Computer software; software for the planning, integration and optimization of smart city applications; big data management software; operating system software and programs; network operating systems programs; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface e-commerce software; computer software applications, downloadable; database management software; computer software platforms, recorded or downloadable; application software; downloadable computer software for remote monitoring and analysis; computer software for use in migrating between different computer network operating systems; artificial intelligence software and apparatus; software for the integration of artificial intelligence and machine learning in the field of big data; software applications [apps] for Internet of things [IoT] enabled devices; artificial intelligence and machine learning software; artificial intelligence software for analysis; predictive maintenance software; interactive software based on artificial intelligence; artificial intelligence software for vehicles and driverless cars; capacitors; embedded operating software; communication software; computer software platforms; Internet of things [IoT] gateway; computer programs for Internet of things [IoT] enabled devices; intelligent gateways for real-time data analysis; mobile operating systems; robot operating system [ros]; environmentally friendly automation systems, namely, embedded operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; computer software for energy management and optimization; accumulators; accumulators, electric, for vehicles; accumulator charging apparatus; batteries for electric vehicles; batteries; battery charging devices for motor vehicles; charging stations for electric vehicles; charging apparatus; charging counters; conductor rails for the supply of electrical power to vehicles; conductor wires for the supply of electrical power to vehicles; electric batteries for powering electric vehicles; electric batteries for vehicles; electric battery chargers; installations for data processing; starter batteries for vehicles; vehicle batteries; computing apparatus; monitoring devices for monitoring battery performance characteristics; downloadable applications for use with mobile devices; software and applications for mobile devices; apparatus for managing energy supplies; apparatus for monitoring electrical energy consumption; devices for measuring energy; electric control devices for energy management; energy control devices; computer software for orchestrating storage and consumption of energy; photovoltaic apparatus for converting solar radiation to electrical energy; computer hardware, namely, computer hardware used for the generation, distribution, and storage of sustainable and renewable energy; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing renewable assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; downloadable cloud-based software; cloud network monitoring software; real-time data processing apparatus; real-time collaborative editing [rtce] platforms [software]

network and communication hubs; test stations for hydrogen generators; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial processes, namely power generation, electrical distribution and oil and gas processing; photovoltaic apparatus and installations for generating solar electricity; photovoltaic cells; solar cells; solar collectors for electricity generation; solar-powered rechargeable batteries; solar panels for electricity generation; electrical recharging apparatus; chargers for batteries; apparatus for monitoring electrical components; computer apparatus for computer aided engineering; engineering design software; measuring apparatus for use in electrical engineering; power supply apparatus [batteries]; apparatus for the supply of electricity; apparatus for electricity distribution; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; electric converters; electricity meters; voltage meters; meters for measuring current; power meters; metering instruments; apparatus for remote meter reading; capacitance meters; capacitive voltage transformers; apparatus for communication; communication devices; electrical communications apparatus adapted for use on vehicles; vehicular communication apparatus; central processing units (processors); couplers (data processing equipment); electro-dynamic apparatus for the remote control of signals current rectifiers; inverters [electricity]; meteorological instruments; surveying apparatus and instruments; batteries; electric batteries; electrolyzers; thermostat control apparatus; graphical user interface software; computer software for playing back information about energy consumption and air quality; computer hardware, namely, computer hardware used for the reduction of carbon emissions; computer hardware, namely, computer hardware used for the reduction of energy consumption; computer hardware, namely, computer hardware used for decarbonisation equipment; computer hardware for use in the reduction of carbon footprint and overall environmental footprint of buildings; computer software for use in the reduction of carbon footprint and overall environmental footprint of buildings; solar panels for the production of electricity; batteries; solar batteries; automatic solar tracking sensors; electric sensors; gas sensors; computers; computer software and display instruments for monitoring energy consumption, temperature, opening of windows, lighting and air quality; computer servers; measuring, detecting, monitoring and controlling devices; integrated computerized system for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information related to technical data and chemical analyses; smart manufacturing system controls; level switches and level indicators for monitoring and controlling liquids in tanks and vessels; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; environmental monitoring software; apparatus for monitoring gas, fuel, water and heat consumption; apparatus for measuring, monitoring and analyzing fuel, gas and electricity consumption; monitoring apparatus for Internet of things [IoT] enabled devices; optimisation software; fuel regulating apparatus; environmental control software; computer software for use in carbon capture technologies optimization for monitoring, distribution, storage and usage of carbon; computer software for use in carbon capture data collection and analysis.

