Information Contained in This Journal

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

GENERAL INFORMATION

References to “section” and “rule” in these notes are references to that section of the Trade Marks Act (Cap. 332, 1999 Ed.) and that rule of the Trade Marks Rules, unless otherwise stated.

Trade Marks Journal

This Journal is published by the Registry of Trade Marks in accordance with the direction of the Registrar under rule 86A.

Request for past issues published more than three months ago will have to be made in writing and is charged at \$12 per issue. It will be reproduced in CD-ROMs and it is to be collected at the following address:

Registry of Trade Marks

Intellectual Property Office of Singapore
51 Bras Basah Road #04-01
Plaza By The Park
Singapore 189 554

This Journal is published every Friday and on other days when necessary.

Official working hours of the Registry

The official working hours of the Registry are as follows:

Monday to Friday	: 0830 hours to 1730 hours
Saturday, Sunday and Public Holidays	: Closed

Payment at the counter should be made during the following time period:

Monday to Friday	: 0830 hours to 1700 hours
------------------	----------------------------

Enquiries

For enquiries relating to official notices and other information appearing in the Journal, please contact the Registry at the following telephone number:

6339-8616

Information on trade marks is available at the Registry's web site at:

<http://www.ipos.gov.sg>

Making Payment

IPOS accepts:

1. Payment by cheque (crossed), money order and bank draft (in Singapore Dollars and drawn on banks operating in Singapore). These should be addressed to the **Intellectual Property Office of Singapore**.
2. Payment by NETS, GIRO, CashCard, eNets Debit (Internet Banking), eNets Credit (Credit Card).

Information on the payment modes is available at the Registry's web site (<http://www.ipos.gov.sg>).

**PRACTICE DIRECTION NO. 1 OF 2009
HOURS OF BUSINESS AND EXCLUDED DAYS**

This Practice Direction is issued by the Registrar under Section 78 of the Trade Marks Act, to specify the hours of business of the Registry and the days which are to be treated as excluded days:

This Practice Direction will come into effect on 1st day of June, 2009.

A. Hours Of Business

Subject to rules 79(4) and 79(6A) of the Trade Marks Rules, the hours of business of the Registry shall be 8.30 am to 5.30 pm from Monday to Friday, except on a day which is an excluded day.

B. Excluded Days

- (1) All Sundays, public holidays and such other days as the Registrar may specify, shall be excluded days for all purposes under the Act and the Rules.
- (2) All Saturdays shall be excluded days for any business under the Trade Marks Act and Rules, where the time for doing the business expires on that date and where the business was not done by that date.

Dated this 14th day of May, 2009

PRACTICE DIRECTION NO. 3 OF 2006

HOURS OF BUSINESS AND EXCLUDED DAYS

This Practice Direction is issued by the Registrar under Section 78 of the Trade Marks Act, to specify the hours of business of the Registry and the days which are to be treated as excluded days.

This Practice Direction will come into effect on 15 December 2006.

A. Hours Of Business

Subject to rules 79(4) and 79(6A) of the Trade Marks Rules, the hours of business of the Registry shall be as follows:

- (a) 8.30 am to 12.30 pm and 1.30 pm to 5.30 pm from Monday to Friday, except on a day which is an excluded day; and
- (b) 8.30 a.m. to 1.00 p.m. on any Saturday which is not an excluded day.

B. Excluded Days

- (1) All Sundays, public holidays and such other days as the Registrar may specify, shall be excluded days for all purposes under the Act and the Rules.
- (2) Subject to B(1), all Saturdays shall be excluded days for any business under the Trade Marks Act and Rules, where the time for doing the business expires on that date and where the business was not done by that date.

Dated this 15th day of November 2006.

PRACTICE DIRECTION NO. 2 OF 2005

REGISTRATION AS ACCOUNT HOLDER TO E-FILE AND PAY BY GIRO

This Practice Direction is issued by the Registrar under Rule 78B(1) of the Trade Marks Rules, to specify the procedure for applying to the Registrar to be registered as an account holder.

This Practice Direction will come into effect on 1 January 2006.

Any person who wishes to use eTrademarks to effect a transaction and make payment by GIRO must register with the Intellectual Property Office of Singapore (IPOS) as an Account Holder. Approval is at the sole discretion of IPOS. Upon approval, an eTrademarks account will be created in the name of the person and the person will receive a User ID and Password.

To register, access IPOS address at <http://www.ipos.gov.sg> and [download the eTrademarks Account Holder Registration Form](#).

The person may appoint an Administrator to administer and manage his eTrademarks Account through the eTrademarks "[Maintenance of Authorised Representatives](#)" service.

The responsibilities of the Administrator are as follows:

- appointment of one or more Representatives to access eTrademarks and make payment by GIRO on behalf of the Account Holder;
- updating of the particulars of the Representatives; and
- removal of any Representative's rights to access eTrademarks and make payment by GIRO on behalf of the Account Holder.

These responsibilities are to be conducted through the eTrademarks "Maintenance of Authorised Representatives" service.

Please note that all Authorized Representatives must be CPF account holders with SingPass. The Authorized Representatives are required to sign in using their SingPass to ensure security for GIRO deductions for the online transactions. If the person does not have a GIRO account with IPOS, please complete the [GIRO Application Form](#) and submit it to IPOS.

The completed eTrademarks Account Holder Registration Form and GIRO Application Form should be mailed or couriered to the Intellectual Property Office of Singapore with the address 51 Bras Basah Road #04-01 Plaza By The Park Singapore 189554 and attentioned to Mrs Ang-Ong Bee Lian. Fax submissions are not acceptable.

Dated this 30th day of December 2005.

PRACTICE DIRECTION NO. 2 OF 2004

HOURS OF BUSINESS AND EXCLUDED DAYS

This Practice Direction is issued by the Registrar under Section 78 of the Trade Marks Act, to specify the hours of business of the Registry and the days which are to be treated as excluded days.

This Practice Direction will come into effect on 1 July 2004.

Hours Of Business

- (1) The hours of business of the Registry shall be as follows:
 - (b) 8.30 am to 12.30 pm and 1.30 pm to 5.30 pm from Monday to Friday, except on a day which is an excluded day; and
 - (b) 8.30 a.m. to 1.00 p.m. on any Saturday which is not an excluded day.
- (2) Notwithstanding paragraph (1), for the purposes of carrying out of any transaction referred to in rule 78A(2) by means of the electronic online system, the Registry shall be taken to be open every day at all hours, except on any day which is an excluded day for the purposes of carrying out of transactions by means of the electronic online system.

Excluded Days

- (1) All Sundays, public holidays and such other days as the Registrar may specify, shall be excluded days for all purposes under the Act and the Rules.

Dated this 1st day of July 2004.

CHIAM LU LIN
ACTING REGISTRAR
REGISTRY OF TRADE MARKS

NOTICES AND INFORMATION PERTAINING TO TRADE MARK APPLICATION AND REGISTRATION PROCEDURES

A) GENERAL

Pre-2004 Circulars

Amendment to Specification

Presently, whenever the Registrar raises an objection to the specification of goods or services, the agent representing the applicant would write to the Registrar with a proposed amendment to the specification. Only if the Registrar agrees to the proposed amendment will the agent file Form TM 27 to effect the amendment. The processing of such letters by the Registrar slows down the registration process considerably.

To shorten the registration process, agents should file Form TM 27 to effect the amendment straightaway instead of writing to the Registrar for her confirmation. If agents are relying on precedents in support of the amendment, they should enclose such precedents with the Form TM 27.

Certificates of Registration

The Trade Marks Act 1998 was revised on 30 December 1999 and accorded the same chapter number as the repealed Trade Marks Act, that is, chapter 332. To facilitate the Registry's operations, for both applications made under the repealed Trade Marks Act and applications made under the Trade Marks Act 1998 which have been accepted for registration and are not subject to opposition proceedings, the Registrar will issue certificates of registration which are headed:

SINGAPORE
TRADE MARKS ACT
(CHAPTER 332)
CERTIFICATE ISSUED UNDER SECTION 15(5)

Description of Device on Form TM 4

The purpose of the description of device on Form TM 4 is to assist the Registrar in conducting a search for conflicting marks. The description need not be too detailed; a general description is sufficient.

Disclaimers of Chinese Characters and Foreign Characters

A disclaimer relating to Chinese characters is published in the Journal as follows:

Registration of this mark shall give no right to the exclusive use of the Chinese character(s) of which the hanyu pinyin is "_____".

For characters other than Chinese characters (for example, Japanese characters), the disclaimer reads:

Registration of this mark shall give no right to the exclusive use of the _____ character(s) of which the transliteration is "_____".

Examination Practice With Respect to Colours in Marks

To avoid any confusion, this notice documents the Registrar's practice in relation to the examination of :

- (i) trade marks consisting solely of colours; and
- (ii) trade marks consisting of colours as a component or as an element in combination with other elements or components.

Such examination practice has been effected by the Registrar in relation to both national applications and international registrations designating Singapore.

(i) Trade Marks Consisting Solely of Colours

Where the trade mark consists solely of colours, the Registrar will need to be satisfied that the colours per se are capable of distinguishing the applicant's goods or services from those dealt with by others. As it will be necessary to determine the precise scope of such a claim, it will be necessary for the applicant to provide a description of the claim in the application form. For the purpose of an illustration, if the trade mark sought for registration is the colour "neon pink" and the colour is applied to the packaging of the goods, an appropriate description would be: "The trade mark is the colour neon pink as applied to an aspect of packaging of the goods as claimed as shown in the representation of the mark on the application form". Such a description will enable the Registrar to examine the mark as filed.

(ii) Trade Marks Consisting of Colours As a Component of the Mark

Where the trade mark consists of colours in combination with other elements such as a letter, word, name, signature, numeral, device, brand, heading, label, ticket, shape, aspect of packaging, the trade mark will be examined as a whole. If the trade mark as a whole is capable of distinguishing the applicant's goods or services from those dealt with by others, the trade mark will be registered as filed, that is, in the colours as filed. The Registrar does not require a colour limitation in such a case. The Registrar will also not seek to clarify whether the colour(s) as an element of the mark constitute a distinctive feature of the mark or not as the mark will be examined as a whole and registration rights will be conferred on the mark as a whole.

Mark Numbers Preceded by the Letter "L"

Search reports obtained from the Registry and examination letters issued by the Registrar may contain references to marks with numbers preceded by the letter "L" instead of the letter "T". These are marks which have been recorded with the Registrar for purposes of rule 13. The prefix "T" refers to marks which are the subject matter of trade mark applications or registrations.

(Multiple Classes, this circular was removed on 3 July 2009)

Representation of Marks

Marks published in the Journal and reflected on the certificates of registration appear exactly as represented on the application forms. Applicants and agents are reminded to provide clear representations of marks on the application forms. The marks should also be of reasonably large size (but not larger than A4) to ensure that all the features are clearly shown.

Series Clause

For applications for registration published in the Gazette on or after 15 January 1999 for opposition purposes, the series clause should read as follows:

"Application for a series of _____ (number) marks."

Service of Documents in Opposition, Revocation, Invalidation and Rectification Proceedings

When filing notices of opposition, counter-statements and applications for revocation, invalidation or rectification with the Registrar, a copy of the same must be served on the relevant party or parties concerned. Please refer to Rules 29, 30, 31, 32, 56, 57, 58, 65, 66 and 66A of the Trade Marks Rules as amended by the Trade Marks (Amendment) Rules 2000.

The requirement of service of evidence on the relevant party or parties concerned remains unchanged. Please refer to Rules 32, 33, 34, 56, 59 and 66A.

It would be greatly appreciated if trade marks agents filing the aforesaid documents with the Registrar could indicate in their covering letters that they have served the necessary on the relevant party or parties concerned in compliance with the Rules.

Validity of Priority Claims

Under Section 10 of the Trade Marks Act 1999, a person may claim a right of priority for the registration of a trade mark from the date on which a corresponding application was filed in a "Convention country" ("Convention application") if the application for the registration of the trade mark is filed within 6 months after the date on which the Convention application is made. A "Convention country" refers to a country or territory, other than Singapore, which is a party to the Paris Convention or a member of the World Trade Organisation. For the purpose of assessing the validity of a priority claim, IPOS will assess whether the "Convention application" was filed in a relevant country which has already become a Convention country as at the date of the filing of the Convention application in the Convention country.

For example,

Trademark application filed in country A on 3 Oct 2001.

Country A became a member of the Paris Convention or WTO on 2 Jan 2002.

Trademark application filed in SG = 3 Feb 2002 (claims priority of earlier application in country A).

Question: Is the claim to priority (application filed in country A) in the Singapore application valid?

Answer: No

2004 Circulars

(Application to Register a Change in Ownership (TM 22), Circular No. 13/2004, dated 18 June 2004. This circular is replaced by Circular No. 3/2008, dated 1 February 2008)

(Application to Register a Licensee (TM 37), Circular No. 13/2004, dated 18 June 2004. This circular is replaced by Circular No. 24/2007, dated 29 June 2007)

(Marks published for opposition purposes, Circular No. 16/2004, dated 2 July 2004. This circular is replaced by Circular No. 8/2009, dated 3 July 2009).

Applications for registration of sound marks (Circular No. 25/2004, dated 17 December 2004)

To assist the Registrar in the examination of applications for registration of sound marks, the Registrar may request the applicant to submit 2 copies of a CD-ROM recording of the sound mark sought for registration.

2005 Circulars

(Translation of Non-English words, Circular No. 4/2005, dated 30 March 2005. This circular is replaced by Circular No. 17/2007, dated 7 May 2007)

Amendment of Typographical Errors in Class Numbers in Form TM 4 (Circular No. 21/2005, dated 21 October 2005)

An amendment of the class number in Form TM 4 may be amended by lodging Form TM 27 with fee for each amended class of goods / services, but only if

- (i) a re-search in the new amended class revealed no prior conflicting marks;
- (ii) all of the items in the specification did not fall under the class as filed but in one other class; and
- (iii) that mistake was obvious to a third party inspecting the Register.

Three examples have been provided for illustrative purposes.

Example 1:

An application was filed in Class 5 in respect of "clothing, hats and shoes". An amendment of the class number from "5" to "25" would be allowed.

Example 2:

An application was filed in Class 5 in respect of "all goods in this class". An amendment of the class number from "5" to "25" would not be allowed because it would not be obvious to a third party inspecting the Register that the correct class intended to be claimed was Class 25 and not Class 5. It was possible that the applicant intended to claim all goods in Class 5.

Example 3:

An application was filed in Class 5 in respect of "clothing, hats and pesticides". An amendment of the class number from "5" to "25" would not be allowed, even with the deletion of the item, "pesticides" because it would not be obvious to a third party inspecting the Register that the correct class intended to be claimed was Class 25 and not Class 5. Since "pesticides" was correctly claimed in Class 5, it was possible that the applicant intended to claim "pesticides" in Class 5 but had incorrectly classified "clothing and hats" in Class 5 as well. It would be necessary for the applicant to file a fresh application in Class 25 in respect of "clothing and hats".

Trade Marks Act (Chapter 332) (2005 Revised Edition) (Circular No. 24/2005, dated 16 December 2005)

Pursuant to Order Under Section 11(3) of the Revised Edition of the Laws Act (Chapter 275) [S 467/2005], the Trade Marks Act (2005 Revised Edition) came into operation on 31 July 2005.

The following provisions in the 1999 Revised Edition of the Trade Marks Act have been renumbered by the Law Revision Commissioners in the 2005 Revised Edition:

Statutes (Miscellaneous Amendments) (No. 2) Act 2005 (Act No. 42 of 2005) (Circular No. 25/2005, dated 23 December 2005)

Section 21 of the Statutes (Miscellaneous Amendments) (No. 2) Act 2005 which amends the Trade Marks Act will come into operation on 1 January 2006.

A summary of some of the amendments to the Trade Marks Act (Cap. 332, 2005 Ed.) are:

(a) Convention country

The definition of “Convention country” in section 2(1) is amended to provide that except in section 10 and paragraph 13 of the Third Schedule (claiming priority) “Convention country” includes Singapore.

(b) Examination of application for registration

An application for registration will be treated as withdrawn if the applicant fails to respond to the Registrar’s queries or objections regarding the registrability of the trade mark within the period specified by the Registrar for doing so.

The Rules, which are being amended to come into operation on 1 January 2006, will deal with restoration of applications which are treated as withdrawn and the conditions for such restoration.

(c) Collective marks

An application for registration of a collective mark will be treated as withdrawn if the applicant fails to file the regulations governing the use of the mark, pay the prescribed fee for lodging the regulations, or respond to the Registrar’s queries or objections regarding the registrability of the trade mark, within the period specified by the Registrar for doing so.

The Rules, which are being amended to come into operation on 1 January 2006, will deal with restoration of applications which are treated as withdrawn and the conditions for such restoration.

(d) Certification marks

An application for registration of a certification mark will be treated as withdrawn if the applicant fails to file the regulations governing the use of the mark, pay the prescribed fee for lodging the regulations, or respond to the Registrar’s queries or objections regarding the registrability of the trade mark, within the period specified by the Registrar for doing so.

The Rules, which are being amended to come into operation on 1 January 2006, will deal with restoration of applications which are treated as withdrawn and the conditions for such restoration.

Trade Marks (Amendment) Rules 2005 Notification (Circular No. 27/2005, dated 30 December 2005)

Trade Marks (International Registration) (Amendment) Rules 2005 Notification (Circular No. 27/2005, dated 30 December 2005)

The above Notifications were gazetted on 28 December 2005 and it declared that the Trade Marks (Amendment) Rules 2005 and Trade Marks (International Registration) (Amendment) Rules 2005 would come into operation on 1 January 2006.

Trade Marks (Amendment) Rules 2005

The following is a summary of some of the amendments in Trade Marks (Amendment) Rules 2005 which will come into force on 1 January 2006:

(a) Rule 7 : Service of documents

Non-fee bearing documents (except documents pertaining to hearings) may be sent to the Registry by facsimile transmission. However, each facsimile transmitted document must be legible and the responsibility for ensuring legibility rests with the sender.

(b) Rule 9 : Address for service

An address for service indicated on Form TM 19 and Form TM 24 is effective only for renewal matters and does not become the proprietor's address for service for all other matters pertaining to that trade mark.

(c) Rule 21 : Deficiencies in application

The amendment clarifies the actions that will be taken by the Registry if minimum filing requirements are not met.

(d) Rules 32, 33, 34 : Extension of time to file evidence by way of a statutory declaration in opposition/revocation/invalidation/rectification proceedings

The second and subsequent requests for extension of time to file evidence by way of a statutory declaration in opposition/revocation/invalidation/rectification proceedings have to be made on Form TM 50, for which a fee will be imposed.

(e) Rule 50 : Notice of renewal

The Registrar's notice to the proprietor informing him of the date of expiry of the trade mark registration will be sent to the proprietor's address for service for renewal purposes, that is, the address for service indicated on Form TM 19 or Form TM 24, if one has been lodged, or if none, to the proprietor's address for service.

(f) Rule 77B : Restoration of applications treated as withdrawn

Applications which are treated as withdrawn under the Act or Rules by reason that the applicant has failed to do any act on time may be restored by filing Form TM 40 with fee within three months from the date of the Registrar's notice informing the applicant of that fact.

(g) Removal of Forms TM 9, TM 14, TM 15 and TM 16

Forms TM 9, TM 14, TM 15 and TM 16 have been removed and Forms TM 4, TM 11, TM 12 and TM 13 respectively will be used in their place.

Trade Marks (International Registration) (Amendment) Rules 2005

The following is a summary of some of the amendments in the Trade Marks (International Registration) (Amendment) Rules 2005 which will come into force on 1 January 2006:

(a) Rule 5 : Specification of Goods/Services

The amendment clarifies that the Registrar is entitled to raise an objection against vague terms in the specification of goods / services of an International Registration designating Singapore.

(b) Rule 28 : Notification to International Bureau

The amendment clarifies that in relation to an international application, the Registry will notify the International Bureau where the basic application is treated as withdrawn and is not restored in accordance with the Trade Marks Rules.

Amendment of Trade Mark Forms

Some trade mark forms have been revised and the revised forms are to be used from 1 January 2006. A separate edition of the Trade Marks Journal containing a consolidation of forms to be used in proceedings before the Registrar will be available online at www.ipos.gov.sg from 30 December 2005.

The changes made to the forms are as follows:

- (a) All forms have been amended to incorporate information on the estimated time needed to complete the form.
- (b) Amendments have also been made to Forms TM 1, TM 4, TM 11, TM 12, TM 13, TM 19, TM 22, TM 24, TM 37 and MP 1.
- (c) Form TM 4, TM 11, TM 12 and TM 13 will now be used in place of Forms TM 9, TM 14, TM 15 and TM 16 respectively.
- (d) The Trade Marks (Amendment) Rules 2005 also introduce:
 - I. Form TM 40 for restoration of an application treated as withdrawn. The fee for this form is \$130; and
 - II Form TM 50 for second and subsequent requests for extension of time to file evidence by way of a statutory declaration in opposition/revocation/invalidation proceedings. The fee for this form is \$100 in respect of each trade mark.

2006 Circular**The State of Incorporation** (Circular No. 30/2006, dated 27 October 2006)

Please note with respect to companies incorporated in the United States of America, the state of incorporation must be indicated on all trade marks forms. This is because companies incorporated in different states of America are separate and distinct legal entities.

If the state of incorporation of a United States of America company is not indicated on Form TM 4, a Form TM 26 will be required for the insertion of the state of incorporation.

2007 Circulars

Trade Marks (Amendment) Act 2007 (Act No. 3/2007) (Circular No. 7/2007, dated 14 February 2007)

The Trade Marks (Amendment) Act 2007 has been passed by Parliament on 22 January 2007 and has received Presidential assent on 1 February 2007.

Some of the key amendments include:**Provision for multiple class registration**

Registration for trademarks is presently based on single classes. The amendments will now allow for a multi-class registration. A multi-class registration allows for one single application in multiple classes of goods and services to lead to one registration. Upon registration, the registration is maintained as one, resulting in the need to renew only once for the renewal to be effective for all the classes of goods and services registered.

Division of an application for registration

To complement a multiple-class system, it is now possible to divide a trademark application into two or more applications. A trademark applicant may divide up his application into two or more applications so that those classes of goods or services that do not face opposition or objection can proceed to registration first. Division will therefore expedite trademark registration where appropriate.

Relief Measures for Procedural Oversight

The Act also provides for relief measures to alleviate procedural mistakes by trademark applicants, notably missed time limits. The relief measures provide the avenue for a trademark applicant to maintain the rights in an application that has been filed, even when time limits have been missed.

Registration of Licence of Pending Trademarks

The amendments will now allow for registration of licences relating to pending trademarks. Prior to the amendments, only licences relating to registered trademarks can be recorded on the register.

The Trade Marks (Amendment) Act 2007 will come into operation on a date to be notified.

A copy of the Trade Marks (Amendment) Act 2007 can be purchased at SNP Corporation Ltd (www.snpcorp.com/webshop/).

Cautionary Notice on Unsolicited Mail about Unofficial Registration Services (Circular No. 13/2007, dated 11 April 2007)

It has been brought to our attention that trade mark proprietors and/or agents whose trade marks have been published in recent IPOS Trade Marks eJournals are receiving letters from companies for payments for unofficial registration services.

These companies use names, abbreviations or emblems that appear to be “official” and send out letters which resemble invoices to trade mark proprietors and/or agents with details of the proprietor, the trade mark, class(es) of goods or services, etc. These companies will offer to register marks in registers or publications for a fee, and in return, claim they will send the respondent a copy of the publication.

Please treat such letters as unsolicited mails. These companies are neither related to nor connected with IPOS. There is no obligation to pay for such services as they are not official services.

The only office constituted under Singapore laws that provides registration services for trade marks in Singapore is our office, the Intellectual Property Office of Singapore (IPOS).

Upon receiving such letter or invoice, if you are in any doubt, please consult your trade mark agent, your lawyer, or email us for clarification.

Amendments to the Trade Marks Act, the Trade Marks Rules and the Trade Marks (International Registration) Rules (Circular No. 17/2007, dated 7 May 2007)

The Trade Marks (Amendment) Act 2007, the Trade Marks (Amendment) Rules 2007 and the Trade Marks (International Registration) (Amendment) Rules 2007 have been gazetted and will come into force on 2 July 2007.

The (Amendment) Act and (Amendment) Rules can be purchased at SNP Corporation Ltd (www.snpcorp.com/webshop/).

Trade Marks (Amendment) Rules 2007

The following is a summary of some of the amendments in Trade Marks (Amendment) Rules 2007:

(a) Rule 17 : Division of applications for registration

An application for registration may be divided, at the request of the applicant, into 2 or more separate applications for registration. The request for division is to be made on Form TM 8 and a fee of \$280 is chargeable for each new divisional application created.

(b) Rule 22 : Amendment of application

Form TM 27 (Request to change the details of an application for registration) will no longer be used. In its place are Forms TM 27A and TM 27B. Form TM 27A is chargeable on a per class basis while Form TM 27B is chargeable on a per trade mark basis.

Form TM 27A is to be used for amendments pertaining to the class number, the specification of goods or services to which the application for registration relates, or the particulars of any claim to a right of priority included in the application for registration.

Form TM 27B is to be used for any other amendment not involving the above.

(c) Rule 56 : Application to alter registered trade mark

The proprietor of a registered trade mark may apply to the Registrar on Form TM 27B for alteration of the registered mark. Form TM 35, the form which is currently used, will no longer be used as from 2 July 2007.

(d) Rule 57 : Rectification of an error or omission in the register

An application to the Registrar for the rectification of an error or omission in the register may be made by the proprietor of a registered trade mark or by any other person.

Where the application is made by the proprietor of a registered trade mark, the amendment shall be made on –

- (a) Form TM 27A, where the amendment pertains to the class number, the specification of goods or services to which the registration relates, or the particulars of any claim to a right of priority;
- (b) Form TM 27B, for any other amendment not involving the above.

Where the application for rectification is made by any other person, the application shall be made on Form TM 28.

(f) Rule 77B : Reinstatement of application, right or thing

Subject to certain exceptions, an applicant, proprietor or other interested person who has missed a time limit for action before the Registry, may apply on Form TM 40 to have his rights reinstated, if:

- 1) the request for reinstatement is made within 6 months from the date of expiration of the time limit;
- 2) the omitted act is completed together with the request; and
- 3) the failure to comply with the time limit is unintentional.

Trade Marks (International Registration) (Amendment) Rules 2005

The Trade Marks (International Registration) (Amendment) Rules 2007 has been amended to make it clear that division does not apply to international registrations designating Singapore.

Amendment of Trade Mark Forms

Some trade mark forms have been revised and the revised forms are to be used from 2 July 2007. A separate edition of the Trade Marks Journal containing a consolidation of all Trade Mark forms will be available for sale from 29 June 2007.

The changes made to the forms are as follows:

(a) All forms have been amended to indicate whether the fee for that particular form is payable on a per class, per trade mark or per form basis. The fee structure is as shown in the table below.

Per form basis	Per trade mark basis	Per class basis
TM 26	TM 1	TM 4
MP 3	TM 7	TM 11
	TM 10	TM 12
	TM 20	TM 13
	TM 22	TM 19
	TM 27 B	TM 21
	TM 29	TM 24
	TM 30	TM 27 A
	TM 31	TM 28
	TM 33	TM 32
	TM 34	TM 44
	TM 37	TM 45
	TM 38	TM 50
	TM 39	MP 1
	TM 40	MP 2
	TM 42	
	TM 46	

(b) Where fees are payable on a per class basis, such as renewal forms and opposition forms, the class numbers affected by the request, are to be indicated on the form.

(c) Amendments have been made to all forms, with the exception of Form TM 23.

(d) Forms TM 18 and TM 35 have been removed.

(e) Forms TM 8, TM 27A and TM 27B are new.

Translation of Non-English words (Circular No. 17/2007, dated 7 May 2007)

For purposes of rule 20(2), where the mark consists of non-English words, it is not necessary to file with the Registrar a certified translation by a qualified translator. A copy of relevant extracts from relevant dictionaries showing the meaning of each word and the words as a whole in English will be sufficient. However, it will be necessary to indicate on the application form that the mark consists of non-English word/words. A failure to include such an indication on the application form will have to be rectified by the filing of amendment via Form TM 27 with the requisite fee. The applicant should forward to the Registrar the requisite translation and/or the transliteration together with a copy of relevant extracts from dictionaries or relevant certification as soon as possible.

As regards the indication on the application form, it is necessary to submit an accurate and complete translation and/or transliteration of the non-English words in the mark.

Two examples are provided below as illustration.

Example 1:

An application was filed for the mark consisting of three Chinese Characters which is the phonetic equivalent of the Applicant's company name.

菲立士

The transliteration of the Chinese characters of which the mark consists is "Fei Li Shi" which has no meaning and it is the phonetic equivalent of the Applicant's company name "Philips".

An appropriate indication in the Application form may read as:

9 If the mark contains or consists of word(s) not being English word(s), provide the derivation of the word(s). If it is invented, state so. If it can be translated, fill in Part 10 below.	
The Chinese characters of which the mark consists is derived from the Applicant's company name i.e. it is the phonetic equivalent of "Philips"	
10 If the mark contains or consists of non-English word(s), and/or non-Roman character(s), provide the English translation and/or transliteration as follows:	
Representation of the words(s)/ characters	菲立士
Language of word(s)/character(s)	Chinese
Translation of each word(s)/ character(s) and the word(s)/ character(s) taken together as a whole	Translation of the Chinese characters as a whole: no meaning. It is the phonetic equivalent of the Applicant's company name "Philips".

		(Enclosed dictionary exact/ Certified translation/ supporting document of the same)	
	Transliteration of character(s)	Transliteration of the Chinese characters: "Fei Li Shi".	

Example 2:

An application was filed for the mark consisting of two Chinese Characters and the word "SINGER" (which is part of the Company name).

勝家
SINGER

Company : THE SINGER COMPANY LIMITED

The transliteration of the Chinese characters appearing in the mark is "Sheng Jia" which has no meaning.

An appropriate indication in the application form may read as:

9 If the mark contains or consists of word(s) not being English word(s), provide the derivation of the word(s). If it is invented, state so. If it can be translated, fill in Part 10 below. The Chinese characters "勝家" appearing in the mark is used to denote a brand name of Singer's product.	
10 If the mark contains or consists of non-English word(s), and/or non-Roman character(s), provide the English translation and/or transliteration as follows:	
Representation of the words(s)/ characters	勝家
Language of word(s)/character(s)	Chinese
Translation of each word(s)/ character(s) and the word(s)/ character(s) taken together as a whole	Translation of the Characters as a whole: no meaning. (Enclosed dictionary exact/ Certified translation/ supporting document showing meaning of each of the Chinese characters and characters taken as whole)
Transliteration of character(s)	Sheng Jia

Application to Register a Licensee (TM 37) (Circular No. 24/2007, dated 29 June 2007)**(i) Processing Of An Application To Register A Licensee (TM 37)**

An application to register a licence (Form TM 37) filed on or after 2/7/2007, will be processed by the Registry even though the status of the mark is still pending registration. However where the application to register a licence (Form TM 37) was filed before 2/7/2007, it will be processed only after the mark has been registered.

(ii) Licence Commencement Date

The licence commencement date (i.e. the date entered in Part 5 of TM 37) should not predate the date from which the proprietor's rights in the mark accrue. For a trade mark application filed before 1/7/2004, the earliest licence commencement date is the trade mark application date or the priority date, if any. For a trade mark application filed on or after 1/7/2004, the earliest licence commencement date is the trade mark application date.

(iii) Exclusive Licence Periods Do Not Overlap

Where there are 2 exclusive licences or more, the licence periods involving the same goods or services should not overlap.

(iv) Licensed Goods/Services Should Not Be Wider Than Trade Mark Application/Registration

The list of licensed goods or services (Annex of TM 37) should not be wider than those under the trade mark application/registration.

Deficiencies in applications for registration : amendments after filing (Circular No. 28/2007, dated 27 July 2007)

The Registrar has been conducting formalities check on all applications for registration to ensure that they contain all formal requirements under the Trade Marks Act.

Where the application does not comply with the requirements which are essential for a filing date to be accorded, the filing date will not be accorded until all the deficiencies have been rectified. In such cases, the application will be accorded the earliest date on which all essential requirements for filing date are complied with. There is no need for the correction to be accompanied by the relevant amendment form. The essential requirements for filing date are spelt out in section 5(2) and (3) of the Trade Marks Act.

In respect of other deficiencies or irregularities that do not affect the filing date, amendments must be effected through the lodgement of the relevant trade mark forms, such as Form TM 27A, Form TM 27B and Form TM 26.

This practice pertains only to new applications filed with effect from 01 August 2007.

The Geneva Conventions (Amendment) Act (Circular No. 40/2007, dated 5 December 2007)

The Geneva Conventions (Amendment) Act was passed in Parliament on 12 November 2007. Under the Act, the following emblems may not be used in Singapore, unless approval is given by the Ministry of Health:

- Red Cross emblem
- Red Crescent emblem
- Red Crystal emblem
- Red Lion and Sun emblem

			
Red Cross emblem	Red Crescent emblem	Red Lion and Sun emblem	Red Crystal emblem

With the commencement of the Act, the Registrar will object to trade mark applications consisting of or containing these emblems or emblems closely resembling them, under Section 7(5) of the Trade Marks Act, unless consent from the Ministry of Health is furnished. This is so even for applications lodged before the effective date of the Act.

Proprietors of registered trade marks containing or consisting of such emblems, or emblems closely resembling them, should note that in spite of their registration, they have one year from 12 November 2007 to cease using the emblems.

2008 Circulars

Image of e-filed mark (Circular No. 11/2008, dated 4 July 2008)

IPOS has encountered certain electronic trade mark applications which have images of marks that have jagged and blurred edges in our database and the images of the mark will not appear as clear as intended by the applicants in the trade mark journal and certificate of registration. The reason for the blurred image of marks is that applicants attach images of the marks with a lot of background or blank space. To ensure that such images are not too small for viewing purposes, IPOS has to make adjustment to the marks which then result in blurred images.

In order to ensure that the image of mark is accurately captured by IPOS, applicants should crop the mark with little background or blank space and save the image as approximately 480 x 480 pixel. This will remove the need for IPOS to make adjustment to the image in the publication and the registration certificate and the applicant can then obtain clear and accurate image of the mark.

(Translation Clause, Circular No. 12/2008, dated 11 July 2008. This circular was removed on 1 August 2008)

Return of assignment deeds and other registrable transaction documents (Circular No. 14/2008, dated 26 September 2008)

The Registry will stop its practice of returning deeds of assignment and other documents lodged in support of applications for transfer of ownership and recordal of other registrable transactions.

However, should the applicant wish for the return of such documents, he may make his request known at the time of lodgement of the recordal application on a covering letter accompanying the application to that effect. The letter shall provide contact details so that the Registry may make the necessary arrangements for the return of the documents. This practice will affect all applications lodged on or after 1 October 2008.

Launch of e-Communications Portal on 1 December 2008 (Circular No. 17/2008, dated 28 November 2008)**Trade Marks (Amendment) Rules 2008; Trade Marks (International Registration) (Amendment) Rules 2008** (Circular No. 17/2008, dated 28 November 2008)

IPOS will launch the e-Communications Portal on 1 December 2008. The e-Communications Portal is an electronic online system developed by IPOS for the main purpose of facilitating the sending, receipt and exchange of all correspondence, relating to trademark applications and prosecutions, between IPOS and registered account holders. The following firms and companies will be taking part in the pilot scheme that is scheduled for the initial period of 6 months.

DREW AND NAPIER LLC
DONALDSON & BURKINSHAW
ELLA CHEONG SPRUSON & FERGUSON (SINGAPORE) PTE LTD
ALLEN & GLEDHILL LLP
RODYK & DAVIDSON LLP
WONG & LEOW LLC
AMICA LAW LLC
LLOYD WISE
ALBAN TAY MAHTANI & DE SILVA
ONE LEGAL LLC
PATRICK MIRANDAH CO. (S) PTE LTD
HAQ & SELVAM
NAMAZIE & CO
TITO ISAAC & CO LLP
PHILIPS ELECTRONICS SINGAPORE PTE LTD
SAMUEL SEOW LAW CORPORATION

The Trade Marks Rules have been amended to give effect to the sending, receipt and exchange of correspondence via the e-Communications Portal. In particular, the changes in the Rules will:-

- (a) provide for service of documents by the Registrar as well as by applicants by electronic communication through the e-Communications Portal;
- (b) provide for the sending of a true and complete image of the original paper document by electronic communication through the e-Communications Portal for documents that are required to be signed, made on oath or affirmed or are required to be attested;
- (c) provide for the extension of deadlines that fall on excluded days in spite of the availability of the e-Communications Portal;

- (d) treat the date of receipt of documents received by IPOS as the day on which the documents are received by IPOS as long as the time of receipt is before the midnight of the day.

It is to be noted that applicants must still comply with the requirement to provide an address for service under rule 9. The electronic address of these persons, if they are using the eCommunications Portal to send documents to and receive documents from the Registrar, is not intended to be part of their address for service. However, service of documents by electronic communication through the eCommunications Portal is intended to be valid service notwithstanding that there is an address for service filed in accordance with rule 9.

The Trade Marks (International Registration) Rules have also been amended to permit the use of one Form for multiple classes of goods or services for Forms for use in opposition, namely Form TM 11 and Form TM 12.

A copy of the Trade Marks (Amendment) Rules 2008 and the Trade Marks (International Registration) (Amendments) Rules 2008 are available for sale at SNP Corporation Ltd. (<http://www.snpcorp.com/webshop/>).

Application for Renewal of Registration (Form TM 19) (Circular No. 18/2008, dated 12 December 2008)

With effect from 1st January 2009, the Registrar will not be issuing renewal certificates confirming that a mark has been renewed. This is applicable to all applications for renewal of registration (Form TM 19) lodged on or after 1st January 2009.

For applications for renewal made online, the renewal will be processed instantaneously and an acknowledgement of the renewal showing the extended expiry date will be displayed for printing. These acknowledgements of renewal will remain available for printing for a period of one month from the renewal application date. In very limited circumstances, such as where there are pending applications affecting the validity of the trade mark, instant renewal will not be possible and the applicant will be notified that the acknowledgement of renewal will be posted in due course.

Where the application for renewal is posted or submitted over the counter, the applicant will not be receiving any acknowledgement from the Registry. The onus will be on the applicant to check the expiry date of the mark at www.etrademarks.gov.sg within 2 weeks of lodgement of the application for renewal of registration (Form TM 19) to confirm that the expiry date has been extended by the Registry. If the expiry date has not been extended, applicants are advised to contact our Renewal Officer at 63302 707 immediately for assistance.

This change in practice does not apply to Late Application for Renewal of Registration (Form TM 24) and Application for Restoration and Renewal of Registration Removed from the Register (Form TM 21).

To reflect the change in practice in Form TM 19, an information note has been incorporated into the form. This revised form should be used from 1st January 2009.

A copy of the revised Form TM 19 will be available for downloading by end of December 2008 at www.ipos.gov.sg.

2009 Circulars**Trade Marks Work Manual** (Circular No. 5/2009, dated 24 April 2009)

The Registry of Trade Marks has added six new chapters to the existing Trade Marks Work Manual. The six new chapters cover the following topics:

- (1) Marks contrary to public policy or morality;
- (2) Names and representation of famous people, building, etc;
- (3) Other grounds of refusal;
- (4) Deceptive marks;
- (5) Licences; and
- (6) Slogans.

You may access the Trade Marks Work Manual online at:

<http://www.ipos.gov.sg/leftNav/tra/IP+Resources.htm>

Marks published for opposition purposes (Circular No. 8/2009, dated 3 July 2009)

The following types of publication in the Trade Marks Journal are subjected to opposition:

	Notice of Opposition via <u>Form</u>
1) Application published before registration;	TM 11
2) Collective or certification marks published before registration;	TM 11
3) Alteration to registered marks;	TM 11
4) Amendment to regulations governing use of collective or certification marks;	TM 11
5) Application amended after publication	TM 11

With respect to items 3)-5), the ground(s) stated in the Notice of Opposition must be confined strictly to the alteration or amendment. The Notice of Opposition must be lodged within 2 months from the date the alteration or amendment is published in the Trade Marks journal. If an extension of time to file the notice of opposition is required, the request must be filed using Form TM 48 within 2 months from the date of publication of the alteration or amendment. The maximum extension of time for filing Notice of Opposition is 4 months from the date of publication of the alteration or amendment. Rules 29(2) to (8) and 31 to 40 apply to these oppositions with the necessary modifications.

Costs for attending Case Management Conferences and Pre-Hearing Reviews (Circular No. 10/2009, dated 28 August 2009)

In opposition, invalidation and revocation proceedings for trade mark applications or registrations, the Registrar has, as a matter of course, directed parties to attend case management conferences and pre-hearing reviews at the appropriate time for the purpose of achieving a just, expeditious and economical disposal of the matter pursuant to the power conferred on the Registrar in the Trade Marks Rules. The Registrar will treat the costs for attending such case management conferences and pre-hearing reviews in the same vein as for attending interlocutory hearings, which costs may be included as party and party costs under rule 73 of the Trade Marks Rules to be awarded to the successful party at the end of the proceedings.

B) PERTAINING TO COLLECTIVE AND CERTIFICATION MARKS**Pre-2004 Circular****Publication of Collective Mark and Certification Mark Applications**

Collective mark and certificate mark applications are published in the Trade Marks Journal for opposition purposes before protection is granted. They are published in a separate section of the Trade Marks Journal titled "Collective and Certification Marks Applications Published for Opposition Purposes". Pursuant to the First and Second Schedules of the Trade Marks Act (Cap. 332, 1999 Ed.), the Regulations governing the use of the collective and Certification Marks are available for inspection at the Registry of Trade Marks.

2004 Circular

Regulations Governing the Use of Certification/Collective Marks (Circular No. 7/2004, dated 19 March 2004)

The filing with the Registrar of regulations governing the use of certification or collective marks under rule 63 of the Trade Marks Rules must be accompanied by Form TM 10. Regulations filed without Form TM 10 will not be recognised and will be returned. The filing of TM 10 without regulations attached will also be rejected.

C) PERTAINING TO FORMS**Pre-2004 Circular****Form TM 26**

A request to change the name, address or other particulars (except trading nature) of an applicant for registration, proprietor of a registered trade mark or other interested person, where the change does not affect the representation of the trade mark, should be made on Form TM 26.

2004 Circulars**Form TM 26 Notification Letter** (Circular No. 8/2004, dated 26 March 2004)

Please note that the main purpose of the Notification Letter is to inform as to the fact that the name and/or address of the applicant/proprietor has/have been updated. Thus, the Notification Letter cannot be treated as conclusive as to the status of marks reflected therein.

Where there is no reply within the given period to our latest examination report, an application will be updated as abandoned notwithstanding any interim Notification Letter from the Registrar.

Form TM 1 [Request to appoint or change an agent or to enter or change an address for service] (Circular No. 18/2004, dated 30 July 2004)

One Form TM 1 may be used for multiple trade mark numbers. However, the fee for this form is still charged on a per trade mark number basis unless the request is to alter an agent's name and/or address for service which does not affect the legal entity of the agent. In such a case, only a single set of fee is payable.

Kindly note that it is not necessary to lodge Form TM 1 together with forms such as TM 4, TM 9, TM 11, TM 14, TM 19, TM 22, TM 24, TM 26, TM 28, TM 29, TM 37 and TM 48 as each of these forms contains a section for the indication of an address for service.

2006 Circular**Erratum - Form TM 40** (Circular No. 1/2006, dated 13 January 2006)

Please note that the title of Form TM 40 should read as "REQUEST FOR RESTORATION OF APPLICATION TREATED AS WITHDRAWN" and Part 2 of the Form should read as "Particulars of applicant/registered proprietor". Please visit IPOS website at <http://www.ipos.gov.sg> to download the corrected Form TM 40.

2007 Circular**Form TM 32** (Circular No. 32/2007, dated 21 September 2007)

Part 4 of Form TM 32 which used to read as "Goods or services to be cancelled" has been amended to "Goods or services to remain". The amendment is to ensure that there is clarity in the residual specification. Please visit IPOS website at <http://www.ipos.gov.sg> to download the amended Form TM 32.

The Registrar will reject the old Form TM 32 (V02/01/07) with effect from 1 October 2007.

It is also to be noted that Form TM 32 is the appropriate Form to file to effect any amendment to specifications of goods or services of registrations that has the effect of cancelling some goods or services or narrowing down the specifications. For example, Form TM 32 is to be filed to effect an amendment from "books" in Class 16 to "books *relating to business management*" in Class 16.

2008 Circular**Application to Register a Change in Ownership (TM 22)** (Circular No. 3/2008, dated 1 February 2008)**i)Effective Date when Subsequent Proprietor/Applicant for Registration Took Ownership**

The effective date when the subsequent proprietor/applicant for registration took over ownership (i.e. the date entered in Part 4 of Form TM 22) should not predate the date from which the proprietor's rights in the mark accrue. For a trade mark application filed before 1 July 2004, the earliest assignment effective date is the trade mark application date or the priority date, if any. For a trade mark application filed on or after 1 July 2004, the earliest assignment effective date is the trade mark application date.

ii)Address for Service of Subsequent Proprietor/Applicant for Registration

The address for service entered in Part 5 of the Form TM 22 is effective for all proceedings in respect of the trade mark including the subject application for change of ownership. As such, there is no need to lodge Form TM 1 together with Form TM 22 for this purpose.

