Computer hardware; cockpit voice and flight data recorders; flight parameter data recorders and transmitters; semiconductors; radio frequency switches; radar detectors; flight testers, namely, computer hardware and software for performing flight simulation; wired and wireless telephones and telephone equipment, namely, telephonic transmitters, telecommunication network hubs, connectors, receivers and other telephonic communications devices, equipment, products, and components, namely, telephonic network interface hardware, telephonic security control hardware, telephonic multimedia control hardware, telephonic switching, routing, and subscriber interface hardware which are used in computer and communications networks and systems; computer software for use in satellite command and control in the field of satellite communications; computer software for information mining in the field of strategic and tactical intelligence; computer telemetry software for use in data collection and transmission from fielded remote equipment, namely, satellites, aircraft, missiles, moving surface-based systems, remotely configured fixed site installations and communication and command and control intelligence; computer software for use in data collection and transmission in the field of medical technology, namely, x-ray machines, magnetic sensing machines, acoustic sensing machines, chemical tracing machines; computer software for use in control and operation of real-time equipment, namely, x-ray machines, magnetic sensing machines, acoustic sensing machines, chemical tracing machines, flight navigation controls, flight safety equipment, namely, voice recorders, telemetry systems on airplanes, maintenance systems on airplanes, telemetry scanners, intrusion systems, combat scoring systems and pictures, air traffic handling systems, monitors, still video, radar systems, and vehicle status and monitoring systems; computer software for system situational awareness and representation in a communication and data link control system; channel amplifiers and frequency filters for use in telecommunications; computer hardware for electronic key information processing, namely, the processing of information related to electronic encryption and other security technologies; radio frequency limiters; harmonic generators; satellite transponders; transponder controllers; secure communications systems consisting of digital processors, modulators, antennas, transmitters, receivers, and encryption hardware and software for secure algorithm processing devices for use with airborne, satellite, ground and sea-based information collection, transmission and analysis; communications systems consisting of high data rate microwave communications links and computer hardware; communications systems consisting of telephonic and high data rate microwave radio components, digital processors, computer hardware, software containing algorithms for use in processing secure communications and software for the secure broadcast and/or receipt of communications and information or data; on-board satellite equipment providing subsystem capabilities, namely, electronic modules and circuit cards for digital solid-state recording, video signal processing, communications signal processing and translation; microwave devices, equipment, products and components, namely, frequency transmitters, frequency converters, frequency synthesizers, frequency modulators, frequency filters, frequency power amplifiers, passive components, mechanical switches, wireless frequency monitoring system and associated electronic implementation circuit card assemblies providing frequency determination, frequency characteristics, frequency status, and frequency control; radio navigation equipment comprised of recording transmission and receiving microwave equipment, namely, microprocessors, electronic displays, digital storage devices, radio transmitters and receivers, providing the following capabilities; navigation, vehicle command and control, vehicle indications and warning, data and telemetry recording; surveillance equipment and devices, namely, ISR (intelligence surveillance reconnaissance) subsystems which use computer hardware and software to provide a sampling of the spectrum in prescribed frequencies to extract information content available for analysis, for use in military and civilian aircraft; electronic sensors that provide in real time the ability to collect electronic data and information, namely, sense the external electromagnetic spectrum and convert that received energy into a digital representation of the energy; process electronic data and information, namely, filter the digital representation of the energy and translate it into a visual or audio representation of the information; analyze electronic data and information, namely, compare georeferenced information, detect any changes, and display changes for visual confirmation; store electronic data and information,

namely, transfer data and information to digital storage; and disseminate electronic data and information, namely, create information based on electronic packets that can be sent on any selected transfer media to other remote locations; electronic computer hardware and software that allow for the collection, monitoring, analysis, storage, and presentation of medical images; computer network devices and equipment, namely, hardware that allows for the interfacing of analog or digital signals into the existing psfn (public switch telephone network) or global information network and create the ability to take those same signals into a mobile communications system; telephonic computer hardware that allows for creation of a wireless last mile, namely, wireless radio connections between a central source and destination, where the telephony and data system have fixed site or mobile operational capability; communications terminals which consist of computer hardware that provides for the creation and connection of multimedia communication signals including analog, voice, data, and video and allow signals to be connected to other communications terminals or other network nodes; radio and television