Chemicals used in industry, science, photography, horticulture and forestry; unprocessed artificial resins, unprocessed plastics; manures; fire-extinguishing apparatus; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives and adhesive materials for industrial purposes, other than for cars or lorries; glues for metal and plastics; carpet glue; hot-melt adhesives; spray adhesives; structural adhesives, mastic compounds, glue sticks, all for industrial purposes; adhesive preparations for surgical bandages; adhesives for billposting; tile and paperhanging adhesives; adhesive tape for industrial purposes; cement in the form of adhesives for repairing broken articles; epoxy resins, unprocessed; gums in the form of adhesives and gum solvents; ungluing preparations; refrigerator (cold) sprays; chemical products in the form of foams; chemical substances for generating or stabilizing foam; foaming compositions; foam sprays; chemical compositions for grout, ceramic tiles, and ceramic, porcelain and vitreous China glazings; chemicals for general manufacture use in cleaning electronic components and medical devices; surfactants, surface active agents, chemical compositions for modifying the surface characteristics of liquids, coatings and inks; fluids for use in heat transfer, refrigeration, metal working and drilling, film cleaning, latent fingerprint development, medical device manufacturing, wet cleaning of dry etcher parts, cleaning of liquid oxygen and gaseous oxygen lines, pharmaceutical and chemical processing; chemical cleaning and drying agents for electronic parts, components, subassemblies, assemblies, precision parts, optics, optoelectronics, aerospace components, aircraft engines and aircraft; sterilization indicators, colorimetric indicators, chemically treated paper, chemically treated paper indicators, chemical composition for application to fabric and apparel to release stains, substances for the impregnation and finish of any material, chemical compositions for cleaning carpet, fabrics and upholstery; chemical compositions for application to fabric, upholstery, carpet and other flooring materials to repel stains and liquids; chemicals to confer repellency to materials for water and oil, chemicals including chemical compositions for application to various surfaces, materials to repel grease and oil and stains, liquid polymeric coating mixtures for application to a printed surface to render printing thereof more securely adherent to said surface, fluorinated products which provide repellency to water and stains, may be used in woven fabrics, leather, and carpets of nylon and polypropylene, glass microspheres bonded to a plastic base which, when bonded onto a fabric provide the fabric with retroreflective properties which enhance the nighttime visibility of garments made from the fabric, glass bubbles for use in manufacture; form release agents for use in the concrete industry; mould-release preparations; roofing adhesives; weatherproofing coating kit consisting primarily of a polymer adhesive and a sealer coating for roof installation; high temperature silicone compound used for forming gaskets; emulsifiers for use in the manufacture of polymers; surfactants for use in the manufacture of polymers; and emulsifier for the emulsion polymerization of monomers to create fluoropolymers for use in the manufacture of plastic articles; chemicals, namely filtration agents, filter media, and molecular separation media for general industrial use, including the pharmaceutical, chemical and paint industries; filter media incorporating silica absorbents for the removal of impurities from fluids and other filtrable substances, for use in the pharmaceutical, food and beverage, chemical, paint and electronics industries; unprocessed plastics in the nature of filtering materials for the removal of impurities from fluids and other filtrable substances, for use in the pharmaceutical, food and beverage, chemical, paint and electronics industries; fluoropolymers, fluoroplastics, fluoroelastomers, polytetrafluoroethylene, fluorinated thermoplastic elastomers, perfluorinated elastomers and perfluorinated plastics, including suspensions, solutions, emulsions, dispersions, powders, pellets, granules, gums and extrudates of the same; chemical compositions containing fluoropolymers, compositions containing fluoropolymers and/or non-fluorinated polymers and/or other chemical additives; vulcanizable fluororubber compositions, filled fluoropolymer compositions, electrically conductive fluororubbers and fluoroplastics, and polytetrafluoroethylene compounds; chemical additives for plastics (including engineering plastics) polyolefin processing additives, antiblocking agents, nucleating agents, clarifying agents, chemical based lubricating agents, release agents and flame retardant additives; fluoropolymer bonding agents, rubber processing additives, rubber curatives, internal and external mold release agents for rubbers and plastics, chemical additives that promote or improve the vulcanization of fluoroelastomers and chemical additives that improve or modify the post-vulcanization properties of fluoroelastomers, chemicals used in the manufacture of fluoropolymers, chemicals used in the

manufacture of fluoroelastomers, chemicals used in the manufacture of fluoroplastics, fluorinated monomers, tetrafluoroethylene, hexafluoropropylene, vinylidene fluoride, fluorinated ether-containing monomers, halogenated and nitrile cure-site monomers; catalysts; all included in class 1.

