REGISTRATION AS ACCOUNT HOLDER TO E-FILE AND PAY BY GIRO**

This Practice Direction is issued by the Registrar under Rule 78B(1) of the Trade Marks Rules, to specify the procedure for applying to the Registrar to be registered as an account holder.

This Practice Direction will come into effect on 1 January 2006.

Any person who wishes to use eTrademarks to effect a transaction and make payment by GIRO must register with the Intellectual Property Office of Singapore (IPOS) as an Account Holder. Approval is at the sole discretion of IPOS. Upon approval, an eTrademarks account will be created in the name of the person and the person will receive a User ID and Password.

To register, access IPOS address at <http://www.ipos.gov.sg> and [download the eTrademarks Account Holder Registration Form](#).

The person may appoint an Administrator to administer and manage his eTrademarks Account through the eTrademarks "[Maintenance of Authorised Representatives](#)" service.

The responsibilities of the Administrator are as follows:

- appointment of one or more Representatives to access eTrademarks and make payment by GIRO on behalf of the Account Holder;
- updating of the particulars of the Representatives; and
- removal of any Representative's rights to access eTrademarks and make payment by GIRO on behalf of the Account Holder.

These responsibilities are to be conducted through the eTrademarks "Maintenance of Authorised Representatives" service.

Please note that all Authorized Representatives must be CPF account holders with SingPass. The Authorized Representatives are required to sign in using their SingPass to ensure security for GIRO deductions for the online transactions. If the person does not have a GIRO account with IPOS, please complete the [GIRO Application Form](#) and submit it to IPOS.

The completed eTrademarks Account Holder Registration Form and GIRO Application Form should be mailed or couriered to the Intellectual Property Office of Singapore with the address 51 Bras Basah Road #04-01 Plaza By The Park Singapore 189554 and attentioned to Mrs Ang-Ong Bee Lian. Application for a series of two marks.

Class 04

Electrical energy; renewable energy, namely, solar energy, wind energy and geothermal energy; electrical energy from solar or wind power; fuel; gas [fuel]; gases for use as fuel; compressed natural gas; fuel gas; fuels; hydrogen fuel; fuels from biological sources; hydrocarbon compositions; hydrocarbon fuels; liquefied gas; liquid fuels; liquefied petroleum; natural gas; non-chemical additives for fuels; petroleum; solidified gases [fuel]; synthetic gas [fuel]; electrical energy, namely energy derived from zero-emission; electrical energy, namely, energy derived from renewal sources; hardened oils [hydrogenated oils for industrial use]; hydrocarbon fuels; hydrocarbon compositions; fuel mixtures; fuel oils; renewable fuels; electrical energy from renewable sources.

Class 09

Computer software; software for the planning, integration and optimization of Smart City applications; big data management software; operating system software and programs; network operating systems programs; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface e-commerce software; computer software applications, downloadable; database management software; computer software platforms, recorded or downloadable; application software; downloadable computer software for remote monitoring and analysis; computer software for use in migrating between different computer network operating systems; artificial intelligence software and apparatus; software for the integration of artificial intelligence and machine learning in the field of Big Data; software applications [apps] for Internet of Things [IoT] enabled devices; artificial intelligence and machine learning software; artificial intelligence software for analysis; predictive maintenance software; interactive software based on artificial intelligence; artificial intelligence software for vehicles and driverless cars; capacitors; embedded operating software; communication software; computer software platforms; Internet of Things [IoT] gateway; computer programs for Internet of Things [IoT] enabled devices; intelligent gateways for real-time data analysis; mobile operating systems; robot operating system [ROS]; environmentally friendly automation systems, namely, embedded operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; computer software for energy management and optimization; accumulators; accumulators, electric, for vehicles; accumulator charging apparatus; batteries for electric vehicles; batteries; battery charging devices for motor vehicles; charging stations for electric vehicles; charging apparatus; charging counters; conductor rails for the supply of electrical

