## **General Information**

### **1. Trade Marks Journal**

This journal is published by the Registry of Trade Marks pursuant to Rule 86A of the Trade Marks Rules. It is published weekly on Fridays, unless otherwise directed by the Registrar.

### **2. Notice of Opposition**

Any person who wishes to oppose any of the marks published may within two months from its publication date file a Notice of Opposition on Form TM11. Reasonable notice should be given to the Applicant beforehand, to provide the Applicant an opportunity to withdraw the application. Failure to give such notice will be taken into account when considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

### **3. Practice Directions and Circulars**

The Registry has ceased our practice of publishing Practice Directions and Circulars in the Trade Marks Journal. Practice Directions and Circulars are available on our website at <https://www.ipos.gov.sg>. If you wish to receive our updates via email, you may subscribe to our mailing list by sending an email to [news@ipos.gov.sg](mailto:news@ipos.gov.sg) and letting us know the subject matter of interest (e.g. Trade Marks).

### **4. Information Contained in this Journal**

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

## National Applications Published For Opposition Purposes

**Goods and/or Services:**

**Class 09**

Photographic machines and apparatus; cinematographic machines and apparatus; optical machines and apparatus; cameras; in-car cameras; measuring or testing machines and instruments; temperature indicators; accelerometers; hygrometers; speed indicators; measuring or testing machines and instruments for automobiles; in-car sensors; mileage recorders for vehicles; automatic indicators of low pressure in vehicle tires; speed checking apparatus for vehicles; thermostats for vehicles; speedometers; speed indicators; power distribution or control machines and apparatus; rotary converters; phase modifiers; circuit breakers; current rectifiers; battery chargers; inverters; switchboards; battery chargers for automobiles; charging stations for electric vehicles; voltage regulators for vehicles; fuel cells; fuses; fuse boxes; solar batteries; batteries and cells; batteries for automobiles; accumulators [batteries]; electric wires and cables; wire harnesses for automobiles; connectors; telecommunication machines and apparatus; in-car radars; vehicular radio

communication machines and apparatus; radar machines and apparatus; event recorders; navigation apparatus; in-car audio equipment; mobile phones; smartphones; cases for mobile phones and smartphones; neck straps for mobile phones; radio transceivers; global positioning system [gps] apparatus; remote engine starters for automobiles being control apparatus; videocameras [camcorders]; digital assistants in the shape of a watch; electronic equipment, apparatus and their parts; electronic control apparatus and instruments for automobiles; application software; display units for automobiles; electronic display units; computer programs; computers; computer software and computer hardware; integrated circuits; electronic circuits recorded with computer programs; magnetic disks, recorded; usb memories; blank data recording media; eyewear; goggles for sports; sunglasses; helmets.

#### Class 10

Ear plugs [ear protection devices]; medical apparatus and instruments; gloves for medical purposes; ear picks; electric massage apparatus for household purposes.

#### Class 12

Traction engine; ropeways for cargo or freight handling; non-electric prime movers for land vehicles, not including their parts; machine elements for land vehicles; shafts, axles or spindles, machine elements for land vehicles; bearings, machine elements for land vehicles; shaft couplings or connectors, machine elements for land vehicles; power transmissions and gearing, machine elements for land vehicles; shock absorbers, machine elements for land vehicles; springs, machine elements for land vehicles; brakes, machine elements for land vehicles; parachutes; anti-theft alarms for vehicles; wheelchairs; ac motors or dc motors for land vehicles, not including their parts; vessels and their parts and fittings; aircraft and their parts and fittings; railway rolling stock and their parts and fittings; automobiles and their parts and fittings; two-wheeled motor vehicles, bicycles and their parts and fittings; rickshaws; sleighs and sleds [vehicles]; trolleys; carts; horse-drawn carriages; riyakah [two-wheeled carts]; adhesive rubber patches for repairing tubes or tires; baby carriage [prams].

#### Class 14

Precious metals; unwrought precious stones; key rings; charms for key rings; jewellery boxes; trophies [prize cups] of precious metals; commemorative shields of precious metals; ornaments of precious metal in the nature of jewelry; earrings; bracelets; brooches; medals; tie pins; badges of precious metal; necklaces; cufflinks; lapel buttons of precious metals; semi-wrought precious stones and their imitations; shoe ornaments of precious metal; clocks and watches; alarm clocks; stopwatches; wristwatches; watch bands and straps; automobile clocks.

#### Class 16

Pastes and other adhesives for stationery or household purposes; sealing wax; addressing machines; envelope sealing machines for offices; drawing instruments; marking templates;

pencil sharpeners, electric or non-electric; decorators' paintbrushes; containers of paper, for packaging; corrugated cardboard boxes; bags [pouches] of plastics, for packaging; food wrapping plastic film for household purposes; garbage bags of paper for household purposes; garbage bags of plastics for household purposes; paper patterns; tailors' chalk; banners of paper; flags of paper; towels of paper; table napkins of paper; handkerchiefs of paper; shipping tags made of paper; paper and cardboard; toilet paper; Japanese paper [washi]; printing paper; stationery; albums; scrapbooks; fountain pens; writing brushes; stamps [seals]; stamp stands; thumbtacks; bookmarkers; inking pads; stands for pens and pencils; lanyards for holding name cards; pocket memorandum books; writing pads; envelopes; pencils; pens; writing ink; rubber erasers; seals [stationery]; correcting fluid [whiteout]; rulers for stationery and office use; stickers [stationery]; pen cases; clips; note books; bookends; paper knives [letter openers]; printed matter; calendars; magazines [publication]; newspapers; books; photograph stands.

#### Class 18

Handbag frames; purse frames; horseshoes; leather straps; industrial packaging containers of leather; clothing for domestic pets; bags; suitcases; handbags; rucksacks; briefcases; card cases [notecases]; shopping bags; pouches; baggage tags; change purses; key cases; wallets; business card cases; vanity cases, not fitted; umbrellas and their parts; walking sticks; canes; saddlery.

#### Class 21

Floss for dental purposes; unworked or semi-worked glass, not for building; mangers for animals [troughs for livestock]; cosmetic and toilet utensils; toothbrushes, electric; cosmetic and toilet utensils, other than toothbrushes, electric; combs; make-up sponges; nail brushes; shaving brushes; toothbrushes, non-electric; gloves for household purposes; industrial packaging containers of glass or porcelain; kitchen utensils and containers, not including gas water heaters for household use, non-electric cooking heaters for household purposes, kitchen worktops and kitchen sinks; dinnerware, other than knives, forks and spoons; mugs; tumblers; drinking cups; decanters; japanese rice bowls [chawan]; beer mugs; non-electric ice chests for household purposes; drinking flasks; cookware; napkin rings; coffeepots, non-electric; egg cups; chopsticks; toothpicks; toothpick holders; household or kitchen containers; coasters, not of paper or textile; place mats, not of paper or textile; cleaning tools and washing utensils; brooms; mops; flower pots; watering cans; clothes brushes; piggy banks; chemically activated packs for heating food and beverages; chemically activated packs for cooling food and beverages; flower vases; shoe brushes; shoe horns; shoe shine cloths; shoe shine sponges and cloths; shoe-trees [stretchers].