Computer software; computer hardware; telecommunication and conferencing hardware; software for tracking, creating lists, and organizing information and digital content; conferencing software; collaboration software; downloadable collaboration portal; computer hardware peripherals, namely, computer cables, audio/video cables, audio/video cable connectors, power cords, computer display screens, touch screens, projection screens for virtual reality visualization, manipulation, immersion and integration of audio, video, text, binary, still images, graphics and multimedia files, computer scanners, computer printers, computer speakers, computer stands, computer joysticks, microphones, webcams, digital cameras, blank usb flash drives, cd-rom drives, digital disc drives, disk drives for computers, dvd drives, hard disk drives, electronic pens, touch screen pens, stylus pens for use with touch-screens; tablet computers; computer mice and wireless computer mice; computer keyboards; mobile phones; cellular telephones; mobile phone peripherals, namely keyboards for mobile phones, mobile phone chargers, stands adapted for mobile phones, hands free kits for mobile phones, headsets for mobile telephones, dustproof plugs for jacks of mobile phones, in-car telephone handset cradles; mobile phone accessories, namely cases adapted for mobile phones, straps for mobile phones; smart phones; parts for mobile telephones; network communication apparatus, namely computer network adapters, computer network switches, computer network bridges, computer network server, network routers, network interface cards; electronic communication equipment, namely modems, ethernet adapters, ethernet switches, video cable adapters, fibre-optic cables, fibre optic light and image conduits; telephones; pedometers; downloadable software applications for mobile phones, smart phones, notebook computers, laptop computers, tablet computers, handheld computers for use in digital painting, drawing and sketching, for use in graphic arts design, for organizing and viewing digital images and photographs, for processing digital images, for digital animation, for creating, sending and receiving e-mail, for optical character recognition, for word processing, for computer aided mechanical design, for playing computer games, video games, virtual reality games, and interactive video games, for transmission of graphics and photographs to mobile telephones, smart phones, computers for predictive and corrective text entry for use with mobile phones, smart phones, and computers; and computer video control devices, namely, trackballs, joysticks and gamepads; computer programs, namely operating system programs; computer programs for playing games; computer programs, namely, game software for use on computers and video game players; computer game software; video game software; video and computer game programs; downloadable computer games; downloadable video games; computer programs for controlling the display of television programs, delivered over global information networks; computer programs for managing communications and data exchange between handheld computers and desktop computers; computer programs magnetically recorded on discs or tapes; computer user manuals in electronic format; computers; computers, namely computers for use in automobiles and computer operating systems and computer software programs, namely mapping software, systems monitoring software, and wireless communication software for use in automobiles; wallet-sized personal computers and computer operating systems and computer software programs, namely word processing, scheduling, e-mail administration, and Internet access and navigation software for wallet-sized personal computers; optical disc players and computer operating system software for optical disc players; computer hardware, computer operating systems and computer software programs for sending and receiving television and global communication network transmissions; telephones and computer programs for controlling the operation thereof; telephones for use in telecommunications over global communication networks and computer programs for controlling the operation thereof; entertainment consoles comprising computer hardware and software developed to provide audio, video and multimedia programs such as material from the Internet, and television programs; electronic pagers and software for electronic paging; handheld computers; handheld computers for playing games and operating system software for use therewith; microcomputers; computer software for word processing, spread sheets, database management, e-

mail, scheduling, games, electronic reference materials, financial management, and Internet access and navigation; computer application programs and operating system programs for use with communications servers; computer application programs providing connectivity over wide area networks and local area networks for mobile phones, smart phones, computers, televisions, and video game consoles; computer application software to enable uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking, and sharing electronic media and information, namely, photographs, videos, graphical images, text and email messages, text documents, music, and audio recordings, all via the Internet; computer network operating software and utilities; computer network server software for managing user content on computer networks and global computer networks; computer software development tools for network servers and applications; computer software for developing, managing and operating intranet sites; computer software for inventorying and monitoring computer hardware and software assets and use within an organization; computer software for use by computer network administrators to deploy and manage application software and network server software; computer software for wireless telecommunications for use with wireless devices, namely software for enabling smart phone, portable computers, mobile phones to connect to wide area networks; operating systems software for use in playing electronic games; security software, namely computer software for managing secure communications over computer networks and global computer networks; computer software for use in browsing, accessing, searching, reviewing, purchasing, downloading, and providing ratings on digital content, namely digital images, television shows, movies, computer games, and gift cards; computer software for use in searching and making purchases in online marketplaces for software applications; computer software for electronic transmission via the Internet and display of digital content, namely digital images, television shows, computer games, movies; computer software, namely computer operating system programs and