CLASS 11

Hydrogen generators; hydrogen-generation equipment and components, namely, hydrogen generators, hydrogen purifiers, hydrogen purification membranes, fuel processors, and steam reformers; solar heating panels; solar energy powered heating apparatus; solar thermal collectors [heating]; level controlling valves in tanks; mechanisms for controlling fluid level in tanks [valves]; energy storage plants; heat exchangers for motors, engines, heaters and boilers [other than parts of machines], for use in processing fuel; oxygen concentrators for use with fuel cells used in heating, ventilation, air conditioning, lighting, and power systems for buildings; regulating apparatus for gas pipes; liquid flow regulating apparatus, namely, hydraulic compensators; industrial installations for filtering liquids; heating apparatus for solid, liquid or gaseous fuels; ionization apparatus for the treatment of liquids and gases for industrial, commercial or agricultural use; apparatus and instruments for use in the purification, separation and sterilization of liquids and gases used in the biotechnology, pharmaceutical, medical and biopharmaceutical industries; solar-powered cooling units; mechanisms for controlling fluid level in tanks [valves].

CLASS 37

Installation and maintenance of photovoltaic installations; charging of electric vehicles; recharging services for electric vehicles; installation of energy-saving apparatus; installation of solar energy systems; repair of energy supply installations; advisory services relating to vehicle maintenance; battery charging service for motor vehicles; vehicle maintenance; maintenance and repair of electric vehicles; maintenance and repair of electricity generators; maintenance and repair of energy generating installations; maintenance and repair of motor vehicles and parts thereof; maintenance, servicing and repair of vehicles; maintenance, repair and reconditioning of photovoltaic apparatus and installations; maintenance, servicing and repair of power generating apparatus and installations; installation of renewable energy generation equipment; installation of wiring in accessible geographical

locations for distribution of electricity suitable for electric vehicle recharging stations; natural gas refuelling service for motor vehicles; vehicle battery charging; installation of solar energy systems; emergency servicing of apparatus for supplying electricity; installation of power generating apparatus; fueling of hydrogen gas for vehicles; maintenance of communications equipment; automotive upgrade services, namely, supercharging, turbocharging and performance upgrades of automobiles; charging station services for electric vehicles; construction of energy efficient buildings and structures; construction project management services in the field of construction of renewable energy and energy generation equipment support structures and ancillary structures for supporting meteorological data gathering equipment; installation, maintenance and repair of regulating, monitoring and control apparatus; maintenance and repair of oil and gas storage installations; vehicle fueling services.

CLASS 39

Supply of electricity; electricity supply services; consultancy services relating to the distribution of electricity; distribution and transmission of electricity; distribution of energy; public utility services in the nature of electricity distribution; providing information relating to the distribution of electricity; information and advisory services in relation to the distribution of energy; storage of energy and fuels; rental of electric cars; arrangement of vehicle rental; booking of vehicle rental; leasing of vehicles; parking services for vehicles; providing information relating to vehicle parking services; rental of vehicle parking spaces; reservation services for vehicle rental; car pooling services; car sharing services; providing information relating to car rental services; rental of hydrogen cars; distribution of renewable energy; distribution of energy for heating and cooling buildings; distribution of renewable energy.

CLASS 40

Production of electricity; electricity generation; generation of electricity from solar energy; generation of energy; consultancy services relating to the generation of electrical energy; consultancy services relating to the generation of electrical power; energy production; leasing of energy generating equipment; production of energy; production of electrical power from renewable sources; conversion of waste energy into electricity [energy recycling services]; waste-to-energy generation services; processing of hydrocarbons; processing of hydrocarbon derivatives; rental of energy generating equipment; rental of electric power generators; rental of power-generating equipment; fuel treatment services whereby plants, algae and organisms are used to treat biofuels in the nature of primary, secondary and tertiary alcohols, ethanol, butanol, bio-diesel and hydrogen fuels; fuel refining; fuel processing.

