General Information

1. Trade Marks Journal

This journal is published by the Registry of Trade Marks pursuant to Rule 86A of the Trade Marks Rules. It is published weekly on Fridays, unless otherwise directed by the Registrar.

2. Notice of Opposition

Any person who wishes to oppose any of the marks published may within two months from its publication date file a Notice of Opposition on Form TM11. Reasonable notice should be given to the Applicant beforehand, to provide the Applicant an opportunity to withdraw the application. Failure to give such notice will be taken into account when considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

3. Practice Directions and Circulars

The Registry has ceased our practice of publishing Practice Directions and Circulars in the Trade Marks Journal. Practice Directions and Circulars are available on our website at <https://www.ipos.gov.sg>. If you wish to receive our updates via email, you may subscribe to our mailing list by sending an email to news@ipos.gov.sg and letting us know the subject matter of interest (e.g. Trade Marks).

4. Information Contained in this Journal

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

Class 35

Presentation in communication media of and/or retail services with the following goods: injection moulding machines for processing plasticisable masses, in particular plastic injection moulding machines, machines for the production of prototypes and small series from plastic or other plasticisable materials, in particular in a process for the additive three-

dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling, injection moulding plants comprising injection moulding machines for the production of injection moulded parts, in particular of plastic, accessories for, spare parts for and parts of the aforementioned goods; presentation in communication media of and/or retail services with the following goods: electronic control systems and computer-controlled numerical control systems, data processing, data input and data output devices for use in connection with equipment and control systems for industrial production, information technology devices for the presentation and recording of information, in particular mobile information technology devices for displaying and collection of information, for the operation, maintenance and programming of industrial manufacturing equipment, parts of the aforementioned goods, programs for the industrial production and for production planning, computer programs, especially for industrial production and for production planning, computer programs for machines, in particular for the operation and programming of machines, the calculation of piece times of machines, computer programs for the operation of control systems for industrial production and/or for the operation of equipment and programs for industrial production, host computer systems (software), in particular for the collection, exchange and archiving of data; presentation of services in communication media, and services relating to the procurement of spare parts for others; procurement services for spare parts, including spare parts for repair of machines, machine accessories and machine control systems, and for repair of failed products or processes on machines, machine accessories and machine control systems for others; all of the above services for injection moulding machines or injection moulding systems, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; services relating to the registration, transcription, writing, compilation or systematic arrangement of written communications and records, as well as the compilation of mathematical or statistical data; services relating to the registration, transcription, writing, compilation or systematic arrangement of written communications and records, as well as to the compilation of mathematical or statistical data; services provided by advertising agencies, as well as distribution of publicity brochures (directly or by post) or the distribution of samples of goods (product samples); all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; presentation in communication media of and/or retail services with the following goods for use in injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: chemical products for industrial purposes, adhesives for industrial purposes, chemical products for the manufacture of products, in particular building materials and supporting materials, plastics in their raw state in all their forms, plastics in powder form, plastics in bulk, plastics as raw

materials, chemical additives for plastics, chemical additions for plastics, plastics in the form of granules, plastics in the form of foam; presentation in communication media of and/or retail services with the following goods for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: terminals for the acquisition, processing and transmission of data, data processing equipment delivering results in real time or otherwise, detection instruments, sensors and detectors, wireless transmitters and receivers, electronic positioning equipment, voice processing systems, computer software for automatic identification, network management and file transfer, software for supply chain management, computer software for the planning and monitoring of machines and business processes, software, apps, application software for use in the implementation of the Internet of Things, parts of the aforementioned goods; presentation in communication media of and/or retail services with the following goods for use in or with injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: plastics for injection moulding, plastics as semi-finished products, plastic fibres, not for textile purposes, recycled plastic material for use in production, goods made of plastics or resins in extruded form for use in manufacturing processes; presentation in communication media of and/or retail services with the following goods for use with injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: materials, not of metal, for construction purposes.

Class 36

Hire purchase or lease purchase financing; insurance services, insurance brokerage services, administration services relating to the conclusion of insurance policies; all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

Class 37

Consulting services relating to the maintenance and repair of machines; consulting services for fault detection and identification of spare parts [maintenance]; all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

Class 40

Surface treatment and surface finishing in the nature of laser and heat treatment; treatment of plastics; 3D printing; plastic injection moulding; custom manufacture by direct metal laser sintering; custom manufacture of moulded components; sample production being custom manufacture for others; metal working, powder injection moulding in the manufacture of a substance or article, all the aforesaid excluding construction work; material treatment in the form of cutting to size, trimming, polishing by grinding or coating with plastics; all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

Class 42

Creation of programs for industrial production and for production planning, in particular for the production and production planning of machine and plant components; installation of updates of computer programs for machines, maintenance of and error correction in computer programs for machines; creation of programs for the operation of machines; development and hosting of a database for the provision of technical information with user examples, documentation, instructions for the operation of machines and computer programs for machines, computing and calculation schemes and media data; provision of technical reports and analysis relating to machine status and process data; prediction of maintenance and repair work [technical planning]; configuration of machines [calibration]; technical consulting services with regard to the operation and configuration of machines and the production process of products to be manufactured on machines; consulting services relating to the programming of machines; technical consulting services relating to machine documentation, machine life cycles and programs for the representation of products to be manufactured on machines; all of the aforementioned services for injection molding machines or injection molding plants, in particular plastic injection molding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; technological consultancy and engineering services in the field of injection moulding technology and the production of prototypes and small series in plastic or other plasticisable materials, in particular with regard to the application and use of the aforementioned goods indicated in Classes 7 and 9 of this international registration.
