Machines, namely machines for humidifying tobacco and tobacco products, filling machines, machines for handling material to be conveyed, machines for the pharmaceutical industry, machines for applying codes on pharmaceutical products and pharmaceutical packagings, machines for processing of filtering materials for tobacco products, machines for picking up goods, machines for loading and unloading goods, machines for filling cartridges for electronic smoking equipment, machines for inserting prospectuses in packagings, machines for depalletising goods, product labelling machines, machines for gripping goods, machines for lifting goods, machines for palletising goods, machines for sorting pharmaceutical products and in particular for sorting tablets, dragees and capsules, machines for transporting pharmaceutical products, pharmaceutical containers and packagings, machines for transporting goods, machines for filling electronic cigarettes, machines for the labelling and printing of containers and packaging, machines for manufacturing and filling inhalers and/or components thereof, machines for manufacturing and filling smokers' articles, machines for manufacturing electronic cigarettes and parts thereof, machines for manufacturing tissue paper products, machines for manufacturing paper products, machines for manufacturing pharmaceutical products, machines for manufacturing toilet paper, machines for manufacturing drinking straws, machines for manufacturing vaporizers, machines for manufacturing packagings for pharmaceutical products, machines for producing cigarettes, machines for producing cigarillos, machines for producing cigars, machines for the commissioning of goods, machines for cleaning pharmaceutical containers, machines for processing tissue papers, machines for processing paper, machines for processing tobacco leaves, mixing machines, cross belt sorter machines, rack operating machines, cutting machines, sifting machines, sorting machines, tobacco cutting machines and tobacco processing machines; machine tools; power operated tools; motors, other than for land vehicles; propulsion mechanisms, other than for land vehicles; machine coupling and transmission components (except for land vehicles); machines and components thereof for the tobacco processing and cigarette and cigar industry; machines for the treatment of tobacco; machines for the manufacture of filters for tobacco products; conveyors [machines]; packaging machines; machines for manufacturing paper, including machines for manufacturing cardboard, tissue and non-woven material; machines and machine apparatus for processing plastics; die-cutting machines; die-stamping machines; machines for the graphic industry, especially printing machines; machines for processing print products; stapling presses [other than for surgical or stationery use]; stacking machines [other than fork-lift trucks]; printing machines; palletizers; palletising robots (machines); electric discharge machines; laser machines; tool grinding machines; production grinding machines; sorting machines for tobacco products and cigarette filters.

CLASS 9

Scientific, research, navigation, surveying, photographic, film, audio-visual, optical, weighing, measuring, signalling, detection, testing, checking, life saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling the distribution and use of electricity; apparatus and instruments for recording, transmission, reproduction or processing of sound, images or data; recorded media; downloadable media; computer software; blank digital or analogue recording and storage media; computers; computer peripheral devices; electronic publications; databases; material testing and measuring instruments and machines; sensors; optical control apparatus; metal detectors; lasers, not for medical purposes; electric apparatus for commutation as well as distribution consoles [electricity] and control cabinets; electrical and electronic controls and control installations consisting thereof; thermometers, not for medical purposes; camcorders; counters; measuring apparatus for tobacco products and cigarette filters; chips [integrated circuits].

CLASS 12

Vehicles; namely automated guided vehicles, rail-guided vehicles and fork lift trucks; apparatus for locomotion by air, namely drones.

CLASS 16

Paper; cardboard; printed matter; bookbinding material; photographs [printed]; stationery; office requisites, except furniture; adhesives for stationery or household purposes; drawing materials; artists' materials; paintbrushes; instructional and teaching materials; foils and bags of plastic for wrapping and packaging; printing fonts; printing blocks.