Form TM 1 will be required only if:-

- a. there is a change of agent whilst the TM 22 is being processed; or
- b. the agent will not be continuing to act for the subsequent proprietor / applicant for registration after TM 22 is recorded.

Such Form TM 1 appointing the agent solely for "Assignment" matters (Part 3 of Form TM 1) will not be processed until a subsequent Form TM 1 appointing an agent for "Application for registration / Registration" is received.

iii)Correction of Errors in Relation to a Recorded Change of Ownership

Once a change in ownership has been recorded according to the request, should the owner need to correct any errors in the recorded details, Form TM 27B is required. Should the assignment(s) need to be re-recorded and re-examined, the relevant Form TM 22 with fees will need to be re-lodged.

iv)Covering Letter

To ensure that the transactions are recorded accurately, please lodge a covering letter stating :-

- a. the sequence of events;
- b. the exact nature of the transaction, and
- c. the trade mark numbers involved.

When e-filing, a covering letter can be attached via the “covering letter” button for eTM 22 and 27B.

2009 Circulars**eCommunications** (Circular No. 2/2009, dated 27 February 2009)

The Registry has been receiving Trade Mark Forms via the eCommunications portal. Please note that this portal is to facilitate the exchange of correspondences only. All forms should be either eFiled, submitted over the counter or posted to us.

Enhancements made to eTM 22 (Application to register a change of ownership)
(Circular No. 4/2009, dated 27 March 2009)

With immediate effect, users may file up to 50 trade mark numbers in one eTM 22 (Application to register change of ownership) form provided that all the trade mark numbers belong to the same assignor under the same IPOS assigned company code. A link is included in the eForm to a search page allowing applicants to check their company code.

Efiling multiple assignment applications (Circular No. 4/2009, dated 27 March 2009)

This is to inform users that eTrademarks may be used to efile multiple assignment applications. So long as there exists a prior assignment application which has not yet been recorded by the Registry, when the user attempts to efile a subsequent assignment application, the field under "Current Proprietor's details" is intentionally left blank by the system for the user to enter the correct details. For example in the case of an assignment from A to B (1st TM 22), and then from B to C (2nd TM 22), the user will have to input B's details manually when efilng the second TM 22.

Form TM 4 - Application to register a trade mark, collective mark or certification mark
(Circular No. 9/2009, dated 21 August 2009)

Form MP 1 - Request to transform an international registration into national application(s) (Circular No. 9/2009, dated 21 August 2009)

With effect from 15/09/2009, an Application to register a trade mark, collective mark or certification mark and a Request to transform an international registration into national application(s) must be made on version V05/01/09 of Form TM4 and MP 1 respectively. The corresponding electronic Form TM 4 available on eTrademarks will also be amended on the same day. The changes are found at Annex A of both forms and pertain to the information to be provided when making a priority claim.

Annex A

Annex A is amended so that where the priority claim is not in respect of all the goods or services claimed in the class, the applicant is to state the goods or services in respect of which priority is claimed. This amendment is to ensure that there is clarity in the scope of the priority claim.

2010 Circular

Notification on Application to Register a Change in Ownership (TM 22) (Circular No. 5/2010, dated 26 November 2010)

With immediate effect, the Registry will be issuing a notification prior to the recordal of an assignment in matters relating to an application for the registration of an assignment application in a trade mark or application for a trade mark pursuant to Rule 55 of the Trade Marks Rules. The purpose of the notification, which will be issued to the proprietor(s)/applicant(s) for registration [or their appointed agent] at the address for service in Singapore, is to provide an opportunity for the proprietor(s)/applicant(s) to inform the Registry without delay in the event they have not authorised the transaction.

D) PERTAINING TO eTRADEMARKS**Pre-2004 Circular****New Features of IPOS' eTrademarks Services****(1) Generation of Check Digit/Year of Trade Mark Numbers**

A new eService for the generation of year/check digit of Trade Mark Number is added to IPOS Online Transactions. This eService has two fields for entry. One is for the old TM No format while the other is for the new TM No format. For the old TM No format, both the year and the check digit would be generated. For the new TM No format, the check digit will be generated.

This eService is already available.

(2) Attachment for Form TM26

The eService for Form TM26 has been enhanced. As filing of Form TM26 usually requires a covering letter to list the TM numbers and sometimes to explain a certain situation, it can only be submitted through the counter. With this enhancement, when a Form TM26 is submitted, it allows for a covering letter to be attached to the said form. This is to facilitate the filing of Form TM26 through eTrademarks.

This eService is already available.

(3) Filing of mark in colour or greyscale

With effect from 1 November 02, eTrademarks will be accepting colour or greyscale attachments for marks filed for Forms TM4 and TM9 in addition to the current black and white. Marks filed in colour or greyscale would be printed in greyscale for the Acknowledgement Letter, Trade Marks Journal and Certificate of Registration. Please note that viewing and printing of the mark images from the Enquiry System would still be in black and white.

(4) "Save/Save As" feature

The "Save/Save As" feature has been implemented on 4 December 02, from 10am onwards. This feature would be available for Forms TM4 and TM9. Any application that is saved would be kept in IPOS' system for 3 working days excluding the current day. All saved documents residing in IPOS' database for more than 3 working days would be removed.

(5) Display Mark Image

The "Display Mark Image" feature has been implemented on 4 December 02, from 10am onwards. Mark images attached to Forms TM4 and TM9 will be displayed for viewing.

2004 Circular

Online Trademarks Search and Enquiry System (Circular No. 4/2004, dated 6 February 2004)

The Intellectual Property Office of Singapore is pleased to announce that its eTrademarks Search has been made available from 30 January 2004.

The following search services have been made available through the system:

Search for similar marks;

Search for marks belonging to a proprietor;

Search for mark detailed information, registered marks, pending marks, certification marks, collective marks, expired marks, cancelled marks, expired marks, withdrawn marks, abandoned marks, expunged marks, refused marks, destroyed marks and article 6ter based on relevant periods.

The services will be offered free of charge.

To access this service, please log on to the eTrademarks webpage and click on the eTrademarks Search link.

E) PERTAINING TO INTERNATIONAL APPLICATIONS AND REGISTRATIONS UNDER THE MADRID PROTOCOL

Pre-2004 Circulars

Singapore's Accession to the Madrid Protocol

Singapore acceded to the Protocol Relating to the Madrid Agreement Concerning the International Registration of Marks (Madrid Protocol) on 31 July 2000. The Madrid Protocol came into operation in Singapore on 31 October 2000.

Publication of International Registration Designating Singapore for Opposition Purposes

International registrations designating Singapore under the Madrid Protocol are treated in the same manner as Singapore national applications, and are therefore published in the Trade Marks Journal for opposition purposes before protection is granted. They are published in a separate section of the Trade Marks Journal titled "International Registrations filed under the Madrid Protocol Published for Opposition Purposes under the Trade Marks Act (Cap. 332, 1999 Ed.)". Unlike Singapore national applications, they are not published according to the class of goods or services, but are published according to the international registration number.

Request for Recording of Changes in the Name and/or Address of the Holder for International Registrations Designating Singapore

Such requests must be presented to the International Bureau of the World Intellectual Property Organization (WIPO) using WIPO's prescribed Form MM9(E). Form TM 26 is not the relevant form to be used.

Form MM9(E) is available for downloading at www.ipos.gov.sg

2004 Circulars**Issuance of Registration Certificates for Protected International Trade Marks (Singapore)** (Circular No. 13/2004, dated 18 June 2004)

The Registrar has received queries as to whether IPOS issues registration certificates for protected international trade marks (Singapore). Please note that IPOS does NOT issue such certificates.

Under the Madrid Protocol, an Office which has examined an international registration in which it is designated and found no grounds for refusal may issue a statement of grant of protection. However, it is not obliged to do so and no legal consequences follow from the fact that no such statement is given. Further, such statements will only be issued if it is still within the 18-month time limit from the date of notification of the international registration. Where no such statements are issued, by the end of the 18-month time limit, the international registration will be regarded as protected in Singapore. In the Singapore context, IPOS does issue such statements, as a matter of customer service, if at the time of issuance, it is still within the said period.

In cases where a provisional refusal or a provisional refusal based on opposition has been issued, a confirmation or withdrawal of such a provisional refusal in the form of a letter of final decision in accordance with Rule 17(5) of the Common Regulations under the Madrid Agreement and Protocol relating to the Madrid Agreement concerning the International Registration of marks will be sent to the International Bureau, who will in turn transmit a copy to the holder of the international registration.

Requests for Recording of Changes in the Ownership of the International Registrations Designating Singapore or where Singapore is the Office of Origin (Circular No. 21/2004, dated 19 November 2004)

For international registrations designating Singapore, in accordance with Rule 25 of the Common Regulations, such requests must be presented to the International Bureau of the World Intellectual Property Organization (WIPO) directly by the holder on WIPO's official Form MM5(E). Form MM5(E) is available for downloading at www.ipos.gov.sg

Form TM 22 should not be lodged for such recordation of change in ownership.

Where Singapore is the Office of Origin, requests for recording of changes in the ownership must also be presented to the International Bureau of the World Intellectual Property Organization (WIPO) directly by the holder. However, Form TM 22 may be lodged (if appropriate) to record the change in ownership of the basic application or basic registration.

Requests for Recording of Changes in the Name and/or Address of the Holder for International Registrations Designating Singapore or where Singapore is the Office of Origin (this serves to replace an existing pre-2004 circular in the journal) (Circular No. 21/2004, dated 19 November 2004)

For international registrations designating Singapore, in accordance with Rule 25 of the Common Regulations, such requests must be presented to the International Bureau of the World Intellectual Property Organization (WIPO) directly by the holder on WIPO's official Form MM9(E). Form MM9(E) is available for downloading at www.ipos.gov.sg

Form TM 26 should not be lodged for such recordation of change in name and/or address.

Where Singapore is the Office of Origin, requests for recording of changes in the name and/or address of the holder must also be presented to the International Bureau of the World Intellectual Property Organization (WIPO) directly by the holder. In such a case, TM 26 should be lodged to amend the change in name and/or address of the basic application or basic registration.

Requests for Designation Subsequent to the International Registration (Circular No. 21/2004, dated 19 November 2004)

In accordance with Rule 24 of the Common Regulations, such requests must be presented to the International Bureau of the World Intellectual Property Organization (WIPO) directly by the holder on WIPO's official Form MM4(E). Form MM4(E) is available for downloading at www.ipos.gov.sg

2005 Circulars

(Effect of the Recording of Licenses in the International Register in respect of International Registrations Designating Singapore, Circular No. 21/2005, dated 21 October 2005. This Circular is replaced by Circular No. 1/2010, dated 12 February 2010)

2007 Circular

(Modes of Payment to the International Bureau of the World Intellectual Property Organisation for Madrid Protocol Matters, Circular No. 42/2007, dated 28 December 2007. This Circular is replaced by Circular No. 1/2008, dated 11 January 2008)

2008 Circulars**Modes of Payment to the International Bureau of the World Intellectual Property Organisation for Madrid Protocol Matters** (Circular No. 1/2008, dated 11 January 2008)

With effect from 1 January 2008, there will be some amendments to the Administrative Instructions for the Application of the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating Thereto ("AI"). The amendments are necessary for the implementation of a more broad-based electronic communications platform for the benefit of users of the Madrid system.

The AI can be found here (http://www.wipo.int/madrid/en/legal_texts/admin_instructions.htm) and the International Bureau's ("IB") notification of the amendments can be found here (http://www.wipo.int/edocs/madrdocs/en/2007/madrid_2007_20.doc).

Please note that under the new Section 19 of the AI, fees payable to the IB must be made

- i. by debit to a current account with the IB,
- ii. by payment into the Swiss postal account or to any of the specified bank accounts of the IB, or
- iii. by credit card, where, in the context of an electronic communication envisaged in Section 11, an electronic interface for online payment has been made available by the IB.

The previous modes of payment by cash at the IB and by a banker's cheque would no longer be available.

Please note that while Section 19 now provides that in the context of electronic communications, fees due to the IB may be paid by credit card only in relation to specific types of transaction or request in respect of which a dedicated electronic interface has been provided, the IB has advised that this mode of payment by credit card would not be applicable to the filing of international applications.

If you are filing an international application through IPOS on and after 2 January 2008, please note that our previous primary mode of payment to the IB via a banker's cheque is no longer available in light of the changes in the AI. Instead, your payment in Swiss Francs to the IB can be made by either options (i) or (ii) as stated above.

Current Account

If you conduct regular monetary transactions with the IB, you may opt to open a current account with them. Please see

http://www.wipo.int/madrid/en/guide/part_d/pdf/account.pdf for details.

Bank Transfer

We envisage that the majority of applicants and agents are likely to use bank transfers under (ii) as the preferred mode of payment. Details of WIPO's postal account and bank account are as follows:

WIPO bank account
IBAN No. CH51 0483 5048 7080 8100 0
Credit Suisse, CH-1211 Geneva 70
Swift/BIC: CRESCHZZ80A

WIPO postal account
IBAN No. CH03 0900 0000 1200 5000 8
Swift/BIC: POFICHBE

The above account details are found on page 6 of the Form MM2(E).

To confirm that the payment has been made, the applicant must indicate the payment details of the bank's transfer transaction in the appropriate space provided in IB's Form MM2(E) Application for International Registration Governed Exclusively by the Madrid Protocol at the time of filing. You must also provide us with a photocopy of the bank's transaction advice.

If you have any queries regarding the above, please do not hesitate to call our Customer Service Officer at 6339 8616 or email us at ipos_enquiry@ipos.gov.sg.

Requests for Recording of a Renewal for International Registrations where Singapore is the Office of Origin (Circular No. 5/2008, dated 22 February 2008)

For an international registration where Singapore is the Office of Origin, a request for the recording of a renewal may be made by the holder or his agent upon payment of the relevant fees in Swiss Francs to WIPO via any of the following ways:-

(a) lodgement of WIPO's Form MM11(E) or an official letter from the holder indicating the necessary information (number(s) of the international registration(s) concerned and the purpose of the payment);

<http://www.wipo.int/madrid/en/forms/>

(b) lodgement done online at WIPO Marks E-Renewal System portal
<http://www.wipo.int/madrid/en/services/>; or

(c) lodgement of Form MM11(E) or the official letter mentioned under (a) through IPOS, together with a separate fee of S\$85 for handling the renewal request.

Kindly note that the above renewal is only effective for the international registration. Holders should lodge IPOS Form TM 19 in order to renew the Singapore basic registration, if necessary.

With regard to the renewal of an international registration where Singapore is *not* the Office of Origin, even if Singapore had been designated, such a request must be effected via (a) or (b). It is also possible to do so via the Office of Origin of that international registration provided that that Office of Origin has agreed to collect the renewal fees and forward them to WIPO.

We wish to emphasise that IPOS Form TM 19 must not be lodged for the renewal of any international registrations designating Singapore. Only WIPO would be able to process the renewal of that international registration.

E-Payments to the World Intellectual Property Organization (Circular No. 19/2008, dated 26 December 2008)

The World Intellectual Property Organization (WIPO) has introduced an E-Payment Service at <https://webaccess.wipo.int/epayment/>, which allows payment of fees notified in their irregularity letters or other WIPO communications with regard to international applications or registrations.

Payments can be made through the WIPO Current Account or by credit card.

To make payment through the WIPO Current Account, you will be required to provide the userID and the password generated by them for the current account holders. If you do not have a current account, please read Current Account at WIPO at

http://www.wipo.int/resource/en/wipo_account.html for details, on how to open, use or close a current account with WIPO, if you are thinking of opening one.

If you already have a WIPO current account, but do not have a password, please send an email to WIPO at income.accounts@wipo.int, mentioning E-Payment as the subject matter.

To make payment by credit card, please follow the steps in the E-Payment Service. American Express, Mastercard and Visa are acceptable to WIPO.

Unfortunately at this stage, WIPO is still unable to accept payment via credit card for the filing of international applications. For such applications, the only payment modes are via the WIPO Current Account, or the Swiss postal account or any of the specified bank accounts of WIPO.

2010 Circular**Effect of the Recording of Licenses in the International Register in respect of International Registrations Designating Singapore** (Circular No. 1/2010, dated 12 February 2010)

Pursuant to Rule 20bis(6)(b) of the Common Regulations under the Madrid Protocol, Singapore has notified the Director General of the World Intellectual Property Organisation on 21 March 2002 that Singapore law would not give effect to the recording of trade mark licenses in the International Register. Accordingly, any recording of a license made under Rule 20bis(3) of the Common Regulations will have no effect on any International Registration designating Singapore. However, the holder of such an International Registration may still record the relevant license with IPOS by lodging Form TM 37, and the fee of S\$60.00 per trade mark number. Similarly, the holder of such an International Registration may request for the amendment or cancellation of the recording of the license via Forms TM 38 and TM 39 respectively.

F) PERTAINING TO THE CLASSIFICATION OF GOODS AND SERVICES**(I) General Information****Pre-2004 Circulars**

(8th Edition of the International Classification of Goods and Services, this circular was removed on 18 January 2008)

Compliance with the International Classification of Goods and Services

To assist the Registrar in expediting the acceptance of trade mark applications for registration, agents are reminded to ensure that the specifications of goods or services set out in the application forms conform with the International Classification of Goods and Services as far as possible. Very often, the Registrar receives applications where the marks are acceptable for registration but the specifications are not in order. This slows down the registration process.

Precedents in Support of Specification

In the examination of the specification of goods or services for compliance with the International Classification of Goods and Services, the Registrar is prepared to rely on precedents relating to Singapore, United Kingdom, Australia and Hong Kong registrations. Applicants and agents are therefore free to file these precedents in support of their specifications of goods and services for the Registrar's consideration.

However, the Registrar would not rely on such precedents in the following situations:

- (a) where the precedent relates to goods or services which have been accepted by the Registrar concerned in the wrong class;
- (b) where the precedent relates to goods or services which are no longer classified in the class stated in the precedent in view of a change of classes by the Special Union for the International Classification of Goods and Services for the purposes of the Registration of Marks (Nice Union);
- (c) where the precedent relates to goods or services which are no longer classified in the class stated in the precedent in view of a change or clarification of practice by the Registry concerned.

The use of square brackets [] and round brackets () in specifications

An expression between square brackets is intended to define more precisely the text or item preceding the brackets. Square brackets are used when the item is ambiguous for classification purposes. Round brackets are used to qualify the text or item preceding the brackets to ensure the correct classification. Round brackets are used when it is possible that the item can be classified in various classes depending on the intended goods or services sought to be covered.

Use of the term "Internet" in specifications of goods and services

In view of the widespread use of the term "Internet" in the generic sense, the Registrar will henceforth not raise any objections to the use of the term "Internet" in the specifications of goods and services of Singapore national applications or international registrations designating Singapore.

However, the use of the term “Internet” in specifications of goods and services is generally not encouraged as the word “Internet” is a registered trade mark in some countries and may be objected to by the designated offices of these countries in respect of international applications originating from Singapore filed under the Madrid Protocol. This may arise where the term “Internet” is listed in a Singapore national application or registration and the Singapore national application or registration forms the basis of an international application originating from Singapore under the Madrid Protocol. In the circumstances, it is advisable for applicants to use the term “global communications network” instead.

2004 Circulars

Underlining of precedents for objections on specification of goods / services (Circular No. 19/2004, dated 3 September 2004)

When lodging precedents to overcome the Registrar’s objection on the specification of goods / services, the Registrar requests that the relevant portions of the precedents to be underlined for greater visibility. This would assist the Registrar to identify and consider the relevant portions of the precedents in order to assess whether the objection should be waived.

Vague descriptions in specifications (Circular No. 20/2004, dated 12 November 2004)

A clear description of the goods or services claimed in a trade mark application is important as it determines the scope of the application. As such, the indication of goods, for example “pouches and the like”, is not acceptable as the expression, “and the like”, is vague. In the example given, it is not clear as to what other goods the applicant is claiming apart from pouches.

2005 Circular

(Use of acronyms for specifications of goods and/or services, Circular No. 6/2005, dated 22 April 2005. This circular was removed on 18 January 2008)

2006 Circular

International Classification of Goods and Services

NICE Classification – Ninth Edition (Circular No. 32/2006, dated 8 November 2006)

The ninth edition of the NICE Classification for the purposes of the registration of trade marks will come into effect on **1 January 2007**. Copies can be ordered online at <http://www.wipo.int/ebookshop?lang=eng>

The majority of the changes involve Classes 14, 20, 21, 26, 34, 42 and 45 but minor changes and additions have also been made to other classes. For more information regarding the specific changes, please refer to the *Nice Union Report CLIM/CE/20/* which is obtainable at the following link

http://www.wipo.int/meetings/en/doc_details.jsp?doc_id=52419

The eighth edition of the NICE Classification shall still apply to all applications filed before 1 January 2007. Applications filed on or after 1 January 2007 shall be filed in accordance with the ninth edition of the NICE Classification. For the avoidance of doubt, there will be no reclassification of goods and services for existing applications filed prior to 1 January 2007, after the 9th Edition of the NICE Classification comes into force.

2007 Circular

Use of registered trade marks in specifications of goods and services (Circular No. 38/2007, dated 14 November 2007)

Registered trade marks which are ordinary dictionary words are allowed to be used in specifications of goods and services as a descriptor. This practice is consistent with our previous journal notice on the use of the term, "Internet", which has become generic. However, words which are invented and have been registered as trade marks will not be acceptable in specifications of goods and services. Instead, applicants should use ordinary English words to describe their goods and services. For example, a specification of goods which reads "bluetooth-enabled devices for communications, namely telephones, handsets, headsets, speakers, microphones and earphones" should be amended to "devices for communications which are enabled by short range radio technology, namely telephones, handsets, headsets, speakers, microphones and earphones".

(II) Information on specific items**Pre-2004 Circulars**

(Cereal-based beverages, Beverages made from cereals, Pre-2004 Circular. This Circular was replaced by Circular No. 7/2008, dated 5 March 2008)

Club [dining] services

With effect from 31 October 2003, the Registrar will accept the specification “club [dining] services” in Class 43 instead of Class 41 of the International Classification of Goods and Services. The emphasis on the word “dining” puts the item more in line with the class heading and explanatory notes of Class 43.

Consultancy Services

In the 8th edition of the International Classification of Goods and Services, consultancy services will be classified according to their subject matter. For example, consultancy services relating to telecommunications will be classified in Class 38, transportation consultancy services in Class 39 and intellectual property consultancy services in Class 42. The Registry had been taking this position in its examination of applications.

WIPO has clarified that pending the coming into force of the 8th edition, the correct classification is in accordance with the 7th edition where such services are classified in class 35 if they are business-related and class 42 if they are non-business-related. Hence, the Registry is adopting this stand.

However, in order not to prejudice any party who has acted on the Registrar’s earlier position on such services, the Registry will not reject consultancy services which have been classified according to their subject matter.

Desserts

With effect from 31 October 2003, the Registrar will not accept a specification consisting of “desserts” per se. This is in line with the World Intellectual Property Organization’s view that the said item, without further qualification, is vague.

Examples of acceptable descriptions are :

“Desserts [Jellies for food]” in Class 29 or

“Desserts [Ice cream]” in Class 30

(Executor services, Pre-2004 Circular. This Circular was replaced by Circular No. 7/2008, dated 5 March 2008)

Mail order services

A specification of services consisting of or containing "mail order services" is unacceptable as it does not conform to the International Classification of Goods and Services and should be reworded to "the bringing together, for the benefit of others, of a variety of goods, enabling customers to conveniently view and purchase those goods from a general merchandise catalogue by mail order" in accordance with the practice in the United Kingdom.

Provision of information for business or domestic purposes in Class 38

With effect from 30 July 2003, a specification which reads "provision of information for business or domestic purposes" in class 38 will not be acceptable. The applicant is requested to further qualify the specification so that it will read as "provision of information in the field of telecommunications for business or domestic purposes". This is in line with the General Remarks as provided in the Nice Classification that the subject matter of the information being provided determines the correct class for the services.

(Provision of user access time to the global computer network, Pre-2004 Circular. This circular was removed on 26 September 2007)

(Storage of data, information or documents, Pre-2004 Circular. This circular was removed on 5 December 2008)

2004 Circulars**Retailing of services** (Circular No. 2/2004, dated 7 January 2004)

With effect from 7 January 2004, the Registrar will not accept a specification containing a claim for "retailing of services" or "the bringing together, for the benefit of others, of a variety of services (excluding the transport thereof), enabling customers to conveniently view and purchase those services". Applicants will be asked to clarify on the type(s) of services they are providing and to apply for such services in the appropriate class(es).

WIPO's Recommendation No. 16 (Circular No. 4/2004, dated 6 February 2004)

For applications lodged on or after 13 January 2004, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the items stated below in the designated classes:

- (1) Pastilles and chewing gum for cosmetic purposes - Class 3
- (2) Soap bubbles and foam generators for shows - Class 11
- (3) Lenyards (Keycards) - Class 14

(Joss sticks, Circular No. 5/2004, dated 13 February 2004. This circular was removed on 20 March 2009)

Canned foodstuffs of plant origin (Circular No. 6/2004, dated 5 March 2004)

For applications lodged on or after 12 March 2004, the Registrar will accept the specification "canned foodstuffs of plant origin" in Class 30 instead of Class 29. This is in line with the explanatory note of Class 30 which states "Class 30 includes mainly foodstuffs of plant origin prepared for consumption or conservation".

Manufacturing of goods (Circular No. 12/2004, dated 11 June 2004)

For applications lodged on or after 18 June 2004, a specification of services consisting of or containing "manufacturing of goods" is unacceptable as it does not conform to the International Classification of Goods and Services. If a person is manufacturing goods, registration should be sought for the goods only.

As appropriate, the specification may be phrased as "custom assembling of materials [for others]" or "custom manufacturing of goods [for others]". For example, where the items in question are cell cultures, it may be more appropriate to describe the service as "custom manufacturing of cell cultures [for others]". However, if the goods in question are clothing, "custom assembling of clothing [for others]" would be more appropriate.

(Providing search engines for the internet, Circular No. 12/2004, dated 11 June 2004. This circular was removed on 20 March 2009)

WIPO's Recommendation No. 17 (Circular No. 17/2004, dated 9 July 2004)

For applications lodged on or after 16 July 2004, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the items stated below in the designated classes:

- (1) Packaging containers of regenerated cellulose - Class 16
- (2) Refilling of empty toner cartridges - Class 37.

Provision of news (Circular No. 19/2004, dated 3 September 2004)

For applications lodged on or after 10 September 2004, the Registrar will not accept a specification consisting of "provision of news" *per se*. This is in line with the World Intellectual Property Organization's view that this description, without further qualification, is vague. The subject matter of the news provided and the purpose for which it is provided are important in determining the class to which it should fall under. Generally, these services are classified in the same classes as the services that correspond to the subject matter of the information. Examples of acceptable descriptions are:-

"Provision of business news [business management]" in Class 35;

"Provision of news [telecommunication services]" in Class 38; and

"Provision of news for entertainment purposes" in Class 41.

Leasing services (Circular No. 20/2004, dated 12 November 2004)

With effect from 19 November 2004, the Registrar will accept “leasing services” only in Class 36 regardless of the nature of the goods to which it relates. This is in line with the World Intellectual Property Organization’s view that it is a form of financial service.

“Rental services”, on the other hand, will still be classified in the same class as the services provided. For example, “rental of telecommunication apparatus” will be classified in Class 38 while “rental of medical apparatus” will be classified in Class 44.

2005 Circulars**Computerised communication network security and other security services** (Circular No. 5/2005, dated 1 April 2005)

For applications lodged on or after 8 April 2005, the Registrar will only accept “computerised communication network security” and like services in Class 42 and not in Class 45, as such items are forms of computer services classified under Class 42.

Class 45 covers services for the protection and security of individuals and property in general, eg “security services for buildings”, “personal body guarding” and “night guards”. If such services and information relating to such services are offered online or via a computer network, they will be classified under Class 45 as well.

However, Class 42 will cover security services if they pertain to security of computer networks or the internet, eg. “computerised communication network security”, or if such services are offered as a form of computer service, eg “data security services [firewalls]” or “professional consultancy relating to computer security”. It would not be correct to classify such computer security services in Class 45.

It is also useful to note that the International Classification of Goods and Services (8th Edition) classifies some security services in Class 39. Security services relating to transport, eg. “guarded transport of valuables” and “escorting of travellers”, are classified under Class 39 and not Class 45.

WIPO’s Recommendation No. 18 (Circular No. 5/2005, dated 1 April 2005)

For applications lodged on or after 8 April 2005, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the designated classes:

- (1) Enzymes for human consumption – Class 29
- (2) Soya milk [condiment] – Class 30
- (3) Supervision of teamwork to improve its effectiveness – Class 35
- (4) Consultancy in the field of computer security – Class 42
- (5) Therapy services – Class 44

Prepared meals (Circular No. 6/2005, dated 22 April 2005)

For applications lodged on or after 29 April 2005, the Registrar will not accept a specification consisting of “prepared meals” per se as the said item, without further qualification, is vague and may fall within several classes. The item should specify the content of the prepared meals, for example,

“Prepared meals consisting of meat” in Class 29 or

“Prepared meals containing principally of rice” in Class 30.

2006 Circulars**Crib bumpers** (Circular No. 3/2006, dated 3 February 2006)

For applications lodged on or after 10 February 2006, the Registrar will only accept the item, “crib bumpers”, in Class 20. This item is a type of cushion for lining the base and sides of the crib and serves a protective purpose for the baby. Since the item “cushions” is listed in Class 20 of the Nice Classification, by analogy, the item, “crib bumpers”, should be classified in Class 20 as well.

Retail services and other like services in Class 35 (Circular No. 6/2006, dated 24 February 2006)

The Registrar has revised her practice concerning retail services and other like services in Class 35. This revision in practice shall take effect for all applications lodged on or after 3 March 2006

In the past, applicants, in most instances, are required to list the goods to which the retail services relate. With the revised practice, where it is practical, it is still advisable to list the goods to which the retail services relate. However, the Registrar will no longer insist on such a requirement in all cases, as long as the description “the bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods”, is used in conjunction with the means of bringing goods together. Thus, in cases where it is not practical to list all the goods to which the retail services relate, the Registrar will accept an indication of the means of bringing goods together and displaying such goods for the benefit of customers, for example, from a retail outlet, a wholesale outlet or a distributor outlet. Such an indication can be inserted at the end of the description “the bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods”.

With the revised practice, “wholesale services” will also be treated in the same manner as “retail services”.

The following descriptions provide guidance on what is considered to be acceptable to the Registrar in future:

(a) “The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a retail outlet”;

(b) "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a retail outlet";

(c) "Retail services in relation to [list the goods]";

(d) "The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a wholesale outlet";

(e) "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a wholesale outlet";

(f) "Wholesale services in relation to [list the goods]";

(g) "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a distributor outlet";

(h) "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a general merchandise catalogue by mail order or by means of telecommunications"; and

(i) "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a general merchandise web site in the global communications network".

The Registrar is prepared to accept similar descriptions of the above services provided that the services are clearly described and fall within the ambit of retail or wholesale services. Please note that vague descriptions such as "distributorship services" are not acceptable as the term "distributorship" may encompass more than just retail or wholesale services, for example, it may include transportation services.

Interior decoration services (Circular No. 22/2006, dated 7 July 2006)

For applications lodged on or after 14 July 2006, the Registrar will only accept "interior decoration services" in Class 42 and not in Class 37, as such services are analogous to the item "design of interior décor" which is listed in Class 42 of the International Classification of Goods and Services (8th Edition).

WIPO's Recommendation No. 19 (Circular No. 25/2006, dated 16 August 2006)

For applications lodged on or after 23 August 2006, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the designated classes :

(1) Incontinence garments – Class 5

(2) Telephone ring tones [downloadable] – Class 9

(3) Milk jam – Class 29

(4) Toasted natural wood chips added to wine to improve its flavour – Class 30

WIPO's Recommendation No. 20 (Circular No. 25/2006, dated 16 August 2006)

For applications lodged on or after 23 August 2006, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the designated classes :

- (1) Paper sheets, sensitized, for carrying photographic imaging materials – Class 1
- (2) Slot machines[vending machines] – Class 9
- (3) Paper sheets, not sensitized, for carrying photographic imaging materials – Class 16
- (4) Slot machines[amusement] – Class 28
- (5) Stand-alone video game machines – Class 28

Technical consultancy services (Circular No. 25/2006, dated 16 August 2006)**Technical support services** (Circular No. 25/2006, dated 16 August 2006)

For applications lodged on or after 23 August 2006, the Registrar will classify “technical consultancy services”, “technical support services” and other similar technical advisory and technical information services according to their subject matters. The General Remarks in the Nice Classification (8th Edition) states that services that provide advice, information or consultation are in principle classified in the same classes as the services that correspond to the subject matter of the advice, information or consultation. Further, in line with the view of the World Intellectual Property Organization, the Registrar will consider indications such as “technical consultancy services” and “technical support services”, *per se* as too broad and vague and objections will be taken. Such indications will have to be specified in respect of their subject matters for the purpose of classification.

2007 Circulars**WIPO's Recommendation No. 21** (Circular No. 27/2007, dated 25 July 2007)

For applications lodged on or after 1 August 2007, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the designated classes:

- (1) Scoreboards for sports, other than mechanical or electric – Class 20
- (2) Advice on tax preparation – Class 35
- (3) Advice on fiscal assessments, advice on fiscal valuations – Class 36
- (4) Carbon offsetting services [recycling] – Class 40
- (5) Prenatal exercises – Class 41
- (6) Weblog [blog] services [on-line publication of journals or diaries] – Class 41
- (7) Creating and maintaining weblogs [blogs] for others – Class 42
- (8) Hosting of weblogs [blogs] – Class 42
- (9) Preparation of technical projects, technical research and consultancy services in the field of carbon offsetting – Class 42
- (10) Carbon offsetting services [reforestation] – Class 44

Providing on-line forums (Circular No. 27/2007, dated 25 July 2007)

Operating chat rooms (Circular No. 27/2007, dated 25 July 2007)

Providing chat rooms (Circular No. 27/2007, dated 25 July 2007)

Providing discussion services on-line (Circular No. 27/2007, dated 25 July 2007)

For applications lodged on or after 1 August 2007, the Registrar will only accept the items "providing on-line forums", "operating chat rooms", "providing chat rooms", and "providing discussion services on-line" in Class 38, regardless of the topic of the discussion. These items are analogous to the items "electronic bulletin board services [telecommunication services]" and "providing internet chatrooms" listed in Class 38 of the NICE Classification (Ninth Edition). This is in line with the view of the World Intellectual Property Organization.

Arranging and conducting of colloquiums (Circular No. 27/2007, dated 25 July 2007)

Arranging and conducting of conferences (Circular No. 27/2007, dated 25 July 2007)

Arranging and conducting of congresses (Circular No. 27/2007, dated 25 July 2007)

Arranging and conducting of seminars (Circular No. 27/2007, dated 25 July 2007)

Arranging and conducting of symposiums (Circular No. 27/2007, dated 25 July 2007)

Arranging and conducting of conventions (Circular No. 27/2007, dated 25 July 2007)

Arranging and conducting of exhibitions (Circular No. 27/2007, dated 25 July 2007)

The Registrar wishes to clarify that the above items with the exception of the last, viz.

"arranging and conducting of colloquiums";
"arranging and conducting of conferences";
"arranging and conducting of congresses";
"arranging and conducting of seminars";
"arranging and conducting of symposiums"; and
"arranging and conducting of conventions"

are classified in Class 41, regardless of the topic relating to these services. It is the purpose of the service and not the topic that determines their classification in Class 41. By virtue of their dictionary definitions, the terms, "colloquiums", "conferences", "congresses", "seminars", "symposiums" and "conventions" refer to activities linked with training or education, both of which are proper to Class 41. To illustrate, "arranging and conducting of conferences for commercial or advertising purposes" and "arranging and conducting of seminars for commercial or advertising purposes" are both classified under Class 41.

However, the item, "arranging and conducting of exhibitions", will be classified according to the subject matter since this service only refers to showing of products or services to the public, and is not primarily offered for the purposes of training or education. By analogy, "organization of exhibitions for commercial or advertising purposes" is listed in Class 35 of the NICE Classification (Ninth Edition), but "organization of exhibitions for cultural or educational purposes" is listed in Class 41 of the NICE Classification (Ninth Edition). This is in line with the view of the World Intellectual Property Organization.

Providing access to databases (Circular No. 33/2007, dated 26 September 2007)

Rental of access time to the internet / global computer networks (Circular No. 33/2007, dated 26 September 2007)

Providing of user access to the internet / global computer networks (Circular No. 33/2007, dated 26 September 2007)

Rental of access time to databases (Circular No. 33/2007, dated 26 September 2007)

For applications lodged on or after 3 October 2007, the Registrar will accept these and other analogous items in Class 38 only. These are essentially telecommunication services and are classified under Class 38 whether they are provided by an Internet Service Provider or a non-Internet Service Provider. Hence, our previous journal notice on the classification of these services based on the status of the applicant is no longer applicable.

Consistent with our previous journal notice on “leasing” (Circular No. 20/2004, dated 12 November 2004), applicants should also avoid using the term, “leasing”, in any class except Class 36, as “leasing services”, are acceptable only in Class 36. With regards to the above items in Class 38, an example of an acceptable description would be “rental of access time to databases” and not “leasing of access time to databases”.

2008 Circulars

Cereal-based beverages (Circular No. 7/2008, dated 5 March 2008)

Beverages made from cereals (Circular No. 7/2008, dated 5 March 2008)

Executor services (Circular No. 7/2008, dated 5 March 2008)

The pre-2004 circulars on “cereal-based beverages/ beverages made from cereals” in Class 32 and “executor services” in Class 42 have been removed in light of recent directives from the World Intellectual Property Organisation.

A specification of goods consisting of or containing “cereal-based beverages” or “beverages made from cereals” will be classified in Class 30 by analogy to “cereal preparations” that are classified under Class 30 of the NICE Classification.

A specification of services consisting of or containing “executor services” will be classified in Class 36 because such services generally relate to the administration of money, investments, real estate, assets, and other valuables. Such services are analogous to “fiduciary services” and “trusteeship services” both of which are classified under Class 36 of the NICE Classification.

The above changes affect all applications lodged on or after 12 March 2008.

Retail services and other like services in Class 35 (Circular No. 9/2008, dated 2 May 2008)

In addition to Circular No. 6/2006, the Registrar will accept the descriptions for applications lodged on or after 9 May 2008 (where it is not practical to list all the goods to which the retail services or wholesale services relate):

- a. "retail services"
- b. "wholesale services"

However, the Registrar will continue to reject descriptions such as "distributorship services", "mail order services", "departmental store services", "supermarket services", or "internet shopping". These terms are considered vague as they include services more than retail and wholesale services.

With the addition, the following descriptions provide guidance on what is considered to be acceptable to the Registrar in future:

- a. "The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a retail outlet";
- b. "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a retail outlet";
- c. "Retail services in relation to [list the goods]";
- d. "Retail services";
- e. "The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a wholesale outlet";
- f. "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a wholesale outlet";
- g. "Wholesale services in relation to [list the goods]";
- h. "Wholesale services";
- i. "The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a distributor outlet";
- j. "The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a distributor outlet";
- k. "The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view

and purchase those goods from a general merchandise catalogue by mail order or by means of telecommunications”;

- l. “The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a general merchandise catalogue by mail order or by means of telecommunications”;
- m. “The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a general merchandise web site in the global communications network”;
- n. “The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a general merchandise web site in the global communications network”;
- o. “The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a departmental store”;
- p. “The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a departmental store”;
- q. “The bringing together, for the benefit of others, of a variety of goods [list the goods] (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a supermarket”; and
- r. “The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods from a supermarket”.

WIPO's Recommendation No. 22 (Circular No. 16/2008, dated 21 November 2008)

For applications lodged on or after 28 November 2008, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the designated classes:

- (1) Milk ferments [bacteria preparations] used in making foodstuffs - Class 1
- (2) Wind turbines - Class 7
- (3) Pill distributor and organizer boxes for medical purposes - Class 10
- (4) Electronic cigarettes for medical purposes - Class 10
- (5) Meditation stones - Class 14
- (6) Pill boxes [not for medical purposes] - Class 21
- (7) Tablecloth holders - Class 21
- (8) Electronic cigarettes, not for medical purposes - Class 34
- (9) Publicity film production - Class 35
- (10) Illustrators' services - Class 42
- (11) Diamond authentication and certification services - Class 42

(12) Electronic data storage - Class 42

(13) Advice concerning cooking recipes - Class 43

Electronic data storage (Circular No. 16/2008, dated 21 November 2008)

Storage of data, information or documents (Circular No. 16/2008, dated 21 November 2008)

The pre-2004 circular on "Storage of data, information or documents" (Class 35 or 39) has been removed in light of recent directive from the World Intellectual Property Organization.

A specification of services consisting of "Electronic data storage" will be classified in Class 42 instead of 35 by analogy to "Duplication of computer programs" and "Data conversion of computer programs and data [not physical conversion]" which are classified under Class 42 of the NICE Classification. This is in conformity with the explanatory note "Class 42 includes mainly services provided by ... computer programmers, etc.".

On the other hand, if the data, information or documents are being stored physically, for example, in a warehouse, then it is proper to Class 39. The determining factor is **where** the data, information, or documents are being stored. Examples of items which are proper to Class 39 are:

i. "Data storage"

ii. "Information storage"

iii. "Storage of electronically-stored data, information or documents".

The above changes affect all applications lodged on or after 28 November 2008.

2009 Circulars

Association services (Circular No. 6/2009, dated 30 April 2009)

For applications lodged on or after 7 May 2009, the Registrar will not accept a description consisting of "association services" per se because the item, without further qualification, is vague and may fall within several classes. The World Intellectual Property Organization also regards this description as being vague and takes the view that a service should not in principle commence with the description "association services" even if it is followed by a qualifier. For example, the description, "association services, namely arranging business introductions", is not acceptable.

In light of the above, applicants should avoid using descriptions beginning with "association services". A description like "association services, namely, promoting the general interests of those concerned with the importance of health and nutrition", should be reworded to "business promotion relating to the importance of health and nutrition, provided through an association" in order for it to be classified in Class 35.

Concierge services (Circular No. 6/2009, dated 30 April 2009)

For applications lodged on or after 7 May 2009, the Registrar will not accept a description consisting of "concierge services" per se because the item, without further qualification, is vague and may fall within several classes. This is in line with the view of the World Intellectual Property Organization that the description is vague and can fall within several classes.

In light of the above, applicants should specify the exact nature of the concierge services that are being claimed. If they insist on using the description, "concierge services", that must be qualified by a precise description of the concierge service. The following are examples of acceptable descriptions.

- i. "Concierge services for the arranging of tours" in Class 39
- ii. "Concierge services, namely, the delivery of luggage for guests" in Class 39
- iii. "Concierge services, namely, arranging for theater tickets" in Class 41
- iv. "Concierge services relating to restaurant reservations" in Class 43
- v. "Concierge services [baggage inspection for security purposes]" in Class 45.

On the other hand, descriptions such as "concierge services for others comprising of making requested personal arrangements and providing customer specific information to meet the needs of individuals", "hotel and resort concierge services", and "personal services rendered by others to meet the needs of individuals, namely, concierge services" are not acceptable since the exact nature of the services is unclear.

Personal and/or social services rendered by others to meet the needs of individuals (Circular No. 7/2009, dated 19 June 2009)

This is to clarify that a description consisting of "personal and/or social services rendered by others to meet the needs of individuals" in Class 45 has never been acceptable to the Registrar because it is vague and too broad in scope. For the purpose of clarity, applicants must specify the exact nature of the services that they wish to claim.

If, however, an applicant insists on using this description, it must be qualified by a precise description of the personal or social services claimed. An example of an acceptable description would be "personal services rendered by others to meet the needs of individuals, namely baby sitting".

Ancillary Services / Related Services (Circular No. 11/2009, dated 25 September 2009)

For applications lodged on or after 2 October 2009, the Registrar will not accept a description containing "ancillary services", "related services" or their equivalent, regardless of whether they are preceded or followed by a specific term. This is because the exact nature of these descriptions remains unclear. The addition of qualifiers such as "included in this class" or "all in this class" in such descriptions does not help in making those descriptions any clearer. The following are some examples of the objectionable descriptions:-

- (a) "advertising services; services ancillary or related to the aforementioned included in this class";
- (b) "services ancillary or related to the provision of business management services; all in this class"; and

(c) “all services relating or ancillary to computer services; all included in Class 42”.

In such cases, the Registrar will request that the applicant specify the “ancillary services” and “related services” claimed so that the specification is clear and unambiguous.

This practice direction is consistent with Circular No. 20/2004 that relates to “Vague descriptions in specifications”.

