems; stabilized sensor platforms; night vision devices, residual light intensifiers (amplifiers); laser target illuminators; software to assess, monitor and control data security within information technology networks; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking (supervision), life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; industrial geoproduction system composed of a digital processing chain for producing satellite, aerial or terrestrial images, data in 3D; magnetic data carriers, recording discs; mechanisms for coin-operated apparatus; cash registers, calculating machines, data processing equipment and computers; fire-extinguishing apparatus; aerials; tape recorders; magnetic tape units (for computers); magnetic tapes; videotapes; film cameras; video cameras; compact discs (audio-video); optical compact discs; magnetic disks; optical disks; gramophone records; optical data media; magnetic data media; transmitting sets (telecommunication); software exclusively for the field of satellite imaging and data; apparatus for processing data, in particular via satellite; apparatus for simulating the development of infrastructure; apparatus for creating and updating development plans and maps and for observing parcels of agricultural land and optimizing crop development and the monitoring thereof; compact disc players; optical character readers; computer software (recorded programs); games software; computer programs (downloadable software); packaged software for processing and analysing photographs, such as aerial shots, satellite or terrestrial shots; apparatus for processing data, in particular from satellites; packaged software for stereographic reproduction, for preparing digital terrain models, for modeling in 3D, ortho, orthoimages and thematic maps; computerized files and software packages with geographic, geologic, cartographic and topographic data; computer files and packaged software containing reproductions of terrain and digital maps; computer software for processing and analyzing photographs such as aerial and satellite photographs; computer software

for stereographic projections, digital land models, orthoimages and thematic maps; computerized files and software for geography, geology and topography; computerized files and software for ground mapping and digital maps; satellite navigation equipment; satellites for scientific purpose, in particular earth observation satellites; apparatus for processing, analysis, reproduction and storage of images, aerial or satellite photograph; computer hardware; computer hardware, computer software and computer peripheral equipment for databases; computer software for authorising access to databases; data base management software such as for stereographic reproduction, for storage, preparation, treatment and analysis of drawings, images, photos, charts, aerial and satellite photographs, surface models; data carriers for computer software, computerized files and software packages, all containing or for stereographic reproduction, for storage, preparation, treatment and analysis of surface models, images and photos; data processing apparatus, in particular from satellites; carriers for dark plates (photography), compact disk players; software (recorded programs); optical mirrors (optics); satellite navigation systems; satellites for scientific purposes, in particular earth observation satellites and radar satellites; remote control apparatus; airborne sensors; transmitters (telecommunication); apparatus for processing, analysis, reproduction and storage of satellites images; electric models; digital elevation models databases (software); computers and computer software for industries, namely, fire and government, relating to operational systems, customer management, asset management systems, geographical information systems, computer aided design, real-time visualization and mobile systems and configuration of the same for usage on appropriate computer hardware.

Class 12

Spacecraft; vehicles; apparatus for locomotion by land, air, water or rail; aircraft of all types; unmanned aerial vehicles; helicopters; rotorcraft and drones; space vehicles; aeronautic apparatus, machine equipment and appliances; military vehicles for transport in particular by air; military aircraft; parts and accessories of all aforementioned products included in this class.

Class 13

Sights, other than telescopic sights, for firearms; sights, other than telescopic sights, for guns [artillery].

Class 16

Printed matter; instructional and teaching material (except apparatus); photographs; posters; postcards; calendars; aerial and satellite photographs; geographical maps, topographic bases, geographical images, charts, surveys.

Class 17

Carbon fibers, other than for textile use.

Class 19

Non-metallic transportable buildings.

Class 24

Textiles and textile goods, not included in other classes.

Class 28

Scale model vehicles and their parts, in particular models of aircraft and in particular model aeroplanes.