CLASS 37

Building construction; installation and repair services relating to machines for humidifying tobacco and tobacco products, filling machines, machines for handling material to be conveyed, machines for the pharmaceutical industry, machines for applying codes on pharmaceutical products and pharmaceutical packaging, machines for processing of filtering materials for tobacco products, machines for picking up goods, machines for loading and unloading goods, machines for filling cartridges for electronic smoking equipment, machines for inserting prospectuses in packagings, machines for depalletising goods, product labelling machines, machines for gripping goods, machines for lifting goods, machines for palletising goods, machines for sorting pharmaceutical products and in particular for sorting tablets, dragees and capsules, machines for transporting pharmaceutical products, pharmaceutical containers and packagings, machines for transporting goods, machines for filling electronic cigarettes, machines for the labelling and printing of containers and packaging, machines for manufacturing and filling inhalers and/or components thereof, machines for manufacturing and filling smokers' articles, machines for manufacturing electronic cigarettes and parts thereof, machines for manufacturing tissue paper products, machines for manufacturing paper products, machines for manufacturing pharmaceutical products, machines for manufacturing toilet paper, machines for manufacturing drinking straws, machines for manufacturing vaporizers, machines for manufacturing packaging for pharmaceutical products, machines for producing cigarettes, machines for producing cigarillos, machines for producing cigars, machines for the commissioning of goods, machines for cleaning pharmaceutical containers, machines for processing tissue papers, machines for processing paper, machines for processing tobacco leaves, mixing machines, cross belt sorter machines, rack operating machines, cutting machines, sifting machines, sorting machines, tobacco cutting machines, tobacco processing machines and external and internal thread grinding machines, banding machines, belt conveyors, pneumatic transporters, conveyor belts, conveying chains, conveyors, transporters, bobbin splicing and changeover machines, printing machines, plunge grinding machines, electric discharge machines, filter attachment machines, staplers, machines for manufacturing hygiene products and hygienic paper products, machines for manufacturing paper, machines for manufacturing paper goods, high-speed grinding machines, power operated tools, machine coupling and transmission components, agricultural implements, laser machines, mechanical conveyor belts for loading machines with goods and articles for further processing, mechanical tray fillers and dischargers, machines for the graphics industry, machines and installations consisting thereof for treating and processing tobacco, machines and mechanical apparatus for processing cardboard, tissue or plastic, machines and mechanical apparatus for manufacturing and/or processing flat material cuts, folded box cuts, envelopes, mailing bags, labels, sanitary articles, tissue articles and household cloths, machines and machines parts for the food, paper, cardboard and hygienic goods processing industries, machines and machines parts for the tobacco processing, cigarette and cigar industries, machines for manufacturing packaging materials, machines for arranging and aligning packaged goods, machines for manufacturing filters for tobacco products, machines for processing print products, material roll replacement devices, engines, palletising robots, palletising machines, polygon grinding machines, embossing machines, production grinding machines, groove grinding machines, grinding machines, laser machining machines, sorting machines for tobacco products and cigarette filters, stamping presses, stacking machines, propulsion mechanisms, vehicles for use on land, universal cylindrical grinding machines, vending machines, packaging machines, roll grinding machines, machine tools, tool grinding machines, scientific, research, navigation, surveying, photographic, film, audio-visual, optical, weighing, measuring, signalling, detection, testing, checking, life saving and teaching apparatus and instruments, apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling the distribution and use of electricity, apparatus and instruments for recording, transmission, reproduction or processing of sound, images or data, computers, computer peripheral devices, material testing and measuring instruments and machines, sensors, optical control apparatus, metal detectors, lasers, weighing machines, electric apparatus for commutation, control panels and control cabinets, electrical and electronic controls, material testing instruments, devices, apparatus and machines, quantity indicators, measuring instruments and apparatus, temperature indicators, thermometers, camcorders, counters, measuring and sorting instruments for tobacco products and cigarette filters, chips [integrated circuits], devices and installations for lighting, heating, cooling, steam generating, cooking, drying, ventilating and water supply as well as sanitary purposes, vehicles, apparatus for locomotion

by land, air or water, furniture, containers for storage or transport as well as industrial robots for appliances relating to the movement and transport of goods.

CLASS 42

Scientific and technological services and research and design relating thereto; industrial analysis; industrial research; industrial design; quality control; authentication services; design and development of computer hardware and software; engineering services; information technology [IT] engineering; technical research projects and studies; design, development and servicing of computer software; advisory services relating to computer programming; preparation of data processing programmes; surveying; mechanical research; technical project planning, products development and technological consultancy; updating, rental and servicing of computer software; technical project management in the field of IT; software as a service (SaaS); rental of computers, computer software and web servers; design of program and database systems for data processing; implementation of IT programs on networks; server administration for software-based systems; technical consultation services in the field of packaging technology and packaging design; services of a packaging designer; quality control of pharmaceutical products; conducting medical studies for pharmaceuticals; development of pharmaceutical preparations and medicines; research on the subject of pharmaceuticals; technological consultancy in the field of the packaging of pharmaceutical products.