2010 Circulars

WIPO's Recommendation No. 23 (Circular No. 2/2010, dated 5 March 2010)

For applications lodged on or after 12 March 2010, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the designated classes:

1. Trophies of common metals (Class 6)
2. Trophies of precious metals (Class 14)
3. Brackets for setting up flat screen TV sets (Class 9)
4. Baby gates (Class 20)
5. Decorative sand bottles (Class 21)
6. Ankle garters (Class 26)
7. Storage of human cells (Class 39)
8. Rental of water dispensers (Class 43)
9. Service of actual notice (Class 45)

Computer services (Circular No. 3/2010, dated 25 June 2010)

For applications lodged on or after 2 July 2010, the Registrar will not accept a description consisting of “computer services” per se because the item, without further qualification, is vague. The insertion of a description that reads, for example, “all included in this class” at the end of a specification will not assist in avoiding an objection from the Registrar.

According to the International Classification of Goods and Services (ICGS), services that relate to the installation, maintenance or repair of computer hardware are classified in Class 37, while services in relation to computer rental and the installation, maintenance or repair of computer software are classified in Class 42. To avoid ambiguity and to ensure conformity with the ICGS, applicants are requested to specify the exact nature of the computer services that they are claiming. However, those who wish to include the description, “computer services”, in their specification of services may refer to the following examples which are considered acceptable to the Registrar:

- “Computer services, namely installation of computer hardware” (Class 37)

- "Computer services, namely providing search engines for the internet" (Class 42)
- "Computer services in the nature of hosting web sites for others" (Class 42)

WIPO's Recommendation No. 24 (Circular No. 4/2010, dated 8 October 2010)

For applications lodged on or after 15 October 2010, the Registrar, following the recommendations of the World Intellectual Property Organization, will accept the following items in the classes indicated in brackets next to the item:

1. Ear candles (Class 5)
2. Massage chairs with built-in massage apparatus (Class 10)
3. Airline seats with a massage function (Class 12)
4. Ergonomic chairs for seated massage (Class 20)
5. Electronic pet feeders (Class 21)

G) CIRCULARS RELATED TO PROCEEDINGS BEFORE THE HEARINGS AND MEDIATION DIVISION**HMD 2009 Circulars****Applications for Security for Costs** (HMD Circular No. 1/2009, dated 20 November 2009)

Section 70 of the Trade Marks Act (Cap 332) 2005 Rev. Ed. provides:-

If a person who neither resides nor carries on business in Singapore —

(a) gives notice of opposition under section 13; or

(b) applies to the Registrar under section 22 or 23 for the registration of a trade mark to be revoked or to be declared invalid, as the case may be,
the Registrar may require the person to give security for the costs for the proceedings and may, if security is not given, dismiss the proceedings.

[Emphasis added].

It is clear from the above that the application for security for costs can be a 2 - stage process. Thus, the Registrar will deal with such applications as a 2-stage process.

(I) Application for security for costs

Firstly, provided that a person neither resides nor carries on business in Singapore, the Registrar then has the discretion to require a person to provide security for costs of the

proceedings, but only if the Registrar thinks it is just to do so in the circumstances of the case.

The factors that would be taken into consideration in deciding whether to grant security for costs in a trade mark opposition, invalidation or revocation are similar to the factors that would be taken into account in deciding whether to grant security for costs in a civil suit. Thus as provided in the Singapore Civil Procedure ("the White Book"), such factors include, amongst others:-

- (i) the likelihood of the opponent succeeding;
- (ii) whether the order for security for costs will stifle a genuine claim; and
- (iii) where the opponent is a limited company, whether there is any evidence that the opponent is unable to pay costs.

Based on a consideration of the above, the Registrar then may or may not order security for costs to be given.

(II) Application for proceedings to be dismissed

In the event that the party whom the Registrar has ordered to provide security for costs fails to do so, the party to whom security for costs has been granted can then apply for the proceedings to be dismissed. The Registrar will call for submissions in writing from both parties and exercise her discretion to decide whether the proceedings should be dismissed. If parties request an interlocutory hearing to decide the issue, or if the Registrar thinks it appropriate, the Registrar may also fix an interlocutory hearing to hear the parties in person.

Completion of Form TM 28 (HMD Circular No. 2/2009, dated 20 November 2009)

Form TM 28 is used for 3 different types of proceedings:-

- (i) Application for revocation of registration of a trade mark (Rule 57(1)(a) of the Trade Marks Rules 2008 Rev. Ed. (TMR));
- (ii) Application for declaration of invalidity of registration of a trade mark (Rule 57(1)(b) of the TMR); and
- (iii) Application for rectification of the register by persons other than the proprietor of the trade mark (Rule 57(1A)(b)).

Thus, when completing the form, please ensure that: -

- (i) the correct information is provided in Form TM 28 pursuant to the particular type of proceedings for which the Form TM 28 is filed; and
- (ii) the statement of grounds provided under Part 5 of Form TM 28 is worded consistently in accordance with the type of proceedings pursued under TM 28 ie application for revocation / declaration of invalidity / rectification of the register, as applicable.

In the event of any inconsistencies between the statement of grounds and the type of proceedings indicated, the applicant would generally be directed to re-file Form TM 28 with a clear indication as to the type of proceedings pursued, unless there are exceptional reasons for the Registrar to exercise her discretion to waive the need for such correction. The earlier application will be treated as withdrawn and the application date will be the later filing date. Fees paid are non-refundable as the need to re-file is attributable to the applicant or his agents.

Filing of Form TM 11 by Joint-Opponents (HMD Circular No. 3/2009, dated 20 November 2009)

Under the provisions relating to oppositions in the Trade Marks Act (Cap 332) 2005 Rev. Ed. and Trade Marks Rules 2008 Rev. Ed., there is no prohibition against joint-opponents opposing a trade mark application.

In such an instance, it is sufficient for the purposes of the opposition that one Form TM 11 be filed. To reflect that there are joint-opponents opposing the registration of a particular trade mark, the opponents simply need to indicate, at Part 3 of TM 11, the particulars of the different opponents opposing such a registration.

The fees which are chargeable for TM 11 will depend upon the number of classes included in TM 11.

Similarly, in such circumstances, for the purpose of lodging evidence via statutory declarations (this will occur at a later stage in an opposition proceeding), the joint-opponents need to file only one set of evidence via statutory declarations provided that it is clear from each statutory declaration that the deponent has been duly authorized by all the joint-opponents to give such evidence on their behalf.

Service of Form TM 11 (Notice of Opposition) and Form TM 28 (Application for Revocation / Declaration of Invalidity / Rectification) (HMD Circular No. 4/2009, dated 20 November 2009)

Service of Form TM 11 and Form TM 28 is regulated under Rule 29 and Rule 57 of the Trade Marks Rules 2008 Rev. Ed. (TMR) respectively.

Rule 29(2) provides that the opponent shall serve on the applicant a copy of the notice of opposition at the same time as the notice of opposition is filed with the Registrar.

Rule 57(3) provides that the applicant for revocation / declaration of invalidity / rectification shall, if he is not the proprietor of the registered trade mark, serve a copy of the application and the statement of grounds on which the application is based on the registered proprietor at the same time as he files the application and statement of grounds with the Registrar.

For the purpose of ensuring compliance with the above Rules, the opponent / applicant is to indicate clearly, on the cover letter enclosing the notice of opposition or application for revocation / declaration of invalidity / rectification to the Registrar, that a copy of Form TM 11 or Form TM 28, as applicable, has been served on the applicant / registered proprietor. Failure to do so will be taken as non-compliance with Rule 29(2) or Rule 57(3) respectively. Accordingly, the Registrar will treat the case as no proper service of Form TM 11 and Form TM 28 respectively, unless the opponent / applicant proves otherwise.

In such an event, Form TM 11 / Form TM 28 will be rejected as non-compliant. The opponent / applicant will have to re-file Form TM 11 / Form TM 28 afresh and serve the same on the applicant / registered proprietor.

In relation to Form TM 11, in the event that the notice of opposition cannot be re-filed as the 2-month or 4-month maximum time period has expired, the prospective opponent will then have to consider filing for invalidation after the mark has been registered.

Service of Form TM 12 (Counter-statement) (HMD Circular No. 5/2009, dated 20 November 2009)

Service of Counter-statement for opposition is regulated under Rule 31 of the Trade Marks Rules 2008 Rev. Ed. (TMR) and service of Counter-statement for an application for revocation / declaration of invalidity / rectification is regulated under Rule 58 of the TMR.

Rule 31(2) provides that the applicant shall serve on the opponent a copy of the Counter-statement at the same time as it is filed with the Registrar.

Rule 58(2) provides that the registered proprietor shall serve on the applicant a copy of the Counter-statement at the same time as he files the Counter-statement with the Registrar.

For the purpose of ensuring compliance with the above Rules, the applicant / registered proprietor is to indicate clearly, on the cover letter enclosing Form TM 12 to the Registrar, that the same has been served on the opponent / applicant. Failure to do so will be taken as non-compliance with the Rules. Accordingly, the Registrar will treat the case as no proper service of Form TM 12.

In such an event of non-service, and provided that the irregularity would not result in a detriment to the other party that cannot be remedied, the Registrar would generally, pursuant to Rule 83, exercise her discretion to direct that the procedural irregularity be

rectified by issuing deadlines for service of the Form TM 12 on the other party and an order as to costs against the applicant / registered proprietor as appropriate.

HMD 2010 Circulars

Compliance with Rule 30(3) (HMD Circular No. 1/2010, dated 20 August 2010)

Where an opponent relies on an “earlier trade mark which is well known in Singapore” in support of his opposition, Rule 30(3) of the Trade Marks Rules 2008 Rev Ed applies.

Rule 30(3) requires that:

- (i) information on the use of the earlier trade mark; and
- (ii) information on any promotion undertaken for the earlier trade mark be provided in the notice of opposition.

There are no pre-set requirements on the specific information needed to comply with Rule 30(3). Therefore, any relevant information will be accepted as long as:

- (i) the information relates to the use or promotion of the earlier trade mark; and
- (ii) it is “for the purpose of determining if the trade mark is well known in Singapore” as expressed in Rule 30(3).

Non-exhaustive examples include:

- (i) revenue figures for the earlier trade mark worldwide and in Singapore, if any
- (ii) promotion figures for the earlier trade mark worldwide and in Singapore, if any
- (iii) information on the duration of the use and promotion of the earlier trade mark
- (iv) information on the extent of the use and promotion of the earlier trade mark
- (v) information on the geographical area of the use and promotion of the earlier trade mark

Examples (iii) to (v) above are essentially information pertaining to Section 2(7)(b) of the Trade Marks Act (Cap 332) 2005 Rev Ed.

The information provided can be descriptive (e.g. “Our well known mark has been used on clothing and footwear in 20 countries worldwide including the USA, UK, Germany, China and Singapore since 1990”) or quantitative (e.g. actual revenue and promotional figures”).

Any information provided under Rule 30(3) must, however, be more than that which is already required of earlier trade marks which are not registered nor pending registration under Rule 30(2)(c). In other words, the information must go beyond information on the goods or services in respect of which the mark is used.

If Rule 30(3) is not complied with, the opponent will be directed to amend his notice of opposition to comply with the requirement if the parties are not negotiating.

In practice, the above applies to an application for invalidation that is based on “an earlier mark which is well known in Singapore” as well.

Amendments to Form TM 11, Form TM 28 and Form TM 12 (HMD Circular No. 2/2010 dated, 20 August 2010)

Amendments may be made to Form TM 11 (Notice of Opposition), Form TM 28 (Application for Revocation or Declaration of Invalidity of Registration of Trade Mark) and Form TM 12 (Counter-Statement) in the course of opposition/revocation/invalidation proceedings before the Registrar if it is fair and reasonable to do so. Depending on when the request to amend is made, different considerations apply.

A. AMENDMENTS BEFORE CLOSE OF PLEADINGS

The Registrar will in appropriate cases generally allow amendments to Form TM 11 and Form TM 28 before pleadings are deemed to be closed. Pleadings are deemed to be closed immediately upon the filing of Form TM 12 (Counter-Statement), or, in the case of an invalidation action where no Counter-Statement is filed, the last date that the Counter-Statement could have been filed.

For avoidance of doubt, amendments to Counter-Statements are always made after the close of pleadings by the foregoing definition. In such instances, B. below applies.

Where the proposed amendments are allowed, the Registrar may grant an extension of time to the other party to file his Counter-Statement and/or award such costs as may be just against the party seeking the amendments.

B. AMENDMENTS AFTER CLOSE OF PLEADINGS

Where amendments are sought after pleadings are deemed to be closed, consent from the other party must first be sought. If there is consent from the other party, the Registrar will in appropriate cases generally allow the amendment and if necessary, issue such directions on the subsequent procedure as is deemed fit.

Where there is no consent, leave of the Registrar must be obtained for any amendment after the close of pleadings. Whether leave would be granted depends on the facts and circumstances of each case. In considering whether to grant leave for the amendments, the Registrar will conduct a balancing exercise, involving a consideration of the public interest that rules relating to procedure are complied with and the need to ensure that there is proper adjudication of a case based on its merits in the interest of justice between the parties. In particular, the Registrar will carefully weigh the following non-exhaustive factors on a case by case basis:

- (i) whether the party seeking the amendment could have claimed the particular ground/defence or cited the additional “earlier trade mark” earlier, when filing Form TM 11, Form TM 28 or Form TM 12
- (ii) whether the amendment is necessitated by the pleading or evidence filed by the other party
- (iii) whether the other party would suffer any real prejudice which cannot be compensated with costs if the amendment is allowed
- (iv) whether allowing the amendment will facilitate the determination of the real question in controversy between the parties or whether the amendment is only a tactical manoeuvre and allowing the amendment would result in prejudice to the other party

- (v) whether the amendment raises grounds or facts which the applicant need not set out in reply, for example, the ground was not raised by the opponent and is therefore inapplicable to the particular proceedings at hand
- (vi) the substantiality of the amendment
- (vii) the stage of the proceedings the amendment is sought.

If leave to amend is granted, the Registrar may issue such necessary directions on the subsequent procedure as is deemed fit, including but not limited to adjourning the case, allowing amendments to be made to the Counter-Statement by the other party, granting extensions of time for the filing of further evidence by both parties as well as awarding such costs as may be just against the party seeking the amendments.

Using Form TM 28 for Two or More Different Types of Actions (HMD Circular No. 3/2010, dated 20 August 2010)

Form TM 28 is used for 3 different types of actions:

- (iv) Application for revocation of registration of a trade mark (Rule 57(1)(a) of the Trade Marks Rules 2008 Rev Ed ("TMR"))
- (v) Application for declaration of invalidity of registration of a trade mark (Rule 57(1)(b) of the TMR)
- (vi) Application for rectification of the register by persons other than the proprietor of the trade mark (Rule 57(1A)(b) of the TMR)

As each type of action is different in that different grounds are applicable, **one Form TM 28** is required for **each** type of action (revocation / invalidation / rectification) pursued in relation to a trade mark. Thus, should the applicant for invalidation / declaration of invalidity / rectification seek to institute two (or three) different types of actions in relation to a trade mark, two (or three) Form TM 28's are to be filed accordingly.

In the event that two (or three) different types of actions are indicated in one Form TM 28, the form will only be considered to be relevant for **one** of the actions for the particular trade mark. This means that should the applicant for invalidation / declaration of invalidity / rectification still wish to pursue the second (or third) action(s), he will be required to file another Form TM 28 with the consequent costs and filing date implications.

For avoidance of doubt, the above does not affect the existing cost calculation for Form TM 28, which is on a per class basis.

Dealing With Extensions of Time and Case Management Conference Timelines (HMD Circular No. 4/2010, dated 20 August 2010)

To better manage trade mark opposition, invalidation and revocation proceedings, the Registrar has, at case management conferences (CMC) convened under Rule 81A of the Trade Marks Rules 2008 Rev Ed, been issuing timelines for the filing of evidence by both parties. The primary objectives are to ensure that the parties explore the possibility of a settlement through negotiations and that all parties have the same expectations on the amount of time given to each party for the filing of evidence. This circular sets out the Registrar's practice in relation to extensions of time for filing evidence and the application of CMC timelines.

Fast-Track and Slow-Track CMC Timelines

Timelines issued through CMCs are generally of two types – slow-track and fast-track. Slow-track timelines are issued in cases where parties are already exploring or are intending to explore the possibility of settlement through negotiations. In such cases, the objective of issuing a longer timeline for the party initiating the action to file his evidence is to allow parties sufficient time to negotiate and reach an amicable settlement. In other cases, fast-track timelines will be issued.

This table sets out typical timelines for slow-track and fast-track cases:

	Slow-Track Timelines	Fast-Track Timelines
Evidence of initiating party	14 months from Counter-Statement	8 months from Counter-Statement
Evidence of responding party	6 months from evidence of initiating party	6 months from evidence of initiating party

These CMC timelines represent the maximum extent to which the Registrar will generally exercise her discretion in granting extensions of time to parties and they are predicated on the appropriate requests for extensions of time being made.

Extensions of Time Within CMC Timelines

The Registrar will, as a matter of general practice, grant extensions of time where they fall within the CMC timelines.

Extensions of Time Beyond CMC Timelines

1. Slow-Track Cases

Under the slow-track timelines, as the evidence of the party initiating the action can be filed as late as 14 months from the Counter-Statement, parties effectively have a total of 14 months to reach a settlement. This saves parties unnecessary expense in preparing evidence for the adversarial process while they negotiate. As 14 months would provide parties a reasonable opportunity to reach a settlement in most cases, in exercising the discretionary power under Rule 32(9), the Registrar **will most likely refuse to grant** any further extension of time beyond that timeline unless it is shown to the Registrar's satisfaction that there are good and sufficient reasons to do so as required under Rule 32(9).

Once the filing of evidence has started, again, in exercising the discretionary power under Rule 33(9) or Rule 34(9), the Registrar **will most likely refuse to grant** any further extension of time beyond the CMC timelines unless the Registrar is satisfied that there are good and sufficient reasons to do so as required under Rule 33(9) or Rule 34(9) respectively.

2. Fast-Track Cases

Where initially fast-track timelines applied but subsequently parties require more time to negotiate, they may apply to the Registrar to adjust the timelines for the filing of evidence and provide the Registrar with information as to the specific additional period of time that will be needed for parties to fully explore settlement through negotiations. Again, in exercising the discretionary power under Rule 32(9), Rule 33(9) or Rule 34(9), the Registrar **will most likely refuse to grant** any further extension of time beyond the adjusted timelines unless it is shown to the Registrar's satisfaction that there are good and sufficient reasons to do so.

3. Reasons Supporting Extensions of Time beyond CMC Timelines

The Registrar may, in exceptional cases, and in so far as it is substantiated, consider the non-exhaustive list of circumstances below as justifications for the further extension of time to file evidence beyond the CMC timelines:

- (i) parties are negotiating a world-wide settlement agreement involving many jurisdictions
- (ii) parties are negotiating a settlement agreement involving a few other parties other than the parties themselves
- (iii) parties are awaiting the outcome of relevant court or other proceedings (such as proceedings before another IP office or foreign court or WIPO) that has a material bearing on the settlement agreement or on how the parties wish to proceed
- (iv) significant progress has been made but parties still require a specific period of additional time to complete the negotiations
- (v) one party has had a change of agent shortly before the deadline for him to file his evidence
- (vi) a circumstance has arisen that is beyond one party's control, provided that the party has acted promptly and diligently at all times; for example, corporate changes such as merger and bankruptcy; the party's decision-maker has taken ill or left and the party needs more time to make certain decisions; civil war; declaration of state of emergency.

Whenever an extension of time beyond the CMC timeline is sought, the party must provide the reason and information on the specific additional period of time needed. In addition, except for (v) and (vi) above, the party requesting an extension of time beyond the CMC timeline must also obtain the consent of the other party to the further extension of time. If the Registrar accepts the reason for a further extension of time beyond the CMC timeline, it shall not be possible to request any further extension of time based on the same reason beyond the specific additional period of time indicated by the party.

4. Adjustment of CMC Timelines

Where the Registrar has granted an extension of time beyond the original CMC timeline, the latter may also be adjusted as appropriate, to take into account the new circumstances that have set in.

Concurrent Statutory Deadlines and CMC Timelines

Parties should note that statutory deadlines and CMC timelines run concurrently. CMC timelines and any further extensions of time beyond CMC timelines granted do not negate the need for parties to apply for extensions of time in accordance with the Trade Marks Rules, including, where applicable, filing Form TM 50 and fee.

Typically, the Registrar will grant an extension of not more than 2 months each time for each Form TM 50 filed. To illustrate, if a party has specified an additional period of 4 months in addition to the 8 months given for the filing of his evidence pursuant to the fast track timelines under any of the reasons at (i) to (vi) above, and the Registrar has accepted the reason for extending the deadline for 4 months beyond the CMC timeline, the party would have to file one Form TM 50 for the first extension beyond 6 months from the date of the Counter-Statement and, then, two Form TM 50's for the additional 4 months required.

Conclusion

The Registrar will seek to apply these guidelines consistently and in a fair and reasonable fashion so as to ensure that timelines issued through the CMC process are properly tracked and complied with by both parties. This, in turn, will enhance the efficiency, effectiveness and transparency of the hearings process as well as the CMC process. It will also ensure that applications for extensions of time beyond CMC timelines are not made routinely but are the result of and supported by evidence of circumstances that warrant the extension.

Applications Published for Opposition Purposes under the Trade Marks Act (Cap.332, 1999 Ed.)

Registration has been applied for in the respect of the following Trade Marks under the provisions of the Trade Marks Act (Cap. 332, 1999 Ed.)

OPPOSITION

Notice is hereby given that any person who wishes to oppose the registration of any of the marks published in the class groups which follow may within two months from the date of this journal file a Notice of Opposition on Form TM 11 (fee \$340).

Formal opposition should not be filed until after reasonable notice has been given to the Applicant for registration so as to afford him an opportunity of withdrawing his application before the expenses of preparing the Notice of Opposition are incurred. Failure to give such notice will be taken into account in considering any application by an Opponent for an Order for Costs if the opposition is uncontested by the Applicant.

T0812576A 11/09/2008 (32)

Registration of this mark shall give no right to the exclusive use of the words "Premium Beer".

The transliteration of the Khmer characters appearing in the mark is "Angkor Beer Wat" which has no meaning.

Class 32
Beer.

The transliteration of the Chinese characters appearing in the mark is "Bo Ke" which has no meaning.

**Class 07**

Abraders (machines); abrading inserts for use with machines; abrading machines; abrading tools for use with machines; abrasive bits for use with machines; abrasive discs (machine tools); abrasive grinding wheels (machines); abrasive instruments (machines); abrasive sharpening stones (parts of machines); abrasive stones (parts of machines); abrasive tools being parts of machines; abrasive vulcanised fibre discs (parts of machines); abrasive wheels being parts for machines; access platforms (mechanical); accumulating machines; acetylene cleaning apparatus; actuators for dampers; actuators for mechanisms; actuators for valves; actuators incorporating a gear mechanism for pipeline valves; adapters for machine tools; adaptors for pipes (parts of machines); adaptors for tool bits (parts of machines); adhesive bands for pulleys; adhesive bands for pulleys; adhesive tape dispensers (machines); aerated beverages making machines; aerated water making apparatus; aerating pumps; aerating pumps for aquaria; aerating pumps for aquariums; aeration pumps for bodies of water; aeration pumps for ponds; aerators; aerial platforms for use with cranes; aerial platforms for use with hoists; aerocondensers; aeronautical engines; aeroplane engines; aerosol filling machines; afterburners for air vehicle engines; afterburners for water vehicle engines; agitating mechanisms; agitator pumping apparatus; agitators; agitators being parts of machines; agricultural apparatus (other than tractors); agricultural elevators; agricultural implements being trailer mounted; agricultural implements other than hand-operated; agricultural machine tools; agricultural machines; agricultural machines for animal management; agricultural machines for cultivating; agricultural machines for fertilising; agricultural machines for grass collecting; agricultural machines for grass cutting; agricultural machines for ground cultivation; agricultural machines for harvesting; agricultural machines for ploughing; agricultural machines for soil working; agricultural machines for sowing; agricultural spraying apparatus (other than hand operated); agricultural spraying machines; air blowers; air blowing machines; air brushes (paint spraying); air brushes for applying colour; air cleaners for engines; air compressing apparatus; air compressor pumps; air compressors; air condensers; air cushion devices for moving loads; air delivery guns; air delivery valves; air driven hand tools; air ducting for jet engines; air filled devices (jacks); air filters being parts of engines; air filters being parts of machines; air filters for automobile engines; air filters for commercial vehicles; air filters for engines;

air filters for motorcycle engines; air filters for motors; air filters for trucks; air filtration machines; air flotation tables; air hose reels (mechanical); air induction apparatus for internal combustion engines; air induction apparatus for machines; air induction apparatus for motors and engines; air inlets (parts of machines, engines or motors); air operated tools; air powered tools; air pressure pumps (garage installations); air pressure reduction gears; air pumps (garage installations); air receivers; air spray guns; air suction apparatus; air suction machines; air switching valves; aircraft engines; airsprings for machines; alternating current generators; alternators; alternators for commercial vehicles; alternators for trucks; amphibious bulldozers; angle joints (parts of machines); animal feed hoppers (machines); animal feeding stations (machines); animal husbandry machines; animal shearing machines; anti-friction bearings for machines; anti-friction pads for machines; anti-kickback devices for power tools; anti-lock brake apparatus for machines; anti-pollution devices for motors and engines; anti-shock pads (parts of machines); anti-vibration mountings for machines; apparatus (machines) for filtering; apparatus (machines) for filtering dust; apparatus (machines) for filtering fumes; apparatus (machines) for filtering gases; apparatus (machines) for filtering water; apparatus for agricultural use (machines); apparatus for aircraft landing gear; apparatus for alcohol damping; apparatus for applying fertilizers (machines); apparatus for applying fungicides (machines); apparatus for applying herbicides (machines); apparatus for applying insecticides (machines); apparatus for binding objects with ribbons; apparatus for binding objects with wires; apparatus for capping containers; apparatus for chemical agitation apparatus for chemical mixing apparatus for clamping workpieces (parts of machines) apparatus for cleaning carpets; apparatus for cleaning conduits; apparatus for cleaning contaminated articles; apparatus for cleaning medical apparatus; apparatus for cleaning medical instruments; apparatus for cleaning pipes; apparatus for cleaning tubes; apparatus for cleaning upholstery; apparatus for coating moulds; apparatus for compressing natural gas; apparatus for controlling the feed of materials to machines; apparatus for controlling the operation of machines (hydraulic); apparatus for controlling the operation of machines (manual); apparatus for controlling the operation of machines (pneumatic); apparatus for controlling the processing of materials by machines; apparatus for conveying goods; apparatus for crushing; apparatus for decapping containers; apparatus for dispensing labels; apparatus for dispensing quantities of liquids into cans; apparatus for dispensing quantities of liquids into cylinders; apparatus for dispensing quantities of liquids into small containers; apparatus for drawing pipes cables through bore holes; apparatus for drawing pipes ducts through bore holes; apparatus for drawing up beer (under pressure); apparatus for dressing;

apparatus for drilling bore holes; apparatus for drilling wells; apparatus for drying surface layers of sheet material; apparatus for duplicating (cutting) keys; apparatus for dust collection (cleaning) in buildings; apparatus for embossing metal plates; apparatus for filling containers; apparatus for filling gas in bottles; apparatus for filling gas in containers; apparatus for fluid handling; apparatus for holding machine tools; apparatus for horticultural use; apparatus for inching printing units; apparatus for ink agitation; apparatus for installing underground cables; apparatus for installing underground ducts; apparatus for installing underground pipes; apparatus for killing weeds by means of heat (agricultural machine); apparatus for laying telecommunications cables; apparatus for lifting; apparatus for lifting containers for waste materials; apparatus for lifting goods; apparatus for lifting rubbish skips; apparatus for loading cargo; apparatus for lowering trailers; apparatus for machining; apparatus for making paper; apparatus for making printing plates; apparatus for manufacturing electric motors; apparatus for manufacturing lamp shades; apparatus for manufacturing semi-conductors; apparatus for materials handling; apparatus for mechanised welding (other than electric); apparatus for milking; apparatus for mixing chemicals; apparatus for mixing concrete; apparatus for mixing enamels; apparatus for mixing lacquers; apparatus for mixing paints; apparatus for moulding plastics; apparatus for moving chucks; apparatus for packing goods in bands; apparatus for packing goods in strips; apparatus for powering high frequency tools; apparatus for printing (machine); apparatus for producing cleaning sprays; apparatus for producing gas and powder mixtures; apparatus for producing metal powders; apparatus for producing sprays of air and powder; apparatus for proofing of printing plates mounted on print cylinders; apparatus for raising semi-trailers; apparatus for raising trailers; apparatus for recovering powder from gas and powder mixtures; apparatus for refuelling ships at sea; apparatus for removing surface water from the ground; apparatus for reverse osmosis; apparatus for sealing containers; apparatus for separating oil; apparatus for separating solids from liquids; apparatus for sheet feeding; apparatus for squashing empty cans (machines); apparatus for strapping parcels with steel hoops; apparatus for strapping parcels with wire; apparatus for stripping branches from trees; apparatus for stripping leaves from trees; apparatus for the assembly of refractory parts; apparatus for the automation of plants; apparatus for the charging of furnaces; apparatus for the cleaning of conduits; apparatus for the cleaning of pipelines; apparatus for the cleaning of tanks; apparatus for the compression of air; apparatus for the compression of fluids; apparatus for the compression of gas; apparatus for the condensing of solvent gases; apparatus for the condensing of vapours; apparatus for the control of machines (pneumatic or hydraulic); apparatus for the handling

of materials; apparatus for the loading of goods; apparatus for the machining of printing plates; apparatus for the maintenance of lawns; apparatus for the manufacture of paper; apparatus for the mechanical handling of goods or materials; apparatus for the melting of polymers; apparatus for the melting of thermoplastics materials; apparatus for the pressing of glass; apparatus for the production of foamed polyurethane materials; apparatus for the propulsion of water borne vessels; apparatus for the recovery of solvent gases; apparatus for the recovery of vapours; apparatus for the removal of debris from buildings; apparatus for the removal of dust from buildings; apparatus for the removal of fluff from floors; apparatus for the removal of obstructions from pipelines; apparatus for the tipping of goods; apparatus for the treatment of lawns; apparatus for the unloading of goods; apparatus for transferring liquid materials; apparatus for transporting articles (pneumatic); apparatus for unsealing containers; apparatus for use in abrading; apparatus for use in agriculture; apparatus for use in animal husbandry; apparatus for use in clarifying; apparatus for use in cleaning buildings; apparatus for use in cleaning carpets; apparatus for use in cleaning floors; apparatus for use in construction; apparatus for use in cutting; apparatus for use in drilling; apparatus for use in feeding livestock; apparatus for use in grinding; apparatus for use in milling; apparatus for use in mining; apparatus for use in reaming; apparatus for use in refineries; apparatus for use in separating; apparatus for use in straining; apparatus for use in the casting of metals; apparatus for use in the coating of surfaces; apparatus for use in the control of machine tools (pneumatic or hydraulic); apparatus for use in the control of machines (pneumatic or hydraulic); apparatus for use in the disposal of manure; apparatus for use in the processing of foodstuffs; apparatus for use in the sorting of waste; apparatus for use in the spray finishing of surfaces; apparatus for use in the spreading of manure; apparatus for use in well drilling operations; apparatus for vacuum packing in plastic bags; apparatus for vacuum packing in plastic film; apparatus for waste sewage treatment (machines); applicators (machines or parts of machines); applicators for lawn care products (machines); apron conveyors; aprons (parts of machines); arbors (parts of machines); archimedian screws; article storage (conveying) apparatus; articulated couplings; articulated loaders; articulated transmissions for aircraft; articulated transmissions for machines; articulated transmissions for watercraft; artificial mist generating machines; artificial smoke generating machines; assembly line conveyor apparatus; assembly machines; assembly presses; atomisers (machines); atomisers being parts for agricultural crop spraying machines; atomizers (machines); atomizers (machines) for insecticides; attachments for bulldozers; attachments for cranes; attachments for excavators; attrition machines for cleaning; attrition machines for particle surface preparation; auger

bits for use with powered tools; augers (machines); auto sheet laminating machines; auto sheet laminators; autogenous soldering apparatus (gas operated); autogenous welding apparatus (gas operated); autogenous welding machines; automated assembly machines; automated collating machines; automated embossing apparatus; automated handling apparatus; automated machines for loading materials; automated punching apparatus; automated transfer machines; automatic assembly machines; automatic cleaning apparatus for swimming pools; automatic conveyor installations; automatic cutting machines; automatic dispensing machines; automatic document feeders being parts of machines; automatic drum filling machines; automatic feeding apparatus for livestock; automatic gearboxes (other than for land vehicles); automatic gearings (other than for land vehicles); automatic grapnels for marine purposes; automatic grinding machines; automatic industrial machines; automatic lathes; automatic machine tools; automatic machines for cutting work pieces; automatic machines for cutting work pieces; automatic machines for feeding materials into machines; automatic machines for filling sachets; automatic machines for packaging sachets; automatic machines for packing food products; automatic machines for producing sachets; automatic machines for the cutting of fabrics; automatic machines for the manufacture of beverages; automatic machines for the packaging of pharmaceuticals; automatic machines for use in manufacture; automatic materials handling apparatus; automatic pallet stabilisation machines; automatic printing machines; automatic production line apparatus; automatic production line conveyors; automatic pumping apparatus; automatic swimming pool sweepers; automatic tool changing apparatus for machine tools; automatic tray dispensing machines; automatic washers for milking installations; automatic washing machines; automatic winding machines; automobile straightening benches; auxiliary press apparatus; awls (powered tools); axial pumps; axles for machines; back hoes (machines); baffles (parts of machines, engines or motors); bag compactors (machines); bag filling machines; bag forming machines; bag sealing machines; bagging machines; bailing machines; balances for power operated tools; balancing machines; ball bearings for engines; ball bearings for machines; ball bearings for motors; ball bushings; ball cramping levers; ball races; ball retrieving apparatus; ball rings for bearings; ball rings for machine tools; ball rings for machines; ball screw cartridges; ball screws; ball splines; ball-bearings; band conveyors; bandsaw blades for machines; bandsaws; bar code labellers; bar code printers (machines); barn cleaners (machines); barrels for use with boring machines; barrels for use with drilling machines; barrels for use with drilling rigs; basement draining installations; batch loading machines; batch sorting machines; battery operated lint removers; battery operated spraying machines; bearing brackets for ball

bearings; bearing brackets for machines; bearing brackets for roller bearings; bearing brushes; bearing end rods; bearing housings; bearing inserts; bearing mounts; bearing rod ends; bearing rollers; bearing to shaft locking devices; bearing units for wheels; bearings; bearings (parts of machines); bearings for shafts; bearings for transmission shafts; beaters being electric appliances; beaters, electric; beating machines; beer engines; beer line cleaning apparatus; beer pumps; bellows (machines); bellows being parts of machines; bellows for machines; belt conveyors; belt drives; belt pulleys; belt sanders (machines); belt sanding machines; belt tensioners; belting for machines; belts for conveyors; belts for engines; belts for machines; belts for motors and engines; belts for shrinkage machines; belts for use with machinery for transmission purposes; belts for vehicle cooling fans; bench drilling machines; bench grinders (machines); bench presses (machines); bending machines; bending machines for sheets; bending machines for tubes; bending presses (machines); bevel gear grinding machines; bevelled edge formers (machines); beverage making machines; beverage preparation machines, electromechanical; bicycle assembling machines; bicycle dynamos; bilge pumps; binding apparatus for hay; binding machines for comb binding; binding machines for ring binding; binding machines for spiral binding; binding machines for thermal binding; biscuit making machines; bits (parts of machines); bitumen making machines; blade components for use with rotary vegetation cutting machines; blade grinding machines; blade holders (parts of machines); blade sharpening (stropping) machines; blades (parts of machines); blades for aircraft turbines; blades for circular saws (machines); blades for powered planes; blades for powered tools; blender proportioning pumps; blenders for food (electric); blenders, electric, for household purposes; blind stitch sewing machines; block and tackle; block cutters (machines); blow pipes (gas-operated cutting apparatus); blowers (machines); blowers for moving materials; blowers for scattering materials; blowers for sucking materials; blowing engines; blowing machines; blowing machines for exhaustion of dust; blowing machines for exhaustion purposes; blowing machines for the compression, exhaustion and transport of gases; blowing machines for the compression, sucking and carrying of grain; blowing machines for the exhaustion of fluids; blowing machines for the exhaustion of gaseous matter; blowing machines for the exhaustion of solid matter; boat engines; boat motors; bobbin winding machines; bobbins (parts of machines); bobbins for weaving looms; body straighteners (machines); boiler connection pipes; boiler feedwater degassers; boiler tubes (parts of machines); boilers for turbines; bolt cutters (machines); bolt setting machines; bonding apparatus (machines); bonding machines; bookbinding apparatus and machines for industrial purposes; bookbinding machines; borax coating machines; boring machines; boring tools (machine tools); bottle

capping machines; bottle filling machines; bottle handling apparatus; bottle sealing machines; bottle stoppering machines; bottle straightening machines; bottle washing machines; bottom cleaning machines for swimming pools; bow saws (machines); bowstoppers; box making machines; boxes for matrices (printing); braiding machines; brake blocks for machines; brake components for machines; brake linings for brakes in conveyor apparatus; brake linings other than for vehicles; brake motors; brake segments for machines; brake segments other than for vehicles; brake shoes for machines; brake shoes other than for vehicles; brakes for industrial washing machines; brakes for machines; brakes for presses; braking components for machines; branch cutters (machines); brazing apparatus; bread cutting machines; bread moulding machines; bread slicers (machines); break rings for horizontal casters; breakrock hammers (machines); brewing machines; brick presses; bridge cranes; briquetting machines; broaches (machine tools); broaching machines; broaching tools; brush cleaning apparatus (machines); brush cutters (machines); brushes (parts of machines); brushes being parts of dynamos; brushes being parts of generators; brushes being parts of machines; brushes being parts of motors; brushes, electrically operated; brushing (sweeping) machines; brushwood cutters (machines); bucket conveyors; bucket excavators; bucket rails for conveyors; bucket wheels; buckets for earth moving machines; buckets for elevator conveyors; buckets for use with hydraulic lifting machines; building hoists; bulldozers; bunchers (machines); bundling machines; bushes being parts of engines; bushes being parts of motors; bushings being parts of machines; butchers saws (machines); butter machines; butter making machines; butterfly shutters; butterfly valves being parts of machines; buttonholing machines; cable cutters (machines); cable cylinders (parts of machines); cable disc casings; cable driven conveying machines; cable driven conveyor belts; cable drums (parts of machines); cable glands being parts of machines; cable hoists (machines or installations); cable operating apparatus for remote handling; cable processing machines; cable pullers (machines); cable rollers (machines); calender rollers (machines); calendering machines; calenders; cam followers; camera cranes; camshafts for air vehicles; camshafts for machines; camshafts for water vehicles; can crushers (machines); can forming apparatus; can openers, electric; can opening machines; candle filters; capping machines; capping machines for aerosols; capstans; car washing installations; car washing machines; carbide burs (machine tools); carbide drill bits for machines; carbide drill tips for machines; carbide tools for metal cutting machines; carbine swivels; carbon brushes (electricity); carbon brushes for alternators; carbon brushes for dynamos; carbon brushes for electrical machines; carbon brushes for starter motors; carbon brushes for use in electrical apparatus in motor vehicles; carbonating machines; carburetter feeders;

carburettors; carburettor conversion apparatus sold in kit form; carburettors; card clothing (parts of carding machines); card type textile machines; cardan joints; cardan shafts; carding machines; cargo handling apparatus; cargo handling machines; carpet brushing machines; carpet cleaning apparatus (electric); carpet cleaning machines (electric); carpet washing machines; carriage aprons; carriages for knitting machines; carrier chisel (machine tools); carton folding machines; carton making machines; cartridges for filtering machines; cartridges of staples for industrial stapling machines; case loading machines; casing cutters; casing rings (parts of machines); casings for industrial machines; cast component parts for jet engines; cast iron parts for pipes (parts of machines); casting apparatus; casting machines for ceramics; casting machines for molten metal; casting moulds of metal (parts of machines); casting wheels; casting withdrawal apparatus; catalytic converter units for vehicle exhausts; catalytic converters; cattle dehorners; cattle marking tools (machines); cattle shearers (machines); cattle skinning instruments (machines); cattle stunning appliances (machines); cement drills for drilling machines; cement mixers (machines); cemented carbide tips for tool bits; cemented carbide tools (machine); central vacuum cleaning apparatus; central vacuum cleaning installations; centralised grease lubricating apparatus; centralised oil lubricating apparatus; centrifugal drums; centrifugal machines; centrifugal mills; centrifugal pumps; centrifugal separating machines for industrial use; centrifugal water pumps for domestic purposes; centrifuge separators for industrial use; centrifuges (machines); ceramic masses being parts of engines; ceramic masses being parts of machines; ceramic masses being parts of motors; ceramic tips (tools for machines); ceramic tools for machines; chaff cutter blades; chaff cutters; chaff spreaders (machines); chain conveyors; chain guards (parts of machines); chain hosts; chain saws; chain transmissions, other than for land vehicles; chamfering machines; change speed transmissions (other than for land vehicles); chasers (machines or parts for machines); check valves (parts of machines); cheese making machines; cheese packaging machines; cheese slicers (machines); chemical handling machines; chemical machines; chemical surface treatment installations for metals; chemical surface treatment installations for plastics; chemical vapour deposition devices; chip cutting machines; chisel heads (machine tools); chisels for machines; chopping machines; chucking apparatus for metal cutting machines; chucking apparatus for pressing machines; chucking apparatus for testing machines; chucks (parts of machines); churns; chutes (parts of machines); chutes for the sorting of goods (parts of machines); cigarette machines for industrial purposes; cinder sifters (machines); circle cutting tools for use with hand-operated tools; circle cutting tools for use with machines; circuit board drills (machines or machine tools); circular conveyors; circular saw

blades being parts of machines; circular saws being portable electric power tools; circulating pumps; circulating pumps for central heating installations; clack valves (parts of machines); cladding mills; clamp connectors for piping (parts of machines); clamp connectors of metal for pipes (parts of machines); clamping collars of metal (parts of machines); clamping devices being parts of machine tools; clamping devices for use with machine tools; clamping machines; clamping tools being machine apparatus; clamps for holding pipes during machining; clamps for holding tubing during machining; clamps for pipes (parts of machines); classifying machines; cleaning (washing) installations; cleaning apparatus for industrial purposes; cleaning appliances utilizing steam; cleaning brushes (parts of machines); cleaning guns (pressure washing machines); cleaning implements (electric polishing); cleaning lances (parts of pressure washers); cleaning machines for aircraft; cleaning machines for aircraft runways; cleaning machines for buildings; cleaning machines for gardens; cleaning machines for industrial installations; cleaning machines for machine tools; cleaning machines for pipe-lines; cleaning machines for railways; cleaning machines for roads; cleaning machines for rolling stock; cleaning machines for streets; cleaning machines incorporating rotary brushes; clearing saws (hand-operated); clearing saws (machines); clippers (machines); clippers for use on animals (machines); cloth cutting machines; cloth ironing machines; cloth ironing presses; cloth spin-dryers; cloth spreading machines; cloth washing machines; clothes agitating devices for washing machines; clothes drying (spin) machines; clothes presses; clothes pressing machines; clothes washing machines; clothes wringing machines; clutch components (other than being for land vehicle and not linings); clutch cylinders, other than for land vehicles; clutch levers, other than for land vehicles; clutches other than for land vehicles; coal handling machines; coalcutting machines; coating machines; coating machines for mechanically processing circuit boards; cocks (valves) of metal (parts of machines); coding machines; coding machines for marking aerosol cans; coffee grinders, other than hand-operated; coffee mills (other than hand operated); cog racks; cog wheels being parts of machines; cog wheels for agricultural machinery; cog wheels for industrial machinery; coil forming apparatus; coil unwinding machines; coil winding machines; coin-operated spin drying machines for laundry use; coin-operated washing machines; collating machines for industrial use; collets being parts of machines; colliery de-gassing machines; colour mixing machines; colour tinting machines; colour-washing machines; combination washing and drying machines; combine harvesters; combined washing and brushing machines; combined washing and drying machines; combined washing machines and tumble driers; combined wire strippers and cutters (machines); combing machines; combs being parts of machines; combustion

engines for aircraft; combustion engines for industrial machines; combustion engines for machines; combustion engines for water vessels; commercial packaging machines; comminuters; comminuting apparatus; compacting machines; compacting machines for waste; compactors; component conveying machines; component feeding machines; components for brakes (other than for vehicles); composing machines; composting machines; compressed air control mechanisms; compressed air engines; compressed air guns for the extrusion of mastics; compressed air hoists; compressed air lifting apparatus; compressed air machines; compressed air motors; compressed air pilot valves; compressed air pumps; compressed air raising apparatus; compressed air sprayers; compressed air switch valves; compressed air tools; compressed air tubes; compressing fans; compression fittings of metal (parts of machines); compression fittings of metal for pipes (parts of machines); compression fittings of metal for tubes (parts of machines); compression machines for the manufacture of plastics preforms; compression machines for the transformation of plastics materials; compressor stages; compressors (compactors) for waste collection containers; compressors (compactors) for waste collection vehicles; compressors (machines); compressors for air conditioning apparatus; compressors for fluids; compressors for gases; compressors for recovering and recycling refrigerant gases; compressors for refrigeration apparatus; compressors for refrigerators; compressors for use on refuse; computer aided machines for use in assembly; computer aided machines for use in manufacture; computer controlled machines for use in manufacture; computer operated mechanical handling apparatus; computer operated mechanical handling instruments; computerised machine tools; concrete mixers (machines); concrete pumps (machines); concrete spraying machines; condensate separators; condensers (steam) (other than parts of machines); condensers (steam) (parts of machines); condensers for bellows; condensers for compressed air apparatus; condensers for fossil fuel turbines; condensers for nuclear turbines; condensers for steam turbines; condensing apparatus; condensing installations; conduit (pipe) benders (machines); conical rounding machines; conical wheels (parts of machines); connecting links (parts of machines, engines or motors); connecting rods (parts of motors and engines); connecting rods for machines, motors and engines; connecting rods for pistons; connecting rods for vehicles (parts of motors and engines); connection blocks (parts of machines); construction machines; construction vehicles, other than for transportation purposes; contact printing machines; contacting machines (mixing machines); container handling machines; continuous belts of plastic tape (parts of machines); continuous casting installations; continuous casting machines; continuous vertical conveyors; contour grinding machines; contouring lathes; control cables for machines, engines or motors; control cables for marine engines;

control installations; control mechanisms for industrial machines; control mechanisms for machines, engines or motors; control valves (parts of machines); control valves being hydraulic apparatus; control valves being pneumatic apparatus; controlled trajectory drills (machines); converters for steel works; conveying belts; conveying chains; conveying installations (other than for the transportation of people); conveying machines; conveying rollers; conveyor apparatus for use in sorting baggage; conveyor apparatus for use in transporting baggage; conveyor belt apparatus; conveyor belt cleats; conveyor belt rollers; conveyor belt scrapers; conveyor belting; conveyor belts; conveyor belts made of rubber; conveyor belts of metal; conveyor cages; conveyor installations (other than for the transportation of people); conveyor line roller coders (printers); conveyors (machines); conveyors for controlling the movement of articles; conveyors for rotating articles; conveyors for solid materials; conveyors for use in mines; conveyors for use in quarries; copper pipes (parts of machines); copper sheets for use in the manufacture of printed circuits; copper tubes (parts of machines); cord making machines; cordless electric drills; core bits (machine tools); core chucks (parts of machines); corking machines; corn and grain husking machines; corn cleaning machines; corn husking machines; corn separating machines; cornering machines for the cutting of materials; cornering machines for the punching of materials; cornering machines for the rounding of materials; corrugated cardboard belts for use with machines; corrugated pipes of metal (parts of machines); countersinking tools for machines; countersinks being machine tools; coupling machines; couplings for agricultural implements; couplings for machines; couplings for pneumatic apparatus; couplings of metal for hydraulic apparatus; couplings other than for land vehicles; cowlings (parts of machines); crabbing machines; crack routers (machines); craneage apparatus; crane augers; crane forks; crane hooks; cranes (lifting and hoisting apparatus); cranes for use on breakdown vehicles; cranes for use with tow trucks (lifting and hoisting apparatus); crank shafts; crankcases for land vehicles engines; crankcases for machines, motors and engines; cranks (parts of air vehicles); cranks (parts of machines); cranks (parts of water vehicles); crawler cranes; cream/milk separators; crimping machines; crimping tools (machines or parts of machines); crochet-galloon looms; crochet-galloon machines; crop lifters (machines); crop spraying booms; crop spraying machines; crosshead extension rods (parts of machines, engines or motors); crown wheels being parts of aircraft; crown wheels being parts of machines; crown wheels being parts of watercraft; crushers (machines); crushing apparatus; crushing machines; culinary machines (electric); cultivators (machines); cultivators for use in agriculture; cultivators for use in forestry; cultivators for use in woodworking; current generators; curtain drawing devices, electrically operated; cushion insertion machines; cutter bar knives

