General Information

1. Trade Marks Journal

This journal is published by the Registry of Trade Marks pursuant to Rule 86A of the Trade Marks Rules. It is published weekly on Fridays, unless otherwise directed by the Registrar.

2. Notice of Opposition

Any person who wishes to oppose any of the marks published may within two months from its publication date file a Notice of Opposition on Form TM11. Reasonable notice should be given to the Applicant beforehand, to provide the Applicant an opportunity to withdraw the application. Failure to give such notice will be taken into account when considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

3. Practice Directions and Circulars

The Registry has ceased our practice of publishing Practice Directions and Circulars in the Trade Marks Journal. Practice Directions and Circulars are available on our website at <https://www.ipos.gov.sg>. If you wish to receive our updates via email, you may subscribe to our mailing list by sending an email to news@ipos.gov.sg and letting us know the subject matter of interest (e.g. Trade Marks).

4. Information Contained in this Journal

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

apparatus used for L band and S band communications, namely, electronic apparatus used for frequency conversion, aerial electronics, preselection, switching and amplification, synthesizers and frequency sources, electronic transmission and reception, analog and digital attenuation and phase shifters in the nature of frequency converters, aeriels, aerial amplifiers and frequency synthesizers; wireless telephone handsets and mounts for use in satellite communications; Microwave aeriels and replacement parts and components therefor; multi-functional electronic assemblies for use in radar, electronic warfare (EW) and communications, navigation and identification friend or foe (IFF) applications, namely, combination of active electrical components in the nature of transistors and electron tubes, and passive electrical components in the nature of isolators being radio and microwave transmitters, electric resistors, and antenna filters, electric switches, amplifiers, electrical signal attenuators, electricity limiters, computer hardware in electronic circuitry, magnetrons for use in generating alternating currents at microwave frequencies, radar receivers with amplifiers, radar detectors; waveguides; Waveguides for radio-wave, microwave and millimeter wave beam delivery; Integrated circuits for use in the defence, security, radar, military or civil aviation, aerospace, onshore or offshore wind energy, space, medical and especially medical imaging, telecommunications industry, nuclear industry sectors; Transmitters and receivers intended for use in radar applications; microwave electric cables; radio-frequency generators for providing radio-frequency energy; frequency synthesizers; Frequency converters and multipliers; oscillators; frequency mixers; Electrical adapters and amplifiers; computer hardware and servers; Apparatus for satellite and microwave communications to transmit communications from a vehicle to another vehicle, or a vehicle to a satellite; Satellite transmitters and receivers; electronic, optical, electro-optical and electro-mechanical avionic apparatus; transmitters of electronic signals, namely, slip rings and switching components in the nature of electric current switches; switches, Electric switches; gauges namely, length measuring gauges, fuel gauges, tire pressure gauges, water temperature gauges;

electronic controllers for use in aircrafts, radars, helicopters, naval vessels, land vehicles, UAV's, commercial and military satellites, oil and gas floating platforms, nuclear and wind turbines, industrial robots and machinery, medical imaging apparatus, food and beverage machinery; communications systems; direction finding and location finding systems; rotating electric contacts and switching elements in the nature of electric switches; parts and components for the aforesaid goods.

Class 37

Construction, installation, maintenance and repair of engineering materials and components including such materials and components (radio-frequency, microwave, electric, electronic or optical) for use in the defence, security, radar, military or civil aviation, aerospace, onshore or offshore wind energy, space, medical and especially medical imaging, telecommunications industry and nuclear industry sectors; information, advice and assistance with respect to the installation, maintenance and repair of machinery and equipment including radio-frequency, microwave, electric, electronic or optical components therefor for use in the defence, security, radar apparatus, military or civilian, aerospace, onshore or offshore wind energy, space, medical and especially medical imaging, telecommunications industry and nuclear industry sectors; installation of instrumentation components and systems; Maintenance and repair of electrical and electronic measuring, signaling, checking and testing equipment and instruments; maintenance and repair of apparatus and instruments for conducting, distributing, transforming, accumulating, regulating or controlling electric current; maintenance and repair of apparatus for the recording, transmission or reproduction of sound or images; maintenance and repair of electrical and electronic communications engineering equipment; repair and maintenance of measuring and testing equipment for sound, video and network communication technology; maintenance and repair of high-frequency receiving and transmission apparatus; maintenance and repair of base stations for radio communication networks; maintenance and repair of aerials.

