Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within commercial products and associated manufacturing, test, and control systems; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature

sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within source power conversion, measurement, and control, namely, utility source power and other energy source power; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within semiconductor, thin film plasma processes including industrial coating, optical coating and other coatings; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within data center, cloud computing, networking systems, and telecommunication systems; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot

monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within analytical instrumentation and analytical instrumentation processes; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within medical equipment, therapeutic equipment, and diagnostic equipment; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within industrial production and manufacturing systems; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared

cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within material and chemical processing; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for use with temperature measurement and control of glass applications, metal applications, nonmetal applications, refineries, gas plants, petrochemicals processes, semiconductor and thin-film production, inspection of boiler tubes and furnace walls, pilot flames and flare stacks, rolling processes, rotary kilns, and glass production; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within electrostatic instrumentation; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the

nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for use in gas sensing and monitoring automotive emissions, patients, greenhouse gases, freon refrigerants, carbon dioxide, sulfur hexafluoride, and ventilation systems; Temperature calibration devices for calibrating pyrometers, thermal imaging cameras, radiometers, heatflux, and spectrographic measurement systems, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors in the nature of devices for monitoring waste gas ignition system characteristics to identify failure, thermal imaging cameras, infrared cameras, power controllers, residual gas analyzers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within power delivery, power control, power measurement, power conversion, power transformation, power refinement, power modification, and power supply systems; Electronic devices, namely, power supplies, power inverters, power shelves in the nature of power supplies, power rectifiers, and power strips for server rack installations, apparatus for conducting, regulating, and controlling electricity for plasma sources in the nature of power supplies, matching networks, and plasma chambers for use with chemical vapor deposition (CVD), power sources in the nature of radio frequency ("RF") plasma generators for producing RF power to generate and maintain plasma in CVD chambers, temperature measurement devices, power controllers, gas sensors for measuring gas concentration, rectifiers, power adapters, power converters, DC/DC converters, digital multi-meters, match networks in the nature of variable impedance-adapting circuits, voltage amplifiers in the nature of high voltage multipliers, voltmeters, electrostatic detectors and sensors for detecting and sensing electrostatic charge buildup, Instrumentation for locating static charges and measuring ionizer performance in the nature of charged plate monitors, surface/volume resistance meters, ionizers being ionization apparatus for scientific or laboratory use, ion collecting plates in the nature of electrostatic emission control devices being electrostatic precipitators for reducing particulate emission in industrial applications, electrostatic force microscopes, voltage pulse generators for testing electric current, power amplifiers, battery backup power supplies, computer hardware, and downloadable computer software and firmware for user interface functionality and back-end processing with power diagnostics, power visualization, power optimization, ventilation system coordination, gas monitoring, thermal comfort assessment, process control, process monitoring, preventive maintenance, and error detection, within the aerospace and defense systems; Integrated systems modules, namely, remote plasma sources equipment for power supplies in the nature of low-energy ion and radical generation systems for use with chemical vapor deposition (CVD) chambers and plasma generators for producing RF power to generate and maintain plasma in CVD chambers and match networks modules in the nature of in the nature of variable impedance-adapting circuits; And downloadable software and firmware for monitoring, controlling, and analyzing power delivery systems, power control systems, power measurement systems, power conversion systems, power transformation systems, power refinement systems, power modification systems, and power supply systems; Downloadable software for providing analytics in the form of advanced diagnostics, predictive or prescriptive actional insights, and computing infrastructure for use in association with manufacturing processes; Electrostatic instrumentation, namely, electrostatic copying machines, gas sensors for measuring gas concentration and gas flow monitors.

CLASS 36

Extended warranty program services, namely, service contracts.

