Telecommunication apparatus in the form of jewelry; Home automation hubs; Smart home hubs; Foldable smartphones; Mobile phone screen protectors; Mobile phone ring holders; Mobile phone ring stands; Holders adapted for mobile telephones and smartphones; In-car telephone handset cradles; Dashboard mats adapted for holding mobile telephones and smartphones; Computer network routers; Frequency extenders; Missile warning systems; Autonomous navigation systems for ships; Cases for smartphones incorporating a keyboard; Lanyards for cell phones; Gimbals for smartphones; Acoustic conduits; Phonograph records; Sound recording discs; Coin-operated musical automata [juke boxes]; Juke boxes, musical; Demagnetizing apparatus for magnetic tapes; Tape recorders; Magnetic tapes; Cabinets for loudspeakers; Tone arms for record players; Sound recording carriers; Monitoring apparatus, other than for medical purposes; Diaphragms [acoustics]; Loudspeakers; Record players; Cleaning apparatus for phonograph records; Cleaning apparatus for sound recording discs; Sound recording strips; Audio- and video-receivers; Coin-operated mechanisms for television sets; Megaphones; Microphones; Sound transmitting apparatus; Sound recording apparatus; Sound reproduction apparatus; Needles for record players; Styli for record players; Television apparatus; Teleprompters; Speed regulators for record players; Videotapes; Apparatus for changing record player needles; Head cleaning tapes [recording]; Video recorders; Horns for loudspeakers; Compact discs [audio-video]; Acoustic couplers; Juke boxes for computers; Camcorders; Cassette players; Compact disc players; Video cassettes; Personal stereos; Headphones; DVD players; Portable media players; Digital photo frames; Electronic book readers; Baby monitors; Video baby monitors; Electric and electronic effects units for musical instruments; Audio interfaces; Equalisers [audio apparatus]; Equalizers [audio apparatus]; Subwoofers; Virtual reality headsets; Audio mixers; Security surveillance robots; Rearview cameras for vehicles; Wearable video display monitors; Wah-wah pedals; Ear pads for headphones; Earpieces for remote communication; Head-up display apparatus for vehicles; Smart speakers; Wearable speakers; Thin film speakers; Wireless speaker microphones; Headsets; Headsets for playing video games; Musical instrument digital interface controllers being audio interfaces; Portable speakers; Effects pedals for guitars; Humanoid robots having communication and learning functions for assisting and entertaining people; Video mixing desks; Enlarging apparatus [photography]; Close-up lenses; Frames for photographic transparencies; Cinematographic cameras; Darkrooms [photography]; Drying racks [photography]; Apparatus for editing cinematographic film; Shutter releases [photography]; Shutters [photography]; Centering apparatus for photographic transparencies; Cameras [photography]; Slide projectors; Transparency projection apparatus; Flash-bulbs [photography]; Projection screens; Screens [photography]; Drainers for use in photography; Photographic racks; Spools [photography]; Epidiascopes; Cases especially made for photographic apparatus and instruments; Exposure meters [light meters]; Film cutting apparatus; Filters for use in photography; Drying apparatus for photographic prints; Glazing apparatus for photographic prints; Screens for photoengraving; Heliographic apparatus; Carriers for dark plates [photography]; Darkroom lamps [photography]; Magic lanterns; Speed measuring apparatus [photography]; Washing trays [photography]; Stands for photographic apparatus; Viewfinders, photographic; Projection apparatus; Diaphragms [photography]; Filters for ultraviolet rays, for photography; Tripods for cameras; Electrified rails for mounting spot lights; Flashlights [photography]; Lens hoods; Selfie sticks [hand-held monopods]; Thermal imaging cameras; Selfie lenses; Video projectors; Flash lamps for smartphones; Selfie ring lights for smartphones; Gimbals for digital cameras; Particle accelerators; Acidimeters for batteries; Hydrometers; Actinometers; Aerometers; Air analysis apparatus; Alcoholmeters; Alidades; Food analysis apparatus; Altimeters; Ammeters; Anemometers; Surveying instruments; Audiovisual teaching apparatus; Comparators; Automatic indicators of low pressure in vehicle tires; Automatic indicators of low pressure in vehicle tyres; Rods for water diviners; Meteorological balloons; Barometers; Betatrons; Pressure indicator plugs for valves; Galvanometers; Spirit levels; Capillary tubes for laboratory use; Boiler control instruments; Marine compasses; Thread counters; Meters; Metronomes; Speed checking apparatus for vehicles; Retorts; Retorts' stands; Cosmographic instruments; Crucibles [laboratory]; Cupels [laboratory]; Cyclotrons; Densimeters; Laboratory trays; Metal detectors for industrial or military purposes; Detectors; Distance measuring apparatus;

Apparatus for recording distance; Distance recording apparatus; Range finders; Telemeters; Measuring apparatus; Dynamometers; Water level indicators; Electric loss indicators; Measuring devices, electric; Kilometer recorders for vehicles; Mileage recorders for vehicles; Test tubes; Balancing apparatus; Ergometers; Material testing instruments and machines; Gauges; Gasoline gauges; Petrol gauges; Testing apparatus not for medical purposes; Fermentation apparatus for laboratory use; Plumb bobs; Plumb lines; High-frequency apparatus; Frequency meters; Gas testing instruments; Gasometers [measuring instruments]; Surveying apparatus and instruments; Levelling staffs [surveying instruments]; Rods [surveying instruments]; Graduated glassware; Measuring glassware; Hygrometers; Clinometers; Gradient indicators; Inclometers; Slope indicators; Taximeters; Vacuum gauges; Speed indicators; Inductors [electricity]; Furniture especially made for laboratories; Lactodensimeters; Lactometers; Lasers, not for medical purposes; Logs [measuring instruments]; Sounding lines; Surveyors' levels; Manometers; Pressure gauges; Mathematical instruments; Mercury levels; Precision measuring apparatus; Measuring instruments; Meteorological instruments; Microtomes; Nautical apparatus and instruments; Levels [instruments for determining the horizontal]; Levelling instruments; Observation instruments; Octants; Ohmmeters; Wavemeters; Oscillographs; Acid hydrometers; Salinometers; Apparatus and instruments for physics; Steering apparatus, automatic, for vehicles; Laboratory pipettes; Plane tables [surveying instruments]; Planimeters; Polarimeters; Pressure measuring apparatus; Pressure indicators; Pyrometers; Protractors [measuring instruments]; Thermometers, not for medical purposes; Saccharometers; Probes for scientific purposes; Satellites for scientific purposes; Diaphragms for scientific apparatus; Teaching apparatus; Sextants; Simulators for the steering and control of vehicles; Sounding apparatus and machines; Sounding leads; Spherometers; Sulfimeters; Tachometers; Temperature indicators; Theodolites; Thermostats for vehicles; Revolution counters; Urinometers; Viscosimeters; Voltage regulators for vehicles; Voltmeters; Stills for laboratory experiments; Azimuth instruments; Directional compasses; Densimeters; Chemistry apparatus and instruments; Incubators for bacteria culture; Distillation apparatus for scientific purposes; Dosimeters; Furnaces for laboratory use; Ovens for laboratory use; Chromatography apparatus for laboratory use; Decompression chambers; Diagnostic apparatus, not for medical purposes; Measuring spoons; Marine depth finders; Wind socks for indicating wind direction; Resuscitation mannequins [teaching apparatus]; DNA chips; Crash test dummies; Laboratory centrifuges; Petri dishes; Pitot tubes; Stroboscopes; Temperature indicator labels, not for medical purposes; Accelerometers; Connected bracelets [measuring instruments]; Calorimeters; Flowmeters; Needles for surveying compasses; Infrared detectors; Digital weather stations; Thermo-hygrometers; Biochips; Humanoid robots with artificial intelligence for use in scientific research; Laboratory robots; Teaching robots; Resuscitation training simulators; Magnetic resonance imaging [MRI] apparatus, not for medical purposes; Height measuring instruments; Hairdressing training heads [teaching apparatus]; Nanoparticle size analysers; Nanoparticle size analyzers; Droppers for measuring, other than for medical or household purposes; Portable ultrafine dust meters; Scanners [apparatus] for performing automotive diagnostics; Electrolysis apparatus for laboratory use; Apparatus for generating gas for calibration purposes; Apparatus for testing breast milk, other than for medical or veterinary use; Bioreactors for laboratory use; Bioreactors for cell culturing for scientific research; Breathalyzers; Dosage dispensers, not for medical use [measuring apparatus]; Wheel alignment meters; Ozone generators for calibration purposes; Ozonizers for calibration purposes; Apertometers [optics]; Lenses for astrophotography; Containers for microscope slides; Eyepieces; Objectives [lenses] [optics]; Diffraction apparatus [microscopy]; Microscopes; Refractometers; Mirrors for inspecting work; Optical lamps; Optical lanterns; Optical lenses; Magnifying glasses [optics]; Periscopes; Micrometer screws for optical instruments; Mirrors [optics]; Prisms [optics]; Optical apparatus and instruments; Optical glass; Apparatus and instruments for astronomy; Photometers; Refractors; Spectroscopes; Spectrograph apparatus; Stereoscopes; Stereoscopic apparatus; Binoculars; Telescopes; Sighting telescopes for firearms; Telescopic sights for firearms; Optical condensers; Telescopic sights for artillery; Sheaths for electric cables; Cables, electric; Wires, electric; Magnetic wires; Identification threads for electric wires; Identification sheaths for electric wires; Telegraph wires; Materials for electricity mains [wires, cables]; Copper wire, insulated; Telephone wires; Junction sleeves for electric cables; Starter cables for motors; Coaxial cables; Fiber optic cables; Fibre optic cables; Electric wire harnesses for automobiles; Coils, electric; Magnets*; Electromagnetic coils; Amplifiers; Amplifying tubes; Amplifying valves; Transformers [electricity]; Distribution boxes [electricity]; Thermionic tubes; Thermionic valves; Terminals [electricity]; Printed circuits; Collectors, electric; Switchboxes [electricity]; Commutators; Capacitors; Condensers [capacitors]; Conductors, electric; Electricity conduits; Circuit closers; Connectors [electricity]; Junction boxes [electricity]; Contacts, electric; Regulating apparatus, electric; Converters, electric; Switches, electric; Limiters [electricity]; Electric plugs; Current rectifiers; Cell switches [electricity]; Reducers [electricity]; Circuit breakers; Distribution boards [electricity]; Distribution consoles [electricity]; Fluorescent screens; Ducts [electricity]; Control panels [electricity]; Connections for electric lines; Connections, electric; Couplings, electric; Relays, electric; Thermostats; Fuses; Galena crystals [detectors]; Armatures [electricity]; Inverters [electricity]; Time switches, automatic; Resistances, electric; Rheostats; Choking coils [impedance]; Wire connectors [electricity]; Remote control apparatus*; Vacuum tubes [radio]; Variometers; Fuse wire; Holders for electric coils; Integrated circuits; Semi-conductors; Chips [integrated circuits]; Semi-conductor memory chips; RISC-V (reduced instruction set computer-five) computer chips and central processing units; Discharge tubes, electric, other than for lighting; Electric discharge tubes, other than for lighting; Optical fibers [light conducting filaments]; Optical fibres [light conducting filaments]; Wafers for integrated circuits; Light dimmers [regulators], electric; Light regulators [dimmers], electric; Transistors [electronic]; Video screens; Covers for electric outlets;