Class 42

Technological engineering, design, development and testing services for RF, microwave, electric, electronic or optical equipment and components; technological support services in relation to the aforesaid equipment and components; Design and development of radio-frequency (RF), microwave and millimeter wave electronic equipment and components; Radiation analysis and screening services, namely, radiation measurement services; Design and calibration of instruments for detecting and measuring radiation and components thereof; computer software consulting; Machine functionality testing services; scientific and technological research on machines, equipment and components thereof in the defence, security, radar, military or civil aviation, aerospace, onshore or offshore wind energy, space, medical and especially medical imaging, telecommunications industry, nuclear industry sectors; instrumentation research; Design and development of engineering materials and components and especially radio-frequency, microwave, electric, electronic or optical in the defence, security, radar, military or civil aviation, aerospace, onshore or offshore wind energy, space, medical, and especially medical imaging, telecommunications industry, nuclear industry sectors.

hardware; computer hardware for automated processes, industry automation and factory automation; Computer network hardware for maximizing automation uptime and availability of automated processes; computer interfaces; computer network interfaces; computer systems interfaces; computer interface boards; interface software; electronic circuits; electronic circuit boards and circuit board modules; electronic circuits for fieldbus communication; electronic circuit boards and circuit board modules for fieldbus communication; electronic circuits for network communication; electronic circuit boards and circuit board modules for network communication; electronic circuits, circuit boards and circuit board modules for automation and industrial automation; electronic circuits, circuit boards and circuit board modules for Internet of Things [IoT] and industrial Internet of Things [IoT]; electronic circuit boards and circuit board modules, communication circuits and circuit boards for connecting computers, networks and networking software; computer network communication protocols; network communication protocols for fieldbus communication and network communication control; electrical and electronic connectors; connecting modules for monitoring and remote monitoring apparatus and for electric and electronic controls; connecting modules for electronic controls; connectors for networks and telecommunication apparatus; intelligent gateways for communication; intelligent gateways for fieldbus and network communication; intelligent gateways for data processing and pre-processing; intelligent gateways for real-time data analysis; intelligent gateways for automation, industrial automation and control; Internet of Things [IoT] gateways; industrial Internet of Things [IoT] gateways; Internet of Things [IoT] gateways for fieldbus and network communication; industrial Internet of Things [IoT] gateways for fieldbus and network communication; Internet of Things [IoT] gateways for automation, industrial automation and control; industrial Internet of Things [IoT] gateways for automation, industrial automation and control; intelligent gateways for industrial devices and machines management; Internet of Things [IoT] gateways for industrial devices and machines management; industrial Internet of Things [IoT] gateways for industrial devices and machines

management; wireless communication devices, apparatus and instruments; wireless transmitters; wireless receivers; wireless routers; wireless network devices; communication processors for networks; network processors; signal processors; data processors; micro processors; safety, security and protection devices; utility, security and cryptography software; security software; computer security software; application security software; software for ensuring the security of electronic mail; software for network and device security; industry operations security software; cloud computing security software; cloud application security software; cloud network monitoring software; infrastructure security software; data, information and network security software; artificial intelligence and machine learning software for monitoring, protection and analysis; artificial intelligence and artificial intelligence platforms threat detection and threat response software; software for the integration of artificial intelligence and machine learning in the field of big data; computer firewall software; endpoint protection software; endpoint threat detection and response software; encryption software; encryption apparatus; intrusion detection software; intrusion protection software; intrusion detection system (IDS) software; security anomaly detection software; programmable fixed function root of trust [RoT] hardware; programmable root of trust hardware; root of trust software.