CLASS 7

Injection moulding machines for processing plasticisable masses, in particular plastic injection moulding machines; machines for producing prototypes and small series from plastic or other plasticisable materials, in particular in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; injection moulding plants comprising injection moulding machines for producing injection moulded parts, in particular from plastic; parts of the aforementioned goods.

CLASS 9

Electronic control systems and computer-controlled numerical control systems, electronic control devices and electronic monitoring instruments as special devices and instruments for injection moulding machines, in particular for plastic injection moulding machines or for machines for the production of prototypes and small series of plastic or other plasticisable materials; programmed components for interactive control devices and monitoring instruments as special devices and instruments for the control and/or operation of injection moulding machines, in particular of plastic injection moulding machines or of machines for the production of prototypes and small series of plastic or other plasticisable materials; computer software [stored] for controlling injection moulding machines, in particular plastic injection moulding machines or machines for producing prototypes and small series made of plastic or other plasticisable materials; scientific, photographic, optical, weighing, measuring, signalling, control apparatus and instruments; devices for recording, transmitting and reproducing sound and images; computer programs, in particular for industrial production and for production planning; computer programs for machines, in particular for operating and programming machines, for calculating piece times of machines; computer programs for operating control systems for industrial production and/or for operating equipment and programs for industrial production; interface software; computer interfaces; information technology equipment and audiovisual equipment; data communication equipment; remote monitoring equipment; recording equipment; audiovisual equipment, equipment for processing digital signals; electrical remote control equipment; wireless radio transmission equipment; host computer systems [software], in particular for recording, exchanging and archiving data; data processing, data input and data output devices for use in connection with devices and controls for industrial production; information technology devices for the representation and

acquisition of information, in particular mobile information technology devices for the representation and acquisition of information, for the operation, maintenance and programming of devices for industrial production, parts of the aforementioned goods; terminals for the collection, processing and transmission of data; data processing equipment delivering results in real time or otherwise; detection instruments; sensors and detectors; wireless transmitters and receivers; electronic positioning equipment; voice processing systems; computer software for automatic identification, network management and file transfer; supply chain management software; computer software for planning and monitoring machinery and business processes; software; apps; application software for use in implementing the Internet of Things; parts of the aforementioned goods; all of the aforementioned goods for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

CLASS 17

Plastics for injection moulding; plastics as semi-finished products; plastic fibres, not for textile purposes; reprocessed plastic material for use in production; goods made of plastics or resins in extruded form for use in manufacturing processes; all of the aforementioned goods for use in or with injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

CLASS 35

Presentation in communication media of and/or retail services with the following goods: injection moulding machines for processing plasticisable masses, in particular plastic injection moulding machines, machines for the production of prototypes and small series from plastic or other plasticisable materials, in particular in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling, injection moulding plants comprising injection moulding machines for the production of injection moulded parts, in particular of plastic, accessories for, spare parts for and parts of the aforementioned goods; presentation in communication media of and/or retail services with the following goods: electronic control systems and computer-controlled numerical control systems, data processing, data input and data output devices for use in connection with equipment and control systems for industrial production, information technology devices for the presentation and recording of information, in particular mobile information technology devices for displaying and collection of information, for the operation, maintenance and programming of industrial manufacturing equipment, parts of the aforementioned goods, programs for the industrial production and for production planning, computer programs, especially for industrial production and for production planning, computer programs for machines, in particular for the operation and programming of machines, the calculation of piece times of machines, computer programs for the operation of control systems for industrial production and/or for the operation of equipment and programs for industrial production, host computer systems (software), in particular for the collection, exchange and archiving of data; presentation of services in communication media, and bringing together a variety of services for the benefit of others, so that consumers can easily compare and purchase these services, namely: services relating to the configuration of machines, services relating to the operation and installation of machines and the production process of products to be manufactured on machines, machine accessories, control systems for machines and programs for machines, training in and workshops on the use and maintenance of machines, training in and workshops on computer programs for the control of machines, services relating to the programming, operation, maintenance and servicing of machines, services relating to the identification and procurement of spare parts, services relating to the provision of machine documentation, machine life cycles and programs for the presentation of parts, creation of programs for industrial production and for production planning, in particular the manufacture and production planning of machine and plant components, installation of updates of computer programs for machines, maintenance of and error correction in computer programs for machines, services in connection with the operation of machines and computer programs for the operation of machines, services in connection with the provision of a database concerning in particular user examples, documentation, instructions for the operation of machines and computer programs for machines, computing and calculation schemes, media data, such as in particular photographs [printed], films, animations, presentations, services in connection with the provision and evaluation of machine condition and process data, services relating to the prediction of maintenance and repair work; procurement services for spare parts, repair of machines, machine accessories and machine control systems, and other troubleshooting applied to repair failed products or processes on machines, machine accessories and machine control systems; all of the above services for injection moulding machines or injection moulding systems, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; services relating to the registration, transcription, writing, compilation or systematic arrangement of written communications and records, as well as the compilation of mathematical or statistical data; services relating to the registration, transcription, writing, compilation