Lighting ballasts; Solenoid valves [electromagnetic switches]; Voltage surge protectors; Stage lighting regulators; Printed circuit boards; Light-emitting diodes [LED]; Triodes; Step-up transformers; Electrical adapters; Electronic key fobs being remote control apparatus; Electronic numeric displays; Climate control digital thermostats; Piezoelectric sensors; Organic light-emitting diodes [OLED]; Quantum dot light-emitting diodes [QLED]; Electric sockets; Parking sensors for vehicles; Amplifiers for servo motors; Electronic controllers for servo motors; Controllers for servo motors; Electric actuators; Electric linear actuators; Electro-dynamic apparatus for the remote control of railway points; Electric apparatus for remote ignition; Igniting apparatus, electric, for igniting at a distance; Heat regulating apparatus; Electric installations for the remote control of industrial operations; Electric apparatus for commutation; Lightning arresters; Lightning conductors; Lightning rods; Ionization apparatus not for the treatment of air or water; Fire extinguishers; Fire beaters; Fire hose nozzles; Fire engines; Fire pumps; Fire boats; Sprinkler systems for fire protection; Fire hose; Fire extinguishing apparatus; Fire-extinguishing balls; Radiological apparatus for industrial purposes; Apparatus and installations for the production of X-rays, not for medical purposes; X-ray tubes not for medical purposes; X-ray apparatus not for medical purposes; Radiology screens for industrial purposes; Protection devices for personal use against accidents; Clothing for protection against accidents, irradiation and fire; Asbestos gloves for protection against accidents; Asbestos clothing for protection against fire; Industrial SASE (Secure Access Service Edge), namely, downloadable security framework software for computer security, network and database security and performance, data and information security, security information and event management (siem), cloud security, identity and access management, privilege and permissions access management, database management, and security framework software for the collection, editing, organizing, modifying, transmission, processing, conversion, storage, analysis, and sharing of data and information to a cloud platform for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Downloadable software for designing business processes in a visual form; Downloadable software for accessing and integrating data from multiple databases, business software applications, and software as a service (SaaS) services; Downloadable software for designing and automating workflows within and between business software applications and business software as a service (SaaS) services; Downloadable computer software, namely, computer software for real-time analytics and debugging, computer software for user authentication, customer engagement, customer relationship management, computer software for providing messages, push notifications and information in the field of video games, computer software for user data capture, storage, and analysis, computer software for allowing users to perform electronic business transactions via a global computer network, computer software for generating coupon codes, payment processing, payment fraud detection, and computer software for creating, using and managing virtual currency; Downloadable computer software for video game development, operation, management, and hosting; Microcontrollers; Computer chipsets; Microcontrollers and chipsets for the secure transmission of data; Computer hardware modules for use with the Internet of Things (IoT); Downloadable computer software and telecommunications apparatus

to enable a data connection between Internet of things (IoT) devices or mobile connected computing devices and the Internet or secure networks; Downloadable software application platform for connecting people, services and devices to the internet; Home or industrial process automation software; Mobile application software for home or industrial process automation; Operating system software for cloud computing services and Internet of Things (IoT) devices; Cloud computing software; Application software for cloud computing services; Operating software for cloud computing devices and the control and secure management of cloud computing devices; Downloadable computer software for data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, cloud computing, data sharing, data security, access, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, data, images, audio, video, and information, and for content management, online project management, online conferences, meetings, demonstrations, tours, presentations and interactive discussions; Downloadable computer software for media and design content creation; Downloadable computer software for image and video rendering, compression, processing and visualization; Downloadable computer software for administering and managing video render farms; Downloadable computer software for automating image and video rendering and post-render tasks; Downloadable computer software for caching animated scene geometry; Downloadable computer software for particle rendering, shading, texturing, meshing, editing, simulating, manipulation and management; Downloadable computer software for visualization and processing of digital images, film, video and data relating to computer graphics in the film, broadcast, commercial marketing, video game, website development, computer-aided design, computer-aided manufacturing, engineering, and non-clinical medical visualization industries; Downloadable computer software for the local and remote management of desktop computers, servers, and workstations, for rendering, processing, execution, and automation of other programs and computer software applications on individual or multiple concurrent computer systems; Data processing computer software; Downloadable computer software for cloud computing; Downloadable computer software for managing virtual machines; Downloadable computer software for use in cloud infrastructure management and automation; Downloadable computer software for running cloud computing based applications; Downloadable computer software that provides access to cloud-based scalable computing resources and data storage; Downloadable computer software for monitoring cloud and application performance; Downloadable computer software for event logging, reporting, analysis and alert generation; Downloadable computer software for collecting, synchronizing, and monitoring of data and information; Downloadable computer software for data and desktop streaming; Downloadable computer software for logging changes within a database; Downloadable computer software for computer network management and automation; Cryptography software; Network access management software; Game software; Game engine software; Downloadable computer software to manage, connect, and operate internet of things (IoT) electronic devices; Computer software development tools; Software development kits (SDK); Downloadable computer software for application development; Downloadable computer software, namely, software for managing, monitoring, identifying, tracking, logging, analyzing and profiling robots and robotics applications; Downloadable computer software for data processing, data transmission, data analytics, and electronic device operation, monitoring, management and communication in the fields of robotics and automated operations; Downloadable computer software development tools for robotics applications and automated operations; Downloadable computer software for the design, development, and testing of robots, robotics applications and automated operations; Downloadable computer software for the design, development, and testing of robotics applications and automated operations; Downloadable computer software for measuring, analyzing and monitoring performance of robotics applications and automated operations; Downloadable computer software for real-time messaging, authentication and security in the robotics field; Downloadable computer software for end-to-end development and management of robotics applications and automated operations; Downloadable computer software for creation, development and iteration of robotics functionalities; Downloadable computer software for monitoring robotics and human operated equipment in manufacturing and logistics operations; Downloadable computer software for gathering and analyzing equipment data in manufacturing and logistics operations; Downloadable computer software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations; Downloadable computer software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations for resolving operational issues; Downloadable computer software for monitoring sensors; Downloadable computer software for analyzing sensor signals from machines; Downloadable computer software for connecting, operating, and managing networked robots and robotics systems in the internet of things (IoT); Downloadable computer software using artificial intelligence for use in managing manufacturing and logistics equipment to improve efficiency and reduce costs in automated operations; Downloadable computer software using artificial intelligence for automatically optimizing industrial robotic workflows and providing machine learning (ML) based recommendations to identify and resolve operational workflow and logistics issues.