#### Class 25

Clothing; non-japanese style outer clothing; suits; skirts; trousers; smocks; jackets; coats; overcoats; sweaters; shirts for suits; cuffs; overalls; polo shirts; parkas; working clothing;

jumpers; nightwear; pajamas; bath robes; corsets [underclothing]; underwear [underclothing]; brassieres; petticoats; swimwear [bathing suits]; swimming caps [bathing caps]; tee-shirts; camisoles; japanese traditional clothing; sleep masks; aprons [clothing]; socks and stockings other than special sportswear; puttees and gaiters; shawls; scarves [scarfs]; japanese style socks [tabi]; japanese style socks covers [tabi covers]; gloves and mittens [clothing]; neckties; neckerchiefs; bandanas [neckerchiefs]; thermal supporters [clothing]; mufflers [clothing]; ear muffs [clothing]; headgear for wear; nightcaps; uniforms; driving gloves; garters; sock suspenders; suspenders [braces]; waistbands; belts [clothing]; footwear other than special footwear for sports; shoes and boots other than special footwear for sports; sneaker; rain boots; leather shoes; boots other than boots for sports; japanese style wooden clogs [geta]; japanese style sandals [zori]; masquerade costumes; special footwear for sports; clothes for sports; uniforms and stockings [special sportswear]; motorists' clothing; driving shoes; biking shoes; automobile race driving shoes.

**Class 27**

Floor mats for automobiles; bath mats for wash places; tatami mats; floor coverings; wall hangings, not of textile; artificial turf; gymnastic mats; wallpaper; yoga mats.

**Class 28**

Amusement machines and apparatus for use in amusement parks; toys for domestic pets; toys; dolls; toy scooters; toy mobiles; remote-controlled toy vehicles; toy vehicles; toy models; scale model vehicles; controllers for toys; protective films adapted for screens for portable games; drones [toys]; electronic games for the teaching of children; apparatus for electronic games other than those adapted for use with an external display screen or monitor; tricycles for infants [toys]; dice; Japanese dice games [sugoroku]; conjuring apparatus; playing cards; mah-jong; game machines and apparatus; billiard equipment; sports equipment; machines for physical exercises; golf bags with or without wheels; golf clubs; golf gloves; gloves for games; fishing tackle; insect nets [toys]; insect cages [toys]; toy cars.

## Applications Amended After Publication

---

**National Trade Mark No:** T1209847A

**Filing Date:** 11 July 2012

**Classes:** 35 36 39 41 45

**Previously Published in Journal No:** 014/2016

**Original Goods and/or Services:**

**Class 35**

Professional business consultancy relating to relocation policy; advisory services for business management; business management and organisation consultancy; business management assistance; business information; business administration; marketing; marketing research; marketing studies; compilation of statistics; business intelligence services; market benchmarking (evaluation of business organisation practices); relocation services for business; business records management; entry or systemization of information into computer database; computerised file management; data management; office functions; accounting in relation to office expenses management; accounting; book-keeping; personnel management consultancy; career planning services; career management services (other than education and training advice) in relation to relocation programmes; career counselling (employment advice and information) in relation to relocation programmes; career consultancy and advisory services (other than education and training advice) in relation to relocation programmes; career coaching (other than education and training advice); headhunting (personnel recruitment), salary index advisory and related personnel advisory services; provision of business information on labour market employment trends; career assessment (other than education and training advice) in relation to relocation programmes; interview assistance for personnel recruitment; personnel placement and recruitment; business referral to recruitment agencies and consultants; business networking; provision of information, advisory and consulting services relating to the aforesaid.

**Class 36**

Real estate affairs; real estate management; provision of information on leasing and rental of real estate; services rendered in connection with real estate affairs; real estate appraisal; real estate agency services; residential real estate agency services; equity funding; insurance; financial affairs; monetary affairs; provision of information regarding insurance; provision of information regarding financial affairs; provision of information regarding monetary affairs; provision of information, advisory and consultancy services in relation to the aforesaid services; all included in Class 36.

**Class 39**

International moving services (transportation); local moving services (transportation); removal services (transportation); transport; packing and unpacking, wrapping, storage, shipping and delivery of goods; freight forwarding; freighting; transporting furniture and household goods; guarded transport of valuables; courier assistance and guarded transport of artwork; marine transport; parcel delivery; railway transport; warehousing; rental of warehouses; rental of storage containers; boat-storage; loading and unloading of cargoes; travel reservations; transport reservations; transportation logistics; providing consultation relating to transportation and mobility (transport) services; all included in Class 39.

**Class 41**

Education; training; education information; organising exhibition for educational and cultural purposes; vocational guidance (education or training advice); entertainment and recreation information; sporting and cultural activities; career consultancy and advisory services (education or training), solely in relation to relocations of individuals or business; career counselling (education or training), solely in relation to relocations of individuals or business; conducting training programs and debriefing training sessions in the career management and personal hiring fields solely in relation to relocations of individuals or business.

**Class 45**

Immigration consultancy and advisory services for corporations and individuals.

**Amended Goods and/or Services:**

**Class 35**

Professional business consultancy relating to relocation policy; advisory services for business management; business management and organisation consultancy; business management assistance; business information; business administration; marketing; marketing research; marketing studies; compilation of statistics; business intelligence services; market benchmarking (evaluation of business organisation practices); relocation services for business; business records management; entry or systemization of information into computer database; computerised file management; data management; office functions; accounting in relation to office expenses management; accounting; book-keeping; personnel management consultancy; career planning services; career management services (other than education and training advice) in relation to relocation programmes; career counselling (employment advice and information) in relation to relocation programmes; career consultancy and advisory services (other than education and training advice) in relation to relocation programmes; career coaching (other than education and training advice); headhunting (personnel recruitment), salary index advisory and related personnel advisory services; provision of business information on labour market employment trends; career assessment (other than education and training advice) in relation to relocation programmes;

interview assistance for personnel recruitment; personnel placement and recruitment; business referral to recruitment agencies and consultants; business networking; provision of information, advisory and consulting services relating to the aforesaid; all of the aforesaid being in the fields of transportation and storage of goods, and transport and travel reservations for individuals and businesses for relocation purposes; none of the aforesaid being in the fields of tourism, hospitality, restaurant, short term accommodation, entertainment, gambling and casino services.

#### Class 36

Real estate affairs; real estate management; provision of information on leasing and rental of real estate in the fields of transportation and storage of goods, and transport and travel reservations for individuals and businesses for relocation purposes; services rendered in connection with real estate affairs; real estate appraisal; real estate agency services; residential real estate agency services; equity funding; insurance; financial affairs; monetary affairs; provision of information regarding insurance; provision of information regarding financial affairs; provision of information regarding monetary affairs; provision of information, advisory and consultancy services in relation to the aforesaid services; all included in Class 36; none of the aforesaid being in the fields of tourism, hospitality, restaurant, short term accommodation, entertainment, gambling and casino services.