CLASS 37

Equipment repair and maintenance services, namely, repair of power supplies, power generators, power inverters, power shelves, plasma sources, plasma generators, temperature measurement devices, temperature calibration sources, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors, thermal imagers, infrared cameras, power controllers, gas analyzers, gas sensors, rectifiers, power adapters, power converters, DC/DC converters, multi-meters, match networks, voltage amplifiers, voltmeters, electrostatic detectors and sensors, charged plate monitors, surface/volume resistance meters, ionizers, ion collecting plates, electrostatic form microscopes, voltage pulse generators, power amplifiers, battery backup units, computer hardware,

and remote plasma sources equipment; Building maintenance and repair, namely, industrial production facilities repair, overhaul, and maintenance; Field services, namely, installation, integration, upgrades, retrofits, and commissioning, set-up, inspection, hand-over, on-site infrared survey, and on-site calibration and repair, and on-site application support, in the nature of repair and maintenance of power supplies, power generators, power inverters, power shelves, plasma sources, plasma generators, temperature measurement devices, temperature calibration sources, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors, thermal imagers, infrared cameras, power controllers, gas analyzers, gas sensors, rectifiers, power adapters, power converters, DC/DC converters, multi-meters, match networks, voltage amplifiers, voltmeters, electrostatic detectors and sensors, charged plate monitors, surface/volume resistance meters, ionizers, ion collecting plates, electrostatic form microscopes, voltage pulse generators, power amplifiers, battery backup units, computer hardware, and remote plasma sources; Refurbishment services, namely, refurbishing of pre-owned power supplies, power generators, power inverters, power shelves, plasma sources, plasma generators, temperature measurement devices, temperature calibration sources, fiber optic temperature sensors, pyrometers, infrared thermometers, flare pilot monitors, thermal imagers, infrared cameras, power controllers, gas analyzers, gas sensors, rectifiers, power adapters, power converters, DC/DC converters, multi-meters, match networks, voltage amplifiers, voltmeters, electrostatic detectors and sensors, charged plate monitors, surface/volume resistance meters, ionizers, ion collecting plates, electrostatic form microscopes, voltage pulse generators, power amplifiers, battery backup units, computer hardware, and remote plasma sources equipment; Exchange and spare part program services, maintenance and repair of computers, namely, exchange of spare parts for computers; Technical support services, namely, providing technical advice and support services related to the repair of electronic device and computer hardware, for use with power delivery systems, power control systems, power measurement systems, power conversion systems, power transformation systems, power refinement systems, power modification systems, and power supply systems, semiconductor and thin film plasma processes, data center, cloud computing, networking systems, and telecommunication systems, analytical instrumentation, medical equipment, industrial production systems, material and chemical processing systems, and temperature measurement and control systems.

CLASS 42

Software as a service (SAAS) services featuring software for monitoring, controlling, and analyzing power delivery systems, power control systems, power measurement systems, power conversion systems, power transformation systems, power refinement systems, power modification systems, and power supply systems; Software as a service (SAAS) services featuring software for providing analytics in the form of advanced diagnostics, predictive or prescriptive actional insights, and computing infrastructure for use in association with manufacturing processes; Maintenance and upgrading of computer software; Technological consulting services, in the field of electrical power management systems for semiconductor and thin film plasma processes, data center, cloud computing, networking systems, and telecommunication systems, analytical instrumentation processes, medical equipment, industrial production systems, material and chemical processing systems, temperature measurement and control applications, electrostatic instrumentation products, and industrial gas sensors and monitors; Providing power regulation and control technology solutions services for the delivery of power for use by the electronic equipment of others, namely, power delivery systems, power control systems, power measurement systems, power conversion systems, power transformation systems, power refinement systems, power modification systems, and power supply systems; Providing online nondownloadable software for use in monitoring, controlling, and analyzing power delivery systems, power control systems, power measurement systems, power conversion systems, power transformation systems, power refinement systems, power modification systems, and power supply systems; Technical support services, namely, providing technical advice, and support services related to the repair of downloadable computer software; Calibration services; Enhancement and upgrade services, namely, upgrading and enhancement of computer software.