CLASS 35

Operating online marketplaces for buyers and sellers of goods and services; Online marketplace services, namely, computerized online ordering featuring software developer tools and cloud computing software and services; Online marketplace services, namely, operating an online marketplace featuring computer software, applications, and software solutions for buyers and sellers of goods and services; Business advisory, consultancy, research and information services; Data processing services; Database management; Management and compilation of computerized

databases; Business records management; Business data analysis; Analyzing and compiling business data; Business management and consulting services in the fields of database management, information technology, cloud computing, web hosting, and enterprise architecture; Computer services, namely, providing online business administration of accounts for others in the field of web hosting; Advertising and marketing services; Providing consumer and business information via a website; Advertising and directory services, namely, promoting the goods and services of others by providing a web page featuring links to the websites of others; Conducting and arranging trade show exhibitions in the fields of technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, databases, data processing and analytics, data storage, data warehousing, data archiving, data and information security, networking, mobile computing, and the Internet of Things (IoT); Domain name directory services; Message and conference call transcription services; Logistics management services for improving efficiency and reducing costs in automated manufacturing processes; Business process re-engineering services to optimize robotic workflows and identify and resolve operational workflow and logistics issues utilizing machine learning-based recommendations.

CLASS 38

Electronic data transmission; Streaming of data; Streaming of software applications; Providing data streaming capacity to others; Electronic transmission and streaming of digital media content for others via cloud-based computer networks; Streaming of audio and video material on the Internet; Streaming of audio, visual and audiovisual material via a cloud-based computer network; Video-on-demand transmission; Telecommunications and information technology services, namely, transmission of voice, data, images, audio, video, and information via a cloud-based communication networks; Providing access to telecommunication networks; Providing multiple user access to global computer information networks for the transfer and dissemination of a wide range of information; Providing user access to computer software in data networks; Providing access to remotely hosted operating systems and computer applications through the internet; Providing access to cloud based computing resources and storage; Providing access to databases; Providing virtual private network (VPN) services; Telephone communications; Voice over Internet protocol (VOIP) services; Web conferencing services; Call routing services; Providing voice chat services; Providing internet chat rooms; Transmission of messages; Providing on-line forums for transmission of messages among computer users; Call recording services.

CLASS 39

Physical storage of electronic data, text, images, files, audio, video, documents, and databases; Providing information and consultation services regarding the physical storage of electronic data, text, images, files, audio, video, documents, and databases; Physical storage services for archiving electronic data, text, images, files, audio, video, documents, and databases.

CLASS 41

Education services, namely, conducting seminars, classes, workshops, online courses, and conferences in the fields of technology, computers, computer software, computer networks, web services, mobile computing, cloud computing, software as a service (SAAS), platform as a service (PAAS), mobile-backend as a service (MBaaS), artificial intelligence, software development, game development, databases, data processing and analytics, data storage, data warehousing, data archiving, data and information security, networking, mobile computing, and the Internet of Things (IoT); Online blog featuring information in the fields of technology, cloud computing, web services, software as a service (SaaS), platform as a service (PaaS), mobile-backend as a service (MBaaS), artificial intelligence, software development, game development, internet of things, databases, and mobile computing.

CLASS 42

Software as a service (SaaS) services featuring software for designing business processes in a visual form; Software as a service (SaaS) services featuring software for accessing and integrating data from multiple databases, business software applications, and SaaS services; Software as a service (SaaS) services featuring software for designing and automating workflows within and between business software applications and business SaaS services; Software as a service (SaaS) services featuring software for database design and development; Software as a service (SaaS) services featuring software for use in database management; Software as a service (SaaS) services featuring software for creating and managing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks; Software as a service (SaaS) services featuring software interface for accessing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks for workload management by administrators, managers and end-users; Software as a service (SaaS) services featuring software for policy-based governance, workload scheduling, resource and energy monitoring, control, management and provisioning by administrators, managers, and end users in the nature of automated allocation of computing resources, analysis of computing resource availability and status information, installation of software and provisioning operating system changes, power management, software upgrades management, accounting and usage management for reporting and billing, third-party application integration management, workload policy management, and job scheduling for both

batch and interactive jobs across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments, and computing networks; Software as a service (SaaS) services featuring software for governance, monitoring, managing, profiling, and indicating available computing and associated resources, namely, for intelligent automation and management of multiple resources, scheduling, operating system provisioning, power management, and computing resource policy implementation that enables administrators, managers, and end users to automate, control, and utilize multiple computing resources across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments and computing networks; Software as a service (SaaS) services featuring software for statistical diagnostic and performance monitoring, namely, analysis of utilization of computing resources, analysis of efficiency of use of computer resources, analysis of optimization of computing resources, analysis of fair sharing of computing resources, analysis of load balancing of computer systems, analysis of hybrid operating system environments, and analysis of power consumption in compute environments by organizations, entities, individuals, classifications of quality of service, queues, and computing nodes; Software as a service (SaaS) services featuring software for providing a quality of service for submitted jobs and for scheduling guarantees and job reservations for users, groups, classes, accounts, and levels of quality of service; Software as a service (SaaS) services featuring software for command-line and graphical resource and workload simulation, including simulation of simultaneous instances to explore the effects of configurations and policies on clusters, grids, high-performance computing environments, and computing networks; Software as a service (SaaS) services featuring software for dynamic command-line and graphical management of computing resources, namely, management of software licenses within a single computer administrative domain or across multiple heterogeneous computer administrative domains, hybrid operating system environments, file spaces, network-attached storage media, tape drives, processors, memory, disks, network bandwidth, and other hardware resources; Software as a service (SaaS) services featuring software for interface with and collection of end-user commands for job, queue, operating system, power consumption, and system management, for internal diagnostic and logging facilities, and for integration of provisioning managers, billing systems, identity and security managers and databases, and translation of resource manager job submissions; Software as a service (SaaS) services featuring software for peer-to-peer collaboration of multiple instances to provide domain-specific policies and to provide native resource management support; Platform as a service (PaaS), namely, platform as a service (PaaS) featuring computer software platforms used for real-time analytics and debugging, platform as a service (PaaS) featuring computer software platforms used for user authentication, customer engagement, customer relationship management, and providing messages, push notifications and information in the field of video games, platform as a service (PaaS) featuring computer software platforms used for user data capture, storage and analysis, platform as a service (PaaS) featuring computer software platforms allowing users to perform electronic business transactions via a global computer network, and platform as a service (PaaS) featuring computer software platforms used for generating coupon codes, payment processing, payment fraud detection, and for creating, using and managing virtual currency; Platform as a service (PaaS) featuring computer software platforms used for the operation, management and hosting of online video games; Software as a service (SaaS), namely, software as a service (SaaS) featuring computer software platforms used for real-time analytics and debugging, software as a service (SaaS) featuring computer software platforms used for user authentication, customer engagement, customer relationship management, and providing messages, push notifications and information in the field of video games, software as a service (SaaS) featuring computer software platforms used for user data capture, storage and analysis, software as a service (SaaS) featuring computer software platforms allowing users to perform electronic business transactions via a global computer network, and software as a service (SaaS) featuring computer software platforms used for generating coupon codes, payment processing, payment fraud detection, and for creating, using and managing virtual currency; Software as a service (SaaS) featuring computer software used for the operation, management and hosting of online video games; Platform as a service (PAAS) featuring computer software platforms for developing, deploying and managing web applications; Platform as a service (PAAS) featuring computer software platforms for real-time modification of web applications, chat room programs, Internet of Things (IoT) software, video game software, analytics dashboards and internet-based software; Providing temporary use of non-downloadable software for developing, deploying and managing web applications; Providing temporary use of non-downloadable software for real-time modification of web applications, chat room programs, Internet of Things (IoT) software, video game software, analytics dashboards and internet-based software; Design and development of computer hardware and software, namely, microcontrollers, computer chipsets and operating software for the aforementioned; Design, development and maintenance of computer hardware modules for use with the Internet of Things (IoT); Programming of operating software for accessing and using a cloud computing networks and IoT (Internet of Things) devices and their components; Design and development of data processing systems for the Internet of Things (IoT) and IoT devices; Provision of non-downloadable system operating software for transmitting, receiving, synchronizing, displaying, backing-up, monitoring, controlling, sharing, coding, decoding, encrypting, accessing, remotely accessing, creating, collecting, storing, securing, removing, transferring, disseminating, locating, organizing or otherwise utilizing data, voice, multimedia, audio, visual, music, photographs, drawings, images, audio-visual, video, text, graphics or other data, including over a global communications network; Design and development of operating software for cloud computing networks and Internet of Things (IoT) devices; Providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; Programming of operating software for accessing

