Chemical products, preparations and substances for use in science and industry; Papers (chemically treated or containing chemicals); Litmus paper; Sensitized papers; Modified and chemically treated glass in fiber form; Silica (chemically treated); Cellulose powders; Chemically treated cellulose; Ion-exchange materials; Buffer solutions; All for filtration, separation, analysis and testing in laboratories, industry, environmental and medical testing and research; Biochemicals, chemicals and chemical products for laboratory, scientific and medical research, biological processing and the production of pharmaceuticals, namely, buffers for cell cultures and chromatography, cell growth media and sera, proteins and amino acids, media components, namely, amino acids, sera, chemical and biochemical additives, nutritional media for maintenance and growth of cells in culture, namely, classical, sera-free,

chemically-defined and stem-cell media, growth media, reagents, buffers for cell cultures and chromatography, and distilled water; Deionized water for laboratory, scientific and medical research; Biological reagents to maintain embryonic stem cells and/or embryos in in-vitro culture for in-vitro scientific and medical research use; Cell culture reagents for scientific research, medical research, and the production of pharmaceuticals; Purified water for scientific research, medical research, and the production of pharmaceuticals, namely, water for injection; Eukaryotic cell nutrition media and sera; Cell culture media for scientific, laboratory and research use; Chemical nucleation preparations for scientific use; Chemical preparations for industrial and scientific purposes; Chemical preparations for use in chromatography; Chemical products and preparations for life science purposes; Chemical products for in-vitro use in analytical tests and in analytical processes; Chemical products for in-vitro use in biochemical separation; Chemical products for separation of molecules for industrial and scientific use; Chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; Silicon coated silica colloids; Chemical products for use in biological and biochemical research; Chemical products for in vitro use in research and in biochemistry; Chemical products for use in gel filtration and in the separation of biomolecules; Chemical substances for in vitro laboratory use; Chemical products and substances, all for in vitro research and biotechnological purposes; None of the aforementioned goods for use in agriculture, horticulture and forestry; Chemical products for use with medical science; Chemical products for laboratory use for in vitro analysis and/or testing; Chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in-vitro research, analysis and/or testing, biochemical research use; Chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; Chemical reagents and substances for analyses (other than for medical or veterinary purposes); Chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; Chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; Chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; Chemicals and chemical products for purification purposes; Premade buffer concentrates for purification of proteins; Chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; Enzymes; Chemicals and chemical reagents for protein and proteome analysis; Biochemical and biological preparations for use in industry, science and research; Radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; Gases and gas mixtures for industrial, research and scientific purposes; Chemical kits comprising a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; Chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; Chemical substances for use in performing analyses; Preparations for diagnosis for scientific or research purposes; Dyes for scientific or research purposes; Fluorescent dyes for labelling nucleotides and proteins; Fluorescent labels for nucleotides and proteins; Chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; Chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; Sorbents, elution solvents and buffer solutions; Chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; Fluorescent reagents; Scintillants; Films and photosensitive materials, papers and plates; Films for use in autoradiography, fluorography or light detection techniques; Sensitised films and chemical preparations and reagents for use therewith; Film emulsions, developers, fixers and sensitisers; Fixing baths; Radioactive and non-radioactive preparations for scientific or research purposes; Chemical reagents, preparations and gels for use in electrophoresis; Protein preparations; Protein molecular weight markers for in vitro scientific and research use; Non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; Chemicals for chromatography media; Chemical products for use in separation and purification; Chemicals that facilitate the separation of mixtures of organic or biological materials; Chromatography chemicals; Chemicals for scientific use, namely beads as microcarriers; Chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; Chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; In particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; Unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; Manures; Fire extinguishing compositions; Tempering and soldering preparations; Chemical substances for preserving foodstuffs; Tanning substances; Adhesives used in industry; Kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S- transferase-tagged recombinant proteins; Prepared microtitre plates containing chromatographic substances; Chemicals, namely agarose for use in the purification of proteins for in vitro use; Chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; Chromatography chemicals and media; Chromatography media for purification of monoclonal antibodies; High molecular chemical substances for research and industrial purposes, namely

microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; Laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; Laboratory reagents, namely, silica beads for scientific and research; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; Polymers being chemical compounds for industrial use in the purification of chemical substances; Process chromatography media for large scale purification of monoclonal antibodies; Reagent kits for DNA and RNA sequencing for use in genomic research; Reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research use; Sample preparations of nucleic acids using silica- based membranes; Scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; All for the collection, transportation, storage and analysis of samples and specimens; Serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; Resins designed and used in biopharmaceutical manufacturing; Process chromatography membranes used in biopharmaceutical manufacturing; Genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes.