power to vehicles; conductor wires for the supply of electrical power to vehicles; electric batteries for powering electric vehicles; electric batteries for vehicles; electric battery chargers; installations for data processing; starter batteries for vehicles; vehicle batteries; computing apparatus; monitoring devices for monitoring battery performance characteristics; downloadable applications for use with mobile devices; software and applications for mobile devices; apparatus for managing energy supplies; apparatus for monitoring electrical energy consumption; devices for measuring energy; electric control devices for energy management; energy control devices; computer software for orchestrating storage and consumption of energy; photovoltaic apparatus for converting solar radiation to electrical energy; computer hardware, namely, computer hardware used for the generation, distribution, and storage of sustainable and renewable energy; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing renewable assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; downloadable cloud-based software; cloud network monitoring software; real-time data processing apparatus; real-Time Collaborative Editing [RTCE] platforms [software] network and communication hubs; test stations for hydrogen generators; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial processes, namely power generation, electrical distribution and oil and gas processing; photovoltaic apparatus and installations for generating solar electricity; photovoltaic cells; solar cells; solar collectors for electricity generation; solar-powered rechargeable batteries; solar panels for electricity generation; electrical recharging apparatus; chargers for batteries; apparatus for monitoring electrical components; computer apparatus for computer aided engineering; engineering design software; measuring apparatus for use in electrical engineering; power supply apparatus [batteries]; apparatus for the supply of electricity; apparatus for electricity distribution; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; electric converters; electricity meters; voltage meters; meters for measuring current; power meters; metering instruments; apparatus for remote meter reading; capacitance meters; capacitive voltage transformers; apparatus for communication; communication devices; electrical communications apparatus adapted for use on vehicles; vehicular communication apparatus; central processing units (processors); couplers (data processing equipment); electro-dynamic apparatus for the remote control of signals current rectifiers; inverters [electricity]; meteorological instruments; surveying apparatus and instruments; batteries; electric batteries; electrolyzers; thermostat control apparatus; graphical user interface software; computer software for playing back information about energy consumption and air quality; computer hardware, namely, computer hardware used for the reduction of carbon emissions; computer hardware, namely, computer hardware used for the reduction of energy consumption; computer hardware, namely, computer hardware used for decarbonisation equipment; computer hardware for use in the reduction of carbon footprint and overall environmental footprint of buildings; computer software for use in the reduction of carbon footprint and overall environmental footprint of buildings; solar panels for the production of electricity; batteries; solar batteries; automatic solar tracking sensors; electric sensors; gas sensors; computers; computer software and display instruments for monitoring energy consumption, temperature, opening of windows, lighting and air quality; computer servers; measuring,

detecting, monitoring and controlling devices; integrated computerized system for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information related to technical data and chemical analyses; smart manufacturing system controls; level switches and level indicators for monitoring and controlling liquids in tanks and vessels; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; environmental monitoring software; apparatus for monitoring gas, fuel, water and heat consumption; apparatus for measuring, monitoring and analyzing fuel, gas and electricity consumption; monitoring apparatus for Internet of Things [IoT] enabled devices; optimisation software; fuel regulating apparatus; environmental control software; computer software for use in carbon capture technologies optimization for monitoring, distribution, storage and usage of carbon; computer software for use in carbon capture data collection and analysis.

Class 11

Hydrogen generators; Hydrogen-generation equipment and components, namely, hydrogen generators, hydrogen purifiers, hydrogen purification membranes, fuel processors, and steam reformers; solar heating panels; solar energy powered heating apparatus; solar thermal collectors [heating]; level controlling valves in tanks; mechanisms for controlling fluid level in tanks [valves]; heat exchangers [other than parts of machines], for use in processing fuel; oxygen concentrators for use with fuel cells used in heating, ventilation, air conditioning, lighting, and power systems for buildings; regulating apparatus for gas pipes; Liquid flow regulating apparatus, namely, hydraulic compensators; industrial installations for filtering liquids; heating apparatus for solid, liquid or gaseous fuels; ionization apparatus for the treatment of liquids and gases for industrial, commercial or agricultural use; apparatus and instruments for use in the purification, for removing impurities and sterilization of liquids and gases used in the biotechnology, pharmaceutical, medical and biopharmaceutical industries; solar-powered cooling units; mechanisms for controlling fluid level in tanks [valves].