Class 35

Compiling of data in data bases and legal data bases; business administration of correspondence exchange services, especially administration of correspondence for third parties; organization of exhibition and trade fairs for commercial or advertising purposes; commercial and organizational consultancy in the field of aeronautics; market research; marketing of aircrafts and parts thereof; advertising; business management; business administration; office functions; presentation of goods on any communications media for retailing images generated by satellites or goods derived from satellite images (2D or 3D), geographical maps or topographic base maps consisting of images generated by satellites or antennae, digital evaluation models in the form of grids of components coded by elevation and receiver antennae; compilation of information into computer databases, in particular compilation of images generated by satellites or antennae, compilation of high-resolution and very high resolution digital images generated by satellites; retailing and wholesaling of images generated by satellites, in particular geographical images, geographical maps and topographic base maps consisting of images generated by satellites; on-line presentation of images generated by satellite, in particular geographical images, geographical maps and topographic maps consisting of images generated by satellite or by aerial means with a view to selling same and providing commercial information relating to these products; provision of business information; business consultancy services; business consultancy services relating to internet communications; provision of business information relating to advertising services, namely for industries, fire and government.

Class 36

Insurance; financial affairs; monetary affairs; financial operations; investment of capital; implementation and arranging of investment of funds; building management; financial services, especially buying-in and underwriting of all securities in especially of issuing of capital; financial and asset management services for all securities, partnership shares, bonds and other stock market valuations; stock market valuation portfolio administration, management services for third parties; providing data for assistance with agricultural insurance underwriting; analysis and research services in the field of agricultural risk analysis from an insurance standpoint; financial analyses and preparation of reports relating thereto; preparation and analysis of financial reports; financial market analysis and preparation of reports relating thereto; preparation of financial and insurance reports.

Class 37

Building construction; custom construction and repair of and installation and mounting services for spacecraft and satellites; aircraft and satellite failure assistance (repair); information relating to repair of aircraft and provision of information relating to repair of aircraft, especially relating to repair of aeroplanes; installation of hardware for mechanical, electrical and computer interfaces between a satellite and launching rocket, especially a launch vehicle; installation of satellites on launch vehicles; services for the installation of satellites and spacecraft on launching vehicles, especially mechanical assembly, set-up (installation) of electrical and computer connections (hardware); custom construction of installations, especially satellites and ground stations and associated equipment; information relating to repair services and the construction of installations and equipment in the aviation sector; construction; repair, especially of vehicles and apparatus of locomotion by land, air or water including unmanned aerial vehicles, aircraft, drones and drive motors; installation, repair, servicing and maintenance of electrical and electronic

installations, equipment and apparatus, aeronautic equipment, and cryptographic equipment, instruments, apparatus and devices; dismantling services for these products; maintenance of computer hardware; repair and maintenance in particular in the field of vehicles and of apparatus for locomotion by land, air or water as well as driving motors; maintenance of multiservice companies' telecommunication networks; building construction consultancy.