and using a cloud computing network; Rental of operating software for accessing and using a cloud computing network; Design, development and updating of embedded devices; Software as a service (SaaS) services for the control and monitoring of cloud computing networks and Internet of Things (IoT) devices; Infrastructure as a service (IaaS) services for use with Internet of Things (IoT) devices and networks; Consultation in relation to all of the aforementioned; Providing a website featuring information in the fields of technology, computers, computer software, computer networks, web services, mobile computing and artificial intelligence; Providing temporary use of non-downloadable software for use in teaching about software development; Computer services, namely, cloud hosting provider services; Computer security services, namely, enforcing, restricting and controlling access privileges of users of computing resources for cloud resources based on assigned credentials; Computer services, namely, integration of private and public cloud computing environments; Consulting services in the field of cloud computing technology, infrastructure-as-a-service (IaaS) cloud computing technology, software-as-a-service (SAAS) cloud computing technology, and platform-as-a-service (PAAS) cloud computing technology; Providing virtual computer systems and virtual computer environments through cloud computing; Technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of public and private cloud computing IT and application systems; Application service provider (ASP), namely, hosting computer software applications of others; Cloud computing featuring software for use in creating web applications, data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, cloud computing, data sharing, data security, access, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, data, images, audio, video, and information, and for content management, online project management, online conferences, meetings, demonstrations, tours, presentations and interactive discussions; Platform-as-a-service (PAAS), infrastructure-as-a-service (IaaS) and software-as-a-service (SAAS) services featuring computer software platforms for creating web applications, data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, cloud computing, data sharing, data security, access, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, data, images, audio, video, and information, and for content management, online project management, online conferences, meetings, demonstrations, tours, presentations and interactive discussions; Computer services, namely, creating cloud-based indexes of information; Software as a service (SaaS) services featuring software for security information and event management (SIEM) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; Providing temporary use of non-downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance; Providing online non-downloadable software for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and providing online non-downloadable software development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Software as a service (SaaS) featuring non-downloadable software for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and providing online non-downloadable software development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Connectivity as a service (CaaS) featuring online non-downloadable computer software for network management, data processing, and connecting with virtual networks (VNet), virtual private networks (VPN), virtual network NAT (network address translation) gateways, the Internet, the cloud, global communications networks, wide area network (WAN), local area network (LAN), and virtual machines for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security, hardware as a service (HaaS), namely, rental of computer hardware and computer peripherals; Platform as a service (PaaS) featuring non-downloadable software platforms for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and providing online non-downloadable software platforms containing development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning,

edge computing, high performance computing, distributed computing, data analytics, and information security; Computer consultancy services, namely, computer software consultancy and consultancy in connection with all of the aforesaid services; Software as a service (SaaS) services featuring software for use in data governance and management to enable users to integrate, manage, classify, label and search for data and electronic information across a network and across multiple platforms and systems; Software as a service (SaaS) services featuring software for designing, creating, constructing and managing data maps to facilitate use of and access to data and electronic information across a network and across multiple platforms and systems; Software as a service (SaaS) services featuring software for extracting and generating accurate and up-to-date data lineage across a network and across multiple platforms and systems; And software as a service (SaaS) services featuring software for management, retention, preservation, classification, access, control, compliance management and disposition of metadata; Software as a service (SaaS) services, namely, software for managing, monitoring, identifying, tracking, logging, analyzing and profiling robots and robotics applications; Software as a service (SaaS) services featuring software for data processing, data transmission, data analytics, and electronic device operation, monitoring, management and communication in the fields of robotics and automated operations; Software as a service (SaaS) services, namely, software development tools for robotics applications and automated operations; Software as a service (SaaS) services featuring software for the design, development, and testing of robots, robotics applications and automated operations; Software as a service (SaaS) services featuring software for the design, development, and testing of robotics applications and automated operations; Software as a service (SaaS) services featuring software for measuring, analyzing and monitoring performance of robotics applications and automated operations; Software as a service (SaaS) services featuring software for real-time messaging, authentication and security in the robotics field; Software as a service (SaaS) services featuring software for end-to-end development and management of robotics applications and automated operations; Software as a service (SaaS) services featuring software for creation, development and iteration of robotics functionalities; Software as a services (SaaS) services featuring software for monitoring robotics and human operated equipment in manufacturing and logistics operations; Software as a services (SaaS) services featuring software for gathering and analyzing equipment data in manufacturing and logistics operations; Software as a services (SaaS) services featuring software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations; Software as a services (SaaS) services featuring software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations for resolving operational issues; Software as a services (SaaS) services featuring software for monitoring sensors; Software as a services (SaaS) services featuring software for analyzing sensor signals from machines; Software as a service (SAAS) services featuring software for monitoring machine performance and reliability; Software as a service (SAAS) services featuring software for connecting, operating, and managing networked robots and robotics systems in the internet of things (IoT); Research and development in the field of robotics software and applications, machine learning and artificial intelligence; Computer systems analysis; Consultation services in the field of cloud computing; Consulting services in the design and development of computer systems, software and hardware; Computer technology consultancy; Consulting services in the field of robotics software and applications; Providing temporary use of online non-downloadable cloud computing software for use in the field of robotics; Software as a service (SAAS) services featuring software using artificial intelligence for use in managing manufacturing and logistics equipment to improve efficiency and reduce costs in automated operations; Application service provider (ASP) services featuring software using artificial intelligence for automatically optimizing industrial robotic workflows and providing machine learning (ML) based recommendations to identify and resolve operational workflow and logistics issues; Software as a service (SaaS) services featuring software for media and design content creation; Software as a service (SaaS) services featuring software for image and video rendering, compression, compositing, processing and visualization; Software as a service (SaaS) services featuring software for administering and managing video render farms; Software as a service (SaaS) services featuring software for automating image and video rendering and post-render tasks; Software as a service (SaaS) services featuring software for caching animated scene geometry; Software as a service (SaaS) services featuring software for particle rendering, shading, texturing, meshing, editing, simulating, manipulation and management; Software as a service (SaaS) services featuring software for visualization and processing of digital images, photographs, film, video and data relating to computer graphics in the film, broadcast, commercial marketing, video game, website development, computer-aided design, computer-aided manufacturing, engineering, and non-clinical medical visualization industries; Software as a service (SaaS) services featuring software for the local and remote management of desktop computers, servers, workstations, tablets, personal digital assistants and smartphones, for rendering, processing, execution, and automation of other programs and computer software applications on individual or multiple concurrent computer systems; Information technology (IT) services; Computer services; Cloud computing hosting services; Hosting of digital content on the Internet; Cloud hosting of electronic databases and virtual computing environments; Server hosting; Computer time-sharing services; Computer services, namely, providing virtual application, web, file, database and storage servers of variable capacity to others; Scaling services, namely, providing variable computing and electronic storage capacity to others; Administering and maintaining databases and virtual computing environments for others; Electronic data storage; Rental of space in a computer co-location facility for containerized data centers of others; Application service provider (ASP), namely, hosting computer software applications and databases of others; Computer services, namely, hosting, managing, provisioning, scaling, administering, maintaining, monitoring,