Class 37

Installation and maintenance of photovoltaic installations; charging of electric vehicles; recharging services for electric vehicles; installation of energy-saving apparatus; installation of solar energy systems; repair of energy supply installations; advisory services relating to vehicle maintenance; battery charging service for motor vehicles; vehicle maintenance; maintenance and repair of electric vehicles; maintenance and repair of electricity generators; maintenance and repair of energy generating installations; maintenance and repair of motor vehicles and parts thereof; maintenance, servicing and repair of vehicles; maintenance, repair and reconditioning of photovoltaic apparatus and installations; maintenance, servicing and repair of power generating apparatus and installations; installation of renewable energy generation equipment; installation of wiring in accessible geographical locations for distribution of electricity suitable for electric vehicle recharging stations; natural gas refuelling service for motor vehicles; vehicle battery charging; installation of solar energy systems; emergency servicing of apparatus for supplying electricity; installation of power generating apparatus; fueling of hydrogen gas for vehicles; maintenance of communications equipment; automotive upgrade services, namely, supercharging, turbocharging and performance upgrades of automobiles; charging station services for

electric vehicles; construction of energy efficient buildings and structures; construction project management services in the field of construction of renewable energy and energy generation equipment support structures and ancillary structures for supporting meteorological data gathering equipment; installation, maintenance and repair of regulating, monitoring and control apparatus; maintenance and repair of oil and gas storage installations; vehicle fueling services.

Class 39

Supply of electricity; electricity supply services; consultancy services relating to the distribution of electricity; distribution and transmission of electricity; distribution of energy; public utility services in the nature of electricity distribution; providing information relating to the distribution of electricity; information and advisory services in relation to the distribution of energy; storage of energy and fuels; rental of electric cars; arrangement of vehicle rental; booking of vehicle rental; leasing of vehicles; parking services for vehicles; providing information relating to vehicle parking services; rental of vehicle parking spaces; reservation services for vehicle rental; car pooling services; car sharing services; providing information relating to car rental services; rental of hydrogen cars; distribution of renewable energy; distribution of energy for heating and cooling buildings; distribution of renewable energy.

Class 40

Production of electricity; electricity generation; generation of electricity from solar energy; generation of energy; consultancy services relating to the generation of electrical energy; consultancy services relating to the generation of electrical power; energy production; leasing of energy generating equipment; production of energy; production of electrical power from renewable sources; conversion of waste energy into electricity [energy recycling services]; waste-to-energy generation services; processing of hydrocarbons; Processing of hydrocarbon derivatives; rental of energy generating equipment; rental of electric power generators; rental of power-generating equipment; fuel treatment services whereby plants, algae and organisms are used to treat biofuels in the nature of primary, secondary and tertiary alcohols, ethanol, butanol, biodiesel and hydrogen fuels; fuel refining; fuel processing.

Class 42

Advisory services relating to energy efficiency; advisory services relating to the use of energy; energy auditing; programming of energy management software; computer programming for the energy industry; Programming of software for e-commerce platforms; research relating to city and Smart City planning; analytical services relating to computer programmes; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; research in the field of artificial intelligence; engineering services in the field of reduction of operating costs, fuel blending, waste handling, quality performance of co-products and by-products, and chemical distribution; providing a web site featuring technology that enables users to connect with other people in their neighborhood or city for any number of user-specified reasons, including providing a service or organizing an event; technical data analysis; computer systems design and analysis; greenhouse gas emission measuring and analysis; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [SaaS]; computer aided scientific and industrial analysis services; design and development of operating system software;

computer technical support services, namely, 24/7 service desk or help desk services for IT infrastructure, operating systems, database systems, and web applications; technical consultancy in the field of energy saving and energy efficiency; design of communication systems; design and development of energy management software; design and development of operating software for accessing and using a cloud computing network; design and development of software in the field of mobile applications; development of computer software application solutions; online provision of web-based applications; computer software consultancy; technological consultancy; server hosting; technological consulting services in the field of alternative energy generation; scientific research and development; technological research; technological planning and consulting services in the field of renewable energy resources; meteorological forecasting; industrial analysis, industrial research and industrial design services; computer programming for the energy industry; conducting research and technical project studies relating to the use of natural energy; cloud computing; cloud hosting provider services; computer programming services; computer programming for data processing and communication systems; providing virtual computer environments through cloud computing; providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; consulting in the field of cloud computing networks and applications; consultancy in the field of energy-saving; consultancy relating to technological services in the field of power and energy supply; design and development of regenerative energy generation systems; design and development of software for control, regulation and monitoring of solar energy systems; design and development of software for database management; design and development of operating software for computer networks and servers; development of energy and power management systems; energy use and conservation consultancy; engineering consultancy; engineering services in the field of energy technology; engineering services relating to energy supply systems; provision of information concerning research and technical project studies relating to the use of natural energy; research in the field of energy; technological analysis relating to energy and power needs of others; technological consultancy in the fields of energy production and use; platform as a service (PaaS); programming of software for information platforms on the Internet; software as a service [SaaS]; software as a service (SaaS) services featuring computer software for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; providing temporary use of web based cloud-computing software for connecting unlimited devices to a cloud computing platform; computer engineering; computer-aided engineering design and drawing services; engineering consultancy; engineering services in the field of environmental technology; computer software research; product research and development; research in the field of energy; research in the field of environmental conservation; research on building construction or city planning; rental of meters for the recording of energy consumption; design of communication systems; design of communications apparatus; design and development of software for the generation, distribution and storage of sustainable and renewable energy; design and development of software for the reduction of carbon emissions; design and development of software for decarbonisation solutions; design and development of software for the reduction of energy consumption; research in the field of renewal energy; technological consulting services in the field of decarbonisation solutions; computer software development services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; computer software consultancy and