(parts for machines); cutter bars (parts of machines); cutters (machines); cutters being machine tools; cutters being parts of machines; cutters for milling machines; cutters for silage (other than hand-operated tools); cutters for straw (other than hand-operated tools); cutting blow pipes gas-operated; cutting blow pipes, gas-operated; cutting devices being parts of machines; cutting dies for use with machines; cutting discs for use as parts of machines; cutting grids being tools for cutting machines; cutting guides for use with electric machines; cutting inserts (parts of machines); cutting inserts for machine tools; cutting machines; cutting rollers (parts of machines); cutting shoes (parts of machines); cutting strips (parts of machines); cutting tips (parts of machines); cutting tool blocks (parts of machines); cutting tools being gas-operated blow pipes; cutting tools being parts of machines; cutting tools being power-operated; cutting tools for machine centres; cutting tools for use in powered hand-held tools; cutting-off machines; cyclone coolant purifying machines; cyclones for particle collection in grinding operations; cylinder blocks (parts of machines); cylinder covers (parts of machines); cylinder heads for engines; cylinder liners; cylinders being parts of machines; cylinders for machines; cylinders for motors and engines; cylinders for use in printing machines; dairy machines; dampening units for offset presses; dampers (parts of machines); damping rollers being parts of machines; darning machines; dashpot plungers (parts of engines or motors); dashpot plungers (parts of machines); de-aerators for feedwater; deburring machines; deburring tools (parts of machines); decanter centrifuges incorporating screw conveyors; degreasers (machines); degreasing apparatus; degreasing apparatus utilising an air blast pressure machine; degreasing machines; dehumidified air dryers for plastic granulates; deionizing machines; demolition hammers (machines); densifiers; depalletisers (machines); depalletisers for metal cans; derricks; descaling machines; desulphurization machines; detergent rinse aid dispensers being parts of dishwashing machines; devices (machines) for tensioning machine belts; devices (machines) operated by compressed air; devices for adapting power driven tools to manipulators; devices for adapting power driven tools to robots; devices for changing moulds in injection moulding machines; devices for holding machine tools; devices for lifting; devices for locking hubs to shafts (parts of machines); devices for the separation of chemicals from fluids; devices for the separation of oil from water; dewatering apparatus; dewatering slides; diamond coated machine parts; diamond coated machine tools; diamond cut-off wheels for machines; diamond cutting tools for machines; diamond drill bits for machines; diamond tipped machine parts; diamond tipped machine tools; diamond tips for tool bits for machines; diamond tools for cutting for machines; diamond tools for drilling for machines; diamond tools for grinding for machines; diamond tools for milling for machines;

diamond tools for polishing for machines; diamond turning machines; diamond turning machines for lathing intra-ocular lenses; diamond turning machines for lathing of contact lenses; diaphragm pumps; diaphragm pumps for pumping fluid material; diaphragm pumps for pumping liquid material; diaphragm pumps for pumping semi-liquid material; diaphragm pumps for use in the metering of fluids; die holders for use with machines; die-casting machines; die-cutting and tapping machines; die-lifters for machine presses; die-stamping machines; die-tapping machines; dies for machine tools; dies for use in the drawing of materials; dies for use in the extruding of materials; dies for use in the pressing of materials; diesel electric generating sets; diesel electric generators; diesel engine air compressor sets; diesel engine driven pump sets; diesel engines (other than for land vehicles); diesel engines for air vehicles; diesel engines for machines; diesel engines for stationary plant; diesel engines for water vehicles; diesel injection devices; diesel machines; diesel motors for air vehicles; diesel motors for machines; diesel motors for ships; diesel motors for stationary plant; diesel motors for water vehicles; diesel turbine engines for air vehicles; diesel turbine engines for machines; diesel turbine engines for water vehicles; differential gear mechanisms for air vehicles; differential gear mechanisms for machines; differential gear mechanisms for sea craft; differential gear mechanisms for water vehicles; differential transmissions for air vehicles; differential transmissions for machines; differential transmissions for sea craft; differential transmissions for water vehicles; diggers (machines); digital electro-hydraulic proportioning valves; direct current generator brushes (parts of machines); direct current generators; direct current motors; direct thin casting apparatus; disc brakes being parts of machines; disc sanding machines; disc screens (parts of machines); disc shaped rotating grinding tools (machines); disc shaped rotating grinding tools (parts for machines); discharging (unloading) apparatus; discharging hoppers; discs for abrading for use with power tools; discs for cutting for use with power tools; discs made of abrasive materials (parts of machines); disengaging mechanisms being parts of machines; dishwashers; dishwashing machines; disintegrators; dispensing machines (other than vending machines); dispensing machines for soap; disposable blades for use with machines; distribution machines (other than automatic); distribution pumps; distributor manifolds being parts of machines, engines or motors; distributors; ditchers (ploughs); dividing machines; domestic blenders (electric); domestic crushers/grinders, electric; domestic floor polishing machines; domestic food liquidisers (electric); domestic food mixers (electric); domestic garbage compacting machines; domestic grinders, electric; domestic grinding machines; domestic ironing machines; domestic kitchen machines (electric); domestic polishing machines; domestic pressing (ironing) machines; domestic refuse compacting machines (electric);

domestic tools (electric); domestic vacuum cleaners; domestic washing machines; domestic waste compacting machines; dosing machines (pumps); dosing valves; double bleed valves; double block valves; double joint shafts; double rotor swing hammer crushers; double shell grippers for excavators; double shell grippers for truck loading cranes; dozer shovels; drag chain conveyors; drain cocks; drainage machines; drape moulding machines; drape winding machines; draw benches; draw machines; dredging machines; dressers for blades (machine tool); dressing apparatus for blades; dressing machines; drill aligning instruments being machines; drill aligning instruments for use with machines; drill aligning squares being machines; drill bits for machines; drill bits for rotary power tools; drill chucks (parts of machines); drill cooling apparatus (parts of machines); drill machines; drill presses being machines; drill sharpening machines; drill stands for drilling machines; drilling bits (parts of machines); drilling hammers; drilling heads (parts of machines); drilling machine supports; drilling machines; drilling rigs (floating or non-floating); drilling rigs for drilling off-shore wells; drilling rigs for drilling wells on land; drilling rods; drilling tips for drilling machines; drilling tools for use with machines; drills being cordless electric power tools; drills for machine tools; drive belts for driving aircraft; drive belts for engines of vehicles; drive belts for machines; drive belts for water vehicles; drive chains for driving aircraft; drive chains for machines; drive chains for watercraft; drive machines; drive mechanisms; drive mechanisms for machine tools; drive motors, other than for land vehicles; drive pulleys; drive pulleys for power transmission belts of agricultural machines; drive pulleys for power transmission belts of industrial machines; drive shafts, other than for land vehicles; drive transmissions, other than for land vehicles; drive units, other than for land vehicles; driver's safety cabs parts of machines; drives for conveyors; drives for elevator cabin doors; drives for elevators; drives for machines; drives for valves; drives for ventilation flaps; driving belts for machines; driving belts for motors (other than for land vehicles); driving belts, other than for land vehicles; driving chains for machines; driving chains other than for land vehicles; driving devices for machines; driving motors other than for land vehicles; drop hammers; drum filters; drum handling apparatus; drum hoists; drums (parts of machines); drums being parts of washing machines; drums being parts of water extracting machines; dry cleaning (laundry) machines; dry developers being apparatus for manufacturing integrated circuits; dry ice machines; dry ink transfer machines; drying machines; drying machines having a vibratory action; dust exhausting installations for cleaning purposes; dust removing installations for cleaning purposes; dyeing machines; dynamo belts; dynamo brushes; dynamo pulleys for vehicles; dynamos; earth boring apparatus (machines); earth diggers (machines); earth moving machines;

earth skimming machines; earth working machines; edge sealing machines for industrial use; edgers (machines); edging tools (machines); edible pastes making machines; effluent treatment machines to separate water from contaminants; egg centrifuges; egg grading machines; egg handling machines; egg incubators; egg packing machines; egg washing apparatus; egg washing machines; egg white concentration apparatus; ejectors; electric adjustable screwdrivers; electric air compressors for use by artists; electric air compressors for use by model makers; electric air compressors, other than for surgical use; electric air jet cleaners; electric alternating current generators; electric alternating current motor drives; electric alternators; electric alternators for aeronautical vehicles; electric alternators for land vehicles; electric alternators for machines; electric alternators for water vehicles; electric apparatus for cleaning; electric apparatus for cleaning (polishing) floors; electric apparatus for cleaning (vacuuming) floors; electric apparatus for cleaning (washing) floors; electric apparatus for cleaning by suction (vacuuming); electric apparatus for cleaning by the application of water under pressure; electric apparatus for shampooing furnishings; electric apparatus for the removal of paints; electric apparatus used for waxing floors; electric appliances for preparing drinks; electric appliances for preparing food; electric articles for domestic cleaning; electric babies' food processors; electric beaters (machines); electric blenders; electric blenders for household purposes; electric boilers (parts of machines); electric brakes for machines; electric bread knives; electric brushes being parts of machines; electric butchers' knives; electric cable hoists; electric can openers; electric carpet brushes; electric carpet cleaning (shampooing) machines; electric carpet cleaning (vacuuming) machines; electric carpet shampooers; electric carpet sweepers; electric carpet vacuum cleaners; electric carving knives; electric chain hoists; electric cleaning (polishing) machines; electric cleaning (pressure washing) machines; electric cleaning (shampooing) machines; electric cleaning (vacuuming) machines; electric cleaning apparatus; electric cleaning installations (polishing); electric cleaning machines; electric cleaning scrubbers; electric clippers for equestrian use (machines); electric coating apparatus for use with adhesives; electric coating apparatus for use with paints; electric coffee grinders; electric coffee grinders incorporating dosing apparatus; electric coffee mills; electric current generators; electric current generators for use with telecommunications apparatus; electric devices for clipping the hair of animals (machines); electric devices for cutting the hair of animals (machines); electric devices for removing hair from animals (machines); electric devices for trimming the hair of animals (machines); electric discharge machine tools; electric dishwashing machines; electric domestic appliances for polishing; electric domestic appliances for scouring; electric domestic appliances for vacuuming; electric domestic appliances for

washing; electric domestic cleaning apparatus; electric domestic machines for polishing; electric domestic machines for scouring; electric domestic machines for vacuuming; electric domestic machines for washing; electric domestic vacuum cleaners; electric door motors, other than for land vehicles; electric dough dividing machines; electric dough kneading machines; electric dough rounding machines; electric drilling machines; electric drills; electric drives for aircraft; electric drives for drawing curtains; electric drives for elevators; electric drives for lifts; electric drives for machine tools; electric drives for machines; electric drives for motors (other than for land vehicles); electric drives for water vehicles; electric drives for watercraft; electric driving motors (other than for land vehicles); electric driving motors for air vehicles; electric driving motors for machines; electric driving motors for water vehicles; electric drying machines; electric dust removing (cleaning) apparatus; electric edge tools; electric engines (other than for land vehicles); electric fabrication tools; electric fans (cooling) being parts of machines; electric fans (cooling) being parts of motors; electric floor cleaners (vacuuming machines) for domestic use; electric floor cleaners (vacuuming machines) for industrial use; electric floor polishers; electric floor polishing apparatus; electric floor sweepers; electric floor vacuuming apparatus; electric food blenders; electric food mixers; electric food preparation machines; electric food processing apparatus; electric food processing machines; electric food processors; electric food processors for domestic use; electric food shredders; electric food slicing machines; electric food whisks; electric fruit grinders; electric fruit juice extractors; electric fruit mashers; electric fruit presses; electric fruit squeezers; electric garbage disposal machines; electric gardening tools; electric garlic presses; electric gear shifting apparatus (other than for land vehicle engines); electric generating machines; electric generator groups; electric generator plant; electric generator power sets; electric generator stations; electric generators; electric generators in combination with steam engines; electric glass cutters; electric glue guns; electric grinders for food preparation; electric grinders for use in catering establishments; electric grinders for use in households; electric guillotine shears (other than office machines); electric hair clipping machines for animals; electric hair cutting appliances for animals; electric hair removal devices (machines); electric hammers; electric hand drilling machines; electric hand drills; electric hand held kitchen utensils; electric hand held polishing apparatus; electric hand held vacuum cleaners; electric hand implements for use in barbecue cooking; electric hand shears; electric hand tools; electric heat sealing apparatus; electric hoists; electric household apparatus for grinding food; electric household apparatus for mincing food; electric household apparatus for mixing food; electric household apparatus for polishing floors; electric household apparatus for shampooing floors; electric

household apparatus for slicing food; electric household apparatus for vacuuming floors; electric household appliances for grinding food; electric household appliances for mincing food; electric household appliances for mixing food; electric household appliances for slicing food; electric household cleaning appliances; electric ignition apparatus for internal combustion engines; electric ignition coils; electric ignition devices (other than for igniting at a distance); electric industrial vacuum cleaners; electric ironing machines; electric ironing presses; electric jacks; electric juice extractors; electric kitchen knives; electric kitchen machines; electric kitchen machines for food preparation (other than cooking); electric kitchen tools; electric knife sharpeners; electric knitting machines; electric knives; electric lawnmowers; electric letter openers; electric lint removers; electric machines for cleaning; electric machines for incandescent welding; electric machines for mixing drinks; electric machines for polishing floors (household use); electric machines for polishing floors (industrial use); electric machines for polishing manufactured products; electric machines for resistance welding; electric machines for shampooing carpets; electric machines for spark welding; electric machines for use in the preparation of food; electric meat slicers for kitchen use; electric mincing machines; electric miniature screwdrivers; electric mixers for mixing food; electric mixers for mixing mortar; electric motor ploughs; electric motor pump units; electric motors (other than for land vehicles); electric motors for aircraft; electric motors for heating installations; electric motors for use with doors; electric motors for use with windows (other than land vehicle windows); electric motors for valves; electric motors for water craft; electric paper drills, other than for office use; electric planes; electric polishing (cleaning) apparatus; electric polishing machines; electric polishing machines for household cleaning; electric polishing machines for household purposes; electric polishing machines for industrial manufacturing purposes; electric polishing machines for industrial processes; electric polishing tools; electric portable power saws; electric power generators; electric power supplies (generators); electric power supply apparatus being generators; electric power tools; electric precision screwdrivers; electric pressing irons for industrial purposes; electric pressing machines for industrial purposes; electric propulsion mechanisms for air vehicles; electric propulsion mechanisms for water vehicles; electric pumps; electric pumps for ponds; electric radiator welding machines; electric resistance welding machines; electric rotary converters; electric sanders; electric sanding machines; electric saws; electric scissors; electric screwdrivers; electric screwdrivers; electric sewing machines; electric sharpeners; electric sharpening machines; electric sharpening machines for blades; electric sharpening machines for cutlery; electric sharpening machines for tools; electric shaving instruments, for use on animals; electric shearers for livestock;

electric shearing machines; electric shearing machines for animals; electric shoe cleaning (polishing) machines; electric single point grease dispensers; electric slicing machines; electric slicing machines for kitchen use; electric slicing machines for large scale food processing; electric spice grinders; electric spray guns (airbrushes); electric staplers, other than for office use; electric steam cleaning apparatus; electric steam cleaning machines; electric stencil cutting machines; electric suction cleaners; electric suction cleaning apparatus for household use; electric suction cleaning apparatus for industrial purposes; electric suction cleaning machines; electric suction cleaning machines for household use; electric suction cleaning machines for industrial purposes; electric suction machines for industrial (manufacturing) use; electric tackers; electric tin openers; electric tools; electric tools for use in agriculture; electric tools for use in gardening; electric tools for use in horticulture; electric track welding machines; electric tree branch cutters; electric tree branch pruners; electric tufting tools; electric upholstery shampoo applicators; electric utensils for blending liquids; electric vacuum apparatus for floor cleaning; electric vacuum cleaners; electric vacuum cleaners for commercial use; electric vacuum cleaners for domestic use; electric vacuum cleaners for industrial use; electric vacuum cleaning installations; electric valves (other than thermionic); electric wax-polishing machines; electric welding machines; electric winch handles for sailboats; electric winches; electric winches for sailboats; electric windlasses; electric window cleaning tools; electric wood scissors; electrical brushes; electrically powered machines; electricity generating sets; electricity generators; electro mechanical clothes presses; electrofusion welding machines; electrohydraulic apparatus driven by electric motors; electrohydraulic automotive lifts; electromagnetic brakes (other than for land vehicles); electromagnetic clutches for machines (other than for land vehicles); electromagnetic drives for machines; electromagnetic drives, other than for land vehicles; electromagnetic feeders; electromagnetic machine tools; electromagnetic machines for separating metals from grinding fluids; electromagnetic valves; electromagnetically operated fluid-flow valves; electromechanical apparatus; electromechanical apparatus for die-cutting metals; electromechanical apparatus for die-cutting plastics; electromechanical apparatus for finishing metals; electromechanical apparatus for finishing plastics; electromechanical apparatus for laminating metals; electromechanical apparatus for laminating plastics; electromechanical apparatus for processing foodstuffs; electromechanical apparatus for use in the kitchen; electromechanical beverage preparation machines; electromechanical food preparation machines; electromechanical machines for chemical industry; electromechanical machines for

the automatic handling of items; electromechanical machines for the automatic manipulation of items; electromechanical reversers for lubricating installations; electromechanical rotating machines; electronic devices for starting engines; electronic devices for stopping engines; electronic fuel injection apparatus for internal combustion engines (other than for land vehicles); electronic starters for engines; electronic starters for motors; electronically controlled embossing machines; electronically controlled inscribing machines; electronically operated conveyor belt apparatus; electrostatic coating apparatus; electrostatic machines for applying finishes; electrothermal engines, other than for land vehicles; elevating apparatus; elevating or lifting work platforms (including mobile); elevating platforms; elevating platforms for attachment to vehicles; elevating work platforms; elevator belts; elevator chains (parts of machines); elevator chains of metal; elevators (lifts); elevators for agricultural use; elevators for materials; embossing machines; embossing rolls for leather treatment machines; embossing stencils for leather treatment machines; embroidery machines; emergency power generators; emergency power supply generators; emission control apparatus (catalytic converters) for exhausts; emptying machines; end mills; engine belts, other than transmission belts for land vehicles; engine cleaning machines; engine cooling radiators; engine driven generators; engine driven water pumps; engine feathering pumps; engine fuel injection apparatus (other than for land vehicles); engine fuel pumps; engine housings; engine speed governors; engine valves; engines for aeronautics; engines for air cushion vehicles; engines for boats; engines for compressors; engines for construction vehicles; engines for fixed installations; engines for marine use; engines for marine vessels; engines for mobile installations; engines for model vehicles; engines for scale models; engines for ships; engines for the generation of electricity; engines for use in powering aircraft; engines for use in powering stationary land installations; engines for use in powering watercraft; engines for water vehicles; engines, other than for land vehicles; engraving machines; envelope stuffing and inserting machines (packaging machines); envelope stuffing machines; escalators; etching machines; excavators; excavators (earth working machines); excavators for hydraulic expansion machines; exhaust apparatus (parts of machines); exhaust apparatus for aircraft; exhaust apparatus for internal combustion engines; exhaust apparatus for land vehicles; exhaust apparatus for water vehicles; exhaust bypasses; exhaust manifold for engines; exhaust mufflers for watercraft; exhaust silencers; exhaust systems for vehicles; exhausters being suction ventilators; exhausts; exhausts for motors and engines; expansion boxes for exhausts; expansion tanks (parts of machines); expansion tanks (parts of vehicle cooling radiators); extracting machines; extracting machines utilising solvents; extractors (air suction apparatus); extractors for mines; extruding machines; extrusion coating lines;

extrusion coating lines for the coating of aluminium foils; extrusion coating lines for the coating of plastic film; extrusion coating machines; extrusion coating machines for the coating of composites; extrusion coating machines for the coating of paper; extrusion machines; extrusion presses; fabric accumulator machines; fabrication tools (other than hand operated); facing heads; fan belts for land vehicle engines; fan belts for motors and engines; fan belts for vehicle engines; fans being parts of machines; fans for cooling vehicle engines; fans for engines; fans for motors and engines; fans for the compression, sucking and carrying of grain; fastener insertion machines; fastener setting tools (parts of machines); feed pumps; feed transport apparatus for livestock; feeders (parts of machines); feeders for machines; feeding apparatus for engine boilers; feeding machines; feeding machines for presses; feeding units for size reduction machines; feedwater regulators; felting machines; fertiliser broadcasters (machines); fertilizer spreading machines; fibreboard presses (machines); files (power-operated tools); filling machines; filling mechanisms; filter housings being parts of engines; filter housings being parts of machines; filter presses; filtering apparatus adapted for liquids with a high viscosity; filtering machines; filtering machines used in sewage handling; filters (parts of machines or engines); filters being parts of engines; filters being parts of engines for cleaning air; filters being parts of engines for cooling air; filters being parts of machines; filters being parts of motors; filters for cleaning cooling air (for engines); filters for cleaning the lubricating oils in engines; filters for dust for use with internal combustion engines; filters for gases (machines); filters for hot gases for use with internal combustion engines; filters for industrial purposes; filters for internal combustion engines; filters for liquid hydrocarbons in engines or motors; filters for lubricants; filters for machines; filters for vehicle engines; filters made from foam plastics materials for internal combustion engines; filtration apparatus for industrial purposes; filtration apparatus for the filtration of egg white; filtration machines; finishing machines; finishing treatment machines; fittings for engine boilers; fixed belt conveyors; fixed machines for pressing asphalt; flail mowers; flame and spark arresters (parts of machines or engines); flame cutting machines; flame cutting nozzles; flame priming apparatus; flame profiling machines; flame sprayers for burning vegetation; flame spraying apparatus; flanging machines for metal tubing; flap folding machines; flat bed knitting machines; flat dies (parts of machines); fleshing machines; flexible couplings (parts of machines); flexible machining units; flexible power transmission apparatus (other than for land vehicles); flexible shafts (other than for land vehicles); flexographic printing plates; floatation type oil-water separators; floor buffing machines; floor cleaning (polishing) machines; floor cleaning (vacuuming) machines; floor cleaning (washing) machines; floor polishers (electric); floor polishing

machines (electric); floor tiling instruments (power-operated tools); flour mill machines; flour mills; flow control installations (mechanical); flues for engine boilers; fluid actuated cylinders; fluid dispensing apparatus; fluid elevation pumps; fluid flow control devices (pumps); fluid flow devices for use with machines; fluid flow machines; fluid handling apparatus; fluid pressure control valves; fluid pressure flow control valves; fluid pressure operated actuators; fluid pressure operated flow control valves; fluid pressure operated fluid control valves; fluid pressurising apparatus; fluid pumping installations; fluid pumps; fluid separation machines; fluid valves for agricultural use (parts of machines); fluid valves for industrial use (parts of machines); flush bottom tank valves; flying shears; foam machines; fodder presses; foil stamping machines; folding machines (other than for office use); food preparation machines, electromechanical; food processors (electric); food waste disposal machines; forage harvesters (machines); forage harvesters with maize picker attachments; forestry machines; forestry processing apparatus; forge bellows; forging presses; forging tools; fork lift attachments for front-end loaders; foundry machines; fractional horsepower electric motors; frames being parts of hydraulic elevators; free wheel clutches (other than for land vehicles); free wheel couplings (other than for land vehicles); freewheels other than for land vehicles; friction applying devices (parts of machines); friction wheels for machines; frictional drive components for machines; friezing machines; front loaders for tractors; fruit presses, electric, for household purposes; fruit squeezing machines (electric); fuel conversion apparatus for internal combustion engines; fuel conversion apparatus for internal combustion engines; fuel economisers for motors and engines; fuel feed apparatus for engines; fuel filter coalescent apparatus; fuel filters; fuel ignition apparatus; fuel ignition apparatus for internal combustion engines; fuel injection apparatus; fuel injection apparatus for internal combustion engines; fuel injection devices for internal combustion engines; fuel injection pumps; fuel injection systems for engines; fuel injector pipes for use in diesel engines; fuel injectors for engines; fuel injectors for internal combustion engines; fuel mixing devices; fuel nozzles; fuel pumps for motor vehicles; fuel systems for internal combustion engines; fuel valves; fuel/air ratio controls (parts of engines or motors); furnace loading machines; gantries (cranes); gantry cranes; garbage (waste) disposals; garbage compacting machines; garbage disposal machines; garbage disposals; garden rollers (machines); garden rotavators; garden tractors for mowing lawns; garment packaging machines; garment pressing apparatus (machines); gas actuated rams; gas boilers (parts of machines); gas compressors; gas condensers (parts of machines); gas converters; gas cutting machines; gas hot air guns; gas intake apparatus; gas operated apparatus for cutting; gas operated blow pipes for cutting; gas operated blow torches; gas

operated cutting blow pipes; gas operated metal cutters; gas operated power generators; gas operated soldering apparatus; gas operated soldering irons; gas torches (tools); gas turbine engines; gas turbine engines for air vehicles; gas turbine engines for sea vehicles; gas turbo engines; gas welding apparatus; gas welding machines; gas welding machines; gasifiers; gasifiers for gaseous and/or liquid fuels for internal combustion engines; gear assemblies, other than for land vehicles; gear box casings, other than for land vehicles; gear boxes being parts of machines; gear boxes for hydraulic transmissions (other than for land vehicles); gear boxes other than for land vehicles; gear cases, other than for land vehicles; gear change knobs, other than for land vehicles; gear changing mechanisms for machines; gear couplings for machines; gear cutters (machines); gear cutting machines; gear finishers (machines); gear hobbing machines; gear levers other than for land vehicles; gear motors other than for land vehicles; gear pumps; gear rolling tools; gear train parts, other than for land vehicles; gear transmissions, other than for land vehicles; gear units for machines; gear units for power transmissions, other than for land vehicles; gear units for water vehicles; gear units, other than for land vehicles; gear wheels for machines; geared electric motors for aircraft; geared electric motors for water craft; geared electric motors, other than for land vehicles; gearing for air vehicles; gearing for machines; gearing for water vehicles; gears for machines; gears for water vehicles; gears for weaving looms; gears, other than for land vehicles; generating plant; generating sets; generating sets for use with engines; generating sets for use with motors; generators; generators of electricity; girder clips being parts of power transmission gear; glass washing machines; glass working machines; glaziers' diamonds (parts of machines); glazing machines; glazing rollers; glazing rollers for use with calendering machines; glow plugs for diesel engines; gluing machines; goods lifting apparatus; goods lifts; governors; grabs (parts of machines); graders (machines or parts of machines); grain driers; grain drills (machines); grain harvesters (machines); grain husking machines; grain mills (machines); grain mixers (machines); grain separating machines; grain separators; granulators for sprue recycling; granulators for sprue regrinding; graphic epoxy drills (machines or parts for machines); graphite electrode making machines; grass collecting machines; grass cutting apparatus (machines); grass cutting machines; grass edging machines; grass trimming machines; grating machines for household use; grating machines for vegetables; gravity conveyors (machines); gravity fed machines for mounting on sowing machines; gravure printing machines; grease boxes (parts of machines); grease filters (parts of machines); grease guns operated by compressed air; grease rings (parts of machines); greasing apparatus (machines); grinders (machines); grinders for road edges; grinders/crushers, electric, for household purposes; grinding apparatus (electric); grinding discs being parts

of machines; grinding machines; grinding machines for cutting tools; grinding machines for refacing the edges of tools; grinding tools (machines or parts of machines); grinding wheels being parts of machines; grindstones (parts of machines); gripper bars for use in printing presses; grippers for cranes; gripping apparatus (machines or parts of machines); grooming machines for clipping animals hair; grooving machines; ground boring machines; ground drilling apparatus (machines); ground engaging machines; grouting machines; guards (parts of machines); guidance frameworks for cutting tools (machine); guidance frameworks for machine tools; guides for machines; guillotine machines, other than for office use; gunning machines for lining furnaces; guns (tools using explosives); guns for paint spraying; hacksaw blades (parts of machines); hacksaw blades for machines; hacksaws (machines); hair clippers (machines) for animals; hair clipping machines for animals; hair cutting machines for animals; hair trimmers for animals (machines); hammer drills; hammering machines; hammers (parts of machines); hand held cordless power tools; hand held power operated spraying machines; hand held power operated tools; hand-held tools, other than hand-operated; hand-operated paper drills, other than for office use; handles being parts of machine tools; handles being parts of mechanically operated tools; handling apparatus (mechanical); handling apparatus for loading and unloading; handling installations; handling machines; handling machines, automatic (manipulators); hangers (parts of machines); harrows; harvesters; harvesting heads; harvesting machines; haulage apparatus (mining); hay grippers (machines or parts of machines); haymaking machines; head attachments for power tools; heat engines, other than for land vehicles; heat exchange apparatus (parts of machines); heat exchangers (parts of machines); heat exchanging apparatus (parts of machines); heat insulated metal pipes (parts of machines); heat insulated metal piping elements (parts of machines); heat lances (machines); heat pumps (parts of machines); heat recovery apparatus (parts of machines); heat recovery devices (parts of machines); heat recovery instruments (parts of machines); heat resistant articles in the treatment of metals; heat sealing machines; heat transfer apparatus (parts of machines); heavy duty flail mowers; heavy duty grinding machines; heavy media separators (machines); heddles; hedge cutters (machines); hedge trimmers (machines); heel-making machines; helical gear units being parts of machines; helical gear units for industrial purposes; hemming machines; high frequency welding machines; high grade finishing machines; high pressure cleaning machines; high pressure compressor assemblies; high pressure precision valves of metal (parts of machines, engines or motors); high pressure pumps; high pressure rotary positive displacement pumps; high pressure washers; high speed presses; high test steel connecting parts (parts of machines, engines or motors); high vacuum metallization

machines; high vacuum production machines; hitches for self-propelled mowers; hoeing machines; hoisting apparatus (mechanical); hoists; hoists for freight; hoists for passengers; holders for carbon brushes; holders for drilling tools (parts of machines); holders for machine tools; holders for machine turning tools; holding devices for machine tools; hole saws (machines); hollowing bits (parts of machine tools); honing machines; honing tools (machine); hoods (parts of machines); hooke's joint shafts; hooke's joints; hopper loaders (machines); hoppers (machines); hoppers (mechanical discharging); horizontal continuous casting installations; horizontal continuous casting machines; horticultural implements (machines); horticultural machines; hosiery looms; hot air driers (machines); hot air guns (electric); hot air welding machines; hot metal extrusion machines; hot print foiling machines; hot rolling stands; household vacuum cleaners; housings (parts of machines); housings for ball bushings; housings for machines; hydraulic accumulators; hydraulic actuating apparatus; hydraulic actuators; hydraulic alignment machines; hydraulic anchor chain stoppers; hydraulic apparatus for handling containers; hydraulic apparatus for lifting containers; hydraulic apparatus for lifting goods; hydraulic apparatus for removing goods; hydraulic apparatus for use in the straightening of cars; hydraulic automobile lifters; hydraulic baffles for shifting water flow; hydraulic braking apparatus for industrial machines; hydraulic breakers for concrete breaking; hydraulic breakers for frozen earth breaking; hydraulic breakers for rock breaking; hydraulic circuits for machines; hydraulic clutch control units, other than for land vehicles; hydraulic clutches, other than for land vehicles; hydraulic connectors (pipes) being parts of machines; hydraulic connectors (pipes) being parts of motors (other than for vehicles); hydraulic control apparatus for agricultural machines; hydraulic control apparatus for engines; hydraulic control apparatus for engines (other than for vehicles); hydraulic control apparatus for industrial machines; hydraulic control apparatus for machine tools; hydraulic control apparatus for machines; hydraulic control apparatus for machines; hydraulic control apparatus for motors; hydraulic control apparatus for robots; hydraulic control apparatus for vehicle engines; hydraulic control devices for compressors; hydraulic control devices for heating installations; hydraulic control devices for lifting apparatus; hydraulic control devices for machine tools; hydraulic control devices for machines; hydraulic control devices for turbines; hydraulic control gear for electric motors; hydraulic control gear for valves; hydraulic control installations; hydraulic control modules; hydraulic control operating apparatus; hydraulic control systems for engines (other than for vehicles); hydraulic control systems for machines; hydraulic control valves; hydraulic controls for automatically operating valves; hydraulic controls for machines, motors and engines; hydraulic couplings for engines

(other than for land vehicles); hydraulic couplings with integral dampers (other than for land vehicles); hydraulic couplings with integral dampers (parts of machines); hydraulic crimping units; hydraulic cutters (machines); hydraulic cylinders (machines or parts of machines); hydraulic door openers and closers (parts of machines); hydraulic door operating equipment; hydraulic drive installations; hydraulic engines and motors; hydraulic flight control units; hydraulic fluid accumulators; hydraulic gripper saws; hydraulic jacks; hydraulic lifting apparatus (other than hand-operated); hydraulic lifting apparatus for vehicles (other than hand-operated); hydraulic lifting machines; hydraulic lifting mechanisms for incorporation into motor vehicles; hydraulic lifting ramps; hydraulic lifts (other than hand operated); hydraulic machines and apparatus; hydraulic machines for use in the repair of vehicle bodies; hydraulic marine apparatus (other than for land vehicles); hydraulic mechanisms; hydraulic motors; hydraulic pouring units; hydraulic power tools; hydraulic power transmission units (other than for land vehicles); hydraulic presses for wool; hydraulic pumps; hydraulic pumps for use in swimming baths; hydraulic pumps for use underwater; hydraulic rams; hydraulic recharging apparatus; hydraulic rotary dampers, other than for vehicles; hydraulic rotary shock absorbers, other than for vehicles; hydraulic servo valves being parts of machines; hydraulic swivels; hydraulic tools; hydraulic transmissions, other than for land vehicles; hydraulic turbines; hydraulic units for gantry cranes; hydraulic units for tower cranes; hydraulic valves; hydraulic valves (parts of machines); hydraulic valves for dosing; hydraulic valves for regulating fluid streams; hydraulic valves for shutting off; hydraulic wood grippers for forestry use; hydraulic wrenches for use on drilling rigs; hydraulically controlled towing eyes; hydraulically controlled towing pins; hydraulically driven winches for marine use; hydraulically extendable arms being parts of lifting apparatus; hydraulically operated benches for the repair of vehicle bodies; hydraulically operated butterfly valves; hydraulically operated control apparatus; hydraulically operated extending working platforms; hydraulically operated machines; hydraulically operated switches; hydraulically retractable chain stoppers; hydraulically retractable wire stoppers; hydro-pneumatic accumulators; hydrocyclones; hydrocyclones for the separation of solids and liquids; hydroelectric apparatus; hydroelectric installations; hydrostatic drives; ice cream dispensing machines; ice cream making machines; ice cream packing machines; ice crushing machines; igniting devices for internal combustion engines; igniting magnetos; igniting magnetos for engines; ignition apparatus for internal combustion engines; ignition devices for internal combustion engines; ignition distributors for internal combustion engines; ignition parts for internal combustion engines; image reproduction machines; image transfer machines; impact crushers (machines or parts of

machines); impact drills (machines or parts of machines); impact grinding crushers; impact printers; impellers; impellers for turbo-superchargers; implements (machines) for drilling; implements (machines) for spraying; implements for tillage; impregnating machines; imprinting machines for industrial purposes; in-line finishing apparatus; incubators for eggs; indexing drive machines; indexing drives; industrial bag filling machines; industrial blowers; industrial boring machines for horizontal boring; industrial boring machines for horizontal drilling; industrial brakes for industrial washing machines; industrial bread making machines; industrial carpet cleaning machines; industrial carpet shampooing machines; industrial carpet vacuuming machines; industrial centrifugal decanting machines; industrial centrifugal drying machines; industrial centrifuges; industrial cleaning apparatus for cleaning boilers; industrial cleaning apparatus for cleaning condensers; industrial cleaning apparatus for cleaning coolers; industrial cleaning apparatus for cleaning evaporators; industrial cleaning apparatus for cleaning exchangers; industrial cleaning apparatus for cleaning pipes; industrial cleaning machines; industrial cleaning machines (polishers); industrial cleaning machines (shampooers); industrial cleaning machines (vacuum cleaners); industrial cleaning machines utilising pressure jets; industrial control apparatus (hydraulic); industrial control apparatus (pneumatic); industrial conveyors; industrial cutting machines; industrial degreasing machines; industrial drills (machines); industrial dry-cleaning machines; industrial floor cleaning (polishing) machines; industrial floor cleaning machines; industrial floor cleaning machines (vacuum cleaners); industrial food mixers (machines); industrial hammers (machines); industrial high frequency drying machines; industrial honing machines; industrial mixing machines; industrial pneumatic tools; industrial process controllers (hydraulic); industrial process controllers (pneumatic); industrial robots for use in manufacture; industrial sewing machines; industrial soldering machines (gas operated); industrial squeezers; industrial tin openers; industrial vacuum machines for cleaning; industrial vacuum machines for use in manufacture; industrial washing machines; inert gas generators (machines); injection moulding machines; injection moulding mandrils; injection moulds; injection presses; injection presses for plastics materials; injection stretch blow moulding machines; injectors; injectors for engines; injectors for machines; ink circulating apparatus; ink dispensing apparatus (parts of machines); ink jet printing machines; ink stirrers; inked ribbons for printing machines; inking apparatus for printing machines; inlet installations for gas turbines; inlet relief valves for turbocharged apparatus; inlet systems for gas turbines; insecticide sprayers (hand-held tools, electric); insecticide sprayers (machines); insecticide vaporizers (machines); inspection port holes for machines; installations and apparatus for coal washing and

separating; instruments (machines) for cleaning the exterior of vehicles; instruments (machines) for cleaning the interior of vehicles; instruments (machines) for washing the exterior of vehicles; instruments (machines) for washing the interior of vehicles; instruments (mechanisms) for the automation of machining operations; insulated metal pipelines (parts of machines, engines or motors); insulated metal pipes (parts of machines, engines or motors); insulated metal tubing (parts of machines, engines or motors); intaglio printing machines; intercoolers for turbochargers; interlinking systems for connecting production machines; internal combustion engines (other than for land vehicles); internal combustion motors (other than for land vehicles); involute splines (parts of machines); ironing machines; ironing machines for clothing; ironing machines for textile articles; ironing presses (ironing machines); jacks (machines); jacquard controlled knitting machines; jacquard controls; jacquard looms; jarring machines; jaw crushers (machines); jaw type rock crushers; jaw type shaft couplings (other than for land vehicles; jet engines other than for land vehicles; jet pumps for vacuum generation; jet stream devices for cleaning surfaces; jet stream devices for preserving surfaces; jets being parts of machines; jigs for holding a component during machining; jigs for locating a component during machining; jigsaw blades (parts for machines); jigsaws (machines); joggers (machines); joining machines; jointers being woodworking machines; jointing machines; joints (parts of engines); journal boxes (parts of machines); journals (parts of machines); juice extracting machines; juice extractors, electric; kebab making machines (other than cooking); kerb laying machines; kerb making machines; key cutting machines; key duplicating apparatus; keyhole saws (machines); kick starters for motorcycles; kitchen machines, electric; kitchen tools (electric utensils); kneaders (electric kitchen machines); kneading machines; knife blades for electric knives; knife cleaning machines; knife grinding machines; knife polishing machines; knife sharpeners (electric); knife sharpening machines; knitting bobbins (parts of machines); knitting machines; knives (parts of machines); knives for mowing machines; knives, electric; label applicators (other than for office use); label dispensing machines (other than for office use); label making machines (other than for office use); labellers (machines); labelling machines (other than for office use); lace making machines; lacing machines; laminating machines other than for office use; lamination coating machines other than for office use; laminators (machines) other than for office use; land clearance apparatus (machines); land reclamation apparatus (machines); laser applied machining devices; laser processing machines; laser welded machine tools; lasts for shoes (parts of machines); lateral connection machines; lathes (machine tools); lathes (machines); lathes being metal working machines; laundry decontamination machines for removing fibres from garments;

laundry decontamination machines for removing particles from garments; laundry folding machines; laundry presses; laundry washing machines; lawn aerators (machines); lawn clippers (machines); lawn cutting machines; lawn edge trimmers (machines); lawn mowing attachments for vehicles; lawn rakes (machines); lawn raking machines; lawn rolling implements for attachment to land vehicles; lawn rolling machines; lawn sweepers (machines); lawn treatment apparatus (machines); lawn trimming machines; lawn weeding machines; lawnmowers (machines); laying machines for use in building; laying machines for use in public works; lead frame arranging machines for electronic circuits; lead frame transporting machines for electronic circuits; leaf collecting machines; leather belts (dynamo); leather belts for conveyors; leather paring machines; leather-working machines; lens manufacturing machines; letterpresses (printing machines); level regulating valves (parts of machines); levellers (machines); levelling apparatus (machines); lift belts; lift chains being parts of machines; lift installations; lift shaft apparatus; lift shaft machines; lift tables; lifting apparatus; lifting apparatus for containers; lifting apparatus for incorporation into vehicles; lifting apparatus for incorporation onto trailers; lifting apparatus for use with cranes; lifting attachments for land vehicles; lifting beams; lifting devices for boats; lifting gear for handling loads; lifting jacks (other than hand-operated); lifting machines for handling loads; lifting machines for transporting bulk materials; lifting platforms; lifting ramps; lifting tables; lifting tackle (machines); lifting tongs for cranes; lifts (other than ski-lifts); lifts for use in lifting vehicles; lifts for use in stairways; lifts for use with vehicles; line marking machines; linear actuators (mechanical); linear drives; linear driving apparatus; linear motors, other than for land vehicles; linear transfer machines; liners for hammer mills; linings for brakes (parts of machines); link chains for driving purposes (other than for land vehicles); linking devices (parts of machines); linking mechanisms (parts of machines); lint removers; liquefiers (machines); liquid aerators (apparatus); liquid aerators (machines); liquid blenders (machines); liquid detergent feeders; liquid dispensing machines for dispensing pre-measured amounts; liquid dosage machines for dispensing pre-measured amounts; liquid filtering apparatus (parts of engines or machines); liquid manure sliders (machines); liquid waste removal apparatus; liquid waste removal machines; liquidisers (kitchen machines); liquidisers (machines); lithographic printing apparatus; lithographic printing machines; lithographic printing plates; live-roller conveying installations; live-roller conveyors (machines); live-rollers (machines); load carrying (lifting) apparatus; load carrying (lifting) machines; load handling apparatus; loader buckets for excavators; loaders (conveyors); loaders (machines); loaders for agricultural machines; loaders for packing goods; loading (lifting) apparatus being parts of vehicles; loading (lifting) apparatus for

use on boats; loading (lifting) apparatus for use on trucks; loading (lifting) apparatus for use on vehicles; loading (lifting) apparatus for use on wagons; loading apparatus (other than fork-lift trucks); loading arms (lifting apparatus); loading cranes; loading devices adapted for use with transport apparatus; loading devices adapted for use with vehicles; loading machines; loading platforms for vehicles; loading ramps; lockable valves (parts of machines); log splitters (machines); longitudinal cutters (machines); longitudinal cutters for plastics materials; loom shafts; looms; looms (machines); lopping shears (machines); lubricant atomising apparatus (hand-operated); lubricant atomising apparatus (machines); lubricant atomising apparatus (parts of machines); lubricating apparatus (machines); lubricating apparatus (machines) for motor vehicles; lubricating apparatus (parts of machines); lubricating assemblies (machines); lubricating assemblies (parts of machines); lubricating guns (hand-operated); lubricating guns (machines); lubricating installations (machines); lubricating installations (parts of machines); lubricating pumps; lubrication machines; lubrication pumps; lubricators (parts of machines); lubricators for high speed spindles; macerating machines; machine belting; machine belts; machine boiler scale collectors; machine boiler scale collectors; machine cages; machine centres; machine cocks; machine coupling components (except for land vehicles); machine couplings (other than pipe); machine fly-wheels; machine guides (parts of machines); machine knives; machine motors; machine mowers; machine operated glue dispensers; machine plasma arc torches; machine pumps; machine stands; machine tool couplings; machine tool holders; machine tool simulators; machine tools; machine tools for agricultural use; machine tools for applying paint to surfaces; machine tools for boring; machine tools for breaking ice; machine tools for breaking up earth; machine tools for breaking up road surface material; machine tools for chiselling; machine tools for cutting; machine tools for deburring; machine tools for dispensing lubricants; machine tools for dressing; machine tools for drilling; machine tools for finishing; machine tools for fitting floor covering material; machine tools for fixing fasteners; machine tools for gluing; machine tools for greasing motor vehicles; machine tools for grinding; machine tools for horticultural use; machine tools for laying floor covering material; machine tools for machining metallic items; machine tools for milling; machine tools for moulding synthetic resins; machine tools for oiling motor vehicles; machine tools for parting; machine tools for pipe working; machine tools for polishing; machine tools for processing plastics material; machine tools for reaming; machine tools for sale in kit form; machine tools for sawing; machine tools for setting anchors; machine tools for shaping; machine tools for slotting; machine tools for spark-eroding; machine tools for tapping; machine tools for threading; machine tools for tube working; machine tools for

use in binding bags; machine tools for use in binding cables; machine tools for use in binding hoses; machine tools for use in connection with pipes; machine tools for use in packaging; machine tools for use in the maintenance of electric installations; machine tools for use in the maintenance of motor vehicles; machine tools for use in the production of engines for vehicles; machine tools for use in the production of vehicles; machine tools for use in the repair of electric installations; machine tools for use in the repair of motor vehicles; machine tools for woodworking machines; machine tools for working composite materials; machine tools for working metals; machine tools for working valve bodies; machine tools for working valve seats; machine tools incorporating automatic controls; machine tools incorporating semi-automatic controls; machine transmission components (except for land vehicles); machine wheels; machine wheelwork; machines; machines adapted for use with printing machines; machines and apparatus for carpet shampooing (electric); machines and apparatus for cleaning (electric); machines and apparatus for polishing (electric); machines and apparatus for wax-polishing (electric); machines for agitating fluids; machines for agricultural use; machines for airing clothes; machines for aligning (sorting) articles; machines for applying glaze; machines for applying hot melt adhesives; machines for applying labels to containers or bottles; machines for automatically depositing articles in a store; machines for automatically retrieving articles from a store; machines for bending; machines for bleaching fabrics; machines for blending fluids; machines for blowing packaging containers; machines for boosting fluids; machines for boxing of goods; machines for building; machines for burnishing; machines for carpet cleaning; machines for carpet cleaning (vacuuming); machines for carton-making; machines for carving positives of sockets; machines for changing tyres; machines for clarifying used coolant fluids; machines for clarifying used fluids; machines for cleaning (polishing) shoes; machines for cleaning (vacuuming) carpets; machines for cleaning carpets; machines for cleaning cutlery; machines for cleaning ditches; machines for cleaning eggs; machines for cleaning floors by scrubbing; machines for cleaning floors by suction; machines for cleaning pipelines; machines for cleaning waterways; machines for closing cartons; machines for coating; machines for coiling cables; machines for coiling hoses; machines for coiling ropes; machines for coiling twines; machines for coiling wires; machines for cold forming of products; machines for collecting balls; machines for collecting earth; machines for collecting rock; machines for compressed air lubrication; machines for compressing garbage; machines for constituting dyestuff composition; machines for construction purposes; machines for continuous moulding of concrete; machines for controlling mechanical operations; machines for conveying; machines for conveying articles; machines for crushing; machines for cutting