securing, encrypting, decrypting, replicating and backing up databases and cloud computing environments for others; Computer software rental; Providing information in the fields of information technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, databases, data processing and analytics, data storage, data warehousing, data archiving, data and information security, networking, mobile computing, and the Internet of Things (IoT); Data and application migration services; Data mining services; Data backup and data restoration services; Remote online backup of computer data; Data encryption and decryption services; Data warehousing; Computer services, namely, monitoring the web sites of others to improve their scalability and performance; Computer services, namely, enforcing, restricting and controlling access privileges of users of computing and network resources based on assigned credentials; Providing search engines for obtaining data via communications networks; Creating indexes of computer network-based information, sites, and other resources available on global computer networks for others; Dedicated IP address hosting for others; Domain name server (DNS) services for others, namely, providing computer servers for electronic storage of domain name addresses and resolution of domain name address requests; Computer services, namely, intrusion detection and protection; Computer services, namely, web traffic filtering; Computer services, namely, providing virtual data storage and caching to others; Computer services, namely, cloud hosting of virtual desktops and applications; Cross-platform conversion of digital content into other forms of digital content; Digital compression of computer data; Software as a service (SaaS), namely, software for data processing; Software as a service (SaaS) featuring software for cloud computing; Software as a service (SaaS) featuring software for virtualization; Software as a service (SaaS) featuring software for managing and deploying virtual machines to a cloud computing platform; Software as a service (SaaS) featuring software for use in cloud infrastructure management and automation; Software as a service (SaaS) featuring software for running cloud computing based applications; Software as a service (SaaS) featuring software platforms for cloud computing networks and applications; Software as a service (SaaS) featuring software that provides access to cloud-based scalable computing resources and data storage; Software as a service (SaaS) featuring software for monitoring cloud and application performance; Software as a service (SaaS) featuring software for event logging, reporting, analysis and alert generation; Software as a service (SaaS) featuring software for collecting, editing, modifying, organizing, synchronizing, integrating, monitoring, transmitting, storage and sharing of data and information; Software as a service (SaaS) featuring software for data, desktop and application streaming; Software as a service (SaaS) featuring software for data backup, recovery and archiving; Software as a service (SaaS) featuring software for data transfer and migration; Software as a service (SaaS) featuring software for data protection and data security; Software as a service (SaaS) featuring software for data warehousing; Software as a service (SaaS) featuring database management software; Software as a service (SaaS) featuring software for creating, configuring, provisioning and scaling databases; Software as a service (SaaS) featuring software for storing, retrieving, caching, extracting, formatting, structuring, systematizing, organizing, indexing, processing, querying, analyzing, replicating and controlling access to data; Software as a service (SaaS) featuring software for logging changes within a database; Software as a service (SaaS) featuring software for improving database performance; Software as a service (SaaS) featuring software for configuring, provisioning and scaling data cache storage for databases; Software as a service (SaaS) featuring software for computer network management and automation; Software as a service (SaaS) featuring software for monitoring computer network access and activity; Software as a service (SaaS) featuring user authentication software; Software as a service (SaaS) featuring cryptography software; Software as a service (SaaS) featuring software for monitoring, tracking, logging, analyzing, auditing and reporting in the field of regulatory and information security compliance; Software as a service (SaaS) featuring software for monitoring, tracking, logging and analyzing computer network events, user activity, changes to resource activity and security statistics; Software as a service (SaaS) featuring network security software; Software as a service (SaaS) featuring network threat detection software; Software as a service (SaaS) featuring network access management and monitoring software; Software as a service (SaaS) featuring search engine software; Software as a service (SaaS) featuring software for searching databases; Software as a service (SaaS) featuring software for creating searchable databases of information and data; Software as a service (SaaS) featuring business intelligence software; Software as a service (SaaS) featuring software that provides real-time, integrated business management intelligence by combining information from various databases; Software as a service (SaaS) featuring business analytics software for collecting and analyzing data to facilitate business decision making; Software as a service (SaaS) featuring software for use in big data analysis; Software as a service (SaaS) featuring software that automates the processing of un-structured, semi-structured and structured information and data stored on computer networks and the Internet; Software as a service (SaaS) featuring e-commerce software to allow users to perform electronic business transactions via a global computer network; Software as a service (SaaS) featuring software for operating and managing call centers and contact centers; Software as a service (SaaS) featuring software for speech, facial and optical character recognition; Software as a service (SaaS) featuring software for converting text to speech; Software as a service (SaaS) featuring software for image analysis, identification, and processing; Software as a service (SaaS) featuring software for video streaming and for high-speed formatting and processing of audio and video streams; Software as a service (SaaS) featuring software for deploying live and on-demand video content; Software as a service (SaaS) featuring software for provisioning and dynamically scaling video processing, delivery, and storage services; Software as a service (SaaS) featuring software used to process, convert, transcode, encode, decode, encrypt, decrypt, distribute and manipulate digital video, image and audio

files; Software as a service (SaaS) featuring software for inserting and removing advertising and other content into video streams; Software as a service (SaaS) featuring game software; Software as a service (SaaS) featuring game engine software; Software as a service (SaaS) featuring software to manage, connect, and operate internet of things (IoT) electronic devices; Software as a service (SaaS) featuring software for enabling electronic devices to operate and communicate locally while retaining the benefits of analytics and high-level services in the cloud; Software as a service (SaaS) featuring software development tools; Software as a service (SaaS) featuring software development kits (SDK); Software as a service (SaaS) featuring software for application development, testing, deployment and management; Software as a service (SaaS) featuring software for managing software development projects and teams; Monitoring of computer systems and databases for security purposes in the nature of protecting data and information from unauthorized access; Computerized security services, namely, electronically monitoring, detecting and reporting on suspicious and abnormal patterns of computer network access or activity in the nature of protecting data and information from unauthorized access; Providing user authentication services for accessing a secure virtual computing environment; Application service provider, namely, providing, hosting, managing, developing and maintaining applications, software, websites and databases in the fields of data storage, shared computing capacity scaling, and messaging services.

CLASS 45

Domain name registry services, namely, coordinating the registration of domain names for identification of users and internet protocol addresses on the internet; Providing an online computer database in the field of domain name registration information.

Downloadable software for creating and managing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks; Downloadable software interface for accessing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks for workload management by administrators, managers and end-users; Downloadable software for policy-based governance, workload scheduling, resource and energy monitoring, control, management and provisioning by administrators, managers, and end users in the nature of automated allocation of computing resources, analysis of computing resource availability and status information, installation of software and provisioning operating system changes, power management, software upgrades management, accounting and usage management for reporting and billing, third-party application integration management, workload policy management, and job scheduling for both batch and interactive jobs across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments, and computing networks; Downloadable software for governance, monitoring, managing, profiling, and indicating available computing and associated resources, namely, for intelligent automation and management of multiple resources, scheduling, operating system provisioning, power management, and computing resource policy implementation that enables administrators, managers, and end users to automate, control, and utilize multiple computing resources across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments and computing networks; Downloadable software for statistical diagnostic and performance monitoring, namely, analysis of utilization of computing resources, analysis of efficiency of use of computer resources, analysis of optimization of computing resources, analysis of fair sharing of computing resources, analysis of load balancing of computer systems, analysis of hybrid operating system environments, and analysis of power consumption in compute environments by organizations, entities, individuals, classifications of quality of service, queues, and computing nodes; Downloadable software for providing a quality of service for submitted jobs and for scheduling guarantees and job reservations for users, groups, classes, accounts, and levels of quality of service; Downloadable software for command-line and graphical resource and workload simulation, including simulation of simultaneous instances to explore the effects of configurations and policies on