utilities, namely, computer utility file compression and synchronization programs and backup software; video game machines for use with televisions and computers, and operating system software for use therewith; computer software for viewing, searching and playing pre-recorded audio and Internet radio; computer software and computer programs for database management, data storage and backup, creating virtual reality and mixed reality environments on a computer network, business and social networking, online business and social collaboration between individuals and organizations, remote Internet access, remote technical support, cloud computing, data sharing, data security, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, text messages, emails, digital images and photographs, documents, publications, videos, comments and multimedia content among users, for content management, for online project management, for web conferencing, for creating, offering, hosting and delivering online meetings, demonstrations, audiovisual presentations, and interactive discussions for others, operating system programs; computer software for use in enterprise resource planning (ERP) and customer relationship management (CRM) in the fields of business operations, business management, accounting, marketing, ecommerce; computer e-commerce software to allow users to perform electronic business transactions via a global computer network; computer operating system software; computer software for playing video games and computer games, computer network security, anti-virus protection, and intrusion detection and prevention; computer graphics and graphical user interface software; computer software for running development programs and application programs in a common development environment; website development software; computer software that provides web-based access to applications and services through a web operating system or portal interface; computer software for developing and operating cloud computer networks and applications; computer software for computer system and application development, deployment and management; hardware for telecommunications for connecting devices via in home phone and electrical wiring, namely, computer networks hubs, computer servers, set-top boxes, computer switches and computer routers designed to provide in-home voice over Internet protocol (voip) communications; computer and video game systems devices, namely, motion sensors and biometric sensors, cameras, projectors, headphones, and microphones; electronic game equipment, namely, display video screens adapted for video games, peripheral devices, namely, monitor stands, controller stands, glasses, headsets, headphones, microphones, floor mats, keypads, and styluses for communicating with a television or computer for playing electronic games; computer software for virtual reality visualization, manipulation, immersion and integration of audio, video, text, binary, still images, graphics and multimedia files; wearable computers, namely smart rings, smartwatches, smart glasses, wearable video display monitors, wireless headsets for use with smartphones, wireless headsets for use with mobile phones, smart bands [measuring instruments], wearable activity trackers, virtual reality and mixed reality glasses and headsets; wearable computer peripherals, namely wireless computer scanners, wireless computer mice, wireless keyboards for mobile telephones, wireless keyboards for computers; virtual reality headsets for use in visualization, manipulation, immersion and integration of audio, video, text, binary, still images, graphics and multimedia files; keyboards, mice, styluses, monitors, scanners, cameras, microphones, projectors, electric cables and cords for mobile devices for remotely accessing and transmitting data; computer display monitors; computer software, namely, software for setting up, operating, configuring, and controlling wearable computer hardware and wearable computer peripherals; carrying cases and holders for use with virtual reality headsets; eyeglasses; optical devices, namely, eye pieces for helmet mounted displays; optical glasses; optical lenses; spectacles;

3d spectacles; hologram apparatus, namely hologram projectors, headsets and glasses; holographic apparatus, namely holographic projectors, screens, headsets and glasses, for projecting holographic video, still images, graphics and multimedia files; computer hardware and software for automobiles, namely, computer programs for monitoring automobile performance, for mapping and navigation, for electronic mail and wireless digital messaging, mobile phone communication, cellular phone communication for maintaining personal directories, contact lists, address and telephone number lists; computer software and computer programs for virtualization, networking, collaboration, remote access, creating, offering, hosting, and delivering online conferences, tours, presentations and interactive discussions; computer software, namely, a full line of computer software for business productivity, business it service management, business computer devices management, business it security management, business administration and management, accounting, and marketing in the fields of business, and computer software to facilitate e-commerce business transactions via a global computer network; computer operating system software; network access server operating software; computer programs for managing communications and data exchange between computers and electronic device; computer and video game systems devices, namely, electronic sensor devices for capturing gesture, facial, voice, and object recognition, cameras, projectors, headphones, and microphones; computer software for virtual reality visualization, manipulation, immersion and integration of audio, video, text, binary, still images, graphics and multimedia files; downloadable employee platform and software featuring articles, education, engagement, wellbeing, insight, collaboration, communication, artificial intelligence, and deep learning components; computer peripherals for mobile devices for remotely accessing and transmitting data; computer peripherals for displaying data and video; apparatus for recording, transmission or reproduction of sound, images, or data; electronic and optical communications instruments and components, namely, flat panel display screens, display video screens for video games, and touchscreens for virtual reality visualization, manipulation, immersion and integration of audio, video, text, binary, still images, graphics and multimedia files; downloadable computer software and mobile software applications for data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, data sharing, data security, access to applications