Class 38

Telecommunication via satellite and satellite constellations; data transmission via satellites and satellite constellations; provision and rental of multiservice companies' telecommunication networks; electronic messaging via the Internet, extranet, intranet; communication services via radio, telephone, telegraph as well as via any means of remote transmission of data, via videotext, especially via terminals, computer peripherals or electronic and/or digital equipment, videophones, picture phones and videoconferencing; data transmission, especially batch transmissions, sending and dispatching of electronic documents, e-mail services; transfer of telephone calls or telecommunications messages; mobile telecommunication; satellite transmission; radio and TV broadcasting and broadcasting of multimedia programmes (computer editing of texts and/or still or animated images, and/or musical or other sounds) in general for interactive use; communication services via computer networks in general; telecommunication services via satellite and satellite constellations; electronic transfer of messages and data (messaging) via the Internet, extranet, intranet; communication services via radio, telephone, telegraph and via any means of remote transmission of data via interactive videography and especially via terminals, computer peripherals or electronic and/or digital equipment, videophones, picture phones and videoconferencing; data transmission services, especially for batch transmissions, broadcasting, transmission of computerized documents; e-mail services; telephone call transfer or telecommunication services; mobile radio telecommunication services; rental of modems; rental of modem peripherals; rental of access times to a database server; telecommunications, telecommunication services, electronic data transmission, transmission of data via computer server; radio communications services, computer-assisted transmission of messages and images; emission and reception of data, signals and information processed by telematics, by computer or by telecommunication apparatus and instruments; electrical or electronic exchange of computerized data; wireless secure e-mail and data messaging services; electronic messaging services; electrical or electronic transmission and reception of data, signals, images and information, transmission of encrypted messages and images; telecommunication sent by satellite; teleinformatics via terminals; telephone communication services; communication via computer terminals, secure mobile telephone services; transmission services by satellite; data transmission services, data transfer services and services for the provision of access to data online, in especially in the fields of satellite navigation and positional data, media for navigation and positional data; preparation and management of access to available data and information; computer-based transmission of positioning and navigation signals and data for simulation and experimentation; preparation, provision of telecommunication data and information on Internet; secured communication (transmission) of data and vocal data on behalf of third parties, provision of access to software platforms guaranteeing user authentication, data integrity, data confidentiality and file acceptance, documents or electronic data via electronic networks, including the Internet, and access to said documents or electronic data; provision of access to software platforms for services relating to the encryption and the signature of files, documents or electronic data on behalf of third parties,

provision of access to software platforms for services relating to the secure transfer of files, documents, data or electronic payments via electronic networks, including telephone networks and the Internet; provision of access to programs in data networks; telecommunications; providing user access to a global computer network (service providers); computer-aided transmission of messages and images, in particular high-resolution and very high resolution images and geographical information; satellite transmission of message and images, in particular high-resolution and very high resolution images and geographical information; providing access to databases, in particular to image databases by satellites or aeriels, transmission of global digital elevation models data and geographical information; access services to electronic databases and to information retrieval centers, such as for drawings, images, photos, carts, aerial and satellite photographs, surface models in particular rental of access time, organization and management of access authorization; communication services in connection with data transmission in computer networks; arranging access to databases on the Internet in particular providing of access software; (computer based) transmission of data and images, such as for worldwide communication networks (Internet) or for private or user restricted networks (Intranet).

Class 39

Air transport; aircraft rental; positioning and remote control of satellites and spacecraft, especially launching and suspension of satellites for third parties; flight tracking services; vehicle rental; air traffic management; traffic information; airport operation services, in particular airport management and organization and guarantee and implementation of air traffic.

Class 40

Printing; treatment and recycling of aircrafts and parts of aircraft; processing of aerial and satellite, monochrome or multi-spectral photographs for third parties, processing of stereoscopic images; rental of printers and peripherals for printers.

Class 41

Teaching, training, education and entertainment services; sports and cultural activities; correspondence courses; edition and publication of texts, illustrations, books, newspapers, magazines, publications of all kinds and in all forms, including electronic and digital publications, and publications on sound and/or image carriers, multimedia carriers of multimedia programmes (computer editing of texts and/or still or animated images); organization of introductory and further academic events and education in all fields of general interest; seminars, classes and lectures; organization of lectures, especially forums, conventions and conferences; production of radio and television programmes, audiovisual and multimedia programmes (film and recording studios) (computer editing of texts and/or still or animated images, and/or musical or other sounds), for interactive or other use; organization of competitions (events), games, information campaigns and professional consultancy and other events in relation to the aforementioned; production of radio information and entertainment programmes, radio and television entertainment, audiovisual and multimedia programmes (film and recording studios) (computer editing of texts and/or still or animated images, and/or musical or other sounds), for interactive or other use; organization of shows; production of films and rental of films and tapes, including video tapes, and more generally any sound and/or image carriers, and multimedia carriers (interactive discs, digital audio CD-ROMs); lending of books and other publications; games libraries, namely for lending and distribution of games, through services of a franchiser and