#### Class 39

International moving services (transportation); local moving services (transportation); removal services (transportation); transport; packing and unpacking, wrapping, storage, shipping and delivery of goods; freight forwarding; freighting; transporting furniture and household goods; guarded transport of valuables; courier assistance and guarded transport of artwork; marine transport; parcel delivery; railway transport; warehousing; rental of warehouses; rental of storage containers; boat-storage; loading and unloading of cargoes; travel reservations; transport reservations; transportation logistics; providing consultation relating to transportation and mobility (transport) services; all included in Class 39; all of the aforesaid being in the fields of transportation and storage of goods, and transport and travel reservations for individuals and businesses for relocation purposes; none of the aforesaid being in the fields of tourism, hospitality, restaurant, short term accommodation, entertainment, gambling and casino services.

#### Class 41

Education; training; education information; organising exhibition for educational and cultural purposes; vocational guidance (education or training advice); career consultancy and advisory services (education or training); career counselling (education or training); conducting training programs and debriefing sessions in the career management and personal hiring fields; all of the aforesaid being in the fields of transportation and storage of goods, and transport and travel reservations for individuals and businesses for relocation

purposes; none of the aforesaid being in the fields of tourism, hospitality, restaurant, short term accommodation, entertainment, gambling and casino services.

**Class 45**

Immigration consultancy and advisory services for corporations and individuals; all of the aforesaid being in the fields of transportation and storage of goods, and transport and travel reservations for individuals and businesses for relocation purposes; none of the aforesaid being in the fields of tourism, hospitality, restaurant, short term accommodation, entertainment, gambling and casino services.

**Original Goods and/or Services:**

**Class 09**

Computer software; software for the planning, integration and optimization of Smart City applications; big data management software; operating system software and programs; network operating systems programs; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface e-commerce software; computer software applications, downloadable; database management software; computer software platforms, recorded or downloadable; application software; downloadable

computer software for remote monitoring and analysis; computer software for use in migrating between different computer network operating systems; artificial intelligence software and apparatus; software for the integration of artificial intelligence and machine learning in the field of Big Data; software applications [apps] for Internet of Things [IoT] enabled devices; artificial intelligence and machine learning software; artificial intelligence software for analysis; predictive maintenance software; interactive software based on artificial intelligence; artificial intelligence software for vehicles and driverless cars; capacitors; embedded operating software; communication software; computer software platforms; Internet of Things [IoT] gateway; computer programs for Internet of Things [IoT] enabled devices; intelligent gateways for real-time data analysis; mobile operating systems; robot operating system [ROS]; environmentally friendly automation systems, namely, embedded operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; computer software for energy management and optimization; accumulators; accumulators, electric, for vehicles; accumulator charging apparatus; batteries for electric vehicles; batteries; batteries; batteries; battery charging devices for motor vehicles; charging stations for electric vehicles; charging apparatus; charging counters; conductor rails for the supply of electrical power to vehicles; conductor wires for the supply of electrical power to vehicles; electric batteries for powering electric vehicles; electric batteries for vehicles; electric battery chargers; installations for data processing; starter batteries for vehicles; vehicle batteries; computing apparatus; monitoring devices for monitoring battery performance characteristics; downloadable applications for use with mobile devices; software and applications for mobile devices; apparatus for managing energy supplies; apparatus for monitoring electrical energy consumption; devices for measuring energy; electric control devices for energy management; energy control devices; computer software for orchestrating storage and consumption of energy; photovoltaic apparatus for converting solar radiation to electrical energy; computer hardware, namely, computer hardware used for the generation, distribution, and storage of sustainable and renewable energy; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing renewable assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing assets; downloadable cloud-based software; cloud network monitoring software; real-time data processing apparatus; real-Time Collaborative Editing [RTCE] platforms [software] network and communication hubs; test stations for hydrogen generators; automated process control system, namely, micro-processor based hardware and software used to monitor the status

of industrial processes, namely power generation, electrical distribution and oil and gas processing; photovoltaic apparatus and installations for generating solar electricity; photovoltaic cells; solar cells; solar collectors for electricity generation; solar-powered rechargeable batteries; solar panels for electricity generation; electrical recharging apparatus; chargers for batteries; apparatus for monitoring electrical components; computer apparatus for computer aided engineering; engineering design software; measuring apparatus for use in electrical engineering; power supply apparatus [batteries]; apparatus for the supply of electricity; apparatus for electricity distribution; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; electric converters; electricity meters; voltage meters; meters for measuring current; power meters; metering instruments; apparatus for remote meter reading; capacitance meters; capacitive voltage transformers; apparatus for communication; communication devices; electrical communications apparatus adapted for use on vehicles; vehicular communication apparatus; central processing units (processors); couplers (data processing equipment); electro-dynamic apparatus for the remote control of signals current rectifiers; inverters [electricity]; meteorological instruments; surveying apparatus and instruments; electric batteries; electrolyzers; thermostat control apparatus; graphical user interface software; computer software for playing back information about energy consumption and air quality; computer hardware, namely, computer hardware used for the reduction of carbon emissions; computer hardware, namely, computer hardware used for the reduction of energy consumption; computer hardware, namely, computer hardware used for decarbonisation equipment; computer hardware for use in the reduction of carbon footprint and overall environmental footprint of buildings; computer software for use in the reduction of carbon footprint and overall environmental footprint of buildings; solar panels for the production of electricity; solar batteries; automatic solar tracking sensors; electric sensors; gas sensors; computers; computer software and display instruments for monitoring energy consumption, temperature, opening of windows, lighting and air quality; computer servers; measuring, detecting, monitoring and controlling devices; integrated computerized system for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information related to technical data and chemical analyses; smart manufacturing system controls; level switches and level indicators for monitoring and controlling liquids in tanks and vessels; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; environmental monitoring software; apparatus for monitoring gas, fuel, water and heat consumption; apparatus for measuring, monitoring and analyzing fuel, gas and electricity consumption; monitoring apparatus for Internet of Things [IoT] enabled devices; optimisation software; fuel regulating apparatus; environmental control software; computer software for use in carbon capture technologies optimization for monitoring, distribution, storage and usage of

carbon; computer software for use in carbon capture data collection and analysis.