advisory services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; consultancy and advisory services in the fields of renewable energy systems development, and the project management [design] of energy generation and supply assets; consultancy and advisory services relating to technological services in the field of demand-side energy resources and assets supply, weather and energy forecasting, and the production of wind and solar energy; website services in the fields of renewable energy and energy asset management, namely hosting of a website containing information in the fields of renewable energy and energy asset management; research and development of new products for others; surveying; meteorological information; rental of web servers; rental of computer software; monitoring of computer systems by remote access; computer software design; Providing temporary use of non-downloadable computer software in the nature of an online platform and online dashboard for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; Platform as a service (PAAS) featuring computer software platforms for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; software as a service (SAAS) services featuring software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, all of the foregoing excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; platform as a service (PAAS) featuring computer software platforms for energy management and optimization; software as a service (SAAS) services featuring software for energy management and optimization; computer software consultancy and advisory services for energy management and optimization; platform as a service (PaaS) featuring computer software platforms for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; computer system analysis; computer system design; computer technology consultancy; electronic data storage; information technology [IT] consultancy; providing information on computer technology and programming via a web site; outsource service providers in the field of information technology; platform as a service [PaaS]; research in the field of environmental protection; provision of scientific information, advice and consultancy in relation to carbon offsetting; technological engineering analysis; computer-aided industrial and scientific analysis; computer aided industrial design, research, testing and analysis services; Digital Distributed Storage; design and development of systems for data input, output, processing, display and storage; environmental monitoring services; monitoring of erosion, pressure, vibration, corrosion, temperature and sedimentation [Environmental monitoring services]; condition monitoring relating to fluids, oils, fuel and gas; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; electronic monitoring and reporting of pipe systems and tanks using computers and sensors [quality control]; storage system monitoring services [Machine condition monitoring]; Providing temporary use of non-downloadable cloud-based software for monitoring energy consumption and , calculating energy costs; Meteorological forecasting services; design, development, maintenance and updating of computer software for process control.

Data processing equipment; computer software; checking, measuring, monitoring and supervising apparatus and instruments for improving energy efficiency and sustainability in industrial, tertiary sector and residential buildings, infrastructures and data centers, machines, installations, electrical networks and industrial processes; checking, measuring, monitoring and supervising apparatus and instruments for process management, security management, access control and video surveillance in industrial, tertiary sector and residential buildings, infrastructures and data centers, machines, installations, electrical

