International Registrations Filed Under The Madrid Protocol Published For Opposition Purposes	53

General Information

1. Trade Marks Journal

This journal is published by the Registry of Trade Marks pursuant to Rule 86A of the Trade Marks Rules. It is published weekly on Fridays, unless otherwise directed by the Registrar.

2. Notice of Opposition

Any person who wishes to oppose any of the marks published may within two months from its publication date file a Notice of Opposition on Form TM11. Reasonable notice should be given to the Applicant beforehand, to provide the Applicant an opportunity to withdraw the application. Failure to give such notice will be taken into account when considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

3. Practice Directions and Circulars

The Registry has ceased our practice of publishing Practice Directions and Circulars in the Trade Marks Journal. Practice Directions and Circulars are available on our website at <https://www.ipos.gov.sg>. If you wish to receive our updates via email, you may subscribe to our mailing list by sending an email to news@ipos.gov.sg and letting us know the subject matter of interest (e.g. Trade Marks).

4. Information Contained in this Journal

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

International Registration No: 1366137

Date of Protection in Singapore: 03 May 2021

Classes: 09 35 38 39 42

Goods and/or Services:

Class 09

Computer software and hardware allowing to search and determine the location of goods, objects, people, places, events, buildings and points of interests (pois); location-based software applications; location-aware software applications; computer software and hardware providing public transports timetables and routes; computer software and hardware providing traffic and parking information; computer software and hardware

providing navigation information; computer software and hardware providing map information; computer software and hardware providing travel information, tourist information, entertainment and education information, weather information, shopping information, social and live events information, points of interest (pois) information, sporting events information, cultural events information, food and drink information; computer software and hardware providing health, fitness and well-being information; computer software and hardware providing employment information; computer software and hardware allowing to listen to music, to read out electronic messages, to chat and to browse on the internet; computer software and hardware providing price information; computer software and hardware allowing online payment and payment at distance; downloadable software in the nature of a mobile application for displaying and sharing a user's location and finding, locating, and interacting with other users; computer software and hardware related to global positioning systems, maps, digital diaries, electronic agendas, online blogging and social messaging; vision recognition software; geo-localisation software; faces recognition software; location recognition software; buildings and objects recognition software; digital maps; global positioning system apparatus; navigation apparatus for vehicles (on-board computers); navigational instruments; satellite navigational apparatus; optical, weighing and measuring sensors; audio sensors; tactile sensors; location, positioning, motion and pressure sensors; humidity sensors; sensor emulators; maps-driven software applications; application programming interfaces (apis); application programming interface (api) delivering dynamic data; software development tools; magnetic data carriers, recording discs, other than pre-recorded cds and dvds containing music or movies; compact discs, dvds and other digital recording media, other than pre-recorded cds and dvds containing music or movies; data processing equipment; software development tools, namely software development software and software development digital documentation and guides; software development software used to create and use digital maps and databases; computer software for use in updating, displaying and manipulating data; computer software for use in location-based services; computer software for use in mapping services; mapping software applications; computer software allowing users, developers and businesses to create, customize, share, consume and use digital maps; software applications and hardware enabling the user to obtain location-related information; computer software and hardware for use in autonomous control, driving or navigation of vehicles, aircraft and watercraft; computer software and hardware allowing users, developers and businesses to obtain, share, consume and use real-time data and information of goods, objects, people, places, events, buildings and points of interests (pois) in connection with control, driving or navigation of vehicles, aircraft and watercraft; integrated or add-on electronic driver assistance systems comprising computer software and hardware for land vehicles, aircraft and watercraft, including collision and accident alerts, automated lighting, adaptive cruise control, automated braking, incorporated gps, traffic and weather information supply, correct lane formation and blind spots revelation.

Class 35

Location-based advertising services; advertising services; compilation and systemization of information and data into computer databases; compilation of statistics; on-line advertising on a computer network; presentation of goods on communication media, for retail purposes; rental of advertising space; rental of advertising time on communication media; sales promotion for others; computerized on-line retail store services in the field of software applications for use with computers, mobile phones, smart phones, tablets, spectacles, watches, household equipment and other electronic devices; providing fuel prices information.

Class 38

Providing access to a collection of computer software by means of global computer information networks; providing access to a database of computer software; providing access to an online platform containing a collection of computer software; providing access to an online platform containing a collection of maps; mobile telecommunications services, these services not being cable and satellite television broadcasting services, and not being transmission of movies and television series and programs via the internet, mobile devices, or similar technology; transmission of digital files; transmission of messages and images; providing access to databases; providing access to a collection data by means of global computer information networks; providing access to an online platform containing a collection of data and pictures.

Class 39

Global positioning system navigation services; transport, traffic and travel information services; providing tourist travel information services; locating of goods, places, buildings, objects and people for transportation purposes via an online application; providing direction and route information for travel purposes; places search services, namely for locating the geographic position of a place and in the field of transportation, traffic, navigation and travel information; physical storage of electronically-stored data or documents; autonomous driverless transportation services.

Class 42

Design and development of computer hardware and software; computer programming; providing on-line (non-downloadable) software for displaying and sharing a user's location and finding, locating, and interacting with other users; providing on-line [non-downloadable] location-based software; providing on-line [non-downloadable] location-aware software; providing on-line [non-downloadable] map-based software; providing information relating to computer software and hardware, information technology, meteorology and weather from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to maps-driven and location-based software applications

from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to software for use as an application programming interface (api) and to software development tools from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to software applications for social networking services from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to software applications for fitness and health services from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing technical information in the field of computer software and software applications development from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing technical information in the field of software development tools, api's (application program interface) from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to software applications for public transports timetables and routes from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to software applications for traffic and parking information from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to software applications for navigation, travel and maps from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing information relating to search engines from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing technological information relating to sensors from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing technological information relating to electronic devices from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing technological information relating to mobile electronic devices from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; providing technological information relating to wearable electronic devices from searchable indexes and databases, including text, maps, electronic documents, databases, graphic and audio visual information, by means of global computer networks; conversion of data or documents from physical to electronic media; data conversion of computer programs and

data [not physical conversion]; services for the design of maps for others; hosting computer sites [web sites]; hosting a web site featuring technology that allows users to create, customize, share, consume and use digital software maps; providing temporary use of on-line non-downloadable software for use as an application programming interface (api); providing temporary use of on-line non-downloadable software development tools; software as a service [saas]; providing weather information; mapping services; providing on-line [non-downloadable] software for autonomous control, driving or navigation of vehicles, aircraft and watercraft; providing on-line [non-downloadable] software allowing users, developers and businesses to obtain, share, consume and use real-time data and information of goods, objects, people, places, events, buildings and points of interests (pois) in connection with control, driving or navigation of vehicles, aircraft and watercraft; providing on-line [non-downloadable] software for integrated or add-on electronic driver assistance for land vehicles, aircraft and watercraft, including collision and accident alerts, automated lighting, adaptive cruise control, automated braking, incorporated gps, traffic and weather information supply, correct lane formation and blind spots revelation.