Class 42

Advisory services relating to energy efficiency; advisory services relating to the use of energy; energy auditing; programming of energy management software; computer programming for the energy industry; computer programming for the energy industry; Programming of software for e-commerce platforms; research relating to city and Smart City planning; analytical services relating to computer programmes; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; research in the field of artificial intelligence; engineering services in the field of reduction of operating costs, fuel blending, waste handling, quality performance of co-products and by-products, and chemical distribution; providing a web site featuring technology that enables users to connect with other people in their neighborhood or city for any number of user-specified reasons, including providing a service or organizing an event; technical data analysis; computer systems design and analysis; greenhouse gas emission measuring and analysis; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [SaaS]; computer aided scientific and industrial analysis services; design and development of operating system software; computer technical support services, namely, 24/7 service desk or help desk services for IT infrastructure, operating systems, database systems, and web applications; technical consultancy in the field of energy saving and energy efficiency; design of communication systems; design of communication systems; design and development of energy management software; design and development of operating software for accessing and using a cloud computing network; design and development of software in the field of mobile applications; development of computer software application solutions; online provision of web-based applications; computer software consultancy; technological consultancy; server hosting; technological consulting services in the field of alternative energy generation; scientific research and development; technological research; technological planning and consulting services in the field of renewable energy resources; meteorological forecasting; industrial analysis, industrial research and industrial design services; conducting research and technical project studies relating to the use of natural energy; cloud computing; cloud hosting provider services; computer programming services; computer programming for data processing and communication systems; providing virtual computer environments through cloud computing; providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; consulting in the field of cloud computing networks and applications; consultancy in the field of energy-saving; consultancy relating to technological services in the field of power and energy supply; design and development of regenerative

energy generation systems; design and development of software for control, regulation and monitoring of solar energy systems; design and development of software for database management; design and development of operating software for computer networks and servers; development of energy and power management systems; energy use and conservation consultancy; engineering consultancy; engineering consultancy; engineering services in the field of energy technology; engineering services relating to energy supply systems; provision of information concerning research and technical project studies relating to the use of natural energy; research in the field of energy; research in the field of energy; technological analysis relating to energy and power needs of others; technological consultancy in the fields of energy production and use; platform as a service (PaaS); programming of software for information platforms on the Internet; software as a service [SaaS]; software as a service (SaaS) services featuring computer software for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; providing temporary use of web based cloud-computing software for connecting unlimited devices to a cloud computing platform; computer engineering; computer-aided engineering design and drawing services; engineering services in the field of environmental technology; computer software research; product research and development; research in the field of environmental conservation; research on building construction or city planning; rental of meters for the recording of energy consumption; design of communications apparatus; design and development of software for the generation, distribution and storage of sustainable and renewable energy; design and development of software for the reduction of carbon emissions; design and development of software for decarbonisation solutions; design and development of software for the reduction of energy consumption; research in the field of renewal energy; technological consulting services in the field of decarbonisation solutions; computer software development services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; computer software consultancy and advisory services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; consultancy and advisory services in the fields of renewable energy systems development, and the project management [design] of energy generation and supply assets; consultancy and advisory services relating to technological services in the field of demand-side energy resources and assets supply, weather and energy forecasting, and the production of wind and solar energy; website services in the fields of renewable energy and energy asset management, namely hosting of a website containing information in the fields of renewable energy and energy asset management; research and development of new products for others; surveying; meteorological information; rental of web servers; rental of computer software; monitoring of computer systems by remote access; computer software design; Providing temporary use of non-downloadable computer

software in the nature of an online platform and online dashboard for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; Platform as a service (PAAS) featuring computer software platforms for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; software as a service (SAAS) services featuring software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, all of the foregoing excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; platform as a service (PAAS) featuring computer software platforms for energy management and optimization; software as a service (SAAS) services featuring software for energy management and optimization; computer software consultancy and advisory services for energy management and optimization; platform as a service (PaaS) featuring computer software platforms for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; computer system analysis; computer system design; computer technology consultancy; electronic data storage; information technology [IT] consultancy; providing information on computer technology and programming via a web site; outsource service providers in the field of information technology; platform as a service [PaaS]; research in the field of environmental protection; provision of scientific information, advice and consultancy in relation to carbon offsetting; technological engineering analysis; computer-aided industrial and scientific analysis; computer aided industrial design, research, testing and analysis services; Digital Distributed Storage; design and development of systems for data input, output, processing, display and storage; environmental monitoring services; monitoring of erosion, pressure, vibration, corrosion, temperature and sedimentation; condition monitoring relating to fluids, oils, fuel and gas; electronic monitoring and reporting of pipe systems and tanks using computers and sensors [electronic data collection]; storage system monitoring services [electronic data collection]; Providing temporary use of non-downloadable cloud-based software for monitoring energy consumption and , calculating energy costs; Meteorological forecasting services; design, development, maintenance and updating of computer software for process control.

**Amended Goods and/or Services:**

**Class 09**

Computer software; software for the planning, integration and optimization of Smart City applications; big data management software; operating system software and programs; network operating systems programs; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface e-commerce software; computer software applications, downloadable; database management software; computer software platforms, recorded or downloadable; application software; downloadable

computer software for remote monitoring and analysis; computer software for use in migrating between different computer network operating systems; artificial intelligence software and apparatus; software for the integration of artificial intelligence and machine learning in the field of Big Data; software applications [apps] for Internet of Things [IoT] enabled devices; artificial intelligence and machine learning software; artificial intelligence software for analysis; predictive maintenance software; interactive software based on artificial intelligence; artificial intelligence software for vehicles and driverless cars; capacitors; embedded operating software; communication software; computer software platforms; Internet of Things [IoT] gateway; computer programs for Internet of Things [IoT] enabled devices; intelligent gateways for real-time data analysis; mobile operating systems; robot operating system [ROS]; environmentally friendly automation systems, namely, embedded operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; computer software for energy management and optimization; accumulators; accumulators, electric, for vehicles; accumulator charging apparatus; batteries for electric vehicles; batteries; battery charging devices for motor vehicles; charging stations for electric vehicles; charging apparatus; charging counters; conductor rails for the supply of electrical power to vehicles; conductor wires for the supply of electrical power to vehicles; electric batteries for powering electric vehicles; electric batteries for vehicles; electric battery chargers; installations for data processing; starter batteries for vehicles; vehicle batteries; computing apparatus; monitoring devices for monitoring battery performance characteristics; downloadable applications for use with mobile devices; software and applications for mobile devices; apparatus for managing energy supplies; apparatus for monitoring electrical energy consumption; devices for measuring energy; electric control devices for energy management; energy control devices; computer software for orchestrating storage and consumption of energy; photovoltaic apparatus for converting solar radiation to electrical energy; computer hardware, namely, computer hardware used for the generation, distribution, and storage of sustainable and renewable energy; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing renewable assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; downloadable cloud-based software; cloud network monitoring software; real-time data processing apparatus; real-Time Collaborative Editing [RTCE] platforms [software] network and communication hubs; test stations for hydrogen generators; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial processes, namely power generation,