clusters, grids, high-performance computing environments, and computing networks; Downloadable software for dynamic command-line and graphical management of computing resources, namely, management of software licenses within a single computer administrative domain or across multiple heterogeneous computer administrative domains, hybrid operating system environments, file spaces, network-attached storage media, tape drives, processors, memory, disks, network bandwidth, and other hardware resources; Downloadable software for interface with and collection of end-user commands for job, queue, operating system, power consumption, and system management, for internal diagnostic and logging facilities, and for integration of provisioning managers, billing systems, identity and security managers and databases, and translation of resource manager job submissions; Downloadable software for peer-to-peer collaboration of multiple instances to provide domain-specific policies and to provide native resource management support; Downloadable and recorded computer software for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and downloadable and recorded computer software development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Downloadable and recorded computer software for the development of secure, high-performance edge computing and artificial intelligence processing computer software applications for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Intelligent edge devices consisting of computer hardware, carrier and development boards, data and vision processors, trusted platform modules (TPM), camera-enabled and audio-enabled system on modules (SoM), cameras and microphones, USB cables, power cables, AC/DC power converters, and antennas for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Edge computing and storage devices, namely, computer hardware, computer memory devices, and electronic storage devices in the nature of memory media for storing information collected from high-performance edge computing and artificial intelligence processing computer software applications for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; SASE (Secure Access Service Edge), namely, downloadable security framework software for computer security, network and database security and performance, data and information security, security information and event management (siem), cloud security, identity and access management, privilege and permissions access management, database management, and security framework software for the collection, editing, organizing, modifying, transmission, processing, conversion, storage, analysis, and sharing of data and information to a cloud platform for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Industrial SASE (Secure Access Service Edge), namely, downloadable security framework software for computer security, network and database security and performance, data and information security, security information and event management (siem), cloud security, identity and access management, privilege and permissions access management, database management, and security framework software for the collection, editing, organizing, modifying, transmission, processing, conversion, storage, analysis, and sharing of data and information to a cloud platform for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Downloadable software for designing business processes in a visual form; Downloadable software for accessing and integrating data from multiple databases, business software applications, and software as a service (SaaS) services; Downloadable software for designing and automating workflows within and between business software applications and business software as a service (SaaS) services; Downloadable computer software, namely, computer software for real-time analytics and debugging, computer software for user authentication, customer engagement, customer relationship management, computer software for providing messages, push notifications and information in the field of video games, computer software for user data capture, storage, and analysis, computer software for allowing users to perform electronic business transactions via a global computer network, computer software for generating coupon codes, payment processing, payment fraud detection, and computer software for creating, using and managing virtual currency; Downloadable computer software for video game development, operation, management, and hosting; Microcontrollers; Computer chipsets; Microcontrollers and chipsets for the secure transmission of data; Computer hardware modules for use with the Internet of Things (IoT); Downloadable computer software and telecommunications apparatus to enable a data connection between Internet of things (IoT) devices or mobile connected computing devices and the Internet or secure networks; Downloadable software application platform for connecting people, services and devices to the internet; Home or industrial process automation software; Mobile application software for home or industrial process automation; Operating system software for cloud computing services and Internet of Things (IoT) devices; Cloud computing software; Application software for cloud computing services; Operating software for cloud computing devices and the control and secure management of cloud computing devices; Downloadable computer

software for data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, cloud computing, data sharing, data security, access, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, data, images, audio, video, and information, and for content management, online project management, online conferences, meetings, demonstrations, tours, presentations and interactive discussions; Downloadable computer software for media and design content creation; Downloadable computer software for image and video rendering, compression, processing and visualization; Downloadable computer software for administering and managing video render farms; Downloadable computer software for automating image and video rendering and post-render tasks; Downloadable computer software for caching animated scene geometry; Downloadable computer software for particle rendering, shading, texturing, meshing, editing, simulating, manipulation and management; Downloadable computer software for visualization and processing of digital images, film, video and data relating to computer graphics in the film, broadcast, commercial marketing, video game, website development, computer-aided design, computer-aided manufacturing, engineering, and non-clinical medical visualization industries; Downloadable computer software for the local and remote management of desktop computers, servers, and workstations, for rendering, processing, execution, and automation of other programs and computer software applications on individual or multiple concurrent computer systems; Data processing computer software; Downloadable computer software for cloud computing; Downloadable computer software for managing virtual machines; Downloadable computer software for use in cloud infrastructure management and automation; Downloadable computer software for running cloud computing based applications; Downloadable computer software that provides access to cloud-based scalable computing resources and data storage; Downloadable computer software for monitoring cloud and application performance; Downloadable computer software for event logging, reporting, analysis and alert generation; Downloadable computer software for collecting, synchronizing, and monitoring of data and information; Downloadable computer software for data and desktop streaming; Downloadable computer software for logging changes within a database; Downloadable computer software for computer network management and automation; Cryptography software; Network access management software; Game software; Game engine software; Downloadable computer software to manage, connect, and operate internet of things (IoT) electronic devices; Computer software development tools; Software development kits (SDK); Downloadable computer software for application development; Downloadable computer software, namely, software for managing, monitoring, identifying, tracking, logging, analyzing and profiling robots and robotics applications; Downloadable computer software for data processing, data transmission, data analytics, and electronic device operation, monitoring, management and communication in the fields of robotics and automated operations; Downloadable computer software development tools for robotics applications and automated operations; Downloadable computer software for the design, development, and testing of robots, robotics applications and automated operations; Downloadable software for the design, development, and testing of robotics applications and automated operations; Downloadable computer software for measuring, analyzing and monitoring performance of robotics applications and automated operations; Downloadable computer software for real-time messaging, authentication and security in the robotics field; Downloadable computer software for end-to-end development and management of robotics applications and automated operations; Downloadable computer software for creation, development and iteration of robotics functionalities; Downloadable computer software for monitoring robotics and human operated equipment in manufacturing and logistics operations; Downloadable computer software for gathering and analyzing equipment data in manufacturing and logistics operations; Downloadable computer software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations; Downloadable computer software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations for resolving operational issues; Downloadable computer software for monitoring sensors; Downloadable computer software for analyzing sensor signals from machines; Downloadable computer software for connecting, operating, and managing networked robots and robotics systems in the internet of things (IoT); Downloadable computer software using artificial intelligence for use in managing manufacturing and logistics equipment to improve efficiency and reduce costs in automated operations; Downloadable computer software using artificial intelligence for automatically optimizing industrial robotic workflows and providing machine learning (ML) based recommendations to identify and resolve operational workflow and logistics issues.

CLASS 35

Operating online marketplaces for buyers and sellers of goods and services; Online marketplace services, namely, computerized online ordering featuring software developer tools and cloud computing software and services; Online marketplace services, namely, operating an online marketplace featuring computer software, applications, and software solutions for buyers and sellers of goods and services; Business advisory, consultancy, research and information services; Data processing services; Database management; Management and compilation of computerized databases; Business records management; Business data analysis; Analyzing and compiling business data; Business management and consulting services in the fields of database management, information technology, cloud computing, web hosting, and enterprise architecture; Computer services, namely, providing online business administration of accounts for others in the field of web hosting; Advertising and marketing services; Providing consumer and business information via a website; Advertising and directory services, namely, promoting the goods and services of others by providing a web page featuring links to the websites of others; Conducting and arranging trade show exhibitions

in the fields of technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, databases, data processing and analytics, data storage, data warehousing, data archiving, data and information security, networking, mobile computing, and the Internet of Things (IoT); Domain name directory services; Message and conference call transcription services; Logistics management services for improving efficiency and reducing costs in automated manufacturing processes; Business process re-engineering services to optimize robotic workflows and identify and resolve operational workflow and logistics issues utilizing machine learning-based recommendations.

CLASS 38

Electronic data transmission; Streaming of data; Streaming of software applications; Providing data streaming capacity to others; Electronic transmission and streaming of digital media content for others via cloud-based computer networks; Streaming of audio and video material on the Internet; Streaming of audio, visual and audiovisual material via a cloud-based computer network; Video-on-demand transmission; Telecommunications and information technology services, namely, transmission of voice, data, images, audio, video, and information via a cloud-based communication networks; Providing access to telecommunication networks; Providing multiple user access to global computer information networks for the transfer and dissemination of a wide range of information; Providing user access to computer software in data networks; Providing access to remotely hosted operating systems and computer applications through the internet; Providing access to cloud based computing resources and storage; Providing access to databases; Providing virtual private network (VPN) services; Telephone communications; Voice over Internet protocol (VOIP) services; Web conferencing services; Call routing services; Providing voice chat services; Providing internet chat rooms; Transmission of messages; Providing on-line forums for transmission of messages among computer users; Call recording services.

CLASS 39

Physical storage of electronic data, text, images, files, audio, video, documents, and databases; Providing information and consultation services regarding the physical storage of electronic data, text, images, files, audio, video, documents, and databases; Physical storage services for archiving electronic data, text, images, files, audio, video, documents, and databases.

CLASS 41

Education services, namely, conducting seminars, classes, workshops, online courses, and conferences in the fields of technology, computers, computer software, computer networks, web services, mobile computing, cloud computing, software as a service (SAAS), platform as a service (PAAS), mobile-backend as a service (MBAAS), artificial intelligence, software development, game development, databases, data processing and analytics, data storage, data warehousing, data archiving, data and information security, networking, mobile computing, and the Internet of Things (IoT); Online blog featuring information in the fields of technology, cloud computing, web services, software as a service (SaaS), platform as a service (PaaS), mobile-backend as a service (MBaaS), artificial intelligence, software development, game development, internet of things, databases, and mobile computing.