transmission systems comprising transmitters, monitors, signal mixers, audio and video signal encoders and decoders and editing equipment, namely, signal processors; transmitters and receivers for satellite communications; computer operated network systems comprising computer hardware and software for transmitting data between computers connected in a network and for managing the computers and the transmission of the data on said network; computer information systems comprising computers and software for processing data, word processing and displaying of data; avionics systems comprising digital maps, fiber-optic and wire data busses, memory devices, instrumentation for displaying, storing, processing, and retrieving weather, tactical, strategic and secure data, cockpit controls and data displays; phased array antennas; global positioning equipment comprising data processors and displays; air traffic control communications systems consisting of computer hardware and software for displaying transporting, transmitting, controlling, switching, routing, and receiving air traffic information; computers and computer software for converting images into data, and for analyzing, displaying and printing the data in the field of two and three-dimensional image extraction, manipulation, display, and geographic registration; secure computer operated systems consisting of computer hardware and computer software, and encrypted databases, all used for ensuring and controlling the security and access of a computer network and the information contained therein namely, tracking air traffic and transmitting encrypted messages to pilots, data base management, file transfer, and for connecting computers and data bases in a network and for circulation management; airline management system comprising computers and software for database management and for exchanging aircraft and aircraft operations information; television signal analysis processors, namely, electronic display panels for displaying signals, signal evaluation terminals primarily comprised of customized signal analysis hardware with integrated displays and software analysis components running on industry standard computers and monitors for evaluating the quality of analog and digital signals, media analysis servers for verifying the quality of digital media content, signal interface modules, handheld signal analyzers, optical signal analyzers, circuit testers for monitoring broadcast signals, and video monitoring tools, namely, software based video monitoring tools, namely, computer software for monitoring and logging the loudness of media content; timing reference generators, namely, time reference signal generators for broadcast system timing signal and test signal generation; hardware and computer software for television production, post production and broadcast, namely, demodulators, digital signage, namely, dynamic electronic displays and networking computer servers and computer software for managing and controlling dynamic electronic displays, distribution amplifiers, audio/video editors, namely, computer workstations equipped with computer software for editing audio and video program material, computer hardware and computer software sold as a unit for generating characters and graphics, computer software for generating visual effects, computer hardware and computer software sold as a unit for generating and inserting on-air branding, emergency alert modules, namely, computerized electronic modules and associated computer software for implementing the broadcasting of public emergency alert messages, fiber optic signal transports, electronic master control switchers for audio and video signals, audio and video signal compressors and audio and video signal decompressors, multiplexers and de-multiplexers, multiviewers, broadcast computer network monitoring and control application software, electronic network control panels, audio, video and data receivers and decoders, electronic routing switchers for audio and video signals, video servers, video computer networking, ntp timing modules comprised primarily computer hardware and computer software for carrying out ntp timing, signal timing clocks, signal transport modules, audio/video sync and timing managers primarily comprised of high precision clock generation circuitry for synchronization of audio with video, broadcast signal legalizers, computer software for creating and displaying timecode markers, up/down signal frequency converters, signal format cross converters, all for use in the media and entertainment industry; broadcast operations software for advertising, sales, traffic and billing, automation, digital asset management, programming and rights management, namely, computer software for managing, monitoring and automating the buying, selling, scheduling, research, inventory management, production tracking and accounting processes for advertising, and general content for the media and entertainment industry; computer software for controlling and monitoring switching systems for television and radio signals; computer software for managing, monitoring and automating the creation, movement, location, archiving, retrieval and use of digital media assets; computer software, namely, business process management and messaging software, for managing and controlling human and automated workflows and