(mechanical); machines for cutting cardboard; machines for cutting dress patterns; machines for cutting fabrics; machines for cutting foods; machines for cutting grass; machines for cutting meat; machines for cutting paper; machines for cutting strip material; machines for cutting surface minerals; machines for damping; machines for de-mineralizing water; machines for depositing sheet material in stacks; machines for desizing; machines for disintegrating materials; machines for dispensing adhesives (industrial); machines for dispensing cables; machines for dispensing drinks (other than vending); machines for dispensing foods (other than vending); machines for dispensing frozen beverages (other than vending); machines for dispensing hoses; machines for dispensing liquids (other than vending); machines for dispensing metered amounts of mixed component materials; machines for dispensing metered amounts of single component materials; machines for dispensing twines; machines for dispensing wires; machines for distributing particulate materials; machines for domestic use in the processing of foodstuffs; machines for drawing rods; machines for drilling; machines for drilling wells; machines for dry lamination; machines for drying; machines for drying clothes; machines for dyeing; machines for encapsulating products; machines for erecting cartons; machines for erecting packing boxes; machines for excavating earth; machines for excavating rock; machines for extruding; machines for feeding materials; machines for filling bottles; machines for filling cartons; machines for filling containers; machines for filling containers with products; machines for filling interconnected plastic bags; machines for filling packages; machines for filling packaging containers; machines for finishing; machines for finishing leather; machines for finishing skins; machines for finishing textiles; machines for flange facing; machines for flash smelting of concentrates; machines for folding; machines for folding articles of clothing for packing; machines for folding textile articles; machines for food preparation (electric); machines for forming bundles; machines for forming cartons; machines for forming concrete panels; machines for forming concrete profiles; machines for forming containers; machines for forming metal work pieces; machines for forming plastic enclosures; machines for forming pouches; machines for forming trays; machines for forming trelliswork; machines for generating power; machines for glass working; machines for grading earth; machines for grading rock; machines for grinding (electric); machines for grinding spectacle lenses; machines for handling containers; machines for handling foodstuffs (electric); machines for handling materials; machines for handling nuclear fuels; machines for handling paper; machines for handling paper board sheets; machines for handling pipes; machines for handling radioactive materials; machines for handling sheets; machines for handling tubes; machines for hardening pipes; machines for

hardening tubes; machines for harvesting; machines for hoisting; machines for household purposes (electric kitchen); machines for inflating balloons; machines for injecting meat; machines for injection moulding of plastics materials; machines for inserting aerosol valves; machines for inserting objects into balloons; machines for joining plastic components; machines for kinescope aluminizing; machines for laminating sheet material; machines for laying mulches upon the ground; machines for laying plastic film upon the ground; machines for laying plastic sheets upon the ground; machines for lifting; machines for lifting for use in mines; machines for lifting vehicles; machines for loading; machines for loading machines; machines for macerating (electric kitchen); machines for macerating (electric); machines for machining knives; machines for machining metal alloys; machines for machining metals; machines for machining operations; machines for machining strip steel; machines for maintaining roads; machines for making aerated beverages (electric); machines for making automotive water pumps; machines for making bags; machines for making cardboard; machines for making cigarettes (industrial); machines for making conveyor belts; machines for making electric terminals; machines for making ice cream (electric mixers); machines for making juice (electric); machines for making packaging; machines for making packing material; machines for making paper; machines for making paper products; machines for making photographic prints; machines for making plastics tapes; machines for making radiators; machines for making sacks; machines for making spun fleece; machines for making tools; machines for making tube blanks; machines for making waves; machines for making wood material boards; machines for manufacture of horological apparatus; machines for manufacturing abrasive materials; machines for manufacturing air filter elements; machines for manufacturing air suction devices; machines for manufacturing chains; machines for manufacturing confectionery; machines for manufacturing containers; machines for manufacturing cotton candy; machines for manufacturing dovetail joints; machines for manufacturing filters; machines for manufacturing foodstuffs; machines for manufacturing frozen confectionery; machines for manufacturing furniture; machines for manufacturing gloves; machines for manufacturing hoses for air transport; machines for manufacturing integrated circuits; machines for manufacturing joints; machines for manufacturing packaging materials; machines for manufacturing pipes; machines for manufacturing polymeric materials; machines for manufacturing sacks; machines for manufacturing semi-conductors; machines for manufacturing stirrups used in buildings; machines for manufacturing stirrups used in concrete manufacture; machines for manufacturing textile products; machines for manufacturing textiles; machines for manufacturing tubes; machines for manufacturing windows; machines for

manufacturing windows frames; machines for marking; machines for marking by hot stamping; machines for marking by impact; machines for marking by rolling; machines for materials handling; machines for mechanical handling; machines for metal forming; machines for metal processing; machines for metal working; machines for mineral processing; machines for mixing asphalt; machines for mixing foodstuffs; machines for moulding; machines for mounting tyres; machines for multiple axis motion; machines for operating gates (pneumatic or hydraulic); machines for operating turnstiles (pneumatic or hydraulic); machines for operating underwater; machines for packaging; machines for packaging cartridges; machines for packaging tape cassettes; machines for painting; machines for pallet stretch wrapping; machines for paper web catching; machines for pasting wall coverings; machines for peeling vegetables; machines for performing repetitive tasks; machines for post press apparatus; machines for preparing beverages (electric, kitchen); machines for preparing beverages (industrial); machines for preparing foam concrete; machines for preparing food (electric, kitchen); machines for preparing food (industrial); machines for pressure forming plastic films; machines for pressure forming plastic sheets; machines for pressure washing; machines for printing labels; machines for printing on metal sheets; machines for printing textile materials; machines for processing foods; machines for processing foodstuffs; machines for processing glass; machines for processing plastics; machines for processing printing plates; machines for processing rails; machines for processing raw fibrous materials; machines for processing wooden materials; machines for producing bags; machines for producing carbon fibres; machines for producing coextruded plastic films; machines for producing containers; machines for producing drinking vessels; machines for producing machine tools; machines for producing materials in sheet form; machines for producing materials in strip form; machines for producing materials in web form; machines for producing memory plastic sockets; machines for producing packaging container blanks; machines for producing sockets from positives; machines for punching (other than office use); machines for purifying compost; machines for raking; machines for recycling; machines for recycling plastics material; machines for reeling in windings; machines for removing earth; machines for removing paint; machines for removing rock; machines for removing surface coatings; machines for resistance welding (gas operated); machines for riveting; machines for road maintenance; machines for routing; machines for sanding floors; machines for scarifying earth; machines for scarifying rock; machines for scouring; machines for scraping earth; machines for scraping rock; machines for sealing bags after filling; machines for sealing containers; machines for sealing packaging containers; machines for separating bags from strips; machines for shaping; machines

for shaping lenses; machines for shaping metal; machines for shaping windings; machines for sharpening (electric, kitchen); machines for sharpening (industrial); machines for shredding agricultural waste; machines for shredding horticultural waste; machines for shredding paper based materials; machines for shredding scrap; machines for sieving (electric, kitchen); machines for sieving (industrial); machines for slicing food (electric, kitchen); machines for slicing food (industrial); machines for soil working; machines for sowing; machines for splitting bags; machines for sprinkling particulate materials; machines for stamping prices on merchandise; machines for stirring; machines for storing chilled confectionery; machines for straightening bars; machines for straightening pipes; machines for straightening pipes and cutting them to length; machines for straightening tubes; machines for straightening wire; machines for stretching plastics tapes; machines for stripping paint; machines for stripping wall coverings; machines for subdividing products; machines for surface coating; machines for surface finishing; machines for surface laying; machines for surface removing; machines for tapping threads; machines for the application of fluids; machines for the assembly of motor vehicle bodies; machines for the assembly of semiconductor components; machines for the assembly of work pieces; machines for the assembly of work pieces made of metal; machines for the binding of books (industrial); machines for the binding of pamphlets (industrial); machines for the building industry; machines for the centrifugal separation of fluids (industrial); machines for the chemical treatment of fabrics; machines for the chopping of timber; machines for the compacting of waste; machines for the construction industry; machines for the conveying (lifting) of goods; machines for the cutting of logs; machines for the cutting of rolls of paper sheet; machines for the cutting of sheet material; machines for the decoration of ceramics; machines for the decoration of glassware; machines for the demolition industry; machines for the digestion of wastes; machines for the dosing of liquid; machines for the dosing of solid plastics; machines for the extrusion of plastics; machines for the fabrication of print products; machines for the filtering of airborne asbestos particulates; machines for the folding of documents (industrial); machines for the food industry; machines for the handling of materials; machines for the making of bags; machines for the making of glassware; machines for the making of hay; machines for the making of pottery; machines for the manipulation of printed products; machines for the manufacture of artificial limb joints; machines for the manufacture of artificial limbs; machines for the manufacture of blinds; machines for the manufacture of electric components; machines for the manufacture of electronic components; machines for the manufacture of land vehicles; machines for the manufacture of magnetic recording carriers; machines for the manufacture of moulded parts;

machines for the manufacture of moulds; machines for the manufacture of packaging; machines for the manufacture of packing; machines for the manufacture of paper; machines for the manufacture of plastic articles; machines for the manufacture of plastic packaging articles; machines for the manufacture of printed circuit boards; machines for the manufacture of printed electric circuits; machines for the manufacture of sachets; machines for the manufacture of springs; machines for the manufacture of textiles; machines for the manufacture of tubes; machines for the mechanical handling of articles; machines for the mechanical handling of drinking vessels; machines for the mechanical handling of goods; machines for the mechanical handling of items of post (industrial); machines for the mechanical handling of materials; machines for the mechanical handling of packages; machines for the mixing of materials (electric, kitchen); machines for the mixing of materials (industrial); machines for the paper making industry; machines for the preparation of carbonated beverages (electric, kitchen); machines for the preparation of carbonated beverages (industrial); machines for the preparation of fodder; machines for the preparation of fodder mats; machines for the preparation of foodstuffs (electric, kitchen), other than cooking; machines for the preparation of foodstuffs (industrial); machines for the preparation of plastics; machines for the preparation of printing plates; machines for the pressing of fodder plants; machines for the pressing of plastics materials; machines for the processing of materials; machines for the processing of rubbish; machines for the production of blown films; machines for the production of bundles of sheet metal; machines for the production of cast films; machines for the production of cheese slices; machines for the production of electronic instruments; machines for the production of optical apparatus; machines for the production of optical lenses; machines for the production of paper; machines for the production of semiconductors; machines for the production of tools for the packaging industry; machines for the recovery of steam; machines for the renovation of conduits; machines for the renovation of ducting for sewers; machines for the renovation of pipes; machines for the renovation of tubes; machines for the repair of vehicles; machines for the servicing of vehicles (mechanical); machines for the stitching of books (industrial); machines for the storage of packaged goods; machines for the textile industry; machines for the thermal treatment of fabrics; machines for the treatment of animal skins; machines for the treatment of articles of leather; machines for the treatment of chemicals; machines for the treatment of concrete; machines for the treatment of hides; machines for the treatment of seeds; machines for the treatment of wet agents; machines for the working of building materials; machines for the working of metals; machines for the wrapping of containers; machines for transmitting (generating) electricity; machines for transporting cables; machines for tray forming;

machines for treating plastics materials; machines for turning; machines for tyre changing; machines for use in agriculture; machines for use in assembly; machines for use in biological reactions (industrial); machines for use in building; machines for use in building engines; machines for use in cement works; machines for use in chemical reactions; machines for use in combustion installations; machines for use in engineering; machines for use in filling cartons with food; machines for use in gardening; machines for use in grading; machines for use in grass cultivation; machines for use in horticulture; machines for use in maintaining grass in good condition; machines for use in making signs; machines for use in making tools; machines for use in mines; machines for use in modular assembly lines; machines for use in opening valves; machines for use in printing works; machines for use in processing meat (not cooking or freezing); machines for use in processing vegetables (not cooking or freezing); machines for use in processing webs; machines for use in shoe production; machines for use in sifting vegetables (electric, kitchen); machines for use in sifting vegetables (industrial); machines for use in the building industry; machines for use in the construction of pipelines; machines for use in the construction of roads; machines for use in the forming of cartons for food; machines for use in the grinding of gears; machines for use in the kitchen (electric); machines for use in the manufacture of electric apparatus; machines for use in the manufacture of electronic instruments; machines for use in the manufacture of electronic parts; machines for use in the manufacture of metal products (not furnaces); machines for use in the manufacture of paper; machines for use in the manufacture of pottery (not kilns); machines for use in the manufacture of spectacle frames; machines for use in the mechanical handling of materials; machines for use in the mounting of slide frames for transparencies; machines for use in the paper industry; machines for use in the preparation of food (not cooking); machines for use in the preparation of lawns; machines for use in the preparation of surfaces; machines for use in the processing of foodstuffs (not cooking or refrigerating); machines for use in the sealing of cartons filled with food; machines for use in tightening; machines for use in wrapping (other than office machines); machines for use with cemented carbide tools; machines for use with diamond tools; machines for vacuum forming fabrics coated with plastic materials; machines for vacuum forming plastic films; machines for vacuum forming plastic sheets; machines for vacuum forming sockets over sculptured positives; machines for washing (electric); machines for washing bottles; machines for washing cages; machines for washing clothing (coin-operated); machines for washing clothing (electric); machines for washing electronic components in chemicals; machines for washing electronic components in solvents; machines for washing fabrics; machines for washing food (electric); machines for washing glassware;

machines for washing golf balls; machines for washing laboratory apparatus; machines for washing laundry (coin-operated); machines for washing laundry (electric); machines for washing mechanical components in chemicals; machines for washing mechanical components in solvents; machines for washing metal articles; machines for washing vehicles; machines for water filtering; machines for welding (electric); machines for welding (gas); machines for welding corners on pvc window frames; machines for wet lamination; machines for wetting; machines for whipping cream (electric, household); machines for whipping cream (industrial); machines for whipping foods (electric, household); machines for whipping foods (industrial); machines for working (other than heating) of metals; machines for working pipes; machines for working stone surfaces; machines for working tubes; machines for wrapping (other than office use); machines in the nature of conveyors; machines incorporating pneumatic apparatus; machines incorporating rotating blades for breaking up soil; machines utilising a punched (encoded) card for the control of a manufacturing process; machines utilising compressed air; machining centres; magnetic brakes for machines; magnetic clamps (parts of machines); magnetic conveyors; magnetic drill stands (parts of machines); magnetic holders for machine tools; magnetic hydrodynamic machines; magnetic positioners (parts of machines); magnetic separators for industrial use in separating magnetic particles from non-magnetic matter; magnetic separators using rare earth materials; magnetic sheet metal separators; magnetic vices (parts of machines); mailing machines {folding inserting and sealing machines}; mandrels (parts of machines); mangles; manhole shaft ring cleaning grippers (machines); manifolds (parts of engines); manifolds (parts of machines); manipulating devices (machines) for industrial use; manipulators (machines) for industrial use; manual chain block hoists; manual chucks for lathes; manual control valves (parts of machines); manually operated valves (parts of machines); marine engines; marine machines; marine motors; marine propulsion units; marine pumps; marking apparatus (machines) for marking cables; marking apparatus (machines) for marking tubes; masonry drills, other than for hand operated tools; material compacting machines; materials handling apparatus; materials handling conveyors; materials handling elevators; materials handling machines; matrices for setting presses; matrices for use in printing; meat choppers (electric machines) for household use; meat choppers (machines); meat cutters (electric machines); meat cutters (electric machines) for household use; meat grinders (electric machines); meat grinders (electric machines) for household use; meat mincers (machines); meat mincing machines (electric machines); meat mincing machines (electric machines) for household use; mechanical abrasive tools; mechanical apparatus for controlling machines; mechanical apparatus for emptying grease containers;

mechanical apparatus for the control of machines; mechanical apparatus for the regulation of machines; mechanical apparatus for the removal of scrap created in machines; mechanical arms (lifting); mechanical brushes (electric sweeping machines); mechanical components for programming the cycles of machines; mechanical components for washing machines; mechanical composters; mechanical construction apparatus; mechanical construction machines; mechanical control apparatus (electric); mechanical control apparatus (hydraulic); mechanical control apparatus (pneumatic); mechanical control apparatus for agricultural machines; mechanical control apparatus for engines; mechanical control apparatus for industrial machines; mechanical control apparatus for machine tools; mechanical control apparatus for machines; mechanical control apparatus for motors; mechanical control apparatus for robots; mechanical control devices; mechanical control devices for compressors; mechanical control devices for heating installations; mechanical control devices for lifting apparatus; mechanical control devices for machine tools; mechanical control devices for machines; mechanical control devices for turbines; mechanical control gear for electric motors; mechanical control gear for valves; mechanical control installations; mechanical control modules; mechanical control operating apparatus; mechanical control valves; mechanical conveying apparatus for feeding synthetics; mechanical conveyors for the timber industry; mechanical egg handling apparatus; mechanical embossing apparatus; mechanical filters for the treatment of water; mechanical gearings (other than for land vehicles); mechanical handling apparatus; mechanical handling apparatus for cargo; mechanical handling apparatus for use with machine tools; mechanical handling devices; mechanical handling installations for storage purposes; mechanical high pressure jet water apparatus; mechanical hose cutters; mechanical hose reels; mechanical instruments (electric) for polishing floors; mechanical instruments (electric) for vacuum cleaning floors; mechanical lifting apparatus; mechanical lifting machines; mechanical loading ramps; mechanical loading skids; mechanical mixers for cement; mechanical mixers for cement slurries; mechanical mixers for concrete; mechanical nibbling tools; mechanical pincers; mechanical power transmitting mechanisms (other than for land vehicles); mechanical presses (electric machines) for kitchen use; mechanical presses (machines) for industrial use; mechanical punching tools (machines); mechanical punching tools (parts of machines); mechanical recovery apparatus; mechanical reeling apparatus for unwinding metal bands; mechanical reeling apparatus for winding metal bands onto reels; mechanical reeling apparatus for winding tapes onto reels; mechanical reels; mechanical reels for flexible hoses; mechanical regulators being parts of mixture preparation devices; mechanical remote control installations; mechanical remote control operating apparatus

(non-electric); mechanical rope reels; mechanical saws (machines); mechanical shears (machines); mechanical shovels (machines); mechanical speed drives for electric motors; mechanical spray exaction machines for cleaning textile surfaces; mechanical stamping tools (machines); mechanical stamping tools (parts for machines); mechanical switches (non-electric); mechanical tools; mechanical transmission machines; mechanical transmissions (other than for land vehicles); mechanical washing appliances; mechanical winders; mechanical winding apparatus; mechanical wringing apparatus for mops; mechanically driven agricultural appliances; mechanically driven post sharpeners; mechanically operated hand tools; mechanically operated knives; mechanically operated punching tools; mechanically operated tools; mechanically operated waste disposal apparatus; mechanically powered apparatus for agriculture; mechanically powered apparatus for forestry; mechanically powered apparatus for gardening; mechanised golf course sand rakes; mechanisms (electric) for use in adjusting the position of racking; mechanisms (electric) for use in adjusting the position of shelving; mechanisms for automatically releasing specified amounts of oil; mechanisms for controlling fluid level (other than in valves); mechanisms for conveying foodstuffs; mechanisms for use in indexing systems; mechanisms for use in positioning systems (non-electric, parts of machines); mechanized livestock feeders; metal t pieces for pipes (parts of engines); metal t pieces for pipes (parts of machines); metal blanking machines; metal branching pipes (parts of engines); metal branching pipes (parts of machines); metal cutters (machines); metal cutting centres (machines); metal cutting tools (gas-operated); metal cutting tools (machines); metal cutting tools (parts of machines); metal drawing machines; metal finishing apparatus (machines); metal finishing plant (machines); metal forming machines; metal forming presses; metal high pressure hoses (parts of machines, engines or motors); metal hoses for use in hydraulic systems in machines; metal joints for pipes (parts of engines); metal joints for pipes (parts of machines); metal joints for tubes (parts of engines); metal joints for tubes (parts of machines); metal loading ramps (machines); metal loading ramps (structures); metal machining centres; metal pipe fittings (parts of engines); metal pipes (parts of engines); metal plate processors (machines); metal processing machines; metal reservoirs (parts of machines); metal safety valves (parts of machines); metal scouring apparatus (machines); metal scouring installations; metal stamping presses; metal tubes (parts of engines); metal tubes (parts of machines); metal welding apparatus (gas); metal welding machines (electric); metal welding machines (gas); metallic flexible pipes (parts of engines); metallic flexible pipes (parts of machines); metallic tools (machine) for use in completion of subterranean wells; metallic tools (machine) for use in drilling of subterranean wells; metallising flame spraying apparatus; metallurgical ladles;

metalworking apparatus; metalworking machines; metering rolls; micro adjustable machine tools; microprocessor controlled machines; milk centrifuges (machines); milk claws (machines or parts of machines); milking machines; milling cutters being parts of machine tools; milling machines; milling tools (machines); milling tools (parts for machines); mills (machines); mills for household purposes (other than hand-operated); millstones; mincers (electric) for household use; mincers (electric) for industrial use; mincing machines (electric) for household use; mincing machines (electric) for industrial use; mine borers; mine hoists; mine working machines; mineral comminution machines; mineral concentrating tables; mineral cutter picks (machines); mineral processing apparatus (machines); mineral water making machines; mineworking machines; mini excavators; miniature power tools; miniature power tools being parts of sets; mining glands; mining machines; mining shovels (machines); minting presses (machines); mist blowing machines; mixers (machines); mixers for furnace repair materials; mixers for oven repair materials; mixing apparatus (powered machines); mixing machines; mobile aerial work platforms (electric); mobile aerial work platforms (hydraulic); mobile baggage conveyors; mobile electric power generators; mobile elevating work platforms; mobile machines adapted to operate automatically; mobile machines adapted to operate by remote control; mobile machines for quarrying; mobile platforms (electric); mobile platforms (hydraulic); mobile platforms (lifting); mobile stairs (motorised); mobile vehicle lifting apparatus; modular conveyors; modular couplings for machine tools; modular sign panels (mechanical); modular tools (machines); modular tools for machines; molding machines; molds (parts of machines); mortising machines; motor air compressor units for blast-chilling apparatus; motor air compressor units for freezing apparatus; motor control apparatus (mechanical); motor control centres (mechanical); motor control instruments (mechanical); motor control protection apparatus (mechanical); motor cultivators; motor drive apparatus for industrial purposes; motor drive mechanisms (other than for land vehicles); motor drive units (other than for land vehicles); motor driven apparatus for hoisting (not transport); motor driven apparatus for lifting (not transport); motor driven display platforms; motor driven lawn mowers; motor driven saws; motor driven screwdrivers; motor driven tools; motor driven windlasses; motor graders (machines); motor hoes (machines); motor operated driving apparatus, other than for land vehicles; motor powered liquid pumps; motor pumps; motor speed regulators; motor speed variators; motorised fans for machines; motorised gears, other than for land vehicles; motorised operating rods for blinds; motorised operating rods for curtains; motorised operating rods for doors; motorised operating rods for roller shutters; motorised operating rods for windows; motorised pumps; motorised valves;

motorised work platforms for hoisting purposes; motorised work platforms for lifting purposes; motorized cultivators; motors for aeronautical purposes; motors for boats; motors for locomotion by water; motors for machines; motors for tractors used other than for transportation purposes; motors for use in the automatic operation of awnings; motors for use in the automatic operation of rolling shutters; motors for use in the automatic operation of window shutters; motors for use with pumps; motors incorporating permanent magnets, other than for land vehicles); motors incorporating turbines, other than for land vehicles); motors, electric, other than for land vehicles; motors, other than for land vehicles; mould withholding devices; moulded component parts of machines; moulded components for machine tools; moulding dies (parts of machines); moulding machines; moulds (parts of machines); moulds for die-casting (parts of machines); moulds for forging metal products (parts of machines); moulds for injection moulding tools; moulds for moulding plastics products (parts of machines); mounted bearings (parts of machines); mounted forage harvesters (machines); mounting devices for crane forks; mounting devices for grippers (machines); mounting machines; mounting plates for machines; movable cranes; movable elevator conveyors; movable vibrating conveyors; movable worm conveyors; moving belt conveyors; moving coil servomotors; moving cranes; moving pavement (sidewalks); moving pavements (walkways); moving staircases (escalators); moving stairways (escalators); moving walkways; mowing and reaping machines; mowing buckets (machines or parts of machines); mowing machines (electric); mowing machines (petrol); muck spreaders (machines); mud catchers and collectors (machines); mud motors; mufflers (parts of exhaust systems); mufflers (parts of machines); mufflers for motors and engines; multi-spindle automatic screw machines; multiple function electric screwdrivers; multiple nut runner motors; multiple shell grippers (machines); multiple spindle heads for use in boring; multiple spindle heads for use in drilling; nailing machines; needle pistols (machines); net haulers (machines); net hauling machines (fishing); nibblers (machines); nippers (machines); non-electric couplers (parts of machines); non-electric coupling devices for engines; non-electric coupling devices for machines; non-electric coupling devices for motors; non-electric coupling rings (parts of engines, other than land vehicles); non-electric coupling rings (parts of machines); non-electric coupling sleeves (parts of engines, other than for land vehicles); non-electric coupling sleeves (parts of machines); non-electric couplings for farm machines; non-metallic hoses for use in hydraulic systems in machines; non-metallic pre-insulated bonded pipes (parts of machines); non-metallic reservoirs (parts of machines); non-metallic spools (parts of machines); non-metallic spools (parts of sewing machines); non-return flaps of metal (parts of machines); non-return valves of metal (parts of machines);

non-return valves of plastic (parts of machines); non-woven belts being parts of machines for use in abrading; non-woven discs being parts of machines for use in cleaning; non-woven rollers being parts of machines for use in polishing; non-woven wheels being parts of machines for use in scouring; notchers (machine tools); notching machines; numerically controlled drilling machines; numerically controlled machine tools; numerically controlled machines; numerically controlled turning machines; numerically positioned machines; nut drivers (machines); nut spinners (machines); nut splitters (machines); nut-tapping machines; off-line assembly modules; offset damper cleaners; offset presses; offset printers; offset printing apparatus; oil drilling rigs; oil drilling tools; oil filtering apparatus for engines; oil filtering apparatus for motors; oil filters for engine lubrication systems; oil filters for engines; oil pressure pumps; oil purification machines for power stations; oil refining machines; oil separators (machines); oil spill cleaning apparatus; oil vapour filters (parts of machines or engines); oleodynamic components; oleodynamic controls; one axis contouring machines; one-sided end profiling machines; operating (control) cables for machines; operating (control) cables for motors; operating apparatus for vacuum pumps; operating machines for the automatic cutting of fabrics; orange squeezing machines (electric); orbital sanders (machines); orbital sanding machines; ore separators (machines); ore treating machines; outboard engines for boats; outboard motors; overdrive units, other than for land vehicles; overhead conveyors; overhead cranes; overload couplings (parts of machines); pack assembling machines; pack dispensing machines; pack emptying machines; pack opening machines; packaging apparatus (machines); packaging machines; packaging machines for sealing bags; packaging machines for wrapping; packaging tools (machines); packing installations; packing machines; padding presses (machines); paint marking machines; paint mixing machines; paint sifting machines; paint spray guns; paint sprayers; paint spraying apparatus; paint striping machines; paint stripping apparatus (machines); painters' tools (machines); painting machines; pallet changing devices for machine tools; pallet loading belts; pallet stabilisation machines; pallet stretch wrapping machines; pallet transferring machines; palletisation machines; palletisers; palletising apparatus; palletising machines; pan conveyors; pantograph controlled machines for engraving; pantograph controlled machines for sign making; paper bags for vacuum cleaners; paper converting machines; paper cutters (machines) for industrial use; paper feed apparatus for use with machines (other than office use); paper feeders (printing); paper feeders for use with printing machines; paper feeding apparatus for use with machines (other than office use); paper feeding machines (other than office use); paper filters (parts of engines); paper filters (parts of machines); paper guiding apparatus (parts of machines), other

than for office use; paper handling devices (machines), other than for office use; paper handling devices (parts of machines), other than for office use; paper handling machines, other than for office use; paper machines; paper mill machines; paper presses (machines), other than for office use; paper receiving apparatus (machines), other than for office use; paper receiving apparatus (parts of machines), other than for office use; paper shredders (machines), other than for office use; paper shredding machines, other than for office use; paper stacking devices (machines); paper transporters (machines), not for office use; papermaking machines; paring machines; parquet wax-polishers, electric; parts of engines; parts of machines; parts of motors; passenger elevators for buildings; passenger lifts; pasta cutters (machines); paste working machines; pattern rolling machines; patterning mechanisms (machines), other than for office use; pavement cutting power grinders; pavement cutting power groovers; pavement cutting power saws; pavement machines; pavement profilers (machines); pedal drives for sewing machines; pedestal drilling machines; peelers (electric machines); peeling machines; pepper mills other than hand-operated; percussion hammers (machines); percussion tool bits for machines; perforated drums being parts of machines for sorting materials; perforated plates being parts of machines for sorting materials; perforated screens being parts of machines for sorting of materials; perforating machines, other than for office use; permanent chucks (parts of machines); petrol injection apparatus; petrol injection instruments; photocomposing machines; photoengraving machines; phototypesetting machines; pick and place machines; piece holders for polishing machines; piercing machines; piercing tools for machine presses; piezoelectric components; pile drivers (machines); pile preparing devices (machines); pile raising devices (machines); pilotless cleaning vehicles; pinions (other than for land vehicles); pinning machines; pipe bending apparatus (machines); pipe bending machines; pipe bends of metal (parts of machines); pipe driving appliances (machines); pipe induction bending machines; pipe jacking machines; pipe laying apparatus; pipe laying machines; pipe sections of metal (fitted parts of engines); pipe sections of metal (fitted parts of machines); pipe-laying machines; pipeline pigs {machines for traversing and cleaning pipelines}; pipes (fitted parts of machines); piston pins; piston rings; piston rings; piston rings for heat pumps; piston rods; piston segments; pistons; pistons (parts of machines or engines); pistons for compressors; pistons for cylinders; pistons for engines; pistons for internal combustion engines; pistons for land vehicle engines; pistons for machines; pistons for vehicle engines; pivoting bucket conveyors; pivoting bucket elevators; plain journal bearings; plain thrust bearings; plaiting machines; planers (machines); planes (machines); planetary gear transmissions, other than for land vehicles; planing machines; planing tools (machines); planing tools (parts of

machines); planting machines; plants being combinations of machines; plasma cutting machines; plasma spraying apparatus; plasma spraying machines; plasma welding apparatus (gas-operated); plasma welding machines; plastics injection forming machines; plastics moulding machines; plastics pipes (fitted parts of machines); plastics processing machines; plastics welding machines; plastics working machines; plate shearing machines; platemaking machines; platen printing machines; platform lifts; platform truck lifts; pleating machines; plough shares; ploughs; ploughs being agricultural machines; ploughshares; plug cocks (parts of machines); plunger pistons; plunger type valves for use with tanks; plungers (machines); pneumatic actuating apparatus; pneumatic actuators for control of shut off valves; pneumatic actuators for control valves; pneumatic air tools; pneumatic apparatus for controlling pressure levels in machines; pneumatic apparatus for maintaining atmospheric environments; pneumatic breaking tools (machines); pneumatic coil and strap nailing machines; pneumatic coil and strap nailing tools (powered); pneumatic compressors; pneumatic concrete breakers; pneumatic control apparatus; pneumatic control apparatus for agricultural machines; pneumatic control apparatus for engines; pneumatic control apparatus for industrial automation; pneumatic control apparatus for industrial machines; pneumatic control apparatus for machine tools; pneumatic control apparatus for machines; pneumatic control apparatus for motors; pneumatic control apparatus for robots; pneumatic control apparatus for vehicle engines; pneumatic control devices; pneumatic control devices for compressors; pneumatic control devices for heating installations; pneumatic control devices for lifting apparatus; pneumatic control devices for machine tools; pneumatic control devices for machines; pneumatic control devices for turbines; pneumatic control gear for electric motors; pneumatic control gear for valves; pneumatic control machines; pneumatic control modules; pneumatic control operating apparatus; pneumatic control valves; pneumatic controls for automatically operating valves; pneumatic controls for machines, motors and engines; pneumatic conveying pumps; pneumatic cylinders; pneumatic distributors; pneumatic door openers and closers (parts of machines); pneumatic drills; pneumatic fuel injectors for engines; pneumatic fuel injectors for motors; pneumatic hammers; pneumatic inflators; pneumatic jacks (air or exhaust filled bags for lifting); pneumatic jacks (machines); pneumatic jacks for operating machine tools; pneumatic jacks for operating machines; pneumatic lifting apparatus (machines); pneumatic machines; pneumatic machines for conveying bulk materials; pneumatic picks; pneumatic pincers (machines); pneumatic pipeline conveyors; pneumatic power tools; pneumatic pumps; pneumatic servoactuators; pneumatic tools; pneumatic tools (machines); pneumatic tools for nailing (machines);

pneumatic tools for peening (machines); pneumatic tools for rust removing (machines); pneumatic tools for scale removing (machines); pneumatic tools for scraping (machines); pneumatic tools for stapling (machines); pneumatic tools for surface cleaning (machines); pneumatic tools for tacking (machines); pneumatic transporters; pneumatic tube conveyors; pneumatically driven machines; pneumatically driven presses; pneumatically operable valves; pneumatically operated apparatus for de-icing aircraft wings; pneumatically operated lifting jacks (machines); pneumatically operated power tools; pneumatically operated silos for the drying of grains; pneumatically operated silos for the mechanical handling of grains; pneumatically operated silos for the storage of grains; polishers (machines); polishing buffs (parts of machines); polishing discs (parts of machines); polishing discs for use with electric floor polishers; portable air tools; portable drill stands (machines); portable drill stands for electric drills; portable drilling machines (electric); portable drilling machines (hand-operated); portable electric blenders (electric); portable electric drills; portable electric food mixers; portable electric grinders; portable electric mixers; portable electric power tools; portable filtration units (machines); portable gas blow pipes; portable gas cutting tools; portable machines for fastening purposes; portable power operated machine tools; portable power supply generating apparatus; portable pump installations for gases (other than for medical use); portable pump installations for liquids (other than for medical use); portable steam engines for agricultural (other than transport) use; portable steam engines for horticultural (other than transport) use; portable upholstery cleaners utilising a vacuum; portable upholstery cleaning (washing) machines; portable vacuum cleaners (electric); portal cranes; positioning apparatus for setting presses; positioning tables being parts for machines; potato diggers (machines); potato diggers for towing behind tractors; potato digging apparatus (machines); potato graders (machines); potato lifters (machines); potato lifters for towing behind tractors; potato mashers (electric machines); potato peelers (electric machines); potato sorters (machines); potters' wheels; poultry hatchers; poultry incubators; powder applying apparatus for printing machines; powder handling apparatus (machines); powder processing machines; power activated hand-held tools; power blowers for the exhaustion of dust; power chucks (parts of machines); power drive trains for use in cooling towers; power driven augers (machines); power driven augers (parts of machines); power driven embossing dies; power driven hand tools; power driven hedge shears; power driven pipe notching machines; power driven punching dies; power filters (machines); power filters for water purification (machines); power generating apparatus; power generators for vehicles; power hammers; power installations (generators); power operated clearing saws; power operated cross-cutting saws; power operated

cutters; power operated cutting machines; power operated cutting tools; power operated drilling tools; power operated excavating machines; power operated flexible jacks; power operated hammers; power operated hand held tools; power operated hand tools; power operated hedge trimmers; power operated hydraulic lifting apparatus; power operated jacks; power operated lawn edging tools; power operated screwdrivers; power operated sprayers for liquids; power operated sprayers for paints; power operated staplers (other than for stationery use); power operated tools; power operated tools for assembling; power operated tools for boring; power operated tools for crimping; power operated tools for cutting; power operated tools for drilling; power operated tools for edging; power operated tools for industrial purposes; power operated tools for punching; power operated tools for reaming; power operated tools for releasing threaded fasteners; power operated tools for tightening threaded fasteners; power operated tools for use in agriculture; power operated tools for use in building; power operated tools for use in decorating; power operated tools for use in electricity supply; power operated tools for use in horticulture; power operated tools for use in metal working; power operated tools for use in plumbing; power operated tools for use in pottery; power operated tools for use in vehicle maintenance; power operated tools for use in woodworking; power operated valves; power operated valves being parts of machines; power operated weeders; power saws; power scythes; power shift transmissions (other than for land vehicles); power shovels; power sources (generators); power supply apparatus (generators); power supply devices (generators); power supply units (generators); power take-off shafts (other than for land vehicles); power take-off shafts for aircraft; power take-off shafts for sea craft; power take-off shafts for water vehicles; power take-off transmission units (other than for land vehicles); power take-off transmission units for aircraft; power take-off transmission units for machines; power take-off transmission units for sea craft; power take-off transmission units for water vehicles; power tools; power trains for aircraft; power trains for machines; power trains for mechanical excavators; power trains for sea craft; power trains for vehicles (other than for land vehicles); power trains for water vehicles; power transmission apparatus (other than for land vehicles); power transmission apparatus for air vehicles; power transmission apparatus for aircraft; power transmission apparatus for machines; power transmission apparatus for mechanical excavators; power transmission apparatus for sea craft; power transmission belting for aircraft; power transmission belting for machines; power transmission belting for mechanical excavators; power transmission belting for sea craft; power transmission belts (other than for land vehicles); power transmission belts for agricultural machines; power transmission belts for aircraft; power transmission belts for

industrial machines; power transmission belts for machines; power transmission belts for mechanical excavators; power transmission belts for sea craft; power transmission couplings (other than for land vehicles); power transmission couplings for aircraft; power transmission couplings for machines; power transmission couplings for sea craft; power transmission couplings for water vehicles; power transmission mechanisms (other than for land vehicles); power transmission mechanisms for aircraft; power transmission mechanisms for machines; power transmission mechanisms for sea craft; power transmission mechanisms for water vehicles; power transmission parts (other than for land vehicles); power transmission systems for machine tools; power transmissions (other than for land vehicles); power transmissions for aircraft; power transmissions for machines; power transmissions for sea craft; power transmissions for water vehicles; power trowels (machines); power units (generators); power units for generating electric current; power washers (machines); powered access work platforms; powered floor scrubbers; powered floor sweepers; powered garden trimmers; powered gardening machines; powered hammers; powered lifting apparatus; powered mobile racking; powered mobile shelving; powered polishers for commercial use; powered polishers for household use; powered polishers for industrial use; powered polishers for use in manufacturing processes; powered polishers for use in polishing manufactured components; powered resin mixers; powered tools; pre-insulated bonded metal pipes (fitted parts of machines); precision grinding machines; precision grooving tools (machines); precision grooving tools (parts of machines); precision machine tools; precision machine tools being parts of sets; precision machine tools for cutting materials; precision machine tools for machining materials; precision machines for producing parts for turbojets; precision parting tools (machines); precision parting tools (parts of machines); precision turning tools (machines); precision turning tools (parts of machines); preparatory machines for spinning; press rollers (parts of machines); press tools (parts of machines); presses; presses (machines for industrial purposes); presses (machines); presses for bundling scrap; presses for foodstuffs (machines); presses for industrial purposes (machines); presses for industrial use (machines); presses for moulding food (machines); presses for use in semi-monocoque manufacture (machines); presses for use in the press forming of metal (machines); presses for use in the production of industrial diamonds (machines); pressing machines; pressing machines (to make satin-like); pressing machines for industrial purposes; pressure cleaning machines; pressure control valves being parts of machines; pressure controllers (regulators) being parts of machines; pressure controllers (valves) being parts of machines; pressure intensifiers (machines); pressure multipliers for gases; pressure multipliers for liquids; pressure pipes of metal (parts of machines); pressure pumps; pressure reducer valves