CLASS 42

Advisory services relating to energy efficiency; advisory services relating to the use of energy; energy auditing; programming of energy management software; computer programming for the energy industry; programming of software for e-commerce platforms; research relating to city and smart city planning; analytical services relating to computer programmes; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; research in the field of artificial intelligence; engineering services in the field of reduction of operating costs, fuel blending, waste handling, quality performance of co-products and by-products, and chemical distribution; hosting a website featuring technology that enables users to connect with other people in their neighborhood or city for any number of user-specified reasons, including providing a service or organizing an event; technical data analysis; computer systems design and analysis; greenhouse gas emission measuring and analysis; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [saas]; computer aided scientific and industrial analysis services; design and development of operating system software; computer technical support services, namely, 24/7 service desk or help desk services of diagnosing and troubleshooting of computer software problems and diagnosing computer hardware problems for it infrastructure, operating systems, database systems, and web applications; technical consultancy in the field of energy saving and energy efficiency; design of communication systems; design and development of energy management software; design and development of operating software for accessing and using a cloud computing network; design and development of software in the field of mobile applications; development of computer software application solutions; online provision of web-based applications; computer software consultancy; technological consultancy; server hosting; technological consulting services in the field of alternative energy generation; scientific research and development; technological research; technological planning and consulting services in the field of renewable energy resources; meteorological forecasting; industrial analysis, industrial research and industrial design services; computer programming for the energy industry; conducting research and technical project studies relating to the use of natural energy; cloud computing; cloud hosting provider services; computer programming services; computer programming for data processing and communication systems; providing virtual computer environments through cloud computing; providing temporary use of on-line non-downloadable operating software for accessing and using a cloud

computing network; consulting in the field of cloud computing networks and applications; consultancy in the field of energy-saving; consultancy relating to technological services in the field of power and energy supply; design and development of regenerative energy generation systems; design and development of software for control, regulation and monitoring of solar energy systems; design and development of software for database management; design and development of operating software for computer networks and servers; development of energy and power management systems; energy use and conservation consultancy; engineering consultancy; engineering services in the field of energy technology; engineering services relating to energy supply systems; provision of information concerning research and technical project studies relating to the use of natural energy; research in the field of energy; technological analysis relating to energy and power needs of others; technological consultancy in the fields of energy production and use; platform as a service (paas); programming of software for information platforms on the Internet; software as a service [saas]; software as a service (saas) services featuring computer software for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; providing temporary use of web based cloud-computing software for connecting unlimited devices to a cloud computing platform; computer engineering; computer-aided engineering design and drawing services; engineering consultancy; engineering services in the field of environmental technology; computer software research; product research and development; research in the field of energy; research in the field of environmental conservation; research on building construction or city planning; rental of meters for the recording of energy consumption; design of communication systems; design of communications apparatus; design and development of software for the generation, distribution and storage of sustainable and renewable energy; design and development of software for the reduction of carbon emissions; design and development of software for decarbonisation solutions; design and development of software for the reduction of energy consumption; research in the field of renewal energy; technological consulting services in the field of decarbonisation solutions; computer software development services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; computer software consultancy and advisory services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; consultancy and advisory services in the fields of renewable energy systems development, and the project management [design] of energy generation and supply assets; consultancy and advisory services relating to technological services in the field of demand-side energy resources and assets supply, weather and energy forecasting, and the production of wind and solar energy; website services in the fields of renewable energy and energy asset management, namely hosting and maintaining a website promoting information in the fields of renewable energy and energy asset management; research and development of new products for others; surveying; meteorological information; rental of web servers; rental of computer software; monitoring of computer systems by remote access; computer software design; providing temporary use of non-downloadable computer software in the nature of an online platform and online dashboard for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; platform as a service (paas) featuring computer software platforms for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; software as a service (saas) services featuring software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, all of the foregoing excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; platform as a service (paas) featuring computer software platforms for energy management and optimization; software as a service (saas) services featuring software for energy management and optimization; computer software consultancy and advisory services for energy management and optimization; platform as a service (paas) featuring computer software platforms for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; computer system analysis; computer system design; computer technology consultancy; electronic data storage; information technology [IT] consultancy; providing information on computer technology and programming via a web site; outsource service providers in the field of information technology; platform as a service [paas]; research in the field of environmental protection; provision of scientific information, advice and consultancy in relation to carbon offsetting; technological engineering analysis; computer-aided industrial and scientific analysis; computer aided industrial design, research, testing and analysis services; digital distributed storage; design and development of systems for data input, output, processing, display and storage; environmental monitoring services; monitoring of erosion, pressure, vibration, corrosion, temperature and sedimentation; condition monitoring relating to fluids, oils, fuel and gas; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; electronic monitoring and reporting of pipe systems and tanks using computers and sensors [electronic data collection]; storage system monitoring services [electronic data collection]; providing temporary use of non-downloadable cloud-based software for monitoring energy

consumption and, calculating energy costs; meteorological forecasting services; design, development, maintenance and updating of computer software for process control.