and services through a web operating system or portal interface; downloadable cloud computing software for data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, data sharing, data security, access to applications and services through a web operating system or portal interface; computer software for monitoring cloud and application performance; downloadable computer software for use in automating the allocation of data processing and computing tasks between computer hardware resources and in private and public cloud environments; downloadable computer software for security information and event management (siem) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; microcontrollers; computer chipsets; microcontrollers and chipsets for the secure transmission of data; computer hardware modules for use with the Internet of things (iot); computer software and telecommunications apparatus to enable a data connection between Internet of things (iot) devices or mobile connected computing devices and the Internet or secure networks; software application platform for connecting people, services and devices to the Internet; home or industrial process automation software; mobile application software for home or industrial process automation; operating system software for cloud computing services and Internet of things (iot) devices; cloud computing software; application software for cloud computing services; operating software for cloud computing devices and the control and secure management of cloud computing devices; computer software for artificial intelligence (ai) processing; computer chips for artificial intelligence (ai) processing; computers and computer servers for artificial intelligence (ai) processing; computer operating system software; computer operating system software that may be embedded in other software; computer software development tools, for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; computer software for general purpose computation, manipulation of collections of data, data transformation, input/output, communications, graphics display, modelling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; computer software runtime systems, namely, computer software systems comprised of computer software for general purpose computation, manipulation of collections of data, data transformation, input/output, communications, graphics display, modelling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; computer software, namely, application programming interface (api) software for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; computer software, namely, software for implementing a computer programming language, and computer software development tools, for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; integrated circuit modules; integrated circuit cards and components; computer hardware for processing math; computer chips; silicon chips; application data processors; central processing units; software programmable microprocessors; downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance; downloadable computer software for use in data storage

and management; downloadable computer software, namely, computer software for real-time analytics and debugging, computer software for user authentication, customer engagement, customer relationship management, computer software for providing messages, push notifications and information in the field of video games, computer software for user data capture, storage, and analysis, computer software for allowing users to perform electronic business transactions via a global computer network, computer software for generating coupon codes, payment processing, payment fraud detection, and computer software for creating, using and managing virtual currency; computer programs for connecting computers to one another and for enabling activities via the Internet; computer programs that provide web-based access to applications and services through a web operating system or portal interface; downloadable computer software for use in assessing, monitoring, administration and management of data centers and datacenter devices, and public and private cloud computing it and application systems and resources; downloadable cloud-computing software for managing cloud computing resources; software for creating and managing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks; software interface for accessing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks for workload management by administrators, managers and end-users; software for policy-based governance, workload scheduling, resource and energy monitoring, control, management and provisioning by administrators, managers, and end users in the nature of automated allocation of computing resources, analysis of computing resource availability and status information, installation of software and provisioning operating system changes, power management, software upgrades management, accounting and usage management for reporting and billing, third-party application integration management, workload policy management, and job scheduling for both batch and interactive jobs across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments, and computing networks; software for governance, monitoring, managing, profiling, and indicating available computing and associated resources, namely, for intelligent automation and management of multiple resources, scheduling, operating system provisioning, power management, and computing resource policy implementation that enables administrators, managers, and end users to automate, control, and utilize multiple computing resources across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments and computing networks; software for statistical diagnostic and performance monitoring, namely, analysis of utilization of computing resources, analysis of efficiency of use of computer resources, analysis of optimization of computing resources, analysis of fair sharing of computing resources, analysis of load balancing of computer systems, analysis of hybrid operating system environments, and analysis of power consumption in compute environments by organizations, entities, individuals, classifications of quality of service, queues, and computing nodes; software for providing a quality of service for submitted jobs and for scheduling guarantees and job reservations for users, groups, classes, accounts, and levels of quality of service; software for command-line and graphical resource and workload simulation, including simulation of simultaneous instances to explore the effects of configurations and policies on clusters, grids, high-performance computing environments, and computing networks; software for dynamic command-line and graphical management of computing