multisystem communications for use in the media and entertainment industry; network management centers primarily comprised of mobile and portable radios and also containing electrical base station controllers, electrical communication controllers and electrical network controllers; mobile and nonmobile two-way communications radios; portable two-way communications radios; radio network gateways comprising computers, computer switches and associated computer software for voice and data communications; Internet protocol-based networks comprising computer hardware and computer software for interoperable communications; telecommunications equipment, namely, trunked radio communication systems for public service and industrial applications comprised of portable communications radios, electrical base station controllers, electrical communication controllers and circuit switches; control equipment for two-way mobile and two-way fixed radios, namely, base station equipment for fixed and mobile networking and communications, cell sites primarily comprised of electronic hardware, computer software, antennae, and base stations, control stations primarily comprised of radios, radio hardware and associated computer software, desktop control stations primarily comprised of radios, radio hardware and associated computer software, dispatch and console hardware, namely, dispatch consoles and software for carrying out emergency and nonemergency communications and carrying out command and control of public safety personnel and assets, site management computer hardware and software for managing communications radios and base stations, and network monitoring computer hardware and software for monitoring communications radios and base stations; radio data communications systems primarily comprised of mobile communications radios and also containing non-mobile communications radios, portable communications radios, base station controllers, communication controllers, and network controllers; communications radio network gateways comprised primarily of computers, computer switches and associated computer software for providing a gateway between networks; space deployable reflectors for satellite communications; computers and computer software for converting elevation data point clouds from remote sensing devices into data, and for analyzing, displaying and printing the data in the field of three-dimensional feature extraction, manipulation, display, and geographic registration; computers and computer software for managing, cataloging and retrieving geospatial imagery, imagery derived products and other intelligence products, through the synchronization of data catalogs across disparate storage locations; computers and computer software for managing, processing, exploiting and disseminating motion imagery intelligence; computers and computer software for managing, processing, exploiting and disseminating flight planning presentations to general aviation pilots and air traffic controllers; networking communications radios; shipboard communication terminals primarily comprised of antennae, pedestals, positioners, modems, up converters, down converters, amplifiers and user interfaces; ground communication terminals primarily comprised of antennae, pedestals, positioners, modems, up converters, down converters, amplifiers and user interfaces; computer information systems comprised mainly of computers and computer software for processing data, word processing and displaying of data in the fields of census information systems, healthcare information systems, intelligent electrical power distribution systems, weather reporting and forecasting systems and environmental reporting and forecasting systems; avionics equipment, namely, video signal compressor and decompressors, power supplies, mounting racks specially adapted for mounting and interconnecting electronic apparatus, airborne signal processors for network interoperability and targeting, secure network switches, computer software in the nature of networking protocols for facilitating the exchange of electronic messages and data., radio frequency (rf) data links for weapons, uhf/vhf wireless data links, phased array electronics, namely, beam former electronics primarily consisting of power amplifiers and also containing low noise amplifiers, phase shifters, time delay units, transmit and receive switches, array dividers, array combiners, frequency up-converters, frequency down-converters, array controllers and array power supplies and control equipment, namely, antenna control units, attitude and heading reference units, transmit/receive control units, antenna position controllers and frequency band select switches; air traffic control communications systems consisting of computer hardware and computer software for displaying, transmitting, controlling, switching, routing, and receiving weather data; two-way radios for communication of voice, data, images and video for use by military and other government agencies; two-way communications radios, namely, voice and data communications radios operable across multiple frequency bands for enabling public safety officials and first responders such as law enforcement agencies, paramedics, firefighters and military personnel to communicate interoperably with one another even though their respective pre-existing communications infrastructures might otherwise be mutually incompatible; trunked radio communication systems for public service and industrial applications, namely, cellular base stations and mobile radio base stations for two-way mobile and fixed communications radios; loudspeakers for mobile two-way communications radios; loudspeakers for non-mobile two-way communications radios; battery chargers for two-way communications radios; Internet protocol-based communication networks comprised primarily of computer hardware and computer software for implementing interoperable communications; cryptographic modules namely, electronic modules with embedded firmware for data encryption purposes; integrated circuits, namely, encryption engines; radio frequency wireless communications adapters, namely, network interface cards; software for operating radio frequency wireless network interface cards; communications software for connecting radio frequency wireless network interface cards to a local area communications network; radio network gateways comprised primarily of computers, computer switches and computer software in the field of voice and data

communications; computer software for use in the field of air traffic control, namely, for the supervision, maintenance, administration, troubleshooting and configuration of computer software for monitoring the performance of air traffic control systems, mapping definition, uploading software updates and releases, access control, user definition, circuit assignment, hardware editing, recovery and diagnostic reporting; all included in class 9.