(parts of machines); pressure reducers (parts of machines); pressure reducing valves (parts of machines); pressure reducing valves being parts of cryogenic apparatus (machines); pressure regulating apparatus being parts of machines; pressure regulating valves being parts of machines; pressure regulating valves parts of machines; pressure regulators (parts of machines); pressure regulators for lubricating installations; pressure release screws being parts of machines; pressure transformers; pressure vacuum pumps; pressure valves (parts of machines); pressurising machines for drums; print finishing apparatus; print finishing machines; print shop machines; print trimmers (machine); print trimmers (parts of machine); printed circuit board drilling machines; printed circuit board forming machines; printheads for ink-jet printers; printing apparatus (machines); printing apparatus for recording permanent copy on label tags; printing apparatus for recording permanent copy on substrates; printing apparatus for recording permanent copy on tickets; printing cylinder changing apparatus; printing cylinders; printing frames (parts of machines); printing machines; printing machines (other than for office use); printing machines for bank notes; printing machines for electric duplicating processes; printing machines for electronic duplicating processes; printing machines for fiduciary documents; printing machines for printing on labels; printing machines for printing on packaging; printing machines for printing on product substrates; printing machines for use on sheet metal; printing masks (parts of machines); printing plate makers; printing plates; printing plates; printing plates (not sensitised); printing presses; printing rollers for machines; printing works machines; process control apparatus (hydraulic); process control apparatus (mechanical); process control apparatus (pneumatic); process control instruments (hydraulic); process control instruments (mechanical); process control instruments (pneumatic); process control units (hydraulic); process control units (mechanical); process control units (pneumatic); process controllers (hydraulic); process controllers (mechanical); process controllers (pneumatic); process controlling apparatus (hydraulic); process controlling apparatus (mechanical); process controlling apparatus (pneumatic); processing machines for use in the food industry; production installations comprising linked machine tools; production installations comprising linked machining centres; profiling machines; progressive starters for asynchronous motors; projection speed plates; propeller shafts; propulsion mechanisms other than for land vehicles; protection gas generators; pruning saws (electric); pruning saws (motorised, fuel driven); pruning shears (other than hand operated); puddling machines; pulleys; pulleys (parts of machines); pulleys (parts of motors); pulleys incorporating bearings (parts of machines); pulleys of metal for use with cable (parts of machines); pulleys of metal for use with rope (parts of machines); pulleys of metal incorporating bearings (parts of machines); pulling apparatus

(machines) for laying pipes; pulp converting machines; pulping machines; pulsation dampeners; pulverisers (machines); pulverisers (sewage); pulverizing machines; pump casings; pump diaphragms; pump installations; pump shafts; pump-motor assemblies; pumping apparatus (machines); pumping station assemblies; pumping units (machines); pumps (machines); pumps (other than petrol vending pumps, surgical pumps or air pumps for vehicle tyres); pumps (parts of machines, engines or motors); pumps being parts of spin drying machines; pumps being parts of vacuum cleaners; pumps being parts of washing machines; pumps being parts of wet cleaners; pumps for aerating indoor aquariums; pumps for aerosols; pumps for beer; pumps for changing oil (electric); pumps for concrete; pumps for containers (electric); pumps for delivering pre-determined quantities; pumps for dispensing liquids from containers (electric); pumps for heating installations; pumps for ink feeding (parts of machines); pumps for liquid fuels for use in filling stations (machines, other than self regulating); pumps for liquids (machines, other than self regulating fuel in filling stations); pumps for machines (parts of); pumps for packaging (machines); pumps for recycling water in swimming pools; pumps for the extraction of gases (machines); pumps for the extraction of liquids (machines); pumps for the extraction of vapour (machines); pumps for use in agriculture (machines); pumps for use in horticulture (machines); pumps for use in the food industry (machines); punches (machines), other than for office use; punches for punching machines; punches for use with machine tools; punching machines; punching presses for the final punching of parts; punching presses for the pre-punching of parts; punching tools (electric), other than for office use; punching tools (hand-operated), other than for office use; punching tools (machines), other than for office requisites; punching tools (parts of machines), other than office requisites; quilting machines for use in the manufacture of mattresses; quilting machines for use in the manufacture of upholstery; rabetting planes (machines); rack and pinion jacks; rack hoists; racket stringing machines; racquet stringing machine; radial feeders (machines); radiator caps for cooling radiators for motors and engines; radiator caps for cooling radiators of engines; radiators (cooling) for motors and engines; rail-laying machines; railroad constructing machines; rakes being parts of machines; rakes for raking machines; raking machines; ram air turbines (other than for land vehicles); ramjets (other than for land vehicles); rammers (machines); ramming apparatus (machines) for earth displacement; ramming apparatus (machines) for splitting pipes; ramming apparatus (machines) for splitting sleeves; ramming apparatus (machines) for splitting wedges; ramming apparatus (machines) for the introduction of pipes; ramming apparatus (machines) for underground conduit laying; ramming apparatus (machines) for underground pipe laying; ramps being machines; rams (machines); rapid scouring machines;

rasps (machines); ratchet handles (machines); ratchet hoists; ratchet wrenches (machines); ratchets (machines); reamers (machine tools); reamers (parts of machines); reapers; reapers and binders; reapers and threshers; rebound crushers; reciprocating feeders (machines); reciprocating feeders (parts of machines); recycling crushing units (machines); recycling machines; reducing gears (parts of machines); reducing gears, other than for land vehicles; reduction gears other than for land vehicles; reeling apparatus, mechanical; reels (parts of machines); reels for weaving looms; reels, mechanical, for flexible hoses; reflow solder apparatus; refrigerant compressors for cooling installations; refrigerant compressors for heating installations; refrigeration compressors; refrigeration condensers; refuse compacting machines; refuse crushing machines; refuse cutting machines; refuse handling apparatus; refuse pressing machines; refuse processing apparatus; regrinding mills (machines) for producing plastic pellets; regulating valves (parts of machines); regulators (parts of machines); regulators (valves) being parts of machines; regulators for engines; regulators for machines; regulators for motors; regulators for use in welding machines; release devices for pipe layers being parts of hoist apparatus; remote control devices (cables) for machine; remote control devices (cables) for use with electric machine; remote control devices (cables) for use with remotely controlled electric machine; remotely controlled handling devices; remotely controlled lifting machines; remotely controlled manipulating machines; reproducing (duplicating) machines, other than for office use; reproduction machines for printing (other than for office use); reserve electric power supply apparatus (generators); restructure valves (parts of machines); return valves for waste gas decontamination; reversible flow filters (parts of machines); rhinestone setting machines; ribbon lap machines; rice planting machines; ride-on lawnmowers (machines); rings for bearings; rinsing machines; rivet saws (machines); riveters (machines); riveters (powered tools); riveting hammers (powered tools); riveting machines; road building machines; road making machines; road marking machines; road rollers; road rolling machines; road sweepers (machines); road sweeping attachments for vehicles; road sweeping machines (self propelled); roadway construction machines; roadway paving machines; robot metal working presses; robotic apparatus for handling materials; robotic cleaning (polishing) machines for floors; robotic cleaning (vacuuming) machines for floors; robotic cleaning machines; robotic electric welding machines; robotic handling apparatus; robotic loaders for diffusion furnaces; robotic swimming pool cleaning machines; robots (machines); robots for handling rods; robots for industrial use; robots for machine tools; robots for use in industry; robots for welding; rock bits for drilling machines; rock breaking machines; rock drills (machine tools); rock drills (machines); rock drills (parts of machines); rocker arms (parts of

engines); rocker arms (parts of machines); rocker arms (parts of motors); rocket engines for the propulsion of airborne weapons; rocket engines for the propulsion of aircraft; rocket engines for the propulsion of missiles; rocket engines for the propulsion of water craft; rocket motor propulsion apparatus for aircraft; rocket motor propulsion apparatus for boats; rocket motor propulsion apparatus for missiles; rocket motor propulsion apparatus for water craft; rocket motor propulsion apparatus for weapons; rocket nozzles; rocket propulsion engines for aircraft; rocket propulsion engines for boats; rocket propulsion engines for missiles; rocket propulsion engines for water craft; rocket propulsion engines for weapons; roll forming machines; roll forming tooling (parts of machines); roll forming tools (machines); roller bearings; roller bridges; roller bridges; roller conveying apparatus; roller conveyor apparatus for movement of goods; roller conveyors; roller installations for brake testing; roller tracks for use in belt conveyor apparatus; roller tracks for use in roller conveyor apparatus; roller washing machines for washing print rollers; rollers being components of packaging lines (machines); rollers for bearings; rolling (conveying) machines; rolling bearing cages; rolling gearings (other than for land vehicles); rolling machines; rolling mill cylinders; rolling mill rolls; rolling mills; rolling presses (machines); rolling surfaces (machines) for packages; rolling surfaces (parts of machines) for packages; rolls being parts of machines; rolls for rolling mills; root slicers (machines); rotary actuators; rotary air compressors; rotary brushes (machines); rotary cultivators (machines); rotary cutting installations (machines); rotary dies (machines); rotary dies (parts of machines); rotary drills (machines); rotary drills (parts of machines); rotary gear pumps; rotary hammers (machines); rotary hydraulic motors (other than for land vehicles); rotary index machines; rotary machines for ironing clothes; rotary metal cutting tools (machines); rotary metal cutting tools (parts of machines); rotary milling cutters (machines); rotary milling cutters (parts of machines); rotary nozzles for use with high pressure water washing machines; rotary paper trimming machines, other than for office use; rotary printing machines (other than for office use); rotary printing presses; rotary pumps; rotary sanding machines; rotary shoes (parts of machines); rotary steam presses, portable, for fabric; rotary steam presses, portable, for fabrics; rotary tables for machine tools; rotary tool bits (machines); rotary tool bits (parts of machines); rotary tools (machines); rotary trimming lines; rotary trimming machines; rotating centres (machines); rotating centres (parts of machines); rotating electric machines; rotating screw conveyors; rotavators (machines); rotor arms for size reduction machines; round bale choppers (machines); routers (machines); routers (parts for machines); row fertiliser spreaders (machines); rubber stamps (parts of machines); rubbish compactors (machines); sack filling machines; sack forming

machines; sack making machines; sack sealing machines; safety couplings (other than for land vehicles); safety couplings for machines; safety manual hoists; safety valves (parts of machines); salad drainers (kitchen machines); sand blasting machines; sanders (machines); sanding belts for use with machines; sanding disks for use with machines; sanding machines; sanitizing machines; sausage machines; saw benches (parts of machines); saw blades (parts of machines); saw blades for use with power tools; saw chains; saw guide rails (parts of machines); sawing machines; sawing tools for use with sawing machines; saws (machines); scaling machines; scarifiers (machines); scarifying machines; scarifying machines for garden use; scissors, electric; scouring machines; scouring machines for textiles; scrap processing apparatus (machines); scrap recovery apparatus (machines); scraper apparatus (machines) for removing sludge; screeders (machines); screen printing apparatus (machines); screen printing machines; screening machines; screening rollers (parts of machines); screens being machine parts for use in the screen printing industry; screens for the printing of textile materials (parts of machines); screens used in the paper industry (machines); screens used in the paper industry (parts of machines); screens used in the pulp industry (machines); screens used in the pulp industry (parts of machines); screw air compressors; screw conveyors; screw extractors (machines); screw hoists; screw jacks (machines); screw milling cutters (machines); screw milling cutters (parts of machines); screw pulley blocks (machines); screw pulley blocks (parts of machines); screw pumps; screw separators; screw sprayers being machines; screw threaded cap openers (machines); screw-thread cutters (machines); screwdriver bits for electric screwdrivers; screwdriver bits for machines; scrubbing machines (floor -); scythes (machines); sealing joints (parts of engines); sealing joints (parts of machines); sealing joints (parts of motors); sealing machines for industrial purposes; seaming machines; seated (ride on) lawn mowers; seed drills (machines); seed drills (parts of machines); seedling processing machines; segmental saw blades for machines; self-centring chucks (parts of machines); self-driven machines for drilling; self-driven machines for sawing; self-driven machines for screwing; self-oiling bearings; self-priming centrifugal pumps; self-propelled cranes; self-propelled hydraulic platforms; self-propelled load handling apparatus; self-propelled material handling apparatus; self-propelled mowers; self-propelled road surface dressing vehicles; self-propelled working baskets; self-propelled working platforms; self-regulating pumps (other than for the delivery of fuel at filling stations); selvedge printing machines; semi-automatic case gluing machines; semi-automatic case taping machines; semi-automatic strapping machines; separating cylinders (machines); separating cylinders (parts of machines); separating machines; separation apparatus (other than for laboratory or medical use); separators; separators (machines);

separators for liquids; separators for oil; separators for separating solids from liquids; sequin setting machines; servo-control valves; servo-controlled hydraulic pumps; servo-cutters (machines); servo-mechanisms; servomotors (other than for land vehicles); servomotors incorporating encoders; setting presses (machines); settling filters (machines); sewage disposal apparatus (machines); sewage disposal installations; sewage pulverizers; sewage transport machines; sewage treatment apparatus; sewage treatment machines; sewing machine apparatus; sewing machine installations; sewing machine motors; sewing machines; shaft bearings (parts of machines); shaft couplings (machines); shaft couplings for machines; shaft couplings for use in connection with marine apparatus; shaft couplings for vehicles (other than for land vehicles); shaft hoists for mines; shaft mounted gear units (other than for land vehicles); shaft mounted gear units for land vehicles; shafts for ball bushings; shafts for machines; shaking machines for use in manufacture; shaped covers for electric kitchen machines; shaper cutters (machines); shaping machines (electric); sharpening machines; sharpening wheels (electric machines); sharpening wheels (parts of machines); shaving exhaust installations; sheaf-binding machines; shearing machines for animals; shears (other than hand operated); shears, electric; sheep shearing machines (hand-operated); sheep shearing machines (powered); sheep's foot rollers (machines); sheet fed rotary printing machines; sheet metal flattening machines; sheet metal separators (machines); sheet metal working apparatus; sheet metal working machines; sheet printing machines; sheeting grippers (machines); shock absorber plungers (parts of machines); shock absorbers for machines; shock absorbing cylinders (parts of machines); shock absorbing springs being parts of machine suspension; shock absorbing springs for machines; shoe cleaners (brushes, electric); shoe cleaning brushes (electric); shoe lasts (parts of machines); shoe polishers, electric; shoes for machine brakes; shot blasting machines; shovel loaders (machines); shovels, mechanical; shower pumps; shredder machines for forage; shredders (machines); shredders (machines) for cardboard; shredders (machines) for industrial use; shredders (machines) for paper; shredders (machines) for waste; shredding machines; shredding machines for water closets; shrinking machines; shrinkwrapping apparatus; shutter valves; shuttleless looms; shuttles (parts of machines); side cutters (machines); sidewalks (moving pavement); sieves (machines or parts of machines); sifters; sifting installations; sifting machines; sign makers (machines); silage spreaders (machines); silencers; silencers being parts of exhaust systems; silencers for engines; silencers for motors and engines; single column welding presses; single point cutting tools (machines); single point cutting tools (parts for machines); single seed sowing machines; single sheet diffusion transfer plates (parts of machines); single shouldered beading machines; single spindle drilling machines; single spindle

tapping machines; site lifts; size reduction machines for hard materials; size reduction machines for rock; size reduction machines for wood; sizing machines; skid steer loaders; skimmers (machines); skimmers for cleaning swimming pool surfaces; skimming machines; sleeve type linear ball bearings for use in linear movement; slewing gear; slicers (machines, electric); slide bearings; slide rests (parts of machines); slide valves (parts of machines); sliders for knitting machines; slides for knitting machines; sliding splines (parts of machines); sliding splines (parts of water vehicle gearing); slitting machines for industrial use; slotting machines; slotting tools for machines; sludge cocks (valves) being parts of machines; sludge valves being parts of machines; smoothing presses; snip cutters (machines); snips (machines); snow blowing attachments for vehicles; snow blowing machines; snow blowing vehicles; snow cutting attachments for vehicles; snow cutting vehicles; snow making apparatus; snow making machines; snow moving attachments for vehicles; snow moving vehicles; snow plough blades; snow ploughs; snow removal apparatus (machines); snow removal machines; snow removal tools (machines); socket head cap screw keys (machines); socket head cap screw keys (parts for machines); socket sets (machines); socket spanners (machines); socket wrenches (machines); sockets (machines); sockets (parts for machines); soil grading apparatus (machines); soil grading machines; soil moving apparatus (machines); soil moving machines; soil screening apparatus (machines); soil screening machines; soil sieving apparatus (machines); soil sieving machines; soil spreading apparatus (machines); soil spreading machines; solder paste printing apparatus; soldering apparatus, gas-operated; soldering blow pipes, gas-operated; soldering instruments (gas-operated); soldering irons, gas-operated; soldering machines (gas-operated); sole plates for supporting shaft bearings; solenoid operated valves; sorting apparatus (other than for money); sorting machines for industry; sorting machines, other than for money; sorting slides (parts of industrial sorting machines); sound absorbers (silencers) being parts of exhaust systems for machines; sound absorbers (silencers) being parts of vehicle exhaust systems; sound absorbers being parts of machines; soundproof hoods (parts of machines); sowers (machines); sowing machines; sowing machines for towing behind tractors; soybean reaping cutters (machines); spanners (machines); spark arrestors being parts of machines; spark eroding machines; spark erosion machines; spark plugs; spark plugs for engines; spark plugs for land vehicle engines; spark plugs for vehicle engines; sparking plugs; sparking plugs for internal combustion engines; sparking plugs for the internal combustion engines of vehicles; speed changers; speed controllers (mechanical) for dual carburettor motors; speed controllers (mechanical) for machines, engines and motors; speed governors (mechanical) for machines, engines and motors; speed governors for machines, engines and motors; speed

reducers (mechanical) being parts of machines; speed reducers (mechanical) for machines, engines and motors; speed regulators (mechanical) for machines, engines and motors; speed variators (mechanical) being parts of machines; spiked rollers (machines); spiked rollers (machines) for use in soil aeration; spin driers; spin driers (machines); spin dryers; spin dryers (machines); spindle adapter flanges for machine tools; spindle hoists; spindle shafts (parts of engines); spindle shafts (parts of machines); spindle shafts (parts of motors); spindles for machine tools; spine binders (machines), other than for office use; spine taping machines, other than for office use; spinning frames; spinning machines; spinning preparation machines; spinning wheels; spinning wheels (machines); spiral conveyors (machines); spiral de-watering units (machines); spiral mixing machines; splash guards (parts of machines); splash preventers (parts of machines); spline shank bits (parts of gearing for aircraft); spline shank bits (parts of gearing for water vehicles); spline shank bits (parts of machines); spool adaptors (parts for industrial machine); spool unwinders (machines); spools of metal (parts of machines); spools of metal (parts of sewing machines); spot cleaning machines; spot welding machines; spray fittings (parts of machines); spray guards for machines; spray guns (machines); spray guns for paint; spray guns for paint; spray heads (parts of machines); spray lances being agricultural implements; spray lances being horticultural implements; spray nozzles being parts of machines; spray nozzles for attachment to pressure washing machines; spray prevention flaps for machines; spray prevention guards for machines; spray rollers being agricultural implements; spray rollers being horticultural implements; spray valves (parts of machines); sprayers (machines) for agricultural use in spraying fungicide; sprayers (machines) for agricultural use in spraying herbicide; sprayers (machines) for agricultural use in spraying insecticides; sprayers (machines) for applying artificial sun tanning preparations; sprayers (machines) for garden use in spraying insecticide; sprayers (machines) for garden use in spraying weedkillers; sprayers (machines) for household use in spraying insecticide; sprayers (machines) for household use in spraying weedkillers; sprayers (machines) for use in agriculture; sprayers (machines) for use in horticulture; sprayers (machines), other than for medical use; sprayers affixed to vehicles for spraying crops; sprayers for towing behind vehicles for spraying crops; sprayers for use in agriculture (parts of machines); sprayers for use in horticulture (parts of machines); spraying booms attached to vehicles for the purpose of spraying crops; spraying booms for attachment to vehicles for the purpose of spraying crops; spraying booms for towing behind vehicles for spraying crops; spraying machines; spraying machines for use mounted on tractors; spraying machines for use mounted on trailers; spraying machines in the form of trailers; sprays (machines), other than for medical

use; sprays (parts of machines), other than for medical use; spreader beams (machines); spreader beams (parts of machines); spreaders (machines); spreading machines; spring bushes (parts of machines); spring driven reels; spring motors; spring powered machines; springs (parts of machines); springs being parts of machines; sprinkling devices (machines); sprockets for machines; sprockets for water vehicle gearing; sprung guide rails (parts of machines); sprung sheet metal guides (parts of machines); spur gear manual hoists; spur wheel pulley blocks (parts of machines); spur wheels (parts of machines); square splines (parts of machines); square splines (parts of water vehicle gearing); squaring machines; squeegees (machines); stacker crane arms; stacking machines (other than fork-lift trucks); stacking machines for ingots; stacking machines for slabs; stage loading apparatus; stainless steel pipe fittings (parts of machines); stainless steel tubes (fitted parts of machines); stairlifts; stalk separators (machines); stamping (franking) machines, other than for office use; stamping machines; stamping machines for pressing (shaping) components from sheet materials; stamping machines for pressing out components from sheet materials; stamping machines for printed materials in sheet form; stamping machines, other than for office use; standard shank drills (machines); standard shank drills (parts of machines); stands for lifting; stands for lifting tables; stands for machines; stapling machines (other than for surgical or stationery use); stapling presses (other than for surgical or stationery use); starter motors; starter pinions; starters for motors and engines; starters for stationary engines; starting couplings for air vehicles; starting couplings for machines; starting couplings for water vehicles; stationary circular saws (machines); stators (parts of machines); steam boilers (parts of machines); steam boilers for steam generating (parts of machines); steam cleaners (machines); steam engine boilers; steam engines; steam engines, other than for land vehicles; steam guns for smoothing garments and fabrics; steam hammers (machines); steam oil separators; steam operated power generators; steam riveting machines; steam traps; steam turbines (other than for land vehicles); steam/oil separators; steamrollers; steel hoists; steel rule dies for cutting patterns in textiles; steel rule dies for use with vacuum compression apparatus; steel sprag rails (parts of machines); steering linkages for machines; stencil cutters (machines) other than for office use; stencils for use with stencil cutting machines (other than for office use); step-up gears for machines; step-up gears for vehicles (other than land vehicles); stereotype machines; stern drives for ships; stitching machines; stone crushers (machines); stone graders (machines); stone hammers (machines); stone screening apparatus (machines); stone working machines; stop valves (parts of machines); stop valves of metal (parts of machines); stop valves of plastic (parts of machines); storage systems (mechanically, pneumatically or electrically operated); straight edge tools

(electrically operated); strainers (electric); strainers (machines); strapping machines; straw (chaff) cutters; straw bale spreaders (machines); straw mills (machines); street cleaning machines; street cleaning vehicles (machines); street sweeping machines; street sweeping vehicles (machines); stretch-wrapping machines for applying plastic film to palletised loads; stringing machines for rackets; strip coiling machines for transformer coils; strip conveyors; strip material feed apparatus (machines); strip material feed apparatus (parts of machines); strip material winding apparatus (machines); strip uncoiling machines; strippers (machines) for removing by abrasion; strippers (machines) for removing by cutting; stripping machines for cathodes; stripping machines for starting sheets; stropping machines; stuffing boxes (parts of machines); submersible electric motors (other than for land vehicles); submersible electric pumps; submersible pumps; subsoilers (machines); suction apparatus for industrial purposes; suction apparatus for industrial purposes for the removal of liquid; suction apparatus for industrial use in the removal of dust; suction cleaning machines (vacuum cleaners); suction cleaning machines for use in manufacture; suction conveyor apparatus; suction conveyor installations; suction conveyors; suction cups for milking machines; suction fans for the carrying of grain; suction fans for the compression of grain; suction fans for the sucking of grain; suction machines for industrial purposes; suction machines for scavenging purposes; suction turbines (other than for land vehicles); suction valves for air compressors; suction valves for gas compressors; sugar making machines; sump pumps; sumps being parts of vehicle gearboxes (other than land vehicle); superchargers; superconductive magnetic separators; superheaters; supervision (control) apparatus (mechanical); support frames for adjusting ramming apparatus; supporting devices for machines; supporting elements for conveyors; supporting elements for machines; supports being parts of machines; supports being parts of motors; supports for rolling bearings; surface grinding machines; surface treatment machines; suspension ball joints (parts of machines); swaging machines; swamp bulldozers; swamp dozer shovels; sweepers (machines) for use with swimming pools; sweeping machines; sweeping machines for use in swimming pools; swimming pool cleaning apparatus; swimming pool cleaning machines; table rollers (machines); tables for machines; tacheometric generators; tachogenerators; tachometer generators; tackers (machines); tambours for embroidery machines; tamping rollers (machines); tamping rollers (parts of machines); tap ratchets (machines); tap wrenches (machines); tape readers for use with embroidery machines; tape stretching apparatus; tape stretching machines; taper shank bits (parts of machines); taping (tying) machines (other than for office use); tappets for engines; tapping centres (machines); tapping machines; tapping valves for metallurgical purposes; taps (parts of machines, engines or

motors); taps being mechanically operated tools; taps being parts of engines; taps being parts of machines; taps being parts of motors; tarring machines; tattooing machines; tea leaf pickers (machines); teat cups (suction cups) for milking machines; teat cups for milking machines; tedding machines; temperature control valves (parts of machines); tempering machines; tension ratchets (machines); tensioners (machines); tensioning heads being parts of machines; tensioning pieces being parts of machines; textile milling machines; textile washing machines; thermal binding machines (other than for office use); thermal contact gluing machines (other than for office use); thermal contact welding machines; thermal diffusion apparatus; thermal document binding machines (other than for office use); thermal engines; thermal impulse welding machines; thermal label printing machines (other than for office use); thermal spray diffusers (machines); thermal spray guns (machines); thermal transfer machines; thermic lances (machines); thermic torches (machines); thermoforming machines; thermographic machines; thermostatic control valves for machines; thermovalves; thrashing machines; thread modulators being thread shaping apparatus; threaders (machines); threading machines; threshing machines; throttle valves; thrust journal bearings; thrusters (marine propulsion apparatus); ticket cancelling (punching) machines; tighteners (machines); tile cutters (electric); tile cutters (machines); tillers (machines); tillers (machines) for towing behind vehicles; tilling implements for agricultural use; tilling machines; tilt hammers; timing belt pulleys; timing belt tensioners; timing belts (parts of machines); timing belts for engines; timing belts for land vehicles; timing belts for vehicle engines; timing chains for automobile engines; timing chains for automobiles; timing chains for engines; timing chains for land vehicles; timing chains for vehicle engines; tin openers, electric; tin snips (machines); tips for cutters (parts of machines); tips for tool bits (parts of machines); tobacco processing machines; tolerance rings; tool bits for boring (parts of machines); tool bits for cutting (parts of machines); tool bits for drilling (parts of machines); tool bits for machines; tool bits for use in power operated hand tools; tool changers for use with machine tools; tool cutting machines; tool holders (parts of machines); tool holders for high-pressure water tools; tool holders for machine tools; tool holders for machines; tool setting apparatus (machines); tool setting apparatus (parts of machines); tool storage containers (fitted); tooling presses (machines); toolmaking machines; tools (machines) for brushing; tools (parts of machines); tools driven by compressed air; tools for electric discharge machines; tools for electric drills; tools for electric screwdrivers; tools for machine tools; tools for machines; tools for mining machines; tools for use in metalworking machines; tools for use with machine tools; tools operated by compressed air; toothed gear transmissions, other than for land vehicles; top loading devices (machines); torque

converters for machines; torque converters other than for land vehicles; torque spanners (machines); torque wrenches (machines); torsion bars for machines; torsion dampers for machines; towable agricultural machines; towable spraying apparatus; towable spraying apparatus for agricultural use; track mounted crushers; tractor loaders; transfer (handling) apparatus; transfer conveying apparatus; transfer modules (handling apparatus); transfer rollers for die transporting machines; transferring machines; transmission apparatus (other than for land vehicles); transmission apparatus for machines; transmission belts for industrial applications; transmission chains other than for land vehicles; transmission control mechanisms; transmission devices for machines; transmission gears for machines; transmission mechanisms, other than for land vehicles; transmission members, other than for land vehicles; transmission shafts (other than for land vehicles); transmission shafts for air vehicles; transmission shafts for machines; transmission shafts for water vehicles; transmissions for air vehicles; transmissions for machines; transmissions for water vehicles; transmissions, other than for land vehicles; transport conveyors for moulds in foundries; transport machines; transportation robots; transporters (conveyors); transporting apparatus (conveying machines); transporting apparatus for printing plates; transporting machines; traps for dust; traps for liquids; trash compacting machines; travelling platforms; travelling rollers (conveying apparatus); tray handling machines; tree branch cutters (machines); tree branch pruners (machines); tree pruners (machines); trenchers (excavators); trenchers (machines); trenching machines; trimmers (electric) for shearing animals; trimming machines; trough conveyors (machines); troughs being parts of machines; truck cranes; truck lifts; trueing machines; trussing apparatus for hay; tube cleaning machines; tube conveyors, hydraulic; tube conveyors, pneumatic; tube cutting instruments (machines); tube cutting machines; tube insertion machines for industrial use; tube reamers (machine tools); tube reamers (machines); tube reamers (parts of machines); tube reamers (tools for machines); tubes being fitted parts of machines; tumble driers; tumble dryers; tumbler gears, other than for land vehicles; tumblers (driers); tumblers (dryers); tungsten carbide machine tools; tunnel boring machines; tunnelling machines; turbine blades for power generation; turbine blades treated with alloys; turbine electricity generating machines; turbine shafts (parts of machines); turbine vanes being parts of gas turbine engines; turbine vanes, other than parts of land vehicle engines; turbines for power generation; turbines other than for land vehicles; turbo-superchargers for engines; turbo-superchargers for land vehicle engines; turbo-superchargers for vehicle engines; turbochargers; turbochargers for vehicle engines; turbocompressors; turf removing ploughs; turning machines; turnip cutters (machines); turnip cutting machines; turntables

(machines); turret lathes; turrets (parts of machines); turrets with radially extending machine tools; twist drills for machines; twisting frames being textile machines; two-disc fertiliser spreaders; tympan (parts of printing presses); type-setting machines (photocomposition); type-setting machines (printing); typecasting machines; typographic machines; typographic presses; tyre inflating machines (garage installations); tyre inflation apparatus (garage installations); tyre mounting machines; tyre presses adapted for curing tyres; tyre pressing machines; tyre removers (machines); tyre trimming machines; tyre vulcanising machines; ultrasonic baths; ultrasonic cleaning apparatus; ultrasonic de-greasing machines; ultrasonic washing machines; ultrasonic welding heads; ultrasonic welding machines; uncoiling machines for sheet metal; undercutters (machines); uninterruptible power supplies (machines); uninterruptible power supply generating machines; universal joints (cardan joints); universal load transfer units; unmanned transportation conveyors; unmanned transportation conveyors being cargo handling machines; unwinding machines; upward continuous casting machines; v-belts; v-belts pulleys (parts of engines); v-belts pulleys (parts of machines); vacuum accumulators for internal combustion engines; vacuum cleaner attachments for disseminating perfumes and disinfectants; vacuum cleaner bags; vacuum cleaner bags of card; vacuum cleaner bags of cardboard; vacuum cleaner bags of paper; vacuum cleaner hoses; vacuum cleaners; vacuum cleaners for cars; vacuum cleaners for industrial purposes; vacuum cleaning implements (electric); vacuum cleaning machines for use in households; vacuum control valves (parts of engines); vacuum control valves (parts of machines); vacuum control valves (parts of motors); vacuum conveying apparatus; vacuum filters being parts of machines; vacuum generators; vacuum operated apparatus for industrial purposes; vacuum packaging machines; vacuum packing machines; vacuum pump installations; vacuum pumps (machines); vacuum shearing machines; valve actuators; valve assemblies of metal (parts of machines); valve bodies of metal (parts of machines); valve closure mechanisms; valve diaphragms; valve grinding tools (machines); valve grinding tools (parts for machines); valve locks; valve operators (motors); valve rotators (motors); valve seat rings; valves (mechanical) for regulating fluid flow; valves (parts of machines); valves for compressors; valves for engines; valves for lubricating installations; valves for measuring fluid flow; valves for turbocharged apparatus; valves for use in wellhead apparatus; valves of metal (electrically operated); valves of metal (parts of machines); valves of metal for industrial installations (parts of machines); valves of metal for piping (parts of machines); valves operated automatically by hydraulic control; valves operated automatically by pneumatic control; valves operated by changes in pressure; variable speed drives for machines; variable speed transmissions (other than for land

vehicles); varnishing machines; vegetable choppers (machines); vegetable corers (machines); vegetable cutting machines; vegetable dryers (machines); vegetable peelers (machines); vegetable shredders (machines); vegetable slicers (machines); vegetable washers (machines); vehicle conveyors; vehicle lifts; vehicle mounted lifting apparatus; vehicle mounted road sweepers; vehicle parking apparatus; vehicle parking carousels; vehicle positioning apparatus; vehicle trolley jacks (machines); vehicle washing installations; vehicle washing machines; venting apparatus (parts for tumble driers); venting devices being parts of fluid handling apparatus; venturi scrubbers; vertical bucket conveyors; vibrating compactors (machines); vibrating conveyors; vibrating crushers; vibrating feeders being parts of machines; vibrating machines; vibrating poker; vibrating screens being parts of machines; vibrating separators (machines); vibration channels for compacting; vibration channels for conveying; vibration channels for riddling; vibration channels for scattering; vibration channels for sifting; vibration conveyors for industrial use; vibration generating apparatus (other than for laboratory use); vibration isolators (parts of machines); vibration machines for compacting surfaces; vibration motors; vibrators (machines) for industrial use; vibratory feeders (machines); vibratory feeders (parts of machines); vibratory finishing machines; vibratory levelling machines; vibratory machine mounts; volumetric rotating gear pumps; vulcanisation apparatus; waggon lifts; walk behind trenchers (machines); wallpaper steamers; wallpaper stripping machines; warp yarn machines; washer-dryers; washing and/or drying machines; washing apparatus; washing apparatus for sewage treatment plants; washing drums (machines); washing installations for vehicles; washing machines; washing machines (laundry); washing machines for crockery; washing machines for kitchen bowls; washing machines for laundry; washing machines for pans; washing machines for pots; washing machines for utensils; washing machines incorporating drying facilities; washing machines incorporating tumble driers; waste baling presses (machines); waste compacting machines; waste compaction apparatus (machines); waste converters (machines); waste disposal apparatus; waste disposal machines; waste disposal machines for household use; waste disposal units; waste disposals; waste disposers (machines); waste energy utilising installations; waste extraction machines; waste gas conduits (parts of machines); waste gas return valves (parts of machines); waste heat recovery machines; water and coolant concentrate proportioning pumps; water collecting apparatus; water discharging apparatus; water distributing apparatus (machines); water distribution machines; water extracting machines; water extraction machines; water filtering machines; water filtration machines; water heaters (parts of machines); water heating apparatus (parts of machines); water processing machines; water pumps for aerating aquaria; water

pumps for aerating ponds; water pumps for showers; water pumps for vehicles; water removal apparatus (pumps); water separators; water supply machines (pumps); water swivels (hydraulic couplings); water-separators; wear plates for industrial apparatus; wear plates for machines; wear segments for crushers; weaving looms; weaving machines; web dryers (machines); web fed rotary printing machines; web guiding apparatus; web handling machines; web positioners (machines); web separation devices (machines); web slitting machines; web stabilizers (machines); weeding machines; weft mixing apparatus; weft straighteners (machines); weft straightening machines; weft yarn machines; welding apparatus for tig welding (gas-operated); welding apparatus operated by compressed air; welding apparatus operated by gas; welding apparatus operated by oxyacetylene; welding apparatus, electric (machines); welding apparatus, gas-operated; welding machines for thermoplastic tubes; welding machines for use in the jewellery trade; welding machines for welding plastics material; welding machines, electric; welding torches (gas-operated); wet and dry vacuum cleaners; wet screens; wet vacuum cleaners; wet wheel abrasive cutters (machines); wheel hubs being parts of machines; wheels being machine tools; wheels being parts of machines; whisks (electric machines) for industrial purposes; whisks, electric, for household purposes; whitewashing machines; winches; winches incorporating a lock; winching machines; wind turbines; winding machines; windlasses; window glass washing machines; wine presses; winnowers; wire chain belts for machines; wire cut electric discharge machine tools for cutting by electric discharge; wire cut machines; wire cutters (machines); wire drawing dies being parts of machines; wire feeding apparatus; wire making machines; wire mesh cutters (machines); wire pulling grips (machines); wire stitching machines; wire straightening machines; wire stripping machines for removing the covering from electric cables; wire welding machines; wood grippers (machines); wood grippers (parts of machines); wood signs (mechanical); woodturning lathes; woodworking machines; wool presses; work clamps for machine tools; work feeding machines; work handling apparatus (machines); work holding apparatus (machines); work holding apparatus (parts of machines); work holding apparatus (vices), parts of machines; work platforms (machines); work processing machines for the cutting of metals; work processing machines for the drilling of metals; work processing machines for the milling of metals; work processing machines for the turning of metals; work stations (machines) for finishing; work stations (machines) for masking; work stations (machines) for plating; work stations (machines) for positioning; work stations (machines) for punching; work stations (machines) for soldering; work stations (machines) for stamping; working platforms (machines); worm gear manual hoists; worm gear reduction units; worm gears for machines; worm wheels for machines; wrapping machines;

wrenches (machines); wringers (machines); wringing machines; wringing machines for laundry; wringing machines incorporating rollers; xy positioning tables (machines); yarn tension control devices (parts of machines).

al centrifugal drying machines; industrial centrifuges; industrial cleaning apparatus for cleaning boilers; industrial cleaning apparatus for cleaning condensers; industrial cleaning apparatus for cleaning coolers; industrial cleaning apparatus for cleaning evaporators; industrial cleaning apparatus for cleaning exchangers; industrial cleaning apparatus for cleaning pipes; industrial cleaning machines; industrial cleaning machines (polishers); industrial cleaning machines (shampooers); industrial cleaning machines (vacuum cleaners); industrial cleaning machines utilising pressure jets; industrial control apparatus (hydraulic); industrial control apparatus (pneumatic); industrial conveyors; industrial cutting machines; industrial degreasing machines; industrial drills (machines); industrial dry-cleaning machines; industrial floor cleaning (polishing) machines; industrial floor cleaning machines; industrial floor cleaning machines (vacuum cleaners); industrial food mixers (machines); industrial hammers (machines); industrial high frequency drying machines; industrial honing machines; industrial mixing machines; industrial pneumatic tools; industrial process controllers (hydraulic); industrial process controllers (pneumatic); industrial robots for use in manufacture; industrial sewing machines; industrial soldering machines (gas operated); industrial squeezers; industrial tin openers; industrial vacuum machines for cleaning; industrial vacuum machines for use in manufacture; industrial washing machines; inert gas generators (machines); injection moulding machines; injection moulding mandrils; injection moulds; injection presses; injection presses for plastics materials; injection stretch blow moulding machines; injectors; injectors for engines; injectors for machines; ink circulating apparatus; ink dispensing apparatus (parts of machines); ink jet printing machines; ink stirrers; inked ribbons for printing machines; inking apparatus for printing machines; inlet installations for gas turbines; inlet relief valves for turbocharged apparatus; inlet systems for gas turbines; insecticide sprayers (hand-held tools, electric); insecticide sprayers (machines); insecticide vaporizers (machines); inspection port holes for machines; installations and apparatus for coal washing and separating; instruments (machines) for cleaning the exterior of vehicles; instruments (machines) for cleaning the interior of vehicles; instruments (machines) for washing the exterior of vehicles; instruments (machines) for washing the interior of vehicles; instruments (mechanisms) for the automation of machining operations; insulated metal pipelines (parts of machines, engines or motors); insulated metal pipes (parts of machines, engines or motors); insulated metal tubing (parts of machines, engines or motors); intaglio printing machines; intercoolers for

turbochargers; interlinking systems for connecting production machines; internal combustion engines (other than for land vehicles); internal combustion motors (other than for land vehicles); involute splines (parts of machines); ironing machines; ironing machines for clothing; ironing machines for textile articles; ironing presses (ironing machines); jacks (machines); jacquard controlled knitting machines; jacquard controls; jacquard looms; jarring machines; jaw crushers (machines); jaw type rock crushers; jaw type shaft couplings (other than for land vehicles; jet engines other than for land vehicles; jet pumps for vacuum generation; jet stream devices for cleaning surfaces; jet stream devices for preserving surfaces; jets being parts of machines; jigs for holding a component during machining; jigs for locating a component during machining; jigsaw blades (parts for machines); jigsaws (machines); joggers (machines); joining machines; jointers being woodworking machines; jointing machines; joints (parts of engines); journal boxes (parts of machines); journals (parts of machines); juice extracting machines; juice extractors, electric; kebab making machines (other than cooking); kerb laying machines; kerb making machines; key cutting machines; key duplicating apparatus; keyhole saws (machines); kick starters for motorcycles; kitchen machines, electric; kitchen tools (electric utensils); kneaders (electric kitchen machines); kneading machines; knife blades for electric knives; knife cleaning machines; knife grinding machines; knife polishing machines; knife sharpeners (electric); knife sharpening machines; knitting bobbins (parts of machines); knitting machines; knives (parts of machines); knives for mowing machines; knives, electric; label applicators (other than for office use); label dispensing machines (other than for office use); label making machines (other than for office use); labellers (machines); labelling machines (other than for office use); lace making machines; lacing machines; laminating machines other than for office use; lamination coating machines other than for office use; laminators (machines) other than for office use; land clearance apparatus (machines); land reclamation apparatus (machines); laser applied machining devices; laser processing machines; laser welded machine tools; lasts for shoes (parts of machines); lateral connection machines; lathes (machine tools); lathes (machines); lathes being metal working machines; laundry decontamination machines for removing fibres from garments; laundry decontamination machines for removing particles from garments; laundry folding machines; laundry presses; laundry washing machines; lawn aerators (machines); lawn clippers (machines); lawn cutting machines; lawn edge trimmers (machines); lawn mowing attachments for vehicles; lawn rakes (machines); lawn raking machines; lawn rolling implements for attachment to land vehicles; lawn rolling machines; lawn sweepers (machines); lawn treatment apparatus (machines); lawn trimming machines; lawn weeding machines; lawnmowers (machines); laying

machines for use in building; laying machines for use in public works; lead frame arranging machines for electronic circuits; lead frame transporting machines for electronic circuits; leaf collecting machines; leather belts (dynamo); leather belts for conveyors; leather paring machines; leather-working machines; lens manufacturing machines; letterpresses (printing machines); level regulating valves (parts of machines); levellers (machines); levelling apparatus (machines); lift belts; lift chains being parts of machines; lift installations; lift shaft apparatus; lift shaft machines; lift tables; lifting apparatus; lifting apparatus for containers; lifting apparatus for incorporation into vehicles; lifting apparatus for incorporation onto trailers; lifting apparatus for use with cranes; lifting attachments for land vehicles; lifting beams; lifting devices for boats; lifting gear for handling loads; lifting jacks (other than hand-operated); lifting machines for handling loads; lifting machines for transporting bulk materials; lifting platforms; lifting ramps; lifting tables; lifting tackle (machines); lifting tongs for cranes; lifts (other than ski-lifts); lifts for use in lifting vehicles; lifts for use in stairways; lifts for use with vehicles; line marking machines; linear actuators (mechanical); linear drives; linear driving apparatus; linear motors, other than for land vehicles; linear transfer machines; liners for hammer mills; linings for brakes (parts of machines); link chains for driving purposes (other than for land vehicles); linking devices (parts of machines); linking mechanisms (parts of machines); lint removers; liquefiers (machines); liquid aerators (apparatus); liquid aerators (machines); liquid blenders (machines); liquid detergent feeders; liquid dispensing machines for dispensing pre-measured amounts; liquid dosage machines for dispensing pre-measured amounts; liquid filtering apparatus (parts of engines or machines); liquid manure sliders (machines); liquid waste removal apparatus; liquid waste removal machines; liquidisers (kitchen machines); liquidisers (machines); lithographic printing apparatus; lithographic printing machines; lithographic printing plates; live-roller conveying installations; live-roller conveyors (machines); live-rollers (machines); load carrying (lifting) apparatus; load carrying (lifting) machines; load handling apparatus; loader buckets for excavators; loaders (conveyors); loaders (machines); loaders for agricultural machines; loaders for packing goods; loading (lifting) apparatus being parts of vehicles; loading (lifting) apparatus for use on boats; loading (lifting) apparatus for use on trucks; loading (lifting) apparatus for use on vehicles; loading (lifting) apparatus for use on wagons; loading apparatus (other than fork-lift trucks); loading arms (lifting apparatus); loading cranes; loading devices adapted for use with transport apparatus; loading devices adapted for use with vehicles; loading machines; loading platforms for vehicles; loading ramps; lockable valves (parts of machines); log splitters (machines); longitudinal cutters (machines); longitudinal cutters for plastics materials; loom shafts; looms; looms