CLASS 42

Software as a service (SaaS) services featuring software for designing business processes in a visual form; Software as a service (SaaS) services featuring software for accessing and integrating data from multiple databases, business software applications, and SaaS services; Software as a service (SaaS) services featuring software for designing and automating workflows within and between business software applications and business SaaS services; Software as a service (SaaS) services featuring software for database design and development; Software as a service (SaaS) services featuring software for use in database management; Software as a service (SaaS) services featuring software for creating and managing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks; Software as a service (SaaS) services featuring software interface for accessing cloud, high performance computing, cluster or grid computing resources, hybrid operating system environment and computing networks for workload management by administrators, managers and end-users; Software as a service (SaaS) services featuring software for policy-based governance, workload scheduling, resource and energy monitoring, control, management and provisioning by administrators, managers, and end users in the nature of automated allocation of computing resources, analysis of computing resource availability and status information, installation of software and provisioning operating system changes, power management, software upgrades management, accounting and usage management for reporting and billing, third-party application integration management, workload policy management, and job scheduling for both batch and interactive jobs across cloud, high-performance computing, cluster or grid computing resources, hybrid operating system environments, and computing networks; Software as a service (SaaS) services featuring software for governance, monitoring, managing, profiling, and indicating available computing and associated resources, namely, for intelligent automation and management of multiple resources, scheduling, operating system provisioning, power management, and computing resource policy implementation that enables administrators, managers, and end users to automate, control, and utilize multiple computing resources across cloud, high-performance computing, cluster or

grid computing resources, hybrid operating system environments and computing networks; Software as a service (SaaS) services featuring software for statistical diagnostic and performance monitoring, namely, analysis of utilization of computing resources, analysis of efficiency of use of computer resources, analysis of optimization of computing resources, analysis of fair sharing of computing resources, analysis of load balancing of computer systems, analysis of hybrid operating system environments, and analysis of power consumption in compute environments by organizations, entities, individuals, classifications of quality of service, queues, and computing nodes; Software as a service (SaaS) services featuring software for providing a quality of service for submitted jobs and for scheduling guarantees and job reservations for users, groups, classes, accounts, and levels of quality of service; Software as a service (SaaS) services featuring software for command-line and graphical resource and workload simulation, including simulation of simultaneous instances to explore the effects of configurations and policies on clusters, grids, high-performance computing environments, and computing networks; Software as a service (SaaS) services featuring software for dynamic command-line and graphical management of computing resources, namely, management of software licenses within a single computer administrative domain or across multiple heterogeneous computer administrative domains, hybrid operating system environments, file spaces, network-attached storage media, tape drives, processors, memory, disks, network bandwidth, and other hardware resources; Software as a service (SaaS) services featuring software for interface with and collection of end-user commands for job, queue, operating system, power consumption, and system management, for internal diagnostic and logging facilities, and for integration of provisioning managers, billing systems, identity and security managers and databases, and translation of resource manager job submissions; Software as a service (SaaS) services featuring software for peer-to-peer collaboration of multiple instances to provide domain-specific policies and to provide native resource management support; Platform as a service (PaaS), namely, platform as a service (PaaS) featuring computer software platforms used for real-time analytics and debugging, platform as a service (PaaS) featuring computer software platforms used for user authentication, customer engagement, customer relationship management, and providing messages, push notifications and information in the field of video games, platform as a service (PaaS) featuring computer software platforms used for user data capture, storage and analysis, platform as a service (PaaS) featuring computer software platforms allowing users to perform electronic business transactions via a global computer network, and platform as a service (PaaS) featuring computer software platforms used for generating coupon codes, payment processing, payment fraud detection, and for creating, using and managing virtual currency; Platform as a service (PaaS) featuring computer software platforms used for the operation, management and hosting of online video games; Software as a service (SaaS), namely, software as a service (SaaS) featuring computer software platforms used for real-time analytics and debugging, software as a service (SaaS) featuring computer software platforms used for user authentication, customer engagement, customer relationship management, and providing messages, push notifications and information in the field of video games, software as a service (SaaS) featuring computer software platforms used for user data capture, storage and analysis, software as a service (SaaS) featuring computer software platforms allowing users to perform electronic business transactions via a global computer network, and software as a service (SaaS) featuring computer software platforms used for generating coupon codes, payment processing, payment fraud detection, and for creating, using and managing virtual currency; Software as a service (SaaS) featuring computer software used for the operation, management and hosting of online video games; Platform as a service (PAAS) featuring computer software platforms for developing, deploying and managing web applications; Platform as a service (PAAS) featuring computer software platforms for real-time modification of web applications, chat room programs, Internet of Things (IoT) software, video game software, analytics dashboards and internet-based software; Providing temporary use of non-downloadable software for developing, deploying and managing web applications; Providing temporary use of non-downloadable software for real-time modification of web applications, chat room programs, Internet of Things (IoT) software, video game software, analytics dashboards and internet-based software; Design and development of computer hardware and software, namely, microcontrollers, computer chipsets and operating software for the aforementioned; Design, development and maintenance of computer hardware modules for use with the Internet of Things (IoT); Programming of operating software for accessing and using a cloud computing networks and lot (Internet of Things) devices and their components; Design and development of data processing systems for the Internet of Things (IoT) and IoT devices; Provision of non-downloadable system operating software for transmitting, receiving, synchronizing, displaying, backing-up, monitoring, controlling, sharing, coding, decoding, encrypting, accessing, remotely accessing, creating, collecting, storing, securing, removing, transferring, disseminating, locating, organizing or otherwise utilizing data, voice, multimedia, audio, visual, music, photographs, drawings, images, audio-visual, video, text, graphics or other data, including over a global communications network; Design and development of operating software for cloud computing networks and Internet of Things (IoT) devices; Providing temporary use of on-line non-downloadable operating software for accessing and using a cloud computing network; Programming of operating software for accessing and using a cloud computing network; Rental of operating software for accessing and using a cloud computing network; Design, development and updating of embedded devices; Software as a service (SaaS) services for the control and monitoring of cloud computing networks and Internet of Things (IoT) devices; Infrastructure as a service (IaaS) services for use with Internet of Things (IoT) devices and networks; Consultation in relation to all of the aforementioned; Providing a website featuring information in the fields of technology, computers, computer software, computer networks, web services, mobile computing and artificial intelligence; Providing temporary use of non-downloadable

software for use in teaching about software development; Computer services, namely, cloud hosting provider services; Computer security services, namely, enforcing, restricting and controlling access privileges of users of computing resources for cloud resources based on assigned credentials; Computer services, namely, integration of private and public cloud computing environments; Consulting services in the field of cloud computing technology, infrastructure-as-a-service (IAAS) cloud computing technology, software-as-a-service (SAAS) cloud computing technology, and platform-as-a-service (PAAS) cloud computing technology; Providing virtual computer systems and virtual computer environments through cloud computing; Technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of public and private cloud computing IT and application systems; Application service provider (ASP), namely, hosting computer software applications of others; Cloud computing featuring software for use in creating web applications, data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, cloud computing, data sharing, data security, access, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, data, images, audio, video, and information, and for content management, online project management, online conferences, meetings, demonstrations, tours, presentations and interactive discussions; Platform-as-a-service (PAAS), infrastructure-as-a-service (IAAS) and software-as-a-service (SAAS) services featuring computer software platforms for creating web applications, data storage and backup, database management, virtualization, networking, collaboration, remote access, remote support, cloud computing, data sharing, data security, access, administration and management of computer applications and computer hardware, computer application distribution, and for transmission of voice, data, images, audio, video, and information, and for content management, online project management, online conferences, meetings, demonstrations, tours, presentations and interactive discussions; Computer services, namely, creating cloud-based indexes of information; Software as a service (SaaS) services featuring software for security information and event management (SIEM) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; Providing temporary use of non-downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance; Providing online non-downloadable software for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and providing online non-downloadable software development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Software as a service (SaaS) featuring non-downloadable software for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and providing online non-downloadable software development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Connectivity as a service (CaaS) featuring online non-downloadable computer software for network management, data processing, and connecting with virtual networks (VNet), virtual private networks (VPN), virtual network NAT (network address translation) gateways, the Internet, the cloud, global communications networks, wide area network (WAN), local area network (LAN), and virtual machines for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security, hardware as a service (HaaS), namely, rental of computer hardware and computer peripherals; Platform as a service (PaaS) featuring non-downloadable software platforms for secure, high-performance edge computing and artificial intelligence processing, developing, training, and implementing edge computing artificial intelligence solutions, model and cloud development, device management, computer networking, hardware acceleration, object and audio detection, keyword spotting and voice control, data analysis, data processing and storage, shelf and spatial analytics, vehicle analytics, anomaly detection, and providing online non-downloadable software platforms containing development libraries featuring electronic data files consisting of software development tools for edge computing, artificial intelligence processing, and artificial intelligence models, all of the foregoing for use in the fields of artificial intelligence, machine learning, neural networks, deep learning, edge computing, high performance computing, distributed computing, data analytics, and information security; Computer consultancy services, namely, computer software consultancy and consultancy in connection with all of the aforesaid services; Software as a service (SaaS) services featuring software for use in data governance and management to enable users to integrate, manage, classify, label and search for data and electronic information across a network and across multiple platforms and systems; Software as a service (SaaS) services featuring software for designing, creating, constructing and managing data maps to facilitate use of and access to data and electronic information across a network