namely basic staff training for the aforementioned services; editors services, especially editing of texts; preparation of news reports, photographic reporting; translation services; rental of recorders, especially cassette recorders; recording of films on video tapes; education; training; entertainment; practical training, instruction (teaching) and demonstration (teaching demonstration) in the fields of defense, monitoring, communication and security, intelligence and geography; organization and conducting training, practice workshops, seminars, internships (training); editing and publication of books, printed matter, CD-ROM, and film production, exclusively in the fields of intelligence and geography, for defense and security; publication of books and periodicals on line; publishing services, except printing; computer training on the operation, performance and security of information and position determining systems; arranging and conducting of colloquiums in the field of the exploitation of satellite data and derivative products, arranging and conducting conferences in the field of the exploitation of satellite data and derivative products, arranging and conducting of conventions in the field of the exploitation of satellite data and derivative products, arranging and conducting of seminars in the field of the exploitation of satellite data and derivative products, photography, organization of exhibitions for cultural or educational purposes, photographic reporting, publication of texts other than advertising texts in the field of the exploitation of satellite data and derivative products, electronic publishing of books and periodicals online in the field of the exploitation of satellite data and derivative products, television program production; education, training, entertainment, sporting and cultural activities, information on educational or entertainment events, film production, digital imaging services, publication of books.

Class 42

Engineering consultancy and drawing-up of plans unrelated to business dealings, namely technological consultancy in the production and manufacture of installations, especially satellites and ground stations and associated equipment, technical projects studies; engineering services; performance of scientific and technical studies, projects and scientific and technological consultancy relating to satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; preparation of scientific, physical and technical analyses and surveys relating to the production, use and maintenance of satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; scientific and technological consultation in relation to computers, drawing-up of construction plans; technological consultancy for the provision of technical information and know-how, set-up, design (development) and management of databases and legal databases; computer programming of electronic apparatus and instruments, computers, remote data processing and telematics systems, multimedia hardware; multimedia programming; rental of computers, software, scanners, recorders; technical and technological design consultancy and establishing technical and technological project planning not related to the conducting of business; services of a franchiser, namely the provision of technological advice, and information about technical design, planning and research; services of a franchiser, namely installation of computer software, development of databases and maintenance of computer software, databases and legal databases; programming of software for electronic apparatus and instruments, for computers, remote processing and telematic systems and multimedia hardware and devices, programming of software for multimedia devices; rental of computers, programs and scanners, recorders; technological consultancy and assistance, especially technical organization and services that were deemed necessary in the consultation, in the field of telecommunications and information technology; technical

and technological examination and development of mechanical, electrical and computer interfaces (integration) between a launching rocket, especially a launch vehicle, and a spacecraft or satellite; testing compatibility and integrity of electrical connections; technological consultation in the fields of telecommunications and data processing; technical consultancy in the field of information technology; computer security services for flight security and flight monitoring services and assistance based on a satellite infrastructure; technical software consultancy in the field of telecommunications; technological information in relation to the aviation sector; scientific, technological or technical studies, scientific, technological or technical studies, development of telecommunication networks and radio communication networks; design, development and updating (for third parties) of software (recorded programs) for the management, administration, architecture management, configuration, and protection of local or remote networks for voice, image, data and multimedia data communication, tests, checks, analyses and/or signal monitoring; scientific, technological or technical development, optimization, performance monitoring and testing for methods, algorithms, processing and software modules for the computer-based signals processing; inspections, tests, analyses and/or monitoring of system algorithms for the generation of data pertaining to navigation or cartography; scientific, technological or technical development, optimization, inspections (technical verification) and implementation of technical tests for performance of methods, algorithms, processing and software modules for the generation of data pertaining to navigation or cartography; performance monitoring and inspection; signal checking and verification; scientific and technical development of algorithms and methods for the computer processing of signals; scientific services for the generation and/or delivery of results, especially in the form of analysis reports, graphs, tables and charts; scientific and technological services and research and design relating thereto, in especially scientific and technical development, engineering, technical investigation, technical consultancy, optimization, and improvement; performance of industrial analyses and measurements; scientific and technological services and research and design relating thereto in the field of data processing, data analysis and data conversion; provision of programs in data networks creation (design, development) and updating of database programs; scientific, technical and technological study of user requirements and the evaluation of intelligence system architectures, scientific, technical and technological studies relating to the adaptation, integration, qualification and logistics support built into operations, exclusively in the fields of intelligence and geography, for defense and security; scientific and technological services and research and design services relating thereto, in especially scientific and technical development, engineering, scientific and technical investigation, scientific and technical consultancy, optimization and improvement, exclusively in the fields of intelligence and geography for defense and security; scientific, technical and technological data analysis and data conversion services, exclusively in the fields of intelligence and geography, for defense and security; engineering services applied to the design and troubleshooting of digital radio communication networks intended for security forces; design, development and updating (for third parties) of software (recorded/stored programs) for position determination, supervision and monitoring in specific geographical areas; design, development and updating (for third parties) of command and monitoring software (recorded/stored programs) for position determination, supervision and monitoring in specific geographical areas; scientific evaluation and estimation services provided by engineers for the generation and/or delivery of results, especially in the form of analysis reports, graphs, tables, charts; programming of software in especially on behalf of third parties; programming and maintenance of software,

