GENERAL INFORMATION**TRADE MARKS ACT 1976****(Act 175)****PUBLICATION OF APPLICATION FOR REGISTRATION OF TRADE MARKS**

Pursuant to section 27 of the Trade Marks Act 1976, the following applications for registration of trade marks have been accepted and hereby published in Intellectual Property Official Journal according to subregulation 120 (3) of the Trademarks Regulation 2019.

Where an application for registration is accepted subject to any conditions, amendments, modifications or limitations, such conditions, amendments, modifications or limitations shall appear in the publication.

Notice of opposition to an application for registration of a trademark may be filed unless extended at the discretion of the Registrar, within two months from the date of publication accompanied by prescribed fee.

Chromatography columns; Storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production equipment, namely, mixers, electronic controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in combination, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; chromatography systems; apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and

concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification; supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; Laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; a unique noise reduction capture mode in the Image acquisition (control) software offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels & western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion

control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing. Precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; electrically operated combined cooling circulator and thermostatic bath for use in heating and cooling liquids; filters and microporous membranes, holders, housings and supports therefor, none being made of metal; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or without supports for scientific and laboratory use; filters and separators; holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; for computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation; heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; hybridization transfer membranes for non-medical scientific and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory and clinical equipment, namely disposable plastic syringe filters; laboratory and clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely handheld devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes; laboratory equipment, namely, disposable column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; modular biologics manufacturing system used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use; namely supported or reinforced nitrocellulose microporous filters; nucleic acid and protein transfer media, particularly for laboratory and clinical use; plastic labware including cellulose esters, immunoassay and lateral flow membrane therefor; laboratory equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; scientific, medical, biological, laboratory and forensic media, namely,

supporting composite material in the form of media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; software and hardware for analyzing data and automating processes related to biomanufacturing equipment; all included in class 9.