networks and industrial processes; software platform (on line) for monitoring energy management, equipment management and asset maintenance (work order management system) in buildings; software platform (on line) for checking asset compliance and preventing security risks; software platform (on line) for analyzing data from retail sale, energy, security and fire systems; software platform (on line) for connecting to security applications, to intelligent equipment applications, to business control applications, to risk awareness and switchboard optimization; digital photographic cameras; digital transmitters; digital indicators; digital multimeters; digital signage display panels; digital sensors; digital projectors; digital signal processors; digital door locks; digital video players; digital sensory devices; digital electronic controllers; software platform to be used in commercial buildings for inputting data from heating, ventilation and air conditioning (HVAC) units, lighting, thermostats and other Internet of Things (IoT) devices; computer software for collecting and distributing data within computer networks, including the Internet, and enabling data communication between application programs, consumer apparatus and industrial apparatus in the field of building technology, fire protection, security, loss prevention and energy management; computer software for data integration, data storage, data processing, data performance monitoring and management, data sharing, data collection, data interpretation, data retrieving and data analysis in the field of building automation systems and other Internet of Things (IoT) devices, to enable customers to take commercial decisions in the field of commercial building management and retail systems, namely, the operation of installations and energy management, security and access control systems, fire alarm and hazard systems, heating, ventilation and air conditioning (HVAC) systems, inventory management and loss prevention; cloud computer software for data analysis, visualization and modeling of data in the field of commercial and retail building management, namely, installation services and energy management, security and access control systems, fire alarm and safety systems, heating, ventilation and air conditioning (HVAC) systems, inventory management and loss prevention; cloud computer software for data analysis, visualization and modeling in the field of building automation systems; Internet and intranet servers for providing data and software concerning energy efficiency, energy management and energy optimization; building and home automation systems comprising wireless and wired controllers, touch screens, control devices and software for apparatus, lighting, heating, ventilating and air-conditioning, entertainment devices in buildings and homes, security applications and other applications for checking and monitoring electricity in buildings and homes; computer software, computers, microprocessors, microcontrollers for analyzing, protecting, measuring, inspecting, signaling, checking, regulating, monitoring, maintaining, supervising, managing, designing, checking and remotely controlling lighting, heating, cooling, humidification, ventilation, air conditioning, energy consumption, fire safety, access control and energy management systems; computer software for data collection and distribution on computer networks, including the Internet, and enabling data communication between application programs, consumer apparatus and industrial apparatus; downloadable software for connecting, operating and managing heating, ventilation and air conditioning (HVAC) systems, building automation systems and control systems in the Internet of Things(IoT); building automation control systems (building automation) consisting of voice-control speakers, computer hardware and downloadable or recorded software for checking network devices on the Internet of Things (IoT) and for operating lighting, heating, ventilation, air-conditioning and security systems of homes and buildings connected to the Internet; building automation control systems (building automation) using an artificial

intelligence consisting of voice-control speakers, computer hardware and downloadable or recorded software for checking network devices on the Internet of Things (IoT) and for operating lighting, heating, ventilation, air-conditioning and security systems of homes and buildings connected to the Internet.

Class 35

Inventory management including the prevention of loss, misplaced or stolen inventory through data analysis; inventory management services; computerized inventory control; business tracking services through data analysis; tracking and monitoring of business transactions through data analysis for commercial purposes; sales volume tracking through data analysis for others; stock control services; provision of commercial advice and information in the fields of cloud-based and non-cloud-based inventory management services; provision of commercial advice and information in the fields of asset tracking by means of cloud-based and non-cloud-based data; analysis, research and information relating to business affairs; compilation and systematization of business data in computer databases; provision of business intelligence services; compilation and provision of commercial statistical information; preparation of business reports; provision of business information and advice; business consultancy services; business management in the field of energy management services; electronic data collection for commercial purposes; provision of commercial information through data analysis in relation to the movement of people in the retail trade via a computer network; provision of statistical data contained in a computer database in the field of customer traffic trends and circulation patterns in public locations, for commercial purposes; statistical analysis of customer traffic in stores; statistical information relating to pedestrian movements and counts, for commercial purposes; commercial enquiry services via the Internet for business partners and suppliers; online data processing services; business networking services; advice and consultancy services in the fields of commercial evaluation of energy consumption, sustainability and energy efficiency; business advice and consultancy services in the fields of commercial energy measuring, energy consumption, energy distribution and energy efficiency for industrial, tertiary sector and residential buildings, infrastructures and data centers, machines and industrial installations; business advice and consultancy services in the fields of commercial energy measuring, energy consumption, energy distribution and energy efficiency for installations and equipment for building automation and automated systems; data systematization in computer databases; compilation and business analysis of information and data relating to building energy efficiency, sustainability, management and to building automation.