(machines); lopping shears (machines); lubricant atomising apparatus (hand-operated); lubricant atomising apparatus (machines); lubricant atomising apparatus (parts of machines); lubricating apparatus (machines); lubricating apparatus (machines) for motor vehicles; lubricating apparatus (parts of machines); lubricating assemblies (machines); lubricating assemblies (parts of machines); lubricating guns (hand-operated); lubricating guns (machines); lubricating installations (machines); lubricating installations (parts of machines); lubricating pumps; lubrication machines; lubrication pumps; lubricators (parts of machines); lubricators for high speed spindles; macerating machines; machine belting; machine belts; machine boiler scale collectors; machine boiler scale collectors; machine cages; machine centres; machine cocks; machine coupling components (except for land vehicles); machine couplings (other than pipe); machine fly-wheels; machine guides (parts of machines); machine knives; machine motors; machine mowers; machine operated glue dispensers; machine plasma arc torches; machine pumps; machine stands; machine tool couplings; machine tool holders; machine tool simulators; machine tools; machine tools for agricultural use; machine tools for applying paint to surfaces; machine tools for boring; machine tools for breaking ice; machine tools for breaking up earth; machine tools for breaking up road surface material; machine tools for chiselling; machine tools for cutting; machine tools for deburring; machine tools for dispensing lubricants; machine tools for dressing; machine tools for drilling; machine tools for finishing; machine tools for fitting floor covering material; machine tools for fixing fasteners; machine tools for gluing; machine tools for greasing motor vehicles; machine tools for grinding; machine tools for horticultural use; machine tools for laying floor covering material; machine tools for machining metallic items; machine tools for milling; machine tools for moulding synthetic resins; machine tools for oiling motor vehicles; machine tools for parting; machine tools for pipe working; machine tools for polishing; machine tools for processing plastics material; machine tools for reaming; machine tools for sale in kit form; machine tools for sawing; machine tools for setting anchors; machine tools for shaping; machine tools for slotting; machine tools for spark-eroding; machine tools for tapping; machine tools for threading; machine tools for tube working; machine tools for use in binding bags; machine tools for use in binding cables; machine tools for use in binding hoses; machine tools for use in connection with pipes; machine tools for use in packaging; machine tools for use in the maintenance of electric installations; machine tools for use in the maintenance of motor vehicles; machine tools for use in the production of engines for vehicles; machine tools for use in the production of vehicles; machine tools for use in the repair of electric installations; machine tools for use in the repair of motor vehicles; machine tools for woodworking machines;

machine tools for working composite materials; machine tools for working metals; machine tools for working valve bodies; machine tools for working valve seats; machine tools incorporating automatic controls; machine tools incorporating semi-automatic controls; machine transmission components (except for land vehicles); machine wheels; machine wheelwork; machines; machines adapted for use with printing machines; machines and apparatus for carpet shampooing (electric); machines and apparatus for cleaning (electric); machines and apparatus for polishing (electric); machines and apparatus for wax-polishing (electric); machines for agitating fluids; machines for agricultural use; machines for airing clothes; machines for aligning (sorting) articles; machines for applying glaze; machines for applying hot melt adhesives; machines for applying labels to containers or bottles; machines for automatically depositing articles in a store; machines for automatically retrieving articles from a store; machines for bending; machines for bleaching fabrics; machines for blending fluids; machines for blowing packaging containers; machines for boosting fluids; machines for boxing of goods; machines for building; machines for burnishing; machines for carpet cleaning; machines for carpet cleaning (vacuuming); machines for carton-making; machines for carving positives of sockets; machines for changing tyres; machines for clarifying used coolant fluids; machines for clarifying used fluids; machines for cleaning (polishing) shoes; machines for cleaning (vacuuming) carpets; machines for cleaning carpets; machines for cleaning cutlery; machines for cleaning ditches; machines for cleaning eggs; machines for cleaning floors by scrubbing; machines for cleaning floors by suction; machines for cleaning pipelines; machines for cleaning waterways; machines for closing cartons; machines for coating; machines for coiling cables; machines for coiling hoses; machines for coiling ropes; machines for coiling twines; machines for coiling wires; machines for cold forming of products; machines for collecting balls; machines for collecting earth; machines for collecting rock; machines for compressed air lubrication; machines for compressing garbage; machines for constituting dyestuff composition; machines for construction purposes; machines for continuous moulding of concrete; machines for controlling mechanical operations; machines for conveying; machines for conveying articles; machines for crushing; machines for cutting (mechanical); machines for cutting cardboard; machines for cutting dress patterns; machines for cutting fabrics; machines for cutting foods; machines for cutting grass; machines for cutting meat; machines for cutting paper; machines for cutting strip material; machines for cutting surface minerals; machines for damping; machines for de-mineralizing water; machines for depositing sheet material in stacks; machines for desizing; machines for disintegrating materials; machines for dispensing adhesives (industrial); machines for dispensing cables; machines

for dispensing drinks (other than vending); machines for dispensing foods (other than vending); machines for dispensing frozen beverages (other than vending); machines for dispensing hoses; machines for dispensing liquids (other than vending); machines for dispensing metered amounts of mixed component materials; machines for dispensing metered amounts of single component materials; machines for dispensing twines; machines for dispensing wires; machines for distributing particulate materials; machines for domestic use in the processing of foodstuffs; machines for drawing rods; machines for drilling; machines for drilling wells; machines for dry lamination; machines for drying; machines for drying clothes; machines for dyeing; machines for encapsulating products; machines for erecting cartons; machines for erecting packing boxes; machines for excavating earth; machines for excavating rock; machines for extruding; machines for feeding materials; machines for filling bottles; machines for filling cartons; machines for filling containers; machines for filling containers with products; machines for filling interconnected plastic bags; machines for filling packages; machines for filling packaging containers; machines for finishing; machines for finishing leather; machines for finishing skins; machines for finishing textiles; machines for flange facing; machines for flash smelting of concentrates; machines for folding; machines for folding articles of clothing for packing; machines for folding textile articles; machines for food preparation (electric); machines for forming bundles; machines for forming cartons; machines for forming concrete panels; machines for forming concrete profiles; machines for forming containers; machines for forming metal work pieces; machines for forming plastic enclosures; machines for forming pouches; machines for forming trays; machines for forming trelliswork; machines for generating power; machines for glass working; machines for grading earth; machines for grading rock; machines for grinding (electric); machines for grinding spectacle lenses; machines for handling containers; machines for handling foodstuffs (electric); machines for handling materials; machines for handling nuclear fuels; machines for handling paper; machines for handling paper board sheets; machines for handling pipes; machines for handling radioactive materials; machines for handling sheets; machines for handling tubes; machines for hardening pipes; machines for hardening tubes; machines for harvesting; machines for hoisting; machines for household purposes (electric kitchen); machines for inflating balloons; machines for injecting meat; machines for injection moulding of plastics materials; machines for inserting aerosol valves; machines for inserting objects into balloons; machines for joining plastic components; machines for kinescope aluminizing; machines for laminating sheet material; machines for laying mulches upon the ground; machines for laying plastic film upon the ground; machines for laying plastic sheets upon the

ground; machines for lifting; machines for lifting for use in mines; machines for lifting vehicles; machines for loading; machines for loading machines; machines for macerating (electric kitchen); machines for macerating (electric); machines for machining knives; machines for machining metal alloys; machines for machining metals; machines for machining operations; machines for machining strip steel; machines for maintaining roads; machines for making aerated beverages (electric); machines for making automotive water pumps; machines for making bags; machines for making cardboard; machines for making cigarettes (industrial); machines for making conveyor belts; machines for making electric terminals; machines for making ice cream (electric mixers); machines for making juice (electric); machines for making packaging; machines for making packing material; machines for making paper; machines for making paper products; machines for making photographic prints; machines for making plastics tapes; machines for making radiators; machines for making sacks; machines for making spun fleece; machines for making tools; machines for making tube blanks; machines for making waves; machines for making wood material boards; machines for manufacture of horological apparatus; machines for manufacturing abrasive materials; machines for manufacturing air filter elements; machines for manufacturing air suction devices; machines for manufacturing chains; machines for manufacturing confectionery; machines for manufacturing containers; machines for manufacturing cotton candy; machines for manufacturing dovetail joints; machines for manufacturing filters; machines for manufacturing foodstuffs; machines for manufacturing frozen confectionery; machines for manufacturing furniture; machines for manufacturing gloves; machines for manufacturing hoses for air transport; machines for manufacturing integrated circuits; machines for manufacturing joints; machines for manufacturing packaging materials; machines for manufacturing pipes; machines for manufacturing polymeric materials; machines for manufacturing sacks; machines for manufacturing semi-conductors; machines for manufacturing stirrups used in buildings; machines for manufacturing stirrups used in concrete manufacture; machines for manufacturing textile products; machines for manufacturing textiles; machines for manufacturing tubes; machines for manufacturing windows; machines for manufacturing windows frames; machines for marking; machines for marking by hot stamping; machines for marking by impact; machines for marking by rolling; machines for materials handling; machines for mechanical handling; machines for metal forming; machines for metal processing; machines for metal working; machines for mineral processing; machines for mixing asphalt; machines for mixing foodstuffs; machines for moulding; machines for mounting tyres; machines for multiple axis motion; machines for operating gates (pneumatic or hydraulic); machines for

operating turnstiles (pneumatic or hydraulic); machines for operating underwater; machines for packaging; machines for packaging cartridges; machines for packaging tape cassettes; machines for painting; machines for pallet stretch wrapping; machines for paper web catching; machines for pasting wall coverings; machines for peeling vegetables; machines for performing repetitive tasks; machines for post press apparatus; machines for preparing beverages (electric, kitchen); machines for preparing beverages (industrial); machines for preparing foam concrete; machines for preparing food (electric, kitchen); machines for preparing food (industrial); machines for pressure forming plastic films; machines for pressure forming plastic sheets; machines for pressure washing; machines for printing labels; machines for printing on metal sheets; machines for printing textile materials; machines for processing foods; machines for processing foodstuffs; machines for processing glass; machines for processing plastics; machines for processing printing plates; machines for processing rails; machines for processing raw fibrous materials; machines for processing wooden materials; machines for producing bags; machines for producing carbon fibres; machines for producing coextruded plastic films; machines for producing containers; machines for producing drinking vessels; machines for producing machine tools; machines for producing materials in sheet form; machines for producing materials in strip form; machines for producing materials in web form; machines for producing memory plastic sockets; machines for producing packaging container blanks; machines for producing sockets from positives; machines for punching (other than office use); machines for purifying compost; machines for raking; machines for recycling; machines for recycling plastics material; machines for reeling in windings; machines for removing earth; machines for removing paint; machines for removing rock; machines for removing surface coatings; machines for resistance welding (gas operated); machines for riveting; machines for road maintenance; machines for routing; machines for sanding floors; machines for scarifying earth; machines for scarifying rock; machines for scouring; machines for scraping earth; machines for scraping rock; machines for sealing bags after filling; machines for sealing containers; machines for sealing packaging containers; machines for separating bags from strips; machines for shaping; machines for shaping lenses; machines for shaping metal; machines for shaping windings; machines for sharpening (electric, kitchen); machines for sharpening (industrial); machines for shredding agricultural waste; machines for shredding horticultural waste; machines for shredding paper based materials; machines for shredding scrap; machines for sieving (electric, kitchen); machines for sieving (industrial); machines for slicing food (electric, kitchen); machines for slicing food (industrial); machines for soil working; machines for sowing; machines for splitting bags;

machines for sprinkling particulate materials; machines for stamping prices on merchandise; machines for stirring; machines for storing chilled confectionery; machines for straightening bars; machines for straightening pipes; machines for straightening pipes and cutting them to length; machines for straightening tubes; machines for straightening wire; machines for stretching plastics tapes; machines for stripping paint; machines for stripping wall coverings; machines for subdividing products; machines for surface coating; machines for surface finishing; machines for surface laying; machines for surface removing; machines for tapping threads; machines for the application of fluids; machines for the assembly of motor vehicle bodies; machines for the assembly of semiconductor components; machines for the assembly of work pieces; machines for the assembly of work pieces made of metal; machines for the binding of books (industrial); machines for the binding of pamphlets (industrial); machines for the building industry; machines for the centrifugal separation of fluids (industrial); machines for the chemical treatment of fabrics; machines for the chopping of timber; machines for the compacting of waste; machines for the construction industry; machines for the conveying (lifting) of goods; machines for the cutting of logs; machines for the cutting of rolls of paper sheet; machines for the cutting of sheet material; machines for the decoration of ceramics; machines for the decoration of glassware; machines for the demolition industry; machines for the digestion of wastes; machines for the dosing of liquid; machines for the dosing of solid plastics; machines for the extrusion of plastics; machines for the fabrication of print products; machines for the filtering of airborne asbestos particulates; machines for the folding of documents (industrial); machines for the food industry; machines for the handling of materials; machines for the making of bags; machines for the making of glassware; machines for the making of hay; machines for the making of pottery; machines for the manipulation of printed products; machines for the manufacture of artificial limb joints; machines for the manufacture of artificial limbs; machines for the manufacture of blinds; machines for the manufacture of electric components; machines for the manufacture of electronic components; machines for the manufacture of land vehicles; machines for the manufacture of magnetic recording carriers; machines for the manufacture of moulded parts; machines for the manufacture of moulds; machines for the manufacture of packaging; machines for the manufacture of packing; machines for the manufacture of paper; machines for the manufacture of plastic articles; machines for the manufacture of plastic packaging articles; machines for the manufacture of printed circuit boards; machines for the manufacture of printed electric circuits; machines for the manufacture of sachets; machines for the manufacture of springs; machines for the manufacture of textiles; machines for the manufacture of tubes; machines for the

mechanical handling of articles; machines for the mechanical handling of drinking vessels; machines for the mechanical handling of goods; machines for the mechanical handling of items of post (industrial); machines for the mechanical handling of materials; machines for the mechanical handling of packages; machines for the mixing of materials (electric, kitchen); machines for the mixing of materials (industrial); machines for the paper making industry; machines for the preparation of carbonated beverages (electric, kitchen); machines for the preparation of carbonated beverages (industrial); machines for the preparation of fodder; machines for the preparation of fodder mats; machines for the preparation of foodstuffs (electric, kitchen), other than cooking; machines for the preparation of foodstuffs (industrial); machines for the preparation of plastics; machines for the preparation of printing plates; machines for the pressing of fodder plants; machines for the pressing of plastics materials; machines for the processing of materials; machines for the processing of rubbish; machines for the production of blown films; machines for the production of bundles of sheet metal; machines for the production of cast films; machines for the production of cheese slices; machines for the production of electronic instruments; machines for the production of optical apparatus; machines for the production of optical lenses; machines for the production of paper; machines for the production of semiconductors; machines for the production of tools for the packaging industry; machines for the recovery of steam; machines for the renovation of conduits; machines for the renovation of ducting for sewers; machines for the renovation of pipes; machines for the renovation of tubes; machines for the repair of vehicles; machines for the servicing of vehicles (mechanical); machines for the stitching of books (industrial); machines for the storage of packaged goods; machines for the textile industry; machines for the thermal treatment of fabrics; machines for the treatment of animal skins; machines for the treatment of articles of leather; machines for the treatment of chemicals; machines for the treatment of concrete; machines for the treatment of hides; machines for the treatment of seeds; machines for the treatment of wet agents; machines for the working of building materials; machines for the working of metals; machines for the wrapping of containers; machines for transmitting (generating) electricity; machines for transporting cables; machines for tray forming; machines for treating plastics materials; machines for turning; machines for tyre changing; machines for use in agriculture; machines for use in assembly; machines for use in biological reactions (industrial); machines for use in building; machines for use in building engines; machines for use in cement works; machines for use in chemical reactions; machines for use in combustion installations; machines for use in engineering; machines for use in filling cartons with food; machines for use in gardening; machines for use in grading; machines for use in grass

cultivation; machines for use in horticulture; machines for use in maintaining grass in good condition; machines for use in making signs; machines for use in making tools; machines for use in mines; machines for use in modular assembly lines; machines for use in opening valves; machines for use in printing works; machines for use in processing meat (not cooking or freezing); machines for use in processing vegetables (not cooking or freezing); machines for use in processing webs; machines for use in shoe production; machines for use in sifting vegetables (electric, kitchen); machines for use in sifting vegetables (industrial); machines for use in the building industry; machines for use in the construction of pipelines; machines for use in the construction of roads; machines for use in the forming of cartons for food; machines for use in the grinding of gears; machines for use in the kitchen (electric); machines for use in the manufacture of electric apparatus; machines for use in the manufacture of electronic instruments; machines for use in the manufacture of electronic parts; machines for use in the manufacture of metal products (not furnaces); machines for use in the manufacture of paper; machines for use in the manufacture of pottery (not kilns); machines for use in the manufacture of spectacle frames; machines for use in the mechanical handling of materials; machines for use in the mounting of slide frames for transparencies; machines for use in the paper industry; machines for use in the preparation of food (not cooking); machines for use in the preparation of lawns; machines for use in the preparation of surfaces; machines for use in the processing of foodstuffs (not cooking or refrigerating); machines for use in the sealing of cartons filled with food; machines for use in tightening; machines for use in wrapping (other than office machines); machines for use with cemented carbide tools; machines for use with diamond tools; machines for vacuum forming fabrics coated with plastic materials; machines for vacuum forming plastic films; machines for vacuum forming plastic sheets; machines for vacuum forming sockets over sculptured positives; machines for washing (electric); machines for washing bottles; machines for washing cages; machines for washing clothing (coin-operated); machines for washing clothing (electric); machines for washing electronic components in chemicals; machines for washing electronic components in solvents; machines for washing fabrics; machines for washing food (electric); machines for washing glassware; machines for washing golf balls; machines for washing laboratory apparatus; machines for washing laundry (coin-operated); machines for washing laundry (electric); machines for washing mechanical components in chemicals; machines for washing mechanical components in solvents; machines for washing metal articles; machines for washing vehicles; machines for water filtering; machines for welding (electric); machines for welding (gas); machines for welding corners on pvc window frames; machines for wet lamination; machines for wetting; machines for

whipping cream (electric, household); machines for whipping cream (industrial); machines for whipping foods (electric, household); machines for whipping foods (industrial); machines for working (other than heating) of metals; machines for working pipes; machines for working stone surfaces; machines for working tubes; machines for wrapping (other than office use); machines in the nature of conveyors; machines incorporating pneumatic apparatus; machines incorporating rotating blades for breaking up soil; machines utilising a punched (encoded) card for the control of a manufacturing process; machines utilising compressed air; machining centres; magnetic brakes for machines; magnetic clamps (parts of machines); magnetic conveyors; magnetic drill stands (parts of machines); magnetic holders for machine tools; magnetic hydrodynamic machines; magnetic positioners (parts of machines); magnetic separators for industrial use in separating magnetic particles from non-magnetic matter; magnetic separators using rare earth materials; magnetic sheet metal separators; magnetic vices (parts of machines); mailing machines {folding inserting and sealing machines}; mandrels (parts of machines); mangles; manhole shaft ring cleaning grippers (machines); manifolds (parts of engines); manifolds (parts of machines); manipulating devices (machines) for industrial use; manipulators (machines) for industrial use; manual chain block hoists; manual chucks for lathes; manual control valves (parts of machines); manually operated valves (parts of machines); marine engines; marine machines; marine motors; marine propulsion units; marine pumps; marking apparatus (machines) for marking cables; marking apparatus (machines) for marking tubes; masonry drills, other than for hand operated tools; material compacting machines; materials handling apparatus; materials handling conveyors; materials handling elevators; materials handling machines; matrices for setting presses; matrices for use in printing; meat choppers (electric machines) for household use; meat choppers (machines); meat cutters (electric machines); meat cutters (electric machines) for household use; meat grinders (electric machines); meat grinders (electric machines) for household use; meat mincers (machines); meat mincing machines (electric machines); meat mincing machines (electric machines) for household use; mechanical abrasive tools; mechanical apparatus for controlling machines; mechanical apparatus for emptying grease containers; mechanical apparatus for the control of machines; mechanical apparatus for the regulation of machines; mechanical apparatus for the removal of scrap created in machines; mechanical arms (lifting); mechanical brushes (electric sweeping machines); mechanical components for programming the cycles of machines; mechanical components for washing machines; mechanical composters; mechanical construction apparatus; mechanical construction machines; mechanical control apparatus (electric); mechanical control apparatus (hydraulic); mechanical control

apparatus (pneumatic); mechanical control apparatus for agricultural machines; mechanical control apparatus for engines; mechanical control apparatus for industrial machines; mechanical control apparatus for machine tools; mechanical control apparatus for machines; mechanical control apparatus for motors; mechanical control apparatus for robots; mechanical control devices; mechanical control devices for compressors; mechanical control devices for heating installations; mechanical control devices for lifting apparatus; mechanical control devices for machine tools; mechanical control devices for machines; mechanical control devices for turbines; mechanical control gear for electric motors; mechanical control gear for valves; mechanical control installations; mechanical control modules; mechanical control operating apparatus; mechanical control valves; mechanical conveying apparatus for feeding synthetics; mechanical conveyors for the timber industry; mechanical egg handling apparatus; mechanical embossing apparatus; mechanical filters for the treatment of water; mechanical gearings (other than for land vehicles); mechanical handling apparatus; mechanical handling apparatus for cargo; mechanical handling apparatus for use with machine tools; mechanical handling devices; mechanical handling installations for storage purposes; mechanical high pressure jet water apparatus; mechanical hose cutters; mechanical hose reels; mechanical instruments (electric) for polishing floors; mechanical instruments (electric) for vacuum cleaning floors; mechanical lifting apparatus; mechanical lifting machines; mechanical loading ramps; mechanical loading skids; mechanical mixers for cement; mechanical mixers for cement slurries; mechanical mixers for concrete; mechanical nibbling tools; mechanical pincers; mechanical power transmitting mechanisms (other than for land vehicles); mechanical presses (electric machines) for kitchen use; mechanical presses (machines) for industrial use; mechanical punching tools (machines); mechanical punching tools (parts of machines); mechanical recovery apparatus; mechanical reeling apparatus for unwinding metal bands; mechanical reeling apparatus for winding metal bands onto reels; mechanical reeling apparatus for winding tapes onto reels; mechanical reels; mechanical reels for flexible hoses; mechanical regulators being parts of mixture preparation devices; mechanical remote control installations; mechanical remote control operating apparatus (non-electric); mechanical rope reels; mechanical saws (machines); mechanical shears (machines); mechanical shovels (machines); mechanical speed drives for electric motors; mechanical spray exaction machines for cleaning textile surfaces; mechanical stamping tools (machines); mechanical stamping tools (parts for machines); mechanical switches (non-electric); mechanical tools; mechanical transmission machines; mechanical transmissions (other than for land vehicles); mechanical washing appliances; mechanical winders; mechanical winding apparatus; mechanical

wringing apparatus for mops; mechanically driven agricultural appliances; mechanically driven post sharpeners; mechanically operated hand tools; mechanically operated knives; mechanically operated punching tools; mechanically operated tools; mechanically operated waste disposal apparatus; mechanically powered apparatus for agriculture; mechanically powered apparatus for forestry; mechanically powered apparatus for gardening; mechanised golf course sand rakes; mechanisms (electric) for use in adjusting the position of racking; mechanisms (electric) for use in adjusting the position of shelving; mechanisms for automatically releasing specified amounts of oil; mechanisms for controlling fluid level (other than in valves); mechanisms for conveying foodstuffs; mechanisms for use in indexing systems; mechanisms for use in positioning systems (non-electric, parts of machines); mechanized livestock feeders; metal t pieces for pipes (parts of engines); metal t pieces for pipes (parts of machines); metal blanking machines; metal branching pipes (parts of engines); metal branching pipes (parts of machines); metal cutters (machines); metal cutting centres (machines); metal cutting tools (gas-operated); metal cutting tools (machines); metal cutting tools (parts of machines); metal drawing machines; metal finishing apparatus (machines); metal finishing plant (machines); metal forming machines; metal forming presses; metal high pressure hoses (parts of machines, engines or motors); metal hoses for use in hydraulic systems in machines; metal joints for pipes (parts of engines); metal joints for pipes (parts of machines); metal joints for tubes (parts of engines); metal joints for tubes (parts of machines); metal loading ramps (machines); metal loading ramps (structures); metal machining centres; metal pipe fittings (parts of engines); metal pipes (parts of engines); metal plate processors (machines); metal processing machines; metal reservoirs (parts of machines); metal safety valves (parts of machines); metal scouring apparatus (machines); metal scouring installations; metal stamping presses; metal tubes (parts of engines); metal tubes (parts of machines); metal welding apparatus (gas); metal welding machines (electric); metal welding machines (gas); metallic flexible pipes (parts of engines); metallic flexible pipes (parts of machines); metallic tools (machine) for use in completion of subterranean wells; metallic tools (machine) for use in drilling of subterranean wells; metallising flame spraying apparatus; metallurgical ladles; metalworking apparatus; metalworking machines; metering rolls; micro adjustable machine tools; microprocessor controlled machines; milk centrifuges (machines); milk claws (machines or parts of machines); milking machines; milling cutters being parts of machine tools; milling machines; milling tools (machines); milling tools (parts for machines); mills (machines); mills for household purposes (other than hand-operated); millstones; mincers (electric) for household use; mincers (electric) for industrial use; mincing machines (electric) for household use;

mincing machines (electric) for industrial use; mine borers; mine hoists; mine working machines; mineral comminution machines; mineral concentrating tables; mineral cutter picks (machines); mineral processing apparatus (machines); mineral water making machines; mineworking machines; mini excavators; miniature power tools; miniature power tools being parts of sets; mining glands; mining machines; mining shovels (machines); minting presses (machines); mist blowing machines; mixers (machines); mixers for furnace repair materials; mixers for oven repair materials; mixing apparatus (powered machines); mixing machines; mobile aerial work platforms (electric); mobile aerial work platforms (hydraulic); mobile baggage conveyors; mobile electric power generators; mobile elevating work platforms; mobile machines adapted to operate automatically; mobile machines adapted to operate by remote control; mobile machines for quarrying; mobile platforms (electric); mobile platforms (hydraulic); mobile platforms (lifting); mobile stairs (motorised); mobile vehicle lifting apparatus; modular conveyors; modular couplings for machine tools; modular sign panels (mechanical); modular tools (machines); modular tools for machines; molding machines; molds (parts of machines); mortising machines; motor air compressor units for blast-chilling apparatus; motor air compressor units for freezing apparatus; motor control apparatus (mechanical); motor control centres (mechanical); motor control instruments (mechanical); motor control protection apparatus (mechanical); motor cultivators; motor drive apparatus for industrial purposes; motor drive mechanisms (other than for land vehicles); motor drive units (other than for land vehicles); motor driven apparatus for hoisting (not transport); motor driven apparatus for lifting (not transport); motor driven display platforms; motor driven lawn mowers; motor driven saws; motor driven screwdrivers; motor driven tools; motor driven windlasses; motor graders (machines); motor hoes (machines); motor operated driving apparatus, other than for land vehicles; motor powered liquid pumps; motor pumps; motor speed regulators; motor speed variators; motorised fans for machines; motorised gears, other than for land vehicles; motorised operating rods for blinds; motorised operating rods for curtains; motorised operating rods for doors; motorised operating rods for roller shutters; motorised operating rods for windows; motorised pumps; motorised valves; motorised work platforms for hoisting purposes; motorised work platforms for lifting purposes; motorized cultivators; motors for aeronautical purposes; motors for boats; motors for locomotion by water; motors for machines; motors for tractors used other than for transportation purposes; motors for use in the automatic operation of awnings; motors for use in the automatic operation of rolling shutters; motors for use in the automatic operation of window shutters; motors for use with pumps; motors incorporating permanent magnets, other than for land vehicles); motors

incorporating turbines, other than for land vehicles); motors, electric, other than for land vehicles; motors, other than for land vehicles; mould withholding devices; moulded component parts of machines; moulded components for machine tools; moulding dies (parts of machines); moulding machines; moulds (parts of machines); moulds for die-casting (parts of machines); moulds for forging metal products (parts of machines); moulds for injection moulding tools; moulds for moulding plastics products (parts of machines); mounted bearings (parts of machines); mounted forage harvesters (machines); mounting devices for crane forks; mounting devices for grippers (machines); mounting machines; mounting plates for machines; movable cranes; movable elevator conveyors; movable vibrating conveyors; movable worm conveyors; moving belt conveyors; moving coil servomotors; moving cranes; moving pavement (sidewalks); moving pavements (walkways); moving staircases (escalators); moving stairways (escalators); moving walkways; mowing and reaping machines; mowing buckets (machines or parts of machines); mowing machines (electric); mowing machines (petrol); muck spreaders (machines); mud catchers and collectors (machines); mud motors; mufflers (parts of exhaust systems); mufflers (parts of machines); mufflers for motors and engines; multi-spindle automatic screw machines; multiple function electric screwdrivers; multiple nut runner motors; multiple shell grippers (machines); multiple spindle heads for use in boring; multiple spindle heads for use in drilling; nailing machines; needle pistols (machines); net haulers (machines); net hauling machines (fishing); nibblers (machines); nippers (machines); non-electric couplers (parts of machines); non-electric coupling devices for engines; non-electric coupling devices for machines; non-electric coupling devices for motors; non-electric coupling rings (parts of engines, other than land vehicles); non-electric coupling rings (parts of machines); non-electric coupling sleeves (parts of engines, other than for land vehicles); non-electric coupling sleeves (parts of machines); non-electric couplings for farm machines; non-metallic hoses for use in hydraulic systems in machines; non-metallic pre-insulated bonded pipes (parts of machines); non-metallic reservoirs (parts of machines); non-metallic spools (parts of machines); non-metallic spools (parts of sewing machines); non-return flaps of metal (parts of machines); non-return valves of metal (parts of machines); non-return valves of plastic (parts of machines); non-woven belts being parts of machines for use in abrading; non-woven discs being parts of machines for use in cleaning; non-woven rollers being parts of machines for use in polishing; non-woven wheels being parts of machines for use in scouring; notchers (machine tools); notching machines; numerically controlled drilling machines; numerically controlled machine tools; numerically controlled machines; numerically controlled turning machines; numerically positioned machines; nut drivers (machines); nut spinners

(machines); nut splitters (machines); nut-tapping machines; off-line assembly modules; offset damper cleaners; offset presses; offset printers; offset printing apparatus; oil drilling rigs; oil drilling tools; oil filtering apparatus for engines; oil filtering apparatus for motors; oil filters for engine lubrication systems; oil filters for engines; oil pressure pumps; oil purification machines for power stations; oil refining machines; oil separators (machines); oil spill cleaning apparatus; oil vapour filters (parts of machines or engines); oleodynamic components; oleodynamic controls; one axis contouring machines; one-sided end profiling machines; operating (control) cables for machines; operating (control) cables for motors; operating apparatus for vacuum pumps; operating machines for the automatic cutting of fabrics; orange squeezing machines (electric); orbital sanders (machines); orbital sanding machines; ore separators (machines); ore treating machines; outboard engines for boats; outboard motors; overdrive units, other than for land vehicles; overhead conveyors; overhead cranes; overload couplings (parts of machines); pack assembling machines; pack dispensing machines; pack emptying machines; pack opening machines; packaging apparatus (machines); packaging machines; packaging machines for sealing bags; packaging machines for wrapping; packaging tools (machines); packing installations; packing machines; padding presses (machines); paint marking machines; paint mixing machines; paint sifting machines; paint spray guns; paint sprayers; paint spraying apparatus; paint striping machines; paint stripping apparatus (machines); painters' tools (machines); painting machines; pallet changing devices for machine tools; pallet loading belts; pallet stabilisation machines; pallet stretch wrapping machines; pallet transferring machines; palletisation machines; palletisers; palletising apparatus; palletising machines; pan conveyors; pantograph controlled machines for engraving; pantograph controlled machines for sign making; paper bags for vacuum cleaners; paper converting machines; paper cutters (machines) for industrial use; paper feed apparatus for use with machines (other than office use); paper feeders (printing); paper feeders for use with printing machines; paper feeding apparatus for use with machines (other than office use); paper feeding machines (other than office use); paper filters (parts of engines); paper filters (parts of machines); paper guiding apparatus (parts of machines), other than for office use; paper handling devices (machines), other than for office use; paper handling devices (parts of machines), other than for office use; paper handling machines, other than for office use; paper machines; paper mill machines; paper presses (machines), other than for office use; paper receiving apparatus (machines), other than for office use; paper receiving apparatus (parts of machines), other than for office use; paper shredders (machines), other than for office use; paper shredding machines, other than for office use; paper stacking devices (machines); paper

transporters (machines), not for office use; papermaking machines; paring machines; parquet wax-polishers, electric; parts of engines; parts of machines; parts of motors; passenger elevators for buildings; passenger lifts; pasta cutters (machines); paste working machines; pattern rolling machines; patterning mechanisms (machines), other than for office use; pavement cutting power grinders; pavement cutting power groovers; pavement cutting power saws; pavement machines; pavement profilers (machines); pedal drives for sewing machines; pedestal drilling machines; peelers (electric machines); peeling machines; pepper mills other than hand-operated; percussion hammers (machines); percussion tool bits for machines; perforated drums being parts of machines for sorting materials; perforated plates being parts of machines for sorting materials; perforated screens being parts of machines for sorting of materials; perforating machines, other than for office use; permanent chucks (parts of machines); petrol injection apparatus; petrol injection instruments; photocomposing machines; photoengraving machines; phototypesetting machines; pick and place machines; piece holders for polishing machines; piercing machines; piercing tools for machine presses; piezoelectric components; pile drivers (machines); pile preparing devices (machines); pile raising devices (machines); pilotless cleaning vehicles; pinions (other than for land vehicles); pinning machines; pipe bending apparatus (machines); pipe bending machines; pipe bends of metal (parts of machines); pipe driving appliances (machines); pipe induction bending machines; pipe jacking machines; pipe laying apparatus; pipe laying machines; pipe sections of metal (fitted parts of engines); pipe sections of metal (fitted parts of machines); pipe-laying machines; pipeline pigs {machines for traversing and cleaning pipelines}; pipes (fitted parts of machines); piston pins; piston rings; piston rings; piston rings for heat pumps; piston rods; piston segments; pistons; pistons (parts of machines or engines); pistons for compressors; pistons for cylinders; pistons for engines; pistons for internal combustion engines; pistons for land vehicle engines; pistons for machines; pistons for vehicle engines; pivoting bucket conveyors; pivoting bucket elevators; plain journal bearings; plain thrust bearings; plaiting machines; planers (machines); planes (machines); planetary gear transmissions, other than for land vehicles; planing machines; planing tools (machines); planing tools (parts of machines); planting machines; plants being combinations of machines; plasma cutting machines; plasma spraying apparatus; plasma spraying machines; plasma welding apparatus (gas-operated); plasma welding machines; plastics injection forming machines; plastics moulding machines; plastics pipes (fitted parts of machines); plastics processing machines; plastics welding machines; plastics working machines; plate shearing machines; platemaking machines; platen printing machines; platform lifts; platform truck lifts; pleating machines; plough

shares; ploughs; ploughs being agricultural machines; ploughshares; plug cocks (parts of machines); plunger pistons; plunger type valves for use with tanks; plungers (machines); pneumatic actuating apparatus; pneumatic actuators for control of shut off valves; pneumatic actuators for control valves; pneumatic air tools; pneumatic apparatus for controlling pressure levels in machines; pneumatic apparatus for maintaining atmospheric environments; pneumatic breaking tools (machines); pneumatic coil and strap nailing machines; pneumatic coil and strap nailing tools (powered); pneumatic compressors; pneumatic concrete breakers; pneumatic control apparatus; pneumatic control apparatus for agricultural machines; pneumatic control apparatus for engines; pneumatic control apparatus for industrial automation; pneumatic control apparatus for industrial machines; pneumatic control apparatus for machine tools; pneumatic control apparatus for machines; pneumatic control apparatus for motors; pneumatic control apparatus for robots; pneumatic control apparatus for vehicle engines; pneumatic control devices; pneumatic control devices for compressors; pneumatic control devices for heating installations; pneumatic control devices for lifting apparatus; pneumatic control devices for machine tools; pneumatic control devices for machines; pneumatic control devices for turbines; pneumatic control gear for electric motors; pneumatic control gear for valves; pneumatic control machines; pneumatic control modules; pneumatic control operating apparatus; pneumatic control valves; pneumatic controls for automatically operating valves; pneumatic controls for machines, motors and engines; pneumatic conveying pumps; pneumatic cylinders; pneumatic distributors; pneumatic door openers and closers (parts of machines); pneumatic drills; pneumatic fuel injectors for engines; pneumatic fuel injectors for motors; pneumatic hammers; pneumatic inflators; pneumatic jacks (air or exhaust filled bags for lifting); pneumatic jacks (machines); pneumatic jacks for operating machine tools; pneumatic jacks for operating machines; pneumatic lifting apparatus (machines); pneumatic machines; pneumatic machines for conveying bulk materials; pneumatic picks; pneumatic pincers (machines); pneumatic pipeline conveyors; pneumatic power tools; pneumatic pumps; pneumatic servoactuators; pneumatic tools; pneumatic tools (machines); pneumatic tools for nailing (machines); pneumatic tools for peening (machines); pneumatic tools for rust removing (machines); pneumatic tools for scale removing (machines); pneumatic tools for scraping (machines); pneumatic tools for stapling (machines); pneumatic tools for surface cleaning (machines); pneumatic tools for tacking (machines); pneumatic transporters; pneumatic tube conveyors; pneumatically driven machines; pneumatically driven presses; pneumatically operable valves; pneumatically operated apparatus for de-icing aircraft wings; pneumatically operated lifting jacks (machines);

pneumatically operated power tools; pneumatically operated silos for the drying of grains; pneumatically operated silos for the mechanical handling of grains; pneumatically operated silos for the storage of grains; polishers (machines); polishing buffs (parts of machines); polishing discs (parts of machines); polishing discs for use with electric floor polishers; portable air tools; portable drill stands (machines); portable drill stands for electric drills; portable drilling machines (electric); portable drilling machines (hand-operated); portable electric blenders (electric); portable electric drills; portable electric food mixers; portable electric grinders; portable electric mixers; portable electric power tools; portable filtration units (machines); portable gas blow pipes; portable gas cutting tools; portable machines for fastening purposes; portable power operated machine tools; portable power supply generating apparatus; portable pump installations for gases (other than for medical use); portable pump installations for liquids (other than for medical use); portable steam engines for agricultural (other than transport) use; portable steam engines for horticultural (other than transport) use; portable upholstery cleaners utilising a vacuum; portable upholstery cleaning (washing) machines; portable vacuum cleaners (electric); portal cranes; positioning apparatus for setting presses; positioning tables being parts for machines; potato diggers (machines); potato diggers for towing behind tractors; potato digging apparatus (machines); potato graders (machines); potato lifters (machines); potato lifters for towing behind tractors; potato mashers (electric machines); potato peelers (electric machines); potato sorters (machines); potters' wheels; poultry hatchers; poultry incubators; powder applying apparatus for printing machines; powder handling apparatus (machines); powder processing machines; power activated hand-held tools; power blowers for the exhaustion of dust; power chucks (parts of machines); power drive trains for use in cooling towers; power driven augers (machines); power driven augers (parts of machines); power driven embossing dies; power driven hand tools; power driven hedge shears; power driven pipe notching machines; power driven punching dies; power filters (machines); power filters for water purification (machines); power generating apparatus; power generators for vehicles; power hammers; power installations (generators); power operated clearing saws; power operated cross-cutting saws; power operated cutters; power operated cutting machines; power operated cutting tools; power operated drilling tools; power operated excavating machines; power operated flexible jacks; power operated hammers; power operated hand held tools; power operated hand tools; power operated hedge trimmers; power operated hydraulic lifting apparatus; power operated jacks; power operated lawn edging tools; power operated screwdrivers; power operated sprayers for liquids; power operated sprayers for paints; power operated staplers (other than for stationery use); power operated

tools; power operated tools for assembling; power operated tools for boring; power operated tools for crimping; power operated tools for cutting; power operated tools for drilling; power operated tools for edging; power operated tools for industrial purposes; power operated tools for punching; power operated tools for reaming; power operated tools for releasing threaded fasteners; power operated tools for tightening threaded fasteners; power operated tools for use in agriculture; power operated tools for use in building; power operated tools for use in decorating; power operated tools for use in electricity supply; power operated tools for use in horticulture; power operated tools for use in metal working; power operated tools for use in plumbing; power operated tools for use in pottery; power operated tools for use in vehicle maintenance; power operated tools for use in woodworking; power operated valves; power operated valves being parts of machines; power operated weeders; power saws; power scythes; power shift transmissions (other than for land vehicles); power shovels; power sources (generators); power supply apparatus (generators); power supply devices (generators); power supply units (generators); power take-off shafts (other than for land vehicles); power take-off shafts for aircraft; power take-off shafts for sea craft; power take-off shafts for water vehicles; power take-off transmission units (other than for land vehicles); power take-off transmission units for aircraft; power take-off transmission units for machines; power take-off transmission units for sea craft; power take-off transmission units for water vehicles; power tools; power trains for aircraft; power trains for machines; power trains for mechanical excavators; power trains for sea craft; power trains for vehicles (other than for land vehicles); power trains for water vehicles; power transmission apparatus (other than for land vehicles); power transmission apparatus for air vehicles; power transmission apparatus for aircraft; power transmission apparatus for machines; power transmission apparatus for mechanical excavators; power transmission apparatus for sea craft; power transmission belting for aircraft; power transmission belting for machines; power transmission belting for mechanical excavators; power transmission belting for sea craft; power transmission belts (other than for land vehicles); power transmission belts for agricultural machines; power transmission belts for aircraft; power transmission belts for industrial machines; power transmission belts for machines; power transmission belts for mechanical excavators; power transmission belts for sea craft; power transmission couplings (other than for land vehicles); power transmission couplings for aircraft; power transmission couplings for machines; power transmission couplings for sea craft; power transmission couplings for water vehicles; power transmission mechanisms (other than for land vehicles); power transmission mechanisms for aircraft; power transmission mechanisms for machines; power transmission mechanisms for sea

craft; power transmission mechanisms for water vehicles; power transmission parts (other than for land vehicles); power transmission systems for machine tools; power transmissions (other than for land vehicles); power transmissions for aircraft; power transmissions for machines; power transmissions for sea craft; power transmissions for water vehicles; power trowels (machines); power units (generators); power units for generating electric current; power washers (machines); powered access work platforms; powered floor scrubbers; powered floor sweepers; powered garden trimmers; powered gardening machines; powered hammers; powered lifting apparatus; powered mobile racking; powered mobile shelving; powered polishers for commercial use; powered polishers for household use; powered polishers for industrial use; powered polishers for use in manufacturing processes; powered polishers for use in polishing manufactured components; powered resin mixers; powered tools; pre-insulated bonded metal pipes (fitted parts of machines); precision grinding machines; precision grooving tools (machines); precision grooving tools (parts of machines); precision machine tools; precision machine tools being parts of sets; precision machine tools for cutting materials; precision machine tools for machining materials; precision machines for producing parts for turbojets; precision parting tools (machines); precision parting tools (parts of machines); precision turning tools (machines); precision turning tools (parts of machines); preparatory machines for spinning; press rollers (parts of machines); press tools (parts of machines); presses; presses (machines for industrial purposes); presses (machines); presses for bundling scrap; presses for foodstuffs (machines); presses for industrial purposes (machines); presses for industrial use (machines); presses for moulding food (machines); presses for use in semi-monocoque manufacture (machines); presses for use in the press forming of metal (machines); presses for use in the production of industrial diamonds (machines); pressing machines; pressing machines (to make satin-like); pressing machines for industrial purposes; pressure cleaning machines; pressure control valves being parts of machines; pressure controllers (regulators) being parts of machines; pressure controllers (valves) being parts of machines; pressure intensifiers (machines); pressure multipliers for gases; pressure multipliers for liquids; pressure pipes of metal (parts of machines); pressure pumps; pressure reducer valves (parts of machines); pressure reducers (parts of machines); pressure reducing valves (parts of machines); pressure reducing valves being parts of cryogenic apparatus (machines); pressure regulating apparatus being parts of machines; pressure regulating valves being parts of machines; pressure regulating valves parts of machines; pressure regulators (parts of machines); pressure regulators for lubricating installations; pressure release screws being parts of machines; pressure transformers; pressure vacuum pumps; pressure valves (parts of machines); pressurising machines