resources, namely, management of software licenses within a single computer administrative domain or across multiple heterogeneous computer administrative domains, hybrid operating system environments, file spaces, network-attached storage media, tape drives, processors, memory, disks, network bandwidth, and other hardware resources; software for interface with and collection of end-user commands for job, queue, operating system, power consumption, and system management, for internal diagnostic and logging facilities, and for integration of provisioning managers, billing systems, identity and security managers and databases, and translation of resource manager job submissions; software for peer-to-peer collaboration of multiple instances to provide domain-specific policies and to provide native resource management support; downloadable software development kits (SDK); downloadable computer programs for assisting developers in creating program code for use in internal computer networks and global communication networks; computer software development tools; downloadable computer programs for running development programs and application programs in a common development environment; computer programs for assisting developers in creating program code for use in multiple application program; computer software development tools for network servers and applications; downloadable software that enables users to share and collaboratively develop software, computer code and user-generated content; computer programs for developing server applications; computer servers; downloadable computer software development tools; downloadable computer software, namely, software development tools for the creation of mobile Internet applications and client interfaces; computer software for browsing the Internet; downloadable computer search engine software; computer browsing software, namely, software for browsing the global computer network and private networks; search engine software; graphical user interface software; voice-recognition software; computer search engine software; software for designing business processes in a visual form; software for accessing and integrating data from multiple databases, business software applications, and software as a service (SaaS) services; software for designing and automating workflows within and between business software applications and business software as a service (SaaS) services; graphical user interface software, namely, toolbar software for use with search engine software and websites;

downloadable computer software, namely, downloadable computer software featuring software in the field of advertising; downloadable computer software featuring software for managing and controlling product display on websites and on-line retail stores; downloadable computer software featuring software for product merchandising; computer application software for advertisers, marketers, and content providers to reach, engage, and interact with online users for the purposes of promotion or advertising; computer software for the design, execution and management of advertising and marketing campaigns; computer software for generating reports and analytics for advertising and marketing campaigns; data processors; data processing apparatus; memories for data processing equipment; mobile data terminal (MDT); downloadable computer software for creating searchable databases of information and data; computer chipset for use in transmitting data to and from a central processing unit; downloadable enterprise software in the nature of a database for non-transactional data and a search engine for database content; network servers; Internet servers; intranet servers; video servers; digital media servers; ip video servers; servers for web hosting; communications servers; downloadable computer software for managing and validating cryptocurrency transactions using blockchain-based smart contracts; downloadable computer software for managing cryptocurrency transactions using blockchain technology; downloadable computer software for managing and verifying cryptocurrency transactions on a blockchain; transceivers for television and global communication network transmissions that transmit them to a television or other display device, and computer operating programs for use therewith; entertainment system comprising a computer, multiple image display screen and multiple input devices; hand held computers; computer operating system software for use with electronic equipment for playing games; computer programs for managing communications and data exchange between hand held computers and desktop computers; computer software for the transmission, recording, reproduction, display, organization, management, manipulation and review of messages, text, images, files, audio, video and audio-visual content for the facilitation of communications between multiple users via computer networks, communication networks and the Internet; communications software for connecting peer professionals on computer networks or the Internet; computer software for use as an application programming interface (API) for facilitating voice over Internet protocol (VOIP) calls, phone calls, video calls, text messages, instant messages and online social networking services; computer communication software which enables multiple users to post messages and memoranda, share files, and synchronize calendars; application programming interface (API) software which facilitates online social networking; electronic devices for communications, namely, telephones, handsets, headsets, speakers, microphones, earphones, webcams and video cameras; headphones; downloadable computer software for use in connection with buying, selling, sharing, searching, downloading, customizing, integrating and reviewing information, data, images, and digital files; computer software for use in access control, identification, authentication, security and safety; authenticating application software for cloud computing services; downloadable computer software for managing, filtering, and monitoring access to mobile devices, console and portable gaming devices; downloadable computer software for finding and displaying a user's location; downloadable computer software for global positioning system (GPS) tracking devices; news software and applications; software for buying and selling photographs; consumer safety hardware; consumer safety software; global positioning system (GPS) hardware; global positioning system (GPS) software; vehicle tracking and monitoring software; vehicle tracking and monitoring hardware; video analytics software; downloadable video analytics technology; computer software for artificial intelligence, deep learning, computational kernel optimization, and sparse attention kernels.