Class 37

Installation, maintenance and repair of closed circuit television systems (CCTV) and security equipment; installation, maintenance and repair of smoke detectors; installation, maintenance and repair of fire extinguishers; installation, maintenance and repair of intrusion detection systems; installation, maintenance and repair of automatic fire sprinklers; installation, maintenance and repair of emergency lighting; installation, repair and maintenance of floor control systems; installation, maintenance and repair of theft prevention devices and surveillance systems; installation, repair and maintenance of inventory control systems; installation, repair and maintenance of electronic video surveillance cameras; installation, repair and maintenance of personnel and asset tracking devices; installation, maintenance and repair of fire protection systems; installation, maintenance and repair of alarm, security and access control systems; installation, maintenance and repair of electronic

surveillance equipment and apparatus; installation, maintenance and repair of heating, ventilation, air-conditioning, refrigerating, energy, lighting, fire alarm and access security systems for industrial, commercial, residential or governmental installations; installation, maintenance and repair of fire detection systems and fire sprinkler systems, piping and warning systems for particular risks; repair and maintenance of buildings; technical consulting services relating to the installation of fire prevention equipment; providing information relating to the repair or maintenance of fire alarm systems; consulting services relating to the installation of security and safety equipment; consulting services in the field of installation and maintenance of alarms for fault clearance and verification; construction, installation, repair and maintenance for the infrastructure of computer hardware and data centers; installation and maintenance services for installations and equipment used for research and engineering in the field of energy efficiency, home and building automation and automated systems; installation and maintenance services for surveillance and security equipment and for installations in the field of energy efficiency, home and building automation and automated systems; installation and maintenance services for surveillance and security equipment and for installations in the field of data center architecture; installation, maintenance and repair of apparatus and installations for the lighting, heating, cooling, humidification, ventilation and air conditioning of homes and buildings; information and advice concerning the installation, maintenance and repair of apparatus and installations for the lighting, heating, cooling, humidification, ventilation and air conditioning of homes and buildings; installation and maintenance of security installations, including by means of a telecommunication network; installation and maintenance of intelligent systems for buildings and homes; installation and maintenance of automation installations and programmable automated controllers and technical management installations for homes and buildings; construction advice and information; installation and repair of electronic data processing apparatus of a data center; installation and repair of computers; construction and installation of data centers; services provided by consultants in the field of data center construction; services provided by consultants with respect to construction and the provision of construction information; consultancy services relating to installation, repair and maintenance of heating, ventilation and air conditioning (HVAC) and cooling equipment, for optimizing energy efficiency in refrigeration installations; services provided by consultants in the fields of installation, maintenance and repair of heating, ventilation and air-conditioning, security, safety, energy management, lighting apparatus and building automation systems.

Class 42

Design and development of computer hardware and software; design, development and scientific analysis in the fields of heating, ventilation and air-conditioning, security, safety, fire detection and suppression, access control, intrusions, loss prevention, inventory, retail business performances, customer traffic, environment, energy management, lighting apparatus, building automation systems; design, development, technical analysis and consultancy in computer technologies, as regards software that collects, measures and distributes data on computer networks, including the Internet, and enables data communication between application programs, consumer apparatus and industrial apparatus in the field of building technology, heating, ventilation and air-conditioning, fire protection, fire detection and suppression, access control, video surveillance, loss prevention of energy management; computer network configuration of automated control systems for buildings and homes, namely, wireless and wired lighting controls, thermostat and heating, ventilation and air-conditioning controls, controls

for doors and windows, audio and video controls for buildings and homes; integration of computer systems and networks; design and development of wired and wireless computer networks; technological consulting in the field of household and industrial automation to enable users to remotely view, monitor, program, operate and control small and large apparatus, electrical systems and security systems in buildings and homes; design, development and consulting related to cloud computer software to provide data analysis, data visualization and modeling in the field of building automation systems; design, development and consulting related to computer software, computers, microprocessors, microcontrollers for analyzing, protecting, measuring, inspecting, signaling, checking, regulating, monitoring, maintaining, supervising, managing, designing, checking and remotely controlling the lighting, heating, cooling, humidification, ventilation, air-conditioning, energy consumption, fire safety, access control and energy management systems; providing temporary use of non-downloadable software for monitoring and controlling electrical household automation systems and automated equipment and installation systems; providing temporary use of non-downloadable software for building checking services, namely, surveillance, security and technical inspection; research and development of new products for others in the fields of energy management, energy efficiency and sustainability, building management and household automation for environmental protection purposes; programming of household automation installations as well as of programmable automated systems and technical management installations for buildings; energy audit consultation services, namely, energy consumption tracking and monitoring services; technical consulting services in the field of data center computer architecture; provision of search engines for online searchable databases in the field of building electronic control in industrial, tertiary and residential buildings, in infrastructures and data centers, in machines, installations, electrical networks and industrial processes, and alarm system performance and reliability maintenance evaluation; industrial analysis and research services in the field of security, safety, health, fire detection and suppression, access control, intrusions, customer care, loss prevention, inventory, performances of businesses and retail stores, customer traffic, environment, energy management, lighting apparatus and home automation; design and inspection (quality control) of fire-extinguishing, fire alarm, fire detection and suppression systems; design of anti-theft alarms, anti-theft alarm keyboards and anti-theft alarm control panels, magnetic and electromagnetic object detectors and electronic equipment for detecting items; design of customer security system monitoring and surveillance apparatus; design of security systems and surveillance systems; design of computer software for security systems and fire alarm, detection and extinguishing systems; maintenance services for computer software relating to fire protection and extinguishing systems and to security and surveillance systems as well as to apparatus for the aforesaid systems; design and engineering of heating, ventilation, air-conditioning and refrigeration systems; engineering and design services for others in the field of heating, ventilation, air-conditioning, refrigeration, energy, lighting, fire alarm and access security; computer programming relating to image inspection, surveillance and processing; management of online computer systems that remotely monitor heating, ventilation, air-conditioning, refrigeration, energy, lighting, fire alarm and security access systems; updating of technology information for household security systems via the global computer network; SAAS (software as a service, SAAS) services; technology advice and information services in the fields of energy management systems, cloud-based and non-cloud-based (software); consulting services relating to the design and development of online computer software systems and to the integration of computer