or systematic arrangement of written communications and records, as well as to the compilation of mathematical or statistical data; services provided by advertising agencies, as well as services such as the distribution of brochures (directly or by post) or the distribution of samples of goods (product samples); all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; presentation in communication media of and/or retail services with the following goods for use in injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; chemical products for industrial purposes, adhesives for industrial purposes, chemical products for the manufacture of products, in particular building materials and supporting materials, plastics in their raw state in all their forms, plastics in powder form, plastics in bulk, plastics as raw materials, chemical additives for plastics, chemical additions for plastics, plastics in the form of granules, plastics in the form of foam; presentation in communication media of and/or retail services with the following goods for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: terminals for the acquisition, processing and transmission of data, data processing equipment delivering results in real time or otherwise, detection instruments, sensors and detectors, wireless transmitters and receivers, electronic positioning equipment, voice processing systems, computer software for automatic identification, network management and file transfer, software for supply chain management, computer software for the planning and monitoring of machines and business processes, software, apps, application software for use in the implementation of the Internet of Things, parts of the aforementioned goods; presentation in communication media of and/or retail services with the following goods for use in or with injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: plastics for injection moulding, plastics as semi-finished products, plastic fibres, not for textile purposes, recycled plastic material for use in production, goods made of plastics or resins in extruded form for use in manufacturing processes; presentation in communication media of and/or retail services with the following goods for use with injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling: materials, not of metal, for construction purposes.

CLASS 36

Hire purchase or lease purchase financing; insurance services, insurance brokerage services, and services relating to the conclusion of insurance policies; all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

CLASS 37

Consulting services relating to the maintenance and repair of machines; consulting services for fault detection and identification of spare parts [maintenance]; all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

CLASS 40

Services relating to the treatment of materials by surface treatment, surface finishing, customised surface treatment, 3D printing, plastic injection moulding, metal working, powder injection moulding in the manufacture of a substance or article, all the aforesaid excluding construction work; services relating to cutting to size, trimming, polishing by grinding or coating with plastics; all of the aforementioned services for injection moulding machines or injection moulding plants, in particular plastic injection moulding machines, and for use in a process for additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling.

CLASS 42

Creation of programs for industrial production and for production planning, in particular for the production and production planning of machine and plant components; installation of updates of computer programs for machines, maintenance of and error correction in computer programs for machines; creation of programs for the operation of machines; creation and provision of technical information in the form of a database with user examples, documentation, instructions for the operation of machines and computer programs for machines, computing and calculation schemes, media data; provision of evaluation relating to development of machines status and process data; prediction of

maintenance and repair work [technical planning]; configuration of machines [calibration]; technical consulting services with regard to the operation and configuration of machines and the production process of products to be manufactured on machines; consulting services relating to the programming of machines; technical consulting services relating to the provision of machine documentation, machine life cycles and programs for the representation of products to be manufactured on machines; all of the aforementioned services for injection molding machines or injection molding plants, in particular plastic injection molding machines, and for use in a process for the additive three-dimensional shaping of objects, in particular stereolithography, rapid prototyping and rapid tooling; technological consultancy and engineering services in the field of injection moulding technology and the production of prototypes and small series in plastic or other plasticisable materials, in particular with regard to the application and use of the aforementioned goods in classes 7 and 9.