electrical distribution and oil and gas processing; photovoltaic apparatus and installations for generating solar electricity; photovoltaic cells; solar cells; solar collectors for electricity generation; solar-powered rechargeable batteries; solar panels for electricity generation; electrical recharging apparatus; chargers for batteries; apparatus for monitoring electrical components; computer apparatus for computer aided engineering; engineering design software; measuring apparatus for use in electrical engineering; power supply apparatus [batteries]; apparatus for the supply of electricity; apparatus for electricity distribution; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; electric converters; electricity meters; voltage meters; meters for measuring current; power meters; metering instruments; apparatus for remote meter reading; capacitance meters; capacitive voltage transformers; apparatus for communication; communication devices; electrical communications apparatus adapted for use on vehicles; vehicular communication apparatus; central processing units (processors); couplers (data processing equipment); electro-dynamic apparatus for the remote control of signals current rectifiers; inverters [electricity]; meteorological instruments; surveying apparatus and instruments; batteries; electric batteries; electrolyzers; thermostat control apparatus; graphical user interface software; computer software for playing back information about energy consumption and air quality; computer hardware, namely, computer hardware used for the reduction of carbon emissions; computer hardware, namely, computer hardware used for the reduction of energy consumption; computer hardware, namely, computer hardware used for decarbonisation equipment; computer hardware for use in the reduction of carbon footprint and overall environmental footprint of buildings; computer software for use in the reduction of carbon footprint and overall environmental footprint of buildings; solar panels for the production of electricity; batteries; solar batteries; automatic solar tracking sensors; electric sensors; gas sensors; computers; computer software and display instruments for monitoring energy consumption, temperature, opening of windows, lighting and air quality; computer servers; measuring, detecting, monitoring and controlling devices; integrated computerized system for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information related to technical data and chemical analyses; smart manufacturing system controls; level switches and level indicators for monitoring and controlling liquids in tanks and vessels; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; environmental monitoring software; apparatus for monitoring gas, fuel, water and heat consumption; apparatus for measuring, monitoring and analyzing fuel, gas and electricity consumption; monitoring apparatus for Internet of Things [IoT] enabled devices; optimisation software; fuel regulating apparatus; environmental control software; computer software for use in carbon capture technologies optimization for monitoring, distribution, storage and usage of carbon; computer software for use in carbon capture data

collection and analysis; none of the foregoing goods being for surgical purposes.

Class 42

Advisory services relating to energy efficiency; advisory services relating to the use of energy; energy auditing; programming of energy management software; computer programming for the energy industry; Programming of software for e-commerce platforms; research relating to city and Smart City planning; analytical services relating to computer programmes; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; research in the field of artificial intelligence; engineering services in the field of reduction of operating costs, fuel blending, waste handling, quality performance of co-products and by-products, and chemical distribution; providing a web site featuring technology that enables users to connect with other people in their neighborhood or city for any number of user-specified reasons, including providing a service or organizing an event; technical data analysis; computer systems design and analysis; greenhouse gas emission measuring and analysis; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [SaaS]; computer aided scientific and industrial analysis services; design and development of operating system software; computer technical support services, namely, 24/7 service desk or help desk services for IT infrastructure, operating systems, database systems, and web applications; technical consultancy in the field of energy saving and energy efficiency; design of communication systems; design and development of energy management software; design and development of operating software for accessing and using a cloud computing network; design and development of software in the field of mobile applications; development of computer software application solutions; online provision of web-based applications; computer software consultancy; technological consultancy; server hosting; technological consulting services in the field of alternative energy generation; scientific research and development; technological research; technological planning and consulting services in the field of renewable energy resources; meteorological forecasting; industrial analysis, industrial research and industrial design services; computer programming for the energy industry; conducting research and technical project studies relating to the use of natural energy; cloud computing; cloud hosting provider services; computer programming services; computer programming for data processing and communication systems; providing virtual computer environments through cloud computing; providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; consulting in the field of cloud computing networks and applications; consultancy in the field of energy-saving; consultancy relating to technological services in the field of power and energy supply; design and development of regenerative energy generation systems; design and development of software for control, regulation and monitoring of solar energy systems; design and

development of software for database management; design and development of operating software for computer networks and servers; development of energy and power management systems; energy use and conservation consultancy; engineering consultancy; engineering services in the field of energy technology; engineering services relating to energy supply systems; provision of information concerning research and technical project studies relating to the use of natural energy; research in the field of energy; technological analysis relating to energy and power needs of others; technological consultancy in the fields of energy production and use; platform as a service (PaaS); programming of software for information platforms on the Internet; software as a service [SaaS]; software as a service (SaaS) services featuring computer software for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; providing temporary use of web based cloud-computing software for connecting unlimited devices to a cloud computing platform; computer engineering; computer-aided engineering design and drawing services; engineering consultancy; engineering services in the field of environmental technology; computer software research; product research and development; research in the field of energy; research in the field of environmental conservation; research on building construction or city planning; rental of meters for the recording of energy consumption; design of communication systems; design of communications apparatus; design and development of software for the generation, distribution and storage of sustainable and renewable energy; design and development of software for the reduction of carbon emissions; design and development of software for decarbonisation solutions; design and development of software for the reduction of energy consumption; research in the field of renewal energy; technological consulting services in the field of decarbonisation solutions; computer software development services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; computer software consultancy and advisory services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; consultancy and advisory services in the fields of renewable energy systems development, and the project management [design] of energy generation and supply assets; consultancy and advisory services relating to technological services in the field of demand-side energy resources and assets supply, weather and energy forecasting, and the production of wind and solar energy; website services in the fields of renewable energy and energy asset management, namely hosting of a website containing information in the fields of renewable energy and energy asset management; research and development of new products for others; surveying; meteorological information; rental of web servers; rental of computer software; monitoring of computer systems by remote access; computer software design; Providing temporary use of non-downloadable computer software in the nature of an online platform and online dashboard for analyzing data for optimization of equipment

performance and power plant production in the wind and solar energy industries; Platform as a service (PAAS) featuring computer software platforms for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; software as a service (SAAS) services featuring software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, all of the foregoing excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; platform as a service (PAAS) featuring computer software platforms for energy management and optimization; software as a service (SAAS) services featuring software for energy management and optimization; computer software consultancy and advisory services for energy management and optimization; platform as a service (PaaS) featuring computer software platforms for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; computer system analysis; computer system design; computer technology consultancy; electronic data storage; information technology [IT] consultancy; providing information on computer technology and programming via a web site; outsource service providers in the field of information technology; platform as a service [PaaS]; research in the field of environmental protection; provision of scientific information, advice and consultancy in relation to carbon offsetting; technological engineering analysis; computer-aided industrial and scientific analysis; computer aided industrial design, research, testing and analysis services; Digital Distributed Storage; design and development of systems for data input, output, processing, display and storage; environmental monitoring services; monitoring of erosion, pressure, vibration, corrosion, temperature and sedimentation; condition monitoring relating to fluids, oils, fuel and gas; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; electronic monitoring and reporting of pipe systems and tanks using computers and sensors [electronic data collection]; storage system monitoring services [electronic data collection]; Providing temporary use of non-downloadable cloud-based software for monitoring energy consumption and , calculating energy costs; Meteorological forecasting services; design, development, maintenance and updating of computer software for process control; none of the foregoing services being for surgical purposes.