including software platforms for secure end-to-end transactions, the management of customer relations and the processing of affairs and transactions; provision of protection services for corporate communication via electronic networks, in especially for protection against illegal network attacks; scientific and technological consultancy, technology advisory services provided to Internet users by means of a support hotline concerning computer hardware, software and wireless data networks in all aforementioned fields, scientific, technical and technological advice centers in all aforementioned fields; tests (technical tests), inspections (technical verification), scientific, technical and technological analyses and/or monitoring of navigation signals; scientific, technical and technological development, optimization, performance monitoring and testing for methods, algorithms, processing and software modules for the computer processing of navigation signals; inspections (technical verifications), tests (technical tests), scientific, technical and technological analyses and/or monitoring of system algorithms for the generation of data pertaining to navigation; scientific, technical and technological development, optimization, inspections and tests for performance of methods, algorithms, processing and software modules for the generation of data pertaining to navigation; engineering services in the field of performance monitoring and inspection; engineering services in the field of navigation signal verification; engineering services in the field of developing algorithms and methods for the computer processing of navigation signals; engineering services in the field of developing algorithms and methods for generating data pertaining to navigation; scientific evaluation and estimation for the generation of extrapolated data for navigation; evaluations, assessments and research in the fields of science and technology provided by engineers, in especially scientific, technical and technological development, engineering, scientific, technical and technological investigation, scientific, technical and technological consultancy, optimization, calibration, alignment, testing, enhancement, in respect of antennas, satellite dishes, reflecting and radiant objects, technical examination and identification of space segments in two dimensions or in three dimensions; scientific, technical and technological measurement, characterization, verification, scientific, technical and technological examination, digitization by scanning and sampling electromagnetic fields; industrial analyses; scientific and technological evaluations, estimates and research in the technological fields of data processing, data analysis and data conversion provided by engineers; creation (design, development) of database programs; performance of technical tests, verification, analyses and/or monitoring of signals associated with vehicles and apparatus for locomotion by land, air and water, especially helicopters, rotorcraft and drones; scientific, technical and technological development, optimization, performance monitoring and testing for methods, algorithms, processing and software modules for the computer processing of signals relating to vehicles and apparatus for locomotion by land, air and water, especially helicopters, rotorcraft and drones; inspections (technical verification), technical tests, technical analyses and/or monitoring of system algorithms for the generation of data; engineering services in the field of performance monitoring and inspection relative to vehicles and apparatus for locomotion by land, air or water, especially helicopters, rotorcraft and drones; engineering services in the field of signal checking and verification; engineering services in the field of developing algorithms and methods for the computer processing of signals; scientific evaluation and estimation for the generation and delivery of results especially in the form of analysis reports, graphs, tables and charts; scientific and technological services, and associated research and design, provided by engineers, in the field of data processing, data analysis and data conversion; scientific, technical and technological studies, development of telecommunication networks