systems and building automation, information technologies for buildings, environmental health and safety in buildings, building environment and environmental quality of buildings; software system design for installation management inspection; engineering, design and development of inspection systems, building, installation and plant inspection devices, apparatus and systems, as well as of building, installation and plant automation and optimization devices, apparatus and systems; monitoring and technological analysis of the performance of inspection systems, of building, installation and plant inspection devices, apparatus and systems, as well as of building, installation and plant automation and optimization devices, apparatus and systems; provision of a web platform for monitoring and checking the energy efficiency of heating, ventilation and air conditioning (HVAC) and cooling equipment in refrigeration installations; rental of software for video surveillance, surveillance by video, security surveillance, security management, control and theft prevention; rental of computers and software; design and development of an online platform for monitoring energy management, equipment management and asset maintenance (work order management system) in buildings; design and development of an online platform for checking asset compliance and security risk prevention; design and development of an online platform for analyzing retail sales, energy, security and fire system data; design and development of online platforms for connection to security applications, to intelligent equipment applications, to business inspection applications, to risk awareness and switchboard optimization; platform as a service (PAAS) including software used for data integration, data storage, data processing, data performance monitoring and management, data sharing, data collection, data interpretation, data retrieval and data analysis; design and development of computer software for cloud data storage in the field of building technology; design of computer networks and software for others in the field of building automation and security systems and controls; updating of technical information on software for monitoring industrial processes via the global computer network; design of computer hardware, integrated circuits, communications hardware and software and computer networks for others; design and development of online computer software systems; provision of temporary use of non-downloadable cloud software on the Internet of Things (IoT) for connecting, operating and managing network building technology systems, namely, heating, ventilation, air-conditioning, refrigeration, fire protection, fire detection and extinguishing, access control, security, video surveillance, theft prevention systems; hosted applications provider (application service provider, ASP) services featuring software using artificial intelligence for collecting, measuring and distributing data on computer networks, including the Internet, and enabling data communication between application programs, consumer apparatus and industrial apparatus in the field of building technology, heating, ventilation and air-conditioning, refrigeration, security, fire protection, fire detection and extinguishing, access control, video surveillance, loss prevention and energy management; providing non-downloadable online software using artificial intelligence for collecting, measuring and distributing data on computer networks, including the Internet, and enabling data communication between application programs, consumer apparatus and industrial apparatus in the field of building technology, heating, ventilation and air-conditioning, refrigeration, security, fire protection, fire detection and suppression, access control, video surveillance, loss prevention and energy management; services for software as a service (SAAS) including software using artificial intelligence for collecting, measuring and distributing data on computer networks, including the Internet, and enabling data communication between application programs, consumer apparatus and industrial apparatus in the field of building technology, heating,

ventilation and air-conditioning, refrigeration, security, fire protection, fire detection and suppression, access control, video surveillance, loss prevention and energy management; creation and maintenance of websites and of wireless electronic communication networks; technical advisory services relating to maintenance of computer software and systems for the operation of data centers.