for drums; print finishing apparatus; print finishing machines; print shop machines; print trimmers (machine); print trimmers (parts of machine); printed circuit board drilling machines; printed circuit board forming machines; printheads for ink-jet printers; printing apparatus (machines); printing apparatus for recording permanent copy on label tags; printing apparatus for recording permanent copy on substrates; printing apparatus for recording permanent copy on tickets; printing cylinder changing apparatus; printing cylinders; printing frames (parts of machines); printing machines; printing machines (other than for office use); printing machines for bank notes; printing machines for electric duplicating processes; printing machines for electronic duplicating processes; printing machines for fiduciary documents; printing machines for printing on labels; printing machines for printing on packaging; printing machines for printing on product substrates; printing machines for use on sheet metal; printing masks (parts of machines); printing plate makers; printing plates; printing plates; printing plates (not sensitised); printing presses; printing rollers for machines; printing works machines; process control apparatus (hydraulic); process control apparatus (mechanical); process control apparatus (pneumatic); process control instruments (hydraulic); process control instruments (mechanical); process control instruments (pneumatic); process control units (hydraulic); process control units (mechanical); process control units (pneumatic); process controllers (hydraulic); process controllers (mechanical); process controllers (pneumatic); process controlling apparatus (hydraulic); process controlling apparatus (mechanical); process controlling apparatus (pneumatic); processing machines for use in the food industry; production installations comprising linked machine tools; production installations comprising linked machining centres; profiling machines; progressive starters for asynchronous motors; projection speed plates; propeller shafts; propulsion mechanisms other than for land vehicles; protection gas generators; pruning saws (electric); pruning saws (motorised, fuel driven); pruning shears (other than hand operated); puddling machines; pulleys; pulleys (parts of machines); pulleys (parts of motors); pulleys incorporating bearings (parts of machines); pulleys of metal for use with cable (parts of machines); pulleys of metal for use with rope (parts of machines); pulleys of metal incorporating bearings (parts of machines); pulling apparatus (machines) for laying pipes; pulp converting machines; pulping machines; pulsation dampeners; pulverisers (machines); pulverisers (sewage); pulverizing machines; pump casings; pump diaphragms; pump installations; pump shafts; pump-motor assemblies; pumping apparatus (machines); pumping station assemblies; pumping units (machines); pumps (machines); pumps (other than petrol vending pumps, surgical pumps or air pumps for vehicle tyres); pumps (parts of machines, engines or motors); pumps being parts of spin drying machines; pumps being parts of

vacuum cleaners; pumps being parts of washing machines; pumps being parts of wet cleaners; pumps for aerating indoor aquariums; pumps for aerosols; pumps for beer; pumps for changing oil (electric); pumps for concrete; pumps for containers (electric); pumps for delivering pre-determined quantities; pumps for dispensing liquids from containers (electric); pumps for heating installations; pumps for ink feeding (parts of machines); pumps for liquid fuels for use in filling stations (machines, other than self regulating); pumps for liquids (machines, other than self regulating fuel in filling stations); pumps for machines (parts of); pumps for packaging (machines); pumps for recycling water in swimming pools; pumps for the extraction of gases (machines); pumps for the extraction of liquids (machines); pumps for the extraction of vapour (machines); pumps for use in agriculture (machines); pumps for use in horticulture (machines); pumps for use in the food industry (machines); punches (machines), other than for office use; punches for punching machines; punches for use with machine tools; punching machines; punching presses for the final punching of parts; punching presses for the pre-punching of parts; punching tools (electric), other than for office use; punching tools (hand-operated), other than for office use; punching tools (machines), other than for office requisites; punching tools (parts of machines), other than office requisites; quilting machines for use in the manufacture of mattresses; quilting machines for use in the manufacture of upholstery; rabetting planes (machines); rack and pinion jacks; rack hoists; racket stringing machines; racquet stringing machine; radial feeders (machines); radiator caps for cooling radiators for motors and engines; radiator caps for cooling radiators of engines; radiators (cooling) for motors and engines; rail-laying machines; railroad constructing machines; rakes being parts of machines; rakes for raking machines; raking machines; ram air turbines (other than for land vehicles); ramjets (other than for land vehicles); rammers (machines); ramming apparatus (machines) for earth displacement; ramming apparatus (machines) for splitting pipes; ramming apparatus (machines) for splitting sleeves; ramming apparatus (machines) for splitting wedges; ramming apparatus (machines) for the introduction of pipes; ramming apparatus (machines) for underground conduit laying; ramming apparatus (machines) for underground pipe laying; ramps being machines; rams (machines); rapid scouring machines; rasps (machines); ratchet handles (machines); ratchet hoists; ratchet wrenches (machines); ratchets (machines); reamers (machine tools); reamers (parts of machines); reapers; reapers and binders; reapers and threshers; rebound crushers; reciprocating feeders (machines); reciprocating feeders (parts of machines); recycling crushing units (machines); recycling machines; reducing gears (parts of machines); reducing gears, other than for land vehicles; reduction gears other than for land vehicles; reeling apparatus, mechanical; reels (parts of machines); reels for weaving

looms; reels, mechanical, for flexible hoses; reflow solder apparatus; refrigerant compressors for cooling installations; refrigerant compressors for heating installations; refrigeration compressors; refrigeration condensers; refuse compacting machines; refuse crushing machines; refuse cutting machines; refuse handling apparatus; refuse pressing machines; refuse processing apparatus; regrinding mills (machines) for producing plastic pellets; regulating valves (parts of machines); regulators (parts of machines); regulators (valves) being parts of machines; regulators for engines; regulators for machines; regulators for motors; regulators for use in welding machines; release devices for pipe layers being parts of hoist apparatus; remote control devices (cables) for machine; remote control devices (cables) for use with electric machine; remote control devices (cables) for use with remotely controlled electric machine; remotely controlled handling devices; remotely controlled lifting machines; remotely controlled manipulating machines; reproducing (duplicating) machines, other than for office use; reproduction machines for printing (other than for office use); reserve electric power supply apparatus (generators); restructure valves (parts of machines); return valves for waste gas decontamination; reversible flow filters (parts of machines); rhinestone setting machines; ribbon lap machines; rice planting machines; ride-on lawnmowers (machines); rings for bearings; rinsing machines; rivet saws (machines); riveters (machines); riveters (powered tools); riveting hammers (powered tools); riveting machines; road building machines; road making machines; road marking machines; road rollers; road rolling machines; road sweepers (machines); road sweeping attachments for vehicles; road sweeping machines (self propelled); roadway construction machines; roadway paving machines; robot metal working presses; robotic apparatus for handling materials; robotic cleaning (polishing) machines for floors; robotic cleaning (vacuuming) machines for floors; robotic cleaning machines; robotic electric welding machines; robotic handling apparatus; robotic loaders for diffusion furnaces; robotic swimming pool cleaning machines; robots (machines); robots for handling rods; robots for industrial use; robots for machine tools; robots for use in industry; robots for welding; rock bits for drilling machines; rock breaking machines; rock drills (machine tools); rock drills (machines); rock drills (parts of machines); rocker arms (parts of engines); rocker arms (parts of machines); rocker arms (parts of motors); rocket engines for the propulsion of airborne weapons; rocket engines for the propulsion of aircraft; rocket engines for the propulsion of missiles; rocket engines for the propulsion of water craft; rocket motor propulsion apparatus for aircraft; rocket motor propulsion apparatus for boats; rocket motor propulsion apparatus for missiles; rocket motor propulsion apparatus for water craft; rocket motor propulsion apparatus for weapons; rocket nozzles; rocket propulsion engines for aircraft; rocket

propulsion engines for boats; rocket propulsion engines for missiles; rocket propulsion engines for water craft; rocket propulsion engines for weapons; roll forming machines; roll forming tooling (parts of machines); roll forming tools (machines); roller bearings; roller bridges; roller bridges; roller conveying apparatus; roller conveyor apparatus for movement of goods; roller conveyors; roller installations for brake testing; roller tracks for use in belt conveyor apparatus; roller tracks for use in roller conveyor apparatus; roller washing machines for washing print rollers; rollers being components of packaging lines (machines); rollers for bearings; rolling (conveying) machines; rolling bearing cages; rolling gearings (other than for land vehicles); rolling machines; rolling mill cylinders; rolling mill rolls; rolling mills; rolling presses (machines); rolling surfaces (machines) for packages; rolling surfaces (parts of machines) for packages; rolls being parts of machines; rolls for rolling mills; root slicers (machines); rotary actuators; rotary air compressors; rotary brushes (machines); rotary cultivators (machines); rotary cutting installations (machines); rotary dies (machines); rotary dies (parts of machines); rotary drills (machines); rotary drills (parts of machines); rotary gear pumps; rotary hammers (machines); rotary hydraulic motors (other than for land vehicles); rotary index machines; rotary machines for ironing clothes; rotary metal cutting tools (machines); rotary metal cutting tools (parts of machines); rotary milling cutters (machines); rotary milling cutters (parts of machines); rotary nozzles for use with high pressure water washing machines; rotary paper trimming machines, other than for office use; rotary printing machines (other than for office use); rotary printing presses; rotary pumps; rotary sanding machines; rotary shoes (parts of machines); rotary steam presses, portable, for fabric; rotary steam presses, portable, for fabrics; rotary tables for machine tools; rotary tool bits (machines); rotary tool bits (parts of machines); rotary tools (machines); rotary trimming lines; rotary trimming machines; rotating centres (machines); rotating centres (parts of machines); rotating electric machines; rotating screw conveyors; rotavators (machines); rotor arms for size reduction machines; round bale choppers (machines); routers (machines); routers (parts for machines); row fertiliser spreaders (machines); rubber stamps (parts of machines); rubbish compactors (machines); sack filling machines; sack forming machines; sack making machines; sack sealing machines; safety couplings (other than for land vehicles); safety couplings for machines; safety manual hoists; safety valves (parts of machines); salad drainers (kitchen machines); sand blasting machines; sanders (machines); sanding belts for use with machines; sanding disks for use with machines; sanding machines; sanitizing machines; sausage machines; saw benches (parts of machines); saw blades (parts of machines); saw blades for use with power tools; saw chains; saw guide rails (parts of machines); sawing machines; sawing tools for

use with sawing machines; saws (machines); scaling machines; scarifiers (machines); scarifying machines; scarifying machines for garden use; scissors, electric; scouring machines; scouring machines for textiles; scrap processing apparatus (machines); scrap recovery apparatus (machines); scraper apparatus (machines) for removing sludge; screeders (machines); screen printing apparatus (machines); screen printing machines; screening machines; screening rollers (parts of machines); screens being machine parts for use in the screen printing industry; screens for the printing of textile materials (parts of machines); screens used in the paper industry (machines); screens used in the paper industry (parts of machines); screens used in the pulp industry (machines); screens used in the pulp industry (parts of machines); screw air compressors; screw conveyors; screw extractors (machines); screw hoists; screw jacks (machines); screw milling cutters (machines); screw milling cutters (parts of machines); screw pulley blocks (machines); screw pulley blocks (parts of machines); screw pumps; screw separators; screw sprayers being machines; screw threaded cap openers (machines); screw-thread cutters (machines); screwdriver bits for electric screwdrivers; screwdriver bits for machines; scrubbing machines (floor -); scythes (machines); sealing joints (parts of engines); sealing joints (parts of machines); sealing joints (parts of motors); sealing machines for industrial purposes; seaming machines; seated (ride on) lawn mowers; seed drills (machines); seed drills (parts of machines); seedling processing machines; segmental saw blades for machines; self-centring chucks (parts of machines); self-driven machines for drilling; self-driven machines for sawing; self-driven machines for screwing; self-oiling bearings; self-priming centrifugal pumps; self-propelled cranes; self-propelled hydraulic platforms; self-propelled load handling apparatus; self-propelled material handling apparatus; self-propelled mowers; self-propelled road surface dressing vehicles; self-propelled working baskets; self-propelled working platforms; self-regulating pumps (other than for the delivery of fuel at filling stations); selvedge printing machines; semi-automatic case gluing machines; semi-automatic case taping machines; semi-automatic strapping machines; separating cylinders (machines); separating cylinders (parts of machines); separating machines; separation apparatus (other than for laboratory or medical use); separators; separators (machines); separators for liquids; separators for oil; separators for separating solids from liquids; sequin setting machines; servo-control valves; servo-controlled hydraulic pumps; servo-cutters (machines); servo-mechanisms; servomotors (other than for land vehicles); servomotors incorporating encoders; setting presses (machines); settling filters (machines); sewage disposal apparatus (machines); sewage disposal installations; sewage pulverizers; sewage transport machines; sewage treatment apparatus; sewage treatment machines; sewing machine apparatus; sewing machine

installations; sewing machine motors; sewing machines; shaft bearings (parts of machines); shaft couplings (machines); shaft couplings for machines; shaft couplings for use in connection with marine apparatus; shaft couplings for vehicles (other than for land vehicles); shaft hoists for mines; shaft mounted gear units (other than for land vehicles); shaft mounted gear units for land vehicles; shafts for ball bushings; shafts for machines; shaking machines for use in manufacture; shaped covers for electric kitchen machines; shaper cutters (machines); shaping machines (electric); sharpening machines; sharpening wheels (electric machines); sharpening wheels (parts of machines); shaving exhaust installations; sheaf-binding machines; shearing machines for animals; shears (other than hand operated); shears, electric; sheep shearing machines (hand-operated); sheep shearing machines (powered); sheep's foot rollers (machines); sheet fed rotary printing machines; sheet metal flattening machines; sheet metal separators (machines); sheet metal working apparatus; sheet metal working machines; sheet printing machines; sheeting grippers (machines); shock absorber plungers (parts of machines); shock absorbers for machines; shock absorbing cylinders (parts of machines); shock absorbing springs being parts of machine suspension; shock absorbing springs for machines; shoe cleaners (brushes, electric); shoe cleaning brushes (electric); shoe lasts (parts of machines); shoe polishers, electric; shoes for machine brakes; shot blasting machines; shovel loaders (machines); shovels, mechanical; shower pumps; shredder machines for forage; shredders (machines); shredders (machines) for cardboard; shredders (machines) for industrial use; shredders (machines) for paper; shredders (machines) for waste; shredding machines; shredding machines for water closets; shrinking machines; shrinkwrapping apparatus; shutter valves; shuttleless looms; shuttles (parts of machines); side cutters (machines); sidewalk (moving pavement); sieves (machines or parts of machines); sifters; sifting installations; sifting machines; sign makers (machines); silage spreaders (machines); silencers; silencers being parts of exhaust systems; silencers for engines; silencers for motors and engines; single column welding presses; single point cutting tools (machines); single point cutting tools (parts for machines); single seed sowing machines; single sheet diffusion transfer plates (parts of machines); single shouldered beading machines; single spindle drilling machines; single spindle tapping machines; site lifts; size reduction machines for hard materials; size reduction machines for rock; size reduction machines for wood; sizing machines; skid steer loaders; skimmers (machines); skimmers for cleaning swimming pool surfaces; skimming machines; sleeve type linear ball bearings for use in linear movement; slewing gear; slicers (machines, electric); slide bearings; slide rests (parts of machines); slide valves (parts of machines); sliders for knitting machines; slides for knitting machines; sliding splines (parts of machines); sliding splines (parts

of water vehicle gearing); slitting machines for industrial use; slotting machines; slotting tools for machines; sludge cocks (valves) being parts of machines; sludge valves being parts of machines; smoothing presses; snip cutters (machines); snips (machines); snow blowing attachments for vehicles; snow blowing machines; snow blowing vehicles; snow cutting attachments for vehicles; snow cutting vehicles; snow making apparatus; snow making machines; snow moving attachments for vehicles; snow moving vehicles; snow plough blades; snow ploughs; snow removal apparatus (machines); snow removal machines; snow removal tools (machines); socket head cap screw keys (machines); socket head cap screw keys (parts for machines); socket sets (machines); socket spanners (machines); socket wrenches (machines); sockets (machines); sockets (parts for machines); soil grading apparatus (machines); soil grading machines; soil moving apparatus (machines); soil moving machines; soil screening apparatus (machines); soil screening machines; soil sieving apparatus (machines); soil sieving machines; soil spreading apparatus (machines); soil spreading machines; solder paste printing apparatus; soldering apparatus, gas-operated; soldering blow pipes, gas-operated; soldering instruments (gas-operated); soldering irons, gas-operated; soldering machines (gas-operated); sole plates for supporting shaft bearings; solenoid operated valves; sorting apparatus (other than for money); sorting machines for industry; sorting machines, other than for money; sorting slides (parts of industrial sorting machines); sound absorbers (silencers) being parts of exhaust systems for machines; sound absorbers (silencers) being parts of vehicle exhaust systems; sound absorbers being parts of machines; soundproof hoods (parts of machines); sowers (machines); sowing machines; sowing machines for towing behind tractors; soybean reaping cutters (machines); spanners (machines); spark arrestors being parts of machines; spark eroding machines; spark erosion machines; spark plugs; spark plugs for engines; spark plugs for land vehicle engines; spark plugs for vehicle engines; sparking plugs; sparking plugs for internal combustion engines; sparking plugs for the internal combustion engines of vehicles; speed changers; speed controllers (mechanical) for dual carburettor motors; speed controllers (mechanical) for machines, engines and motors; speed governors (mechanical) for machines, engines and motors; speed governors for machines, engines and motors; speed reducers (mechanical) being parts of machines; speed reducers (mechanical) for machines, engines and motors; speed regulators (mechanical) for machines, engines and motors; speed variators (mechanical) being parts of machines; spiked rollers (machines); spiked rollers (machines) for use in soil aeration; spin driers; spin driers (machines); spin dryers; spin dryers (machines); spindle adapter flanges for machine tools; spindle hoists; spindle shafts (parts of engines); spindle shafts (parts of machines); spindle shafts (parts of motors); spindles for machine tools; spine binders

(machines), other than for office use; spine taping machines, other than for office use; spinning frames; spinning machines; spinning preparation machines; spinning wheels; spinning wheels (machines); spiral conveyors (machines); spiral de-watering units (machines); spiral mixing machines; splash guards (parts of machines); splash preventers (parts of machines); spline shank bits (parts of gearing for aircraft); spline shank bits (parts of gearing for water vehicles); spline shank bits (parts of machines); spool adaptors (parts for industrial machine); spool unwinders (machines); spools of metal (parts of machines); spools of metal (parts of sewing machines); spot cleaning machines; spot welding machines; spray fittings (parts of machines); spray guards for machines; spray guns (machines); spray guns for paint; spray guns for paint; spray heads (parts of machines); spray lances being agricultural implements; spray lances being horticultural implements; spray nozzles being parts of machines; spray nozzles for attachment to pressure washing machines; spray prevention flaps for machines; spray prevention guards for machines; spray rollers being agricultural implements; spray rollers being horticultural implements; spray valves (parts of machines); sprayers (machines) for agricultural use in spraying fungicide; sprayers (machines) for agricultural use in spraying herbicide; sprayers (machines) for agricultural use in spraying insecticides; sprayers (machines) for applying artificial sun tanning preparations; sprayers (machines) for garden use in spraying insecticide; sprayers (machines) for garden use in spraying weedkillers; sprayers (machines) for household use in spraying insecticide; sprayers (machines) for household use in spraying weedkillers; sprayers (machines) for use in agriculture; sprayers (machines) for use in horticulture; sprayers (machines), other than for medical use; sprayers affixed to vehicles for spraying crops; sprayers for towing behind vehicles for spraying crops; sprayers for use in agriculture (parts of machines); sprayers for use in horticulture (parts of machines); spraying booms attached to vehicles for the purpose of spraying crops; spraying booms for attachment to vehicles for the purpose of spraying crops; spraying booms for towing behind vehicles for spraying crops; spraying machines; spraying machines for use mounted on tractors; spraying machines for use mounted on trailers; spraying machines in the form of trailers; sprays (machines), other than for medical use; sprays (parts of machines), other than for medical use; spreader beams (machines); spreader beams (parts of machines); spreaders (machines); spreading machines; spring bushes (parts of machines); spring driven reels; spring motors; spring powered machines; springs (parts of machines); springs being parts of machines; sprinkling devices (machines); sprockets for machines; sprockets for water vehicle gearing; sprung guide rails (parts of machines); sprung sheet metal guides (parts of machines); spur gear manual hoists; spur wheel pulley blocks (parts of machines);

spur wheels (parts of machines); square splines (parts of machines); square splines (parts of water vehicle gearing); squaring machines; squeegees (machines); stacker crane arms; stacking machines (other than fork-lift trucks); stacking machines for ingots; stacking machines for slabs; stage loading apparatus; stainless steel pipe fittings (parts of machines); stainless steel tubes (fitted parts of machines); stairlifts; stalk separators (machines); stamping (franking) machines, other than for office use; stamping machines; stamping machines for pressing (shaping) components from sheet materials; stamping machines for pressing out components from sheet materials; stamping machines for printed materials in sheet form; stamping machines, other than for office use; standard shank drills (machines); standard shank drills (parts of machines); stands for lifting; stands for lifting tables; stands for machines; stapling machines (other than for surgical or stationery use); stapling presses (other than for surgical or stationery use); starter motors; starter pinions; starters for motors and engines; starters for stationary engines; starting couplings for air vehicles; starting couplings for machines; starting couplings for water vehicles; stationary circular saws (machines); stators (parts of machines); steam boilers (parts of machines); steam boilers for steam generating (parts of machines); steam cleaners (machines); steam engine boilers; steam engines; steam engines, other than for land vehicles; steam guns for smoothing garments and fabrics; steam hammers (machines); steam oil separators; steam operated power generators; steam riveting machines; steam traps; steam turbines (other than for land vehicles); steam/oil separators; steamrollers; steel hoists; steel rule dies for cutting patterns in textiles; steel rule dies for use with vacuum compression apparatus; steel sprag rails (parts of machines); steering linkages for machines; stencil cutters (machines) other than for office use; stencils for use with stencil cutting machines (other than for office use); step-up gears for machines; step-up gears for vehicles (other than land vehicles); stereotype machines; stern drives for ships; stitching machines; stone crushers (machines); stone graders (machines); stone hammers (machines); stone screening apparatus (machines); stone working machines; stop valves (parts of machines); stop valves of metal (parts of machines); stop valves of plastic (parts of machines); storage systems (mechanically, pneumatically or electrically operated); straight edge tools (electrically operated); strainers (electric); strainers (machines); strapping machines; straw (chaff) cutters; straw bale spreaders (machines); straw mills (machines); street cleaning machines; street cleaning vehicles (machines); street sweeping machines; street sweeping vehicles (machines); stretch-wrapping machines for applying plastic film to palletised loads; stringing machines for rackets; strip coiling machines for transformer coils; strip conveyors; strip material feed apparatus (machines); strip material feed apparatus (parts of machines); strip material winding

apparatus (machines); strip uncoiling machines; strippers (machines) for removing by abrasion; strippers (machines) for removing by cutting; stripping machines for cathodes; stripping machines for starting sheets; stropping machines; stuffing boxes (parts of machines); submersible electric motors (other than for land vehicles); submersible electric pumps; submersible pumps; subsoilers (machines); suction apparatus for industrial purposes; suction apparatus for industrial purposes for the removal of liquid; suction apparatus for industrial use in the removal of dust; suction cleaning machines (vacuum cleaners); suction cleaning machines for use in manufacture; suction conveyor apparatus; suction conveyor installations; suction conveyors; suction cups for milking machines; suction fans for the carrying of grain; suction fans for the compression of grain; suction fans for the sucking of grain; suction machines for industrial purposes; suction machines for scavenging purposes; suction turbines (other than for land vehicles); suction valves for air compressors; suction valves for gas compressors; sugar making machines; sump pumps; sumps being parts of vehicle gearboxes (other than land vehicle); superchargers; superconductive magnetic separators; superheaters; supervision (control) apparatus (mechanical); support frames for adjusting ramming apparatus; supporting devices for machines; supporting elements for conveyors; supporting elements for machines; supports being parts of machines; supports being parts of motors; supports for rolling bearings; surface grinding machines; surface treatment machines; suspension ball joints (parts of machines); swaging machines; swamp bulldozers; swamp dozer shovels; sweepers (machines) for use with swimming pools; sweeping machines; sweeping machines for use in swimming pools; swimming pool cleaning apparatus; swimming pool cleaning machines; table rollers (machines); tables for machines; tacheometric generators; tachogenerators; tachometer generators; tackers (machines); tambours for embroidery machines; tamping rollers (machines); tamping rollers (parts of machines); tap ratchets (machines); tap wrenches (machines); tape readers for use with embroidery machines; tape stretching apparatus; tape stretching machines; taper shank bits (parts of machines); taping (tying) machines (other than for office use); tappets for engines; tapping centres (machines); tapping machines; tapping valves for metallurgical purposes; taps (parts of machines, engines or motors); taps being mechanically operated tools; taps being parts of engines; taps being parts of machines; taps being parts of motors; tarring machines; tattooing machines; tea leaf pickers (machines); teat cups (suction cups) for milking machines; teat cups for milking machines; tedding machines; temperature control valves (parts of machines); tempering machines; tension ratchets (machines); tensioners (machines); tensioning heads being parts of machines; tensioning pieces being parts of machines; textile milling machines; textile washing machines; thermal binding machines

(other than for office use); thermal contact gluing machines (other than for office use); thermal contact welding machines; thermal diffusion apparatus; thermal document binding machines (other than for office use); thermal engines; thermal impulse welding machines; thermal label printing machines (other than for office use); thermal spray diffusers (machines); thermal spray guns (machines); thermal transfer machines; thermic lances (machines); thermic torches (machines); thermoforming machines; thermographic machines; thermostatic control valves for machines; thermovalves; thrashing machines; thread modulators being thread shaping apparatus; threaders (machines); threading machines; threshing machines; throttle valves; thrust journal bearings; thrusters (marine propulsion apparatus); ticket cancelling (punching) machines; tighteners (machines); tile cutters (electric); tile cutters (machines); tillers (machines); tillers (machines) for towing behind vehicles; tilling implements for agricultural use; tilling machines; tilt hammers; timing belt pulleys; timing belt tensioners; timing belts (parts of machines); timing belts for engines; timing belts for land vehicles; timing belts for vehicle engines; timing chains for automobile engines; timing chains for automobiles; timing chains for engines; timing chains for land vehicles; timing chains for vehicle engines; tin openers, electric; tin snips (machines); tips for cutters (parts of machines); tips for tool bits (parts of machines); tobacco processing machines; tolerance rings; tool bits for boring (parts of machines); tool bits for cutting (parts of machines); tool bits for drilling (parts of machines); tool bits for machines; tool bits for use in power operated hand tools; tool changers for use with machine tools; tool cutting machines; tool holders (parts of machines); tool holders for high-pressure water tools; tool holders for machine tools; tool holders for machines; tool setting apparatus (machines); tool setting apparatus (parts of machines); tool storage containers (fitted); tooling presses (machines); toolmaking machines; tools (machines) for brushing; tools (parts of machines); tools driven by compressed air; tools for electric discharge machines; tools for electric drills; tools for electric screwdrivers; tools for machine tools; tools for machines; tools for mining machines; tools for use in metalworking machines; tools for use with machine tools; tools operated by compressed air; toothed gear transmissions, other than for land vehicles; top loading devices (machines); torque converters for machines; torque converters other than for land vehicles; torque spanners (machines); torque wrenches (machines); torsion bars for machines; torsion dampers for machines; towable agricultural machines; towable spraying apparatus; towable spraying apparatus for agricultural use; track mounted crushers; tractor loaders; transfer (handling) apparatus; transfer conveying apparatus; transfer modules (handling apparatus); transfer rollers for die transporting machines; transferring machines; transmission apparatus (other than for land vehicles); transmission apparatus

for machines; transmission belts for industrial applications; transmission chains other than for land vehicles; transmission control mechanisms; transmission devices for machines; transmission gears for machines; transmission mechanisms, other than for land vehicles; transmission members, other than for land vehicles; transmission shafts (other than for land vehicles); transmission shafts for air vehicles; transmission shafts for machines; transmission shafts for water vehicles; transmissions for air vehicles; transmissions for machines; transmissions for water vehicles; transmissions, other than for land vehicles; transport conveyors for moulds in foundries; transport machines; transportation robots; transporters (conveyors); transporting apparatus (conveying machines); transporting apparatus for printing plates; transporting machines; traps for dust; traps for liquids; trash compacting machines; travelling platforms; travelling rollers (conveying apparatus); tray handling machines; tree branch cutters (machines); tree branch pruners (machines); tree pruners (machines); trenchers (excavators); trenchers (machines); trenching machines; trimmers (electric) for shearing animals; trimming machines; trough conveyors (machines); troughs being parts of machines; truck cranes; truck lifts; trueing machines; trussing apparatus for hay; tube cleaning machines; tube conveyors, hydraulic; tube conveyors, pneumatic; tube cutting instruments (machines); tube cutting machines; tube insertion machines for industrial use; tube reamers (machine tools); tube reamers (machines); tube reamers (parts of machines); tube reamers (tools for machines); tubes being fitted parts of machines; tumble driers; tumble dryers; tumbler gears, other than for land vehicles; tumblers (driers); tumblers (dryers); tungsten carbide machine tools; tunnel boring machines; tunnelling machines; turbine blades for power generation; turbine blades treated with alloys; turbine electricity generating machines; turbine shafts (parts of machines); turbine vanes being parts of gas turbine engines; turbine vanes, other than parts of land vehicle engines; turbines for power generation; turbines other than for land vehicles; turbo-superchargers for engines; turbo-superchargers for land vehicle engines; turbo-superchargers for vehicle engines; turbochargers; turbochargers for vehicle engines; turbocompressors; turf removing ploughs; turning machines; turnip cutters (machines); turnip cutting machines; turntables (machines); turret lathes; turrets (parts of machines); turrets with radially extending machine tools; twist drills for machines; twisting frames being textile machines; two-disc fertiliser spreaders; tympan (parts of printing presses); type-setting machines (photocomposition); type-setting machines (printing); typecasting machines; typographic machines; typographic presses; tyre inflating machines (garage installations); tyre inflation apparatus (garage installations); tyre mounting machines; tyre presses adapted for curing tyres; tyre pressing machines; tyre removers

(machines); tyre trimming machines; tyre vulcanising machines; ultrasonic baths; ultrasonic cleaning apparatus; ultrasonic de-greasing machines; ultrasonic washing machines; ultrasonic welding heads; ultrasonic welding machines; uncoiling machines for sheet metal; undercutters (machines); uninterruptible power supplies (machines); uninterruptible power supply generating machines; universal joints (cardan joints); universal load transfer units; unmanned transportation conveyors; unmanned transportation conveyors being cargo handling machines; unwinding machines; upward continuous casting machines; v-belts; v-belts pulleys (parts of engines); v-belts pulleys (parts of machines); vacuum accumulators for internal combustion engines; vacuum cleaner attachments for disseminating perfumes and disinfectants; vacuum cleaner bags; vacuum cleaner bags of card; vacuum cleaner bags of cardboard; vacuum cleaner bags of paper; vacuum cleaner hoses; vacuum cleaners; vacuum cleaners for cars; vacuum cleaners for industrial purposes; vacuum cleaning implements (electric); vacuum cleaning machines for use in households; vacuum control valves (parts of engines); vacuum control valves (parts of machines); vacuum control valves (parts of motors); vacuum conveying apparatus; vacuum filters being parts of machines; vacuum generators; vacuum operated apparatus for industrial purposes; vacuum packaging machines; vacuum packing machines; vacuum pump installations; vacuum pumps (machines); vacuum shearing machines; valve actuators; valve assemblies of metal (parts of machines); valve bodies of metal (parts of machines); valve closure mechanisms; valve diaphragms; valve grinding tools (machines); valve grinding tools (parts for machines); valve locks; valve operators (motors); valve rotators (motors); valve seat rings; valves (mechanical) for regulating fluid flow; valves (parts of machines); valves for compressors; valves for engines; valves for lubricating installations; valves for measuring fluid flow; valves for turbocharged apparatus; valves for use in wellhead apparatus; valves of metal (electrically operated); valves of metal (parts of machines); valves of metal for industrial installations (parts of machines); valves of metal for piping (parts of machines); valves operated automatically by hydraulic control; valves operated automatically by pneumatic control; valves operated by changes in pressure; variable speed drives for machines; variable speed transmissions (other than for land vehicles); varnishing machines; vegetable choppers (machines); vegetable corers (machines); vegetable cutting machines; vegetable dryers (machines); vegetable peelers (machines); vegetable shredders (machines); vegetable slicers (machines); vegetable washers (machines); vehicle conveyors; vehicle lifts; vehicle mounted lifting apparatus; vehicle mounted road sweepers; vehicle parking apparatus; vehicle parking carousels; vehicle positioning apparatus; vehicle trolley jacks (machines); vehicle washing installations; vehicle washing machines; venting apparatus (parts

for tumble driers); venting devices being parts of fluid handling apparatus; venturi scrubbers; vertical bucket conveyors; vibrating compactors (machines); vibrating conveyors; vibrating crushers; vibrating feeders being parts of machines; vibrating machines; vibrating poker; vibrating screens being parts of machines; vibrating separators (machines); vibration channels for compacting; vibration channels for conveying; vibration channels for riddling; vibration channels for scattering; vibration channels for sifting; vibration conveyors for industrial use; vibration generating apparatus (other than for laboratory use); vibration isolators (parts of machines); vibration machines for compacting surfaces; vibration motors; vibrators (machines) for industrial use; vibratory feeders (machines); vibratory feeders (parts of machines); vibratory finishing machines; vibratory levelling machines; vibratory machine mounts; volumetric rotating gear pumps; vulcanisation apparatus; waggon lifts; walk behind trenchers (machines); wallpaper steamers; wallpaper stripping machines; warp yarn machines; washer-dryers; washing and/or drying machines; washing apparatus; washing apparatus for sewage treatment plants; washing drums (machines); washing installations for vehicles; washing machines; washing machines (laundry); washing machines for crockery; washing machines for kitchen bowls; washing machines for laundry; washing machines for pans; washing machines for pots; washing machines for utensils; washing machines incorporating drying facilities; washing machines incorporating tumble driers; waste baling presses (machines); waste compacting machines; waste compaction apparatus (machines); waste converters (machines); waste disposal apparatus; waste disposal machines; waste disposal machines for household use; waste disposal units; waste disposals; waste disposers (machines); waste energy utilising installations; waste extraction machines; waste gas conduits (parts of machines); waste gas return valves (parts of machines); waste heat recovery machines; water and coolant concentrate proportioning pumps; water collecting apparatus; water discharging apparatus; water distributing apparatus (machines); water distribution machines; water extracting machines; water extraction machines; water filtering machines; water filtration machines; water heaters (parts of machines); water heating apparatus (parts of machines); water processing machines; water pumps for aerating aquaria; water pumps for aerating ponds; water pumps for showers; water pumps for vehicles; water removal apparatus (pumps); water separators; water supply machines (pumps); water swivels (hydraulic couplings); water-separators; wear plates for industrial apparatus; wear plates for machines; wear segments for crushers; weaving looms; weaving machines; web dryers (machines); web fed rotary printing machines; web guiding apparatus; web handling machines; web positioners (machines); web separation devices (machines); web slitting machines; web stabilizers (machines);

weeding machines; weft mixing apparatus; weft straighteners (machines); weft straightening machines; weft yarn machines; welding apparatus for tig welding (gas-operated); welding apparatus operated by compressed air; welding apparatus operated by gas; welding apparatus operated by oxyacetylene; welding apparatus, electric (machines); welding apparatus, gas-operated; welding machines for thermoplastic tubes; welding machines for use in the jewellery trade; welding machines for welding plastics material; welding machines, electric; welding torches (gas-operated); wet and dry vacuum cleaners; wet screens; wet vacuum cleaners; wet wheel abrasive cutters (machines); wheel hubs being parts of machines; wheels being machine tools; wheels being parts of machines; whisks (electric machines) for industrial purposes; whisks, electric, for household purposes; whitewashing machines; winches; winches incorporating a lock; winching machines; wind turbines; winding machines; windlasses; window glass washing machines; wine presses; winnowers; wire chain belts for machines; wire cut electric discharge machine tools for cutting by electric discharge; wire cut machines; wire cutters (machines); wire drawing dies being parts of machines; wire feeding apparatus; wire making machines; wire mesh cutters (machines); wire pulling grips (machines); wire stitching machines; wire straightening machines; wire stripping machines for removing the covering from electric cables; wire welding machines; wood grippers (machines); wood grippers (parts of machines); wood signs (mechanical); woodturning lathes; woodworking machines; wool presses; work clamps for machine tools; work feeding machines; work handling apparatus (machines); work holding apparatus (machines); work holding apparatus (parts of machines); work holding apparatus (vices), parts of machines; work platforms (machines); work processing machines for the cutting of metals; work processing machines for the drilling of metals; work processing machines for the milling of metals; work processing machines for the turning of metals; work stations (machines) for finishing; work stations (machines) for masking; work stations (machines) for plating; work stations (machines) for positioning; work stations (machines) for punching; work stations (machines) for soldering; work stations (machines) for stamping; working platforms (machines); worm gear manual hoists; worm gear reduction units; worm gears for machines; worm wheels for machines; wrapping machines; wrenches (machines); wringers (machines); wringing machines; wringing machines for laundry; wringing machines incorporating rollers; xy positioning tables (machines); yarn tension control devices (parts of machines).

BOKE TOOLS MACHINERY PTE LTD

**5026 ANG MO KIO INDUSTRIAL PARK 2, #01-95, SINGAPORE
569529**

T1015108A 16/11/2010 (06)

The Romanian word "Granit" appearing in the mark means "Granite".

Class 06

Locks and padlocks included in Class 6.

HIGH RESERVE MARKETING SDN BHD (106032-T)

NO. 2 & 4 JALAN BK 1/19, KINRARA INDUSTRIAL PARK,
BANDAR KINRARA, 47100 PUCHONG, SELANGOR,
MALAYSIA.

AGENT: W.P. LAI & CO, P.O. BOX 0399 PSA BUILDING POST
OFFICE, SINGAPORE 911144

T1015358J 22/11/2010 (29)

Class 29

Edible seaweed; food products made from seaweeds.

SINHUA HOCK KEE TRADING (S) PTE LTD

463 TAGORE INDUSTRIAL AVENUE, TELI BUILDING,
SINGAPORE 787832

AGENT: TEH YIP WONG & TAN, 34 CRAIG ROAD, #02-01
CHINATOWN PLAZA, SINGAPORE 089673

T1015562A 24/11/2010 (05)

The transliteration of the Chinese characters appearing in the mark is "Guan Jie Bao" which has no meaning.

Class 05

Dietary supplements, dietetic foods adapted for medical purpose.

CHIEN CHI TOW HEALTHCARE PTE LTD

44 BENDEMEER ROAD, #01-1456, SINGAPORE 330044

AGENT: JUBILEE LAW CORPORATION, 63A TRAS STREET,
SINGAPORE 079002

T1015563Z 24/11/2010 (05)

The transliteration of the Chinese characters appearing in the mark is "Gu Bao" which has no meaning.

Class 05

Dietary supplements, dietetic foods adapted for medical purpose.

CHIEN CHI TOW HEALTHCARE PTE LTD

44 BENDEMEER ROAD, #01-1456, SINGAPORE 330044

AGENT: JUBILEE LAW CORPORATION, 63A TRAS STREET,
SINGAPORE 079002

T1015902C 30/11/2010 (11)

Class 11

Apparatus for lighting, heating, steam generating, cooking, refrigerating, drying, ventilating, water supply and sanitary purposes.

SolarMist

UNIVERSAL (FAR EAST) PTE LTD

BLK 1008 TOA PAYOH NORTH, #03-09, SINGAPORE 318996

T1016046C 06/12/2010 (32)

Class 32

Mineral and aerated waters and other non-alcoholic drinks; fruit drinks and fruit juices; carbonated soft drinks; energy drinks; syrups and other preparations for making beverages.

ACUTE FRUIT

THE MONARCH BEVERAGE COMPANY (EUROPE)
LIMITED

ONE SPENCER DOCK, NORTH WALL QUAY, DUBLIN 1,
IRELAND.

AGENT: HSLEGAL LLP, 80 RAFFLES PLACE, #22-23 UOB
PLAZA 2, SINGAPORE 048624

T1016071D 07/12/2010 (31)

Class 31
Live animals.

Absolute Gold

PANG LONG PTE LTD

191 NEO TIEW ROAD, SINGAPORE 719024

T1016072B 07/12/2010 (31)

Class 31
Live animals.

PANG LONG PTE LTD

191 NEO TIEW ROAD, SINGAPORE 719024

Absolute Red

T1016083H 07/12/2010 (33)

The mark consists of a Spanish word meaning "Masonry".

CALICANTO

Class 33

Wines and alcoholic beverages (except beers); all included in Class 33.

VINA EL PRINCIPAL S.A.

AV. LA DEHESA 1201, TORRE NORTE, OF. 707, LO
BARNECHEA-SANTIAGO, CHILE

AGENT: ONE LEGAL LLC, 5 SHENTON WAY, #02-02 UIC
BUILDING, SINGAPORE 068808

T1016137J 08/12/2010 (29)

Class 29

International Registrations filed under the Madrid Protocol Published for Opposition Purposes under the Trade Marks Act (Cap.332, 1999 Ed.)

OPPOSITION

Notice is hereby given that any person who wishes to oppose the registration of any of the marks published in the class groups which follow may within two months from the date of this journal file a Notice of Opposition on Form TM 11 (fee \$340).

Formal opposition should not be filed until after reasonable notice has been given to the Applicant for registration so as to afford him an opportunity of withdrawing his application before the expenses of preparing the Notice of Opposition are incurred. Failure to give such notice will be taken into account in considering any application by an Opponent for an Order for Costs if the opposition is uncontested by the Applicant.

T0905640B (09 11 38 42 45)
(International Registration No. 1000582)

Date of International Registration: 24/11/2008
Date of Protection in Singapore: 24/11/2008

The following claim is made in the International Registration:
Colours claimed: Blue and red. Points: red; word: blue.

By consent of the registered proprietor of TM No T8601107H.

Class 09

Installation equipment for electrical power transmission and distribution, namely distribution cabinets, distribution boxes, distribution housings, distribution boards, small installation distribution devices, meter stations, meter panels, busbars, busbar mounts, phase rails, apparatus mounting rows, mounting panels, connecting terminals, terminal strips, terminal pieces, taps, and trunking systems for cable routing and apparatus installation, namely cable trays, mesh trays, cable ducts, cable cladding, cable mounts, wiring ducts, connecting boxes, appliance built-in sockets, room and vertical columns, all the abovementioned goods included in this class; electrical protective devices, namely circuit breakers, residual current devices and signalling devices, surge arresters, isolating switches, main switches, power switches, safety switch disconnectors, fuse links, fuse holders, fuse rails, motor circuit breakers, plug sockets for industrial applications, encapsulated circuit breakers; electrical, including remote-acting, control and monitoring devices, namely switches, changeover switches, pressure switches, light signalling devices, socket outlets, bells, transformers; metering instruments, smoke, wind, rain, temperature, brightness and motion sensors; electrical/electronic display and monitoring devices for multiple applications; automatic circuit controllers, namely relays, contactors, time switches, switching clocks, programmable switching devices and controllers, load shedding relays, control relays, regulators, dimmers, remote controls, remote-acting switches, remotely controlled circuit breakers, thermostats; electrical installation equipment for the consumer field, namely wall-mounted switches, ceiling-mounted switches (cord-operated switches), dimmer switches, electronic switches, socket outlets including consumer units with integrated switch and/or fuses and/or residual current protection, data line socket outlets, telephone socket outlets, plugs, couplings, connecting boxes, consumer units for the connection of electrical cookers; door intercom and video systems (with and without wires), intruder and fire alarms, smoke and heat signalling devices, transmission devices for telephones, video monitoring appliances, transmitters and receivers as well as cables for the transmission of data, images and audio, electrical/electronic

appliances for automatic control of building installations, switch panels and electrical/electronic appliances for automatic control of applications in the field of renewable energy; electrical/electronic appliances for automatic control of apparatuses for cleaning, hardening, dehardening, degassing, gassing, disinfecting, heating and cooling of water as well as cleaning, disinfecting, dehumidification, humidification, gassing, heating and cooling of air; catalogues stored on data storage devices, planning and calculation software for electrical installation, monitoring and control software for electrical installations; software which is stored in particular on a central server and/or on control interfaces, for display and/or for control, automation and operation of electrical and electronic installations and data processing installations, namely lighting installations, heating devices, air-conditioning installations, ventilation installations, drying installations, protection installations, roller shutters, roller blinds, rollers and sun canopies, installations for power supply management, for consumption indication, installations with audio and video devices or information technology devices, in particular for multiple occupancy dwellings and free standing houses and for commercially used and public buildings; central units in which this software is integrated; control interfaces for the abovementioned devices and installations, namely remote controls, keyboards and screens.

Class 11

Lamp sockets, lamp kits, included in this class; components for cleaning, hardening, dehardening, degassing, gassing, disinfecting, heating and cooling of water and for cleaning, disinfecting, dehumidification, humidification, gassing, heating and cooling of air; all included in this class.

Class 38

Telecommunication, namely services for transmission of messages and images via an Internet page, in particular for remote transmission of information about electrical and/or electronic installations and about data processing installations, namely information about lighting installations, heating devices, air-conditioning installations, ventilation installations, drying installations, protection installations, roller shutters, roller blinds, rollers and sun canopies, installations for power supply management, for consumption indication, installations with audio and video appliances or data processing appliances, in particular for dwellings, houses and multiple occupancy dwellings and for commercially used and public buildings and services for remote indication and for remote control, remote automation, remote control of these installations and devices via a Web page; telecommunication, namely services for transmission of written or spoken messages and of images via Web pages, computer

terminals, telephones, pagers, videophones, remote alarm installations, facsimile machines, in particular for remote monitoring of the state of health of people, for testing appliances and equipment, for aid, for assistance and supply of people, for remote monitoring and for emission of alarm signals by people from dwellings, houses and multiple occupancy dwellings and for commercially used and public buildings.

Class 42

Technical consultancy, in particular for the design of electrical devices and installations, in particular power supply installations and for the inspection and checking of said devices and installations.

Class 45

Security services for protection and for monitoring of people in their dwelling, of buildings, of goods, of appliances and of equipment for aid, assistance and supply for or of people; operation of an alarm and intervention centre (security services).