**Applicant/Proprietor Details:**

Envision Digital International Pte. Ltd.  
1 HARBOURFRONT AVENUE  
#17-01 KEPPEL BAY TOWER  
SINGAPORE 098632

**Agent Details/Address for Service:**

YUSARN AUDREY LLC

4 SHENTON WAY  
#14-03 SGX CENTRE II  
SINGAPORE 068807

**Original Goods and/or Services:**

Class 09

Network management computer software; data processing installations incorporating expandable architecture; computer software for application and database integration; interfaces between application programs and firmware on real-time computers; database management software; downloadable computer software for remote monitoring and analysis; real-time data processing apparatus; inventory software; computer software for use in carbon capture technologies optimization for monitoring, distribution, storage and usage of carbon; computer software for use in carbon capture data collection and analysis; Downloadable computer software for blockchain technology; software for greenhouse gas accounting computer software; software for the planning, integration and optimization of Smart City applications; big data management software; operating system software and programs; network operating systems programs; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface e-commerce software; computer software applications, downloadable; computer software platforms, recorded or downloadable; application software; computer software for use in migrating between different computer network operating systems; artificial intelligence software and apparatus; software for the integration of artificial intelligence and machine learning in the field of Big Data; software applications [apps] for Internet of Things [IoT] enabled devices; artificial intelligence and machine learning software; artificial intelligence software for analysis; predictive maintenance software; interactive software based on artificial intelligence; embedded operating software; communication software; computer software platforms; Internet of Things [IoT] gateway; computer programs for Internet of Things [IoT] enabled devices; intelligent gateways for real-time data analysis; mobile operating systems; robot operating system [ROS]; environmentally friendly automation systems, namely, embedded

operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; computer software for energy management and optimization; installations for data processing; computing apparatus; downloadable applications for use with mobile devices; software and applications for mobile devices; apparatus for managing energy supplies; apparatus for monitoring electrical energy consumption; devices for measuring energy; electric control devices for energy management; energy control devices; computer software for orchestrating storage and consumption of energy; photovoltaic apparatus for converting solar radiation to electrical energy; computer hardware, namely, computer hardware used for the generation, distribution, and storage of sustainable and renewable energy; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing renewable assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing assets; downloadable cloud-based software; cloud network monitoring software; real-Time Collaborative Editing [RTCE] platforms [software] network and communication hubs; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial processes, namely power generation, electrical distribution and oil and gas processing; apparatus for monitoring electrical components; computer apparatus for computer aided engineering; engineering design software; measuring apparatus for use in electrical engineering; power supply apparatus [batteries]; apparatus for the supply of electricity; apparatus for electricity distribution; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; metering instruments; apparatus for remote meter reading; apparatus for communication; communication devices; electrical communications apparatus adapted for use on vehicles; vehicular communication apparatus; central processing units (processors); couplers (data processing equipment); electro-dynamic apparatus for the remote control of signals current rectifiers; graphical user interface software; computer software for playing back information about energy consumption and air quality; computer hardware, namely, computer hardware used for the reduction of carbon emissions; computer hardware, namely, computer hardware used for the reduction of energy consumption; computer hardware, namely, computer hardware used for decarbonisation equipment; computer hardware and software for use in the reduction of carbon footprint and overall environmental footprint of buildings; computer software and display instruments for monitoring energy consumption, temperature, opening of windows, lighting and air quality; measuring, detecting, monitoring and controlling devices; integrated

computerized system for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information related to technical data and chemical analyses; smart manufacturing system controls; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; environmental monitoring software; apparatus for monitoring gas, fuel, water and heat consumption; apparatus for measuring, monitoring and analyzing fuel, gas and electricity consumption; monitoring apparatus for Internet of Things [IoT] enabled devices; optimisation software; fuel regulating apparatus; environmental control software; Internet of Things [IoT] gateways; computer application software for use in implementing the Internet of Things [IoT]; sensors for real time data input and output apparatus.

#### Class 42

Research in the reduction of carbon emissions; design and development of energy management software; development of energy and power management systems; calibration [measuring]; preparation of technical projects, technical research and consultancy services in the field of carbon offsetting; providing scientific information, advice and consultancy relating to carbon offsetting; providing scientific information, advice and consultancy relating to carbon offsetting; certification services for the energy efficiency of buildings; computer security services in the nature of administering digital certificates; energy auditing; programming of energy management software; design and development of computer software for logistics, supply chain management and e-business portals; programming of software for database management; programming of software for inventory management; design and development of software for inventory management; technological analysis relating to energy and power needs of others; technological consultancy in the fields of energy production and use; technological consulting services in the field of alternative energy generation; energy use and conservation consultancy; design and development of regenerative energy generation systems; consultancy and information services relating to information technology architecture and infrastructure; design and development of computer hardware and software architecture; computer systems integration services; integration of computer systems and networks; development of measuring and testing methods; technical measuring and testing; design of measurement systems; technical advice in connection with energy-saving measures; design and development of energy distribution networks; design and development of data processing software; design and development of software for importing and managing data; data storage via blockchain; data authentication via blockchain; data authentication via blockchain; advisory services relating to energy efficiency; advisory services relating to the use of energy; environmental monitoring services; consultancy in the field of energy-saving; design and development of software for control, regulation and monitoring of solar energy

systems; computer programming for the energy industry; computer programming for the energy industry; programming of software for e-commerce platforms; research relating to city and Smart City planning; analytical services relating to computer programmes; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; research in the field of artificial intelligence; engineering services in the field of reduction of operating costs, fuel blending, waste handling, quality performance of co-products and by-products, and chemical distribution; providing a web site featuring technology that enables users to connect with other people in their neighbourhood or city for any number of user-specified reasons, including providing a service or organizing an event; technical data analysis; computer systems design and analysis; greenhouse gas emission measuring and analysis; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [SaaS]; computer aided scientific and industrial analysis services; design and development of operating system software; computer technical support services for IT infrastructure, operating systems, database systems and web applications, provided via 24/7 service desk or help desk; technical consultancy in the field of energy saving and energy efficiency; design of communication systems; design of communication systems; design and development of operating software for accessing and using a cloud computing network; design and development of software in the field of mobile applications; development of computer software application solutions; online provision of web-based applications; computer software consultancy; technological consultancy; server hosting; scientific research and development; technological research; technological planning and consulting services in the field of renewable energy resources; meteorological forecasting; industrial analysis, industrial research and industrial design services; conducting research and technical project studies relating to the use of natural energy; cloud computing; cloud hosting provider services; computer programming services; computer programming for data processing and communication systems; providing virtual computer environments through cloud computing; providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; consulting in the field of cloud computing networks and applications; consultancy relating to technological services in the field of power and energy supply; design and development of software for database management; design and development of operating software for computer networks and servers; engineering consultancy; engineering consultancy; engineering services in the field of energy technology; engineering services relating to energy supply systems; provision of information concerning research and technical project studies relating to the use of natural energy; research in the field of energy; platform as a service (PaaS); programming of software for information platforms on the Internet; software as a service [SaaS]; software as a service (SaaS) services