and across multiple platforms and systems; Software as a service (SaaS) services featuring software for extracting and generating accurate and up-to-date data lineage across a network and across multiple platforms and systems; And software as a service (SaaS) services featuring software for management, retention, preservation, classification, access, control, compliance management and disposition of metadata; Software as a service (SaaS) services, namely, software for managing, monitoring, identifying, tracking, logging, analyzing and profiling robots and robotics applications; Software as a service (SaaS) services featuring software for data processing, data transmission, data analytics, and electronic device operation, monitoring, management and communication in the fields of robotics and automated operations; Software as a service (SaaS) services, namely, software development tools for robotics applications and automated operations; Software as a service (SaaS) services featuring software for the design, development, and testing of robots, robotics applications and automated operations; Software as a service (SaaS) services featuring software for the design, development, and testing of robotics applications and automated operations; Software as a service (SaaS) services featuring software for measuring, analyzing and monitoring performance of robotics applications and automated operations; Software as a service (SaaS) services featuring software for real-time messaging, authentication and security in the robotics field; Software as a service (SaaS) services featuring software for end-to-end development and management of robotics applications and automated operations; Software as a service (SaaS) services featuring software for creation, development and iteration of robotics functionalities; Software as a services (SaaS) services featuring software for monitoring robotics and human operated equipment in manufacturing and logistics operations; Software as a services (SaaS) services featuring software for gathering and analyzing equipment data in manufacturing and logistics operations; Software as a services (SaaS) services featuring software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations; Software as a services (SaaS) services featuring software for remotely orchestrating robotics and automated equipment in manufacturing and logistics operations for resolving operational issues; Software as a services (SaaS) services featuring software for monitoring sensors; Software as a services (SaaS) services featuring software for analyzing sensor signals from machines; Software as a service (SAAS) services featuring software for monitoring machine performance and reliability; Software as a service (SAAS) services featuring software for connecting, operating, and managing networked robots and robotics systems in the internet of things (IoT); Research and development in the field of robotics software and applications, machine learning and artificial intelligence; Computer systems analysis; Consultation services in the field of cloud computing; Consulting services in the design and development of computer systems, software and hardware; Computer technology consultancy; Consulting services in the field of robotics software and applications; Providing temporary use of online non-downloadable cloud computing software for use in the field of robotics; Software as a service (SAAS) services featuring software using artificial intelligence for use in managing manufacturing and logistics equipment to improve efficiency and reduce costs in automated operations; Application service provider (ASP) services featuring software using artificial intelligence for automatically optimizing industrial robotic workflows and providing machine learning (ML) based recommendations to identify and resolve operational workflow and logistics issues; Software as a service (SaaS) services featuring software for media and design content creation; Software as a service (SaaS) services featuring software for image and video rendering, compression, compositing, processing and visualization; Software as a service (SaaS) services featuring software for administering and managing video render farms; Software as a service (SaaS) services featuring software for automating image and video rendering and post-render tasks; Software as a service (SaaS) services featuring software for caching animated scene geometry; Software as a service (SaaS) services featuring software for particle rendering, shading, texturing, meshing, editing, simulating, manipulation and management; Software as a service (SaaS) services featuring software for visualization and processing of digital images, photographs, film, video and data relating to computer graphics in the film, broadcast, commercial marketing, video game, website development, computer-aided design, computer-aided manufacturing, engineering, and non-clinical medical visualization industries; Software as a service (SaaS) services featuring software for the local and remote management of desktop computers, servers, workstations, tablets, personal digital assistants and smartphones, for rendering, processing, execution, and automation of other programs and computer software applications on individual or multiple concurrent computer systems; Information technology (IT) services; Computer services; Cloud computing hosting services; Hosting of digital content on the Internet; Cloud hosting of electronic databases and virtual computing environments; Server hosting; Computer time-sharing services; Computer services, namely, providing virtual application, web, file, database and storage servers of variable capacity to others; Scaling services, namely, providing variable computing and electronic storage capacity to others; Administering and maintaining databases and virtual computing environments for others; Electronic data storage; Rental of space in a computer co-location facility for containerized data centers of others; Application service provider (ASP), namely, hosting computer software applications and databases of others; Computer services, namely, hosting, managing, provisioning, scaling, administering, maintaining, monitoring, securing, encrypting, decrypting, replicating and backing up databases and cloud computing environments for others; Computer software rental; Providing information in the fields of information technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, databases, data processing and analytics, data storage, data warehousing, data archiving, data and information security, networking, mobile computing, and the Internet of Things (IoT); Data and application migration services; Data mining services; Data backup and data restoration services; Remote online backup of computer data; Data

encryption and decryption services; Data warehousing; Computer services, namely, monitoring the web sites of others to improve their scalability and performance; Computer services, namely, enforcing, restricting and controlling access privileges of users of computing and network resources based on assigned credentials; Providing search engines for obtaining data via communications networks; Creating indexes of computer network-based information, sites, and other resources available on global computer networks for others; Dedicated IP address hosting for others; Domain name server (DNS) services for others, namely, providing computer servers for electronic storage of domain name addresses and resolution of domain name address requests; Computer services, namely, intrusion detection and protection; Computer services, namely, web traffic filtering; Computer services, namely, providing virtual data storage and caching to others; Computer services, namely, cloud hosting of virtual desktops and applications; Cross-platform conversion of digital content into other forms of digital content; Digital compression of computer data; Software as a service (SaaS), namely, software for data processing; Software as a service (SaaS) featuring software for cloud computing; Software as a service (SaaS) featuring software for virtualization; Software as a service (SaaS) featuring software for managing and deploying virtual machines to a cloud computing platform; Software as a service (SaaS) featuring software for use in cloud infrastructure management and automation; Software as a service (SaaS) featuring software for running cloud computing based applications; Software as a service (SaaS) featuring software platforms for cloud computing networks and applications; Software as a service (SaaS) featuring software that provides access to cloud-based scalable computing resources and data storage; Software as a service (SaaS) featuring software for monitoring cloud and application performance; Software as a service (SaaS) featuring software for event logging, reporting, analysis and alert generation; Software as a service (SaaS) featuring software for collecting, editing, modifying, organizing, synchronizing, integrating, monitoring, transmitting, storage and sharing of data and information; Software as a service (SaaS) featuring software for data, desktop and application streaming; Software as a service (SaaS) featuring software for data backup, recovery and archiving; Software as a service (SaaS) featuring software for data transfer and migration; Software as a service (SaaS) featuring software for data protection and data security; Software as a service (SaaS) featuring software for data warehousing; Software as a service (SaaS) featuring database management software; Software as a service (SaaS) featuring software for creating, configuring, provisioning and scaling databases; Software as a service (SaaS) featuring software for storing, retrieving, caching, extracting, formatting, structuring, systematizing, organizing, indexing, processing, querying, analyzing, replicating and controlling access to data; Software as a service (SaaS) featuring software for logging changes within a database; Software as a service (SaaS) featuring software for improving database performance; Software as a service (SaaS) featuring software for configuring, provisioning and scaling data cache storage for databases; Software as a service (SaaS) featuring software for computer network management and automation; Software as a service (SaaS) featuring software for monitoring computer network access and activity; Software as a service (SaaS) featuring user authentication software; Software as a service (SaaS) featuring cryptography software; Software as a service (SaaS) featuring software for monitoring, tracking, logging, analyzing, auditing and reporting in the field of regulatory and information security compliance;