and radio communication networks relating to vehicles and apparatus for locomotion by land, air or water, especially helicopters, rotorcraft and drones; design, development and updating (for third parties) of software (recorded/stored programs) for the management, administration, architecture, configuration, and protection of local or remote networks for voice, image, data and multimedia data communication networks associated with vehicles and apparatus for locomotion by land, air or water, especially helicopters, rotorcraft and drones; design, development and updating (for third parties) of software (recorded/stored programs) for the design, development, management and securement of access to computer networks and to Internet protocol (IP) networks, programming and maintenance of computer software for military and aeronautic applications; installation of and development of new software products for military or aeronautic applications; network security services to assess, monitor and control data security within information technology networks; scientific and technological services, namely providing data generated by earth observation satellites, precision measuring of relief models, physical measuring (characterization of objects observed from the ground according to spectral signatures, atmospheric influence, geometric and radiometric modeling from on-board cameras); research and design in the field of satellite imaging and the exploitation for related data, namely design of processing methods for observation satellite data, development of processing protocols for exploiting satellite data with a view to producing geographical information and engineering in connection with programming aerial photographs from a network of observation satellites; industrial analysis and research services in the field of satellite imagery and the exploitation of the data relating thereto; research in radar, mapping radar; design and development of computers and software; recovery of databases; environmental protection consultancy; conversion of data and computer programs (other than physical conversion); computer software design; technical project studies; surveying; oil-field surveys; geological surveys; geological research; analysis for oil-field exploitation; land surveying; oil prospecting; urban planning; computer programming; creating and maintaining web sites on behalf of others; geological prospecting; research services in the field of cartographic products, land cover maps and land registers; technical information and inquiry services rendered by engineers relating to the presentation of on-line images generated by satellites, in particular geographical images, geographical maps and topographic base maps composed of images generated via satellite or aerial; technical information and inquiry services rendered by engineers relating to the following products: images generated by satellites, in particular geographical images, geographical maps and topographic base maps consisting of images generated by satellites or aeriels; computer aided services concerning the scientific treatment and analysis of aerial or satellite photographs (monochrome or multi-spectral); services of physicist, engineer or computer scientist in connection with computer-aided services in relation to the processing of aerial photographs, satellite recordings (monochrome or multispectral); design of global digital elevation models databases; scientific and technological services, namely providing data generated by earth observation satellites, precise relief measurement, measurement physics (characterization of objects observed on the ground on the basis of their spectral signatures, influence of the atmosphere, geometric and radiometric modeling by on-board cameras); scientific and research applications, studies and projects for developing and validation purposes of geo-data relating to digital elevation models; research and design services in the field of satellite imagery and exploitation of related data, namely design of processing methods for related data, namely design of processing methods for observation satellite data, development of processing protocols for exploiting satellite data with a view to producing

geographical information and engineering in connection with programming aerial photographs from a network of observation satellites; industrial analysis and research services based on digital elevation models for applications in processing and orthorectification of other geo-data, mapping, modeling of geo-physical processes on telecommunication industry as well as logistic and safety applications in transportation (aviation, vehicles); analysis for oil design, real-time visualization and mobile systems and configuration of the same for usage on appropriate computer hardware.

Class 45

Legal counseling; services of a franchiser, namely granting of licenses, management of copyright; legal consultancy; flight security guard services; negotiation and exploitation of industrial property rights and copyright, in particular through granting of licenses and know-how licenses for industrial property rights and copyright, valuation of industrial property rights and copyright; security services; firefighting services, police protection services, military protection services, custom authorities' protection services; flight safety services, in particular the provision of information and advice regarding flight safety, technical and operational audits and risk management strategies; crisis intervention planning consultancy; consultancy to defense and security related missions.