featuring computer software for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; providing temporary use of web based cloud-computing software for connecting unlimited devices to a cloud computing platform; computer engineering; computer-aided engineering design and drawing services; engineering services in the field of environmental technology; computer software research; product research and development; research in the field of environmental conservation; research on building construction or city planning; rental of meters for the recording of energy consumption; design of communications apparatus; design and development of software for the generation, distribution and storage of sustainable and renewable energy; design and development of software for the reduction of carbon emissions; design and development of software for decarbonisation solutions; design and development of software for the reduction of energy consumption; research in the field of renewal energy; technological consulting services in the field of decarbonisation solutions; computer software development services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; computer software consultancy and advisory services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; consultancy and advisory services in the fields of renewable energy systems development, and the project management [design] of energy generation and supply assets; consultancy and advisory services relating to technological services in the field of demand-side energy resources and assets supply, weather and energy forecasting, and the production of wind and solar energy; website services in the fields of renewable energy and energy asset management, namely hosting of a website containing information in the fields of renewable energy and energy asset management; research and development of new products for others; surveying; meteorological information; rental of web servers; rental of computer software; monitoring of computer systems by remote access; computer software design; Providing temporary use of non-downloadable computer software in the nature of an online platform and online dashboard for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; Platform as a service (PAAS) featuring computer software platforms for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; software as a service (SAAS) services featuring software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, all of the foregoing excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; platform as a service (PAAS) featuring computer software platforms for energy management and optimization; software as a service (SAAS) services featuring software for energy management and optimization; computer software consultancy and

advisory services for energy management and optimization; platform as a service (PaaS) featuring computer software platforms for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud based platform; computer system analysis; computer system design; computer technology consultancy; electronic data storage; information technology [IT] consultancy; providing information on computer technology and programming via a web site; outsource service providers in the field of information technology; platform as a service [PaaS]; research in the field of environmental protection; provision of scientific information, advice and consultancy in relation to carbon offsetting; technological engineering analysis; computer-aided industrial and scientific analysis; computer aided industrial design, research, testing and analysis services; digital distributed storage; design and development of systems for data input, output, processing, display and storage; monitoring of erosion, pressure, vibration, corrosion, temperature and sedimentation [environmental monitoring services]; condition monitoring relating to fluids, oils, fuel and gas for quality control purposes; electronic monitoring and reporting of pipe systems and tanks using computers and sensors [quality control]; storage system monitoring services [machine condition monitoring]; providing temporary use of non downloadable cloud-based software for monitoring energy consumption and calculating energy costs; meteorological forecasting services; design, development, maintenance and updating of computer software for process control; certification of data via blockchain; technical project studies in the field of carbon offsetting; technical research in the field of carbon offsetting and consultancy relating thereto; recording data relating to energy consumption in buildings; prediction measurement of steady state exhaust emissions; research into the reduction of carbon emissions; development of computer programs for analysis of exhaust gas emissions.

**Amended Goods and/or Services:**

**Class 09**

Network management computer software; data processing installations incorporating expandable architecture; computer software for application and database integration; interfaces between application programs and firmware on real-time computers; database management software; downloadable computer software for remote monitoring and analysis; real-time data processing apparatus; inventory software; computer software for use in carbon capture technologies optimization for monitoring, distribution, storage and usage of carbon; computer software for use in carbon capture data collection and analysis; Downloadable computer software for blockchain technology; software for greenhouse gas accounting computer software; software for the planning, integration and optimization of Smart City applications; big data management software; operating system software and programs; network operating systems programs; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface e-commerce software; computer software applications, downloadable; computer software platforms, recorded or

downloadable; application software; computer software for use in migrating between different computer network operating systems; artificial intelligence software and apparatus; software for the integration of artificial intelligence and machine learning in the field of Big Data; software applications [apps] for Internet of Things [IoT] enabled devices; artificial intelligence and machine learning software; artificial intelligence software for analysis; predictive maintenance software; interactive software based on artificial intelligence; embedded operating software; communication software; computer software platforms; Internet of Things [IoT] gateway; computer programs for Internet of Things [IoT] enabled devices; intelligent gateways for real-time data analysis; mobile operating systems; robot operating system [ROS]; environmentally friendly automation systems, namely, embedded operating systems and pc based software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; computer software for energy management and optimization; installations for data processing; computing apparatus; downloadable applications for use with mobile devices; software and applications for mobile devices; apparatus for managing energy supplies; apparatus for monitoring electrical energy consumption; devices for measuring energy; electric control devices for energy management; energy control devices; computer software for orchestrating storage and consumption of energy; photovoltaic apparatus for converting solar radiation to electrical energy; computer hardware, namely, computer hardware used for the generation, distribution, and storage of sustainable and renewable energy; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing renewable assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; computer software for the operational overview and control of devices and the production of analytics for the purpose of managing assets; downloadable cloud-computing software for connecting unlimited devices to a cloud computing platform; downloadable cloud-based software; cloud network monitoring software; real-Time Collaborative Editing [RTCE] platforms [software] network and communication hubs; automated process control system, namely, micro-processor based hardware and software used to monitor the status of industrial processes, namely power generation, electrical distribution and oil and gas processing; apparatus for monitoring electrical components; computer apparatus for computer aided engineering; engineering design software; measuring apparatus for use in electrical engineering; power supply apparatus [batteries]; apparatus for the supply of electricity; apparatus for electricity distribution; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; metering instruments; apparatus for remote meter reading; apparatus for communication; communication devices; electrical communications apparatus adapted for use on vehicles; vehicular communication apparatus; central

processing units (processors); couplers (data processing equipment); electro-dynamic apparatus for the remote control of signals current rectifiers; graphical user interface software; computer software for playing back information about energy consumption and air quality; computer hardware, namely, computer hardware used for the reduction of carbon emissions; computer hardware, namely, computer hardware used for the reduction of energy consumption; computer hardware, namely, computer hardware used for decarbonisation equipment; computer hardware and software for use in the reduction of carbon footprint and overall environmental footprint of buildings; computer software and display instruments for monitoring energy consumption, temperature, opening of windows, lighting and air quality; measuring, detecting, monitoring and controlling devices; integrated computerized system for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information related to technical data and chemical analyses; smart manufacturing system controls; pipeline communication systems for transferring data over oil, gas, water and heat distribution pipeline networks, comprised of computer hardware, software, modems and communication cables; computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; environmental monitoring software; apparatus for monitoring gas, fuel, water and heat consumption; apparatus for measuring, monitoring and analyzing fuel, gas and electricity consumption; monitoring apparatus for Internet of Things [IoT] enabled devices; optimisation software; fuel regulating apparatus; environmental control software; Internet of Things [IoT] gateways; computer application software for use in implementing the Internet of Things [IoT]; sensors for real time data input and output apparatus; none of the foregoing goods being for surgical purposes.