Class 37

Installation of automation equipment; installation of industrial automation equipment; advisory services relating to installation of automation equipment; advisory services relating to installation of industrial automation equipment; installation, maintenance and repair of computers, computer hardware and peripherals; installation, maintenance and repair of telecommunications equipment; installation, maintenance and repair of computer network and information technology equipment; maintenance and repair of communications, telecommunications and data communications systems hardware, networks, apparatus, and instruments; maintenance and repair of electronic apparatus and installations.

Class 38

Telecommunications; computer communication; telecommunications services provided via fiber optic, wireless and cable networks; wireless messaging and digital messaging services, wireless broadband communication services, wireless electronic transmission of data and information, cable transmission of signals and data; communications by fiber optic networks; computer communication, providing access to data and information on communication and computer networks; providing access to computers and computer networks; providing access to electronic communications networks and databases; providing telecommunications connections to the Internet or to databases; providing telecommunications connections to cellular phones and cellular phone networks; providing frame relay connectivity services for data transfer; providing telecommunications connections to networks, local area networks and personal area networks; providing telecommunications connections to wireless fixed and mobile devices; providing telecommunications connections to wireless, fixed and mobile devices and machines over short and long distances.

Class 41

Education; training; training courses; education examination; educational services with awarding of certificates; education courses relating to automation and automation equipment; education courses relating to automation uptime; instruction and training relating to communications, telecommunications and data communications systems, software, software packages, security, information and data security, computer security, networks, apparatus, and instruments; instruction and training relating to installation and use of industrial automation systems; training of personnel to ensure maximum security, computer security and information security and protection.

Class 42

Design and development of automation equipment; design and development of firmware and firmware systems; computer hardware development and design; research relating to automated processes; research relating to automated industrial processes; research relating to the computerized automation of industrial processes; research relating to the computerized automation of technical processes; research relating to the computerized automation of administrative processes; software creation, development, programming, implementation and adaptation; troubleshooting in the nature of diagnosing computer hardware and software problems [technical support services]; technical support services, namely, troubleshooting in the nature of diagnosing of automation and industry automation problems; troubleshooting in the nature of diagnosing problems with automation and industrial automation products; computer programming and installation, maintenance, updating and upgrading of computer programs; programming, installation, maintenance, updating and upgrading of device management software; consultancy and information services relating to the design, programming and maintenance of computer software; computer system monitoring and remote monitoring; machine monitoring and machine condition monitoring; monitoring of networks and network systems; Computer security services [testing and risk assessment of computer networks], namely real-time technology risk assessments of computer systems, machines, networks and network systems; IT support; software technical support services; technical support services relating to computer software and applications; provision of technical support in the operation and supervision of computer networks; software support and maintenance services; testing, authentication and quality control; technical testing; quality testing; quality control testing; testing of machinery; testing of computing equipment and computer systems, software and hardware; testing of electronic data processing systems; certification [quality control]; testing of apparatus in the field of electrical engineering for certification purposes; machine and equipment commissioning services; design and development of software and operating software for accessing and using a cloud computing network; providing

temporary use of operating software for accessing and using a cloud computing network; authentication services for computer security; computer programming services for electronic data security; computer security services for protection against illegal network access; computer security services in the nature of administering digital certificates; computer security system monitoring services; computer security threat analysis; IT security, protection and restoration; design and development of electronic data security systems; computer and data security services and consultancy; monitoring of computer systems for security purposes; provision of security services for computer networks and computer access; provision of computer security risk management programs; updating of computer software and networks relating to computer security and prevention of computer risks; IT services for data and information protection; cloud based data and information protection services; computer firewall services; data encryption services.

Class 45

Electronic monitoring services for security purposes, for control of building environmental access and security systems; monitoring of security systems; consultation in relation to data and information protection compliance; identity validation services; identity verification.