#### Class 42

Research in the reduction of carbon emissions; design and development of energy management software; development of energy and power management systems; calibration [measuring]; preparation of technical projects, technical research and consultancy services in the field of carbon offsetting; providing scientific information, advice and consultancy relating to carbon offsetting; certification services for the energy efficiency of buildings; computer security services in the nature of administering digital certificates; energy auditing; programming of energy management software; design and development of computer software for logistics, supply chain management and e-business portals; programming of software for database management; programming of software for inventory management; design and development of software for inventory management; technological analysis relating to energy and power needs of others; technological consultancy in the fields of energy production and use; technological consulting services in the field of alternative energy generation; energy use and conservation consultancy; design and development of regenerative energy generation systems; consultancy and information services relating to information technology architecture and infrastructure; design and development of computer hardware and software architecture; computer systems

integration services; integration of computer systems and networks; development of measuring and testing methods; technical measuring and testing; design of measurement systems; technical advice in connection with energy-saving measures; design and development of energy distribution networks; design and development of data processing software; design and development of software for importing and managing data; data storage via blockchain; data authentication via blockchain; advisory services relating to energy efficiency; advisory services relating to the use of energy; environmental monitoring services; consultancy in the field of energy-saving; design and development of software for control, regulation and monitoring of solar energy systems; computer programming for the energy industry; programming of software for e-commerce platforms; research relating to city and Smart City planning; analytical services relating to computer programmes; computer monitoring service which tracks application software performance, performs periodic maintenance and provides reports and alerts concerning such performance [quality control]; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; research in the field of artificial intelligence; engineering services in the field of reduction of operating costs, fuel blending, waste handling, quality performance of co-products and by-products, and chemical distribution; providing a web site featuring technology that enables users to connect with other people in their neighbourhood or city for any number of user-specified reasons, including providing a service or organizing an event; technical data analysis; computer systems design and analysis; greenhouse gas emission measuring and analysis; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [SaaS]; computer aided scientific and industrial analysis services; design and development of operating system software; computer technical support services for IT infrastructure, operating systems, database systems and web applications, provided via 24/7 service desk or help desk; technical consultancy in the field of energy saving and energy efficiency; design of communication systems; design and development of operating software for accessing and using a cloud computing network; design and development of software in the field of mobile applications; development of computer software application solutions; online provision of web-based applications; computer software consultancy; technological consultancy; server hosting; scientific research and development; technological research; technological planning and consulting services in the field of renewable energy resources; meteorological forecasting; industrial analysis, industrial research and industrial design services; computer programming for the energy industry; conducting research and technical project studies relating to the use of natural energy; cloud computing; cloud hosting provider services; computer programming services; computer programming for data processing and communication systems; providing virtual computer environments through cloud computing; providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; consulting in the field of cloud computing networks and applications; consultancy relating to technological services in the field of power and energy supply; design and development of

software for database management; design and development of operating software for computer networks and servers; engineering consultancy; engineering services in the field of energy technology; engineering services relating to energy supply systems; provision of information concerning research and technical project studies relating to the use of natural energy; research in the field of energy; platform as a service (PaaS); programming of software for information platforms on the Internet; software as a service [SaaS]; software as a service (SaaS) services featuring computer software for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud-based platform; providing temporary use of web based cloud-computing software for connecting unlimited devices to a cloud computing platform; computer engineering; computer-aided engineering design and drawing services; engineering consultancy; engineering services in the field of environmental technology; computer software research; product research and development; research in the field of environmental conservation; research on building construction or city planning; rental of meters for the recording of energy consumption; design of communication systems; design of communications apparatus; design and development of software for the generation, distribution and storage of sustainable and renewable energy; design and development of software for the reduction of carbon emissions; design and development of software for decarbonisation solutions; design and development of software for the reduction of energy consumption; research in the field of renewal energy; technological consulting services in the field of decarbonisation solutions; computer software development services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; computer software consultancy and advisory services for software used in connection with the management of devices that generate energy and devices that consume energy, the management of weather and energy forecasting, and the management of devices that generate and consume wind and solar energy; consultancy and advisory services in the fields of renewable energy systems development, and the project management [design] of energy generation and supply assets; consultancy and advisory services relating to technological services in the field of demand-side energy resources and assets supply, weather and energy forecasting, and the production of wind and solar energy; website services in the fields of renewable energy and energy asset management, namely hosting of a website containing information in the fields of renewable energy and energy asset management; research and development of new products for others; surveying; meteorological information; rental of web servers; rental of computer software; monitoring of computer systems by remote access; computer software design; Providing temporary use of non-downloadable computer software in the nature of an online platform and online dashboard for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; Platform as a service (PAAS) featuring computer software platforms for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries; software as a service

(SAAS) services featuring software for analyzing data for optimization of equipment performance and power plant production in the wind and solar energy industries, all of the foregoing excluding computer software for surveillance or video monitoring for purposes of point-of-sale, business management and marketing data collection and analysis; platform as a service (PAAS) featuring computer software platforms for energy management and optimization; software as a service (SAAS) services featuring software for energy management and optimization; computer software consultancy and advisory services for energy management and optimization; platform as a service (PaaS) featuring computer software platforms for management of data analytics and for operating a digital marketplace connecting unlimited devices to a cloud based platform; computer system analysis; computer system design; computer technology consultancy; electronic data storage; information technology [IT] consultancy; providing information on computer technology and programming via a web site; outsource service providers in the field of information technology; platform as a service [PaaS]; research in the field of environmental protection; provision of scientific information, advice and consultancy in relation to carbon offsetting; technological engineering analysis; computer-aided industrial and scientific analysis; computer aided industrial design, research, testing and analysis services; digital distributed storage; design and development of systems for data input, output, processing, display and storage; monitoring of erosion, pressure, vibration, corrosion, temperature and sedimentation [environmental monitoring services]; condition monitoring relating to fluids, oils, fuel and gas for quality control purposes; computer monitoring service which tracks hardware performance and processes and sends out historical reports and alerts [quality control]; electronic monitoring and reporting of pipe systems and tanks using computers and sensors [quality control]; storage system monitoring services [machine condition monitoring]; providing temporary use of non downloadable cloud-based software for monitoring energy consumption and calculating energy costs; meteorological forecasting services; design, development, maintenance and updating of computer software for process control; certification of data via blockchain; data authentication via blockchain; providing scientific information, advice and consultancy relating to carbon offsetting; technical project studies in the field of carbon offsetting; technical research in the field of carbon offsetting and consultancy relating thereto; recording data relating to energy consumption in buildings; prediction measurement of steady state exhaust emissions; research into the reduction of carbon emissions; development of computer programs for analysis of exhaust gas emissions; none of the foregoing services being for surgical purposes.
