General Information

1. Trade Marks Journal

This journal is published by the Registry of Trade Marks pursuant to Rule 86A of the Trade Marks Rules. It is published weekly on Fridays, unless otherwise directed by the Registrar.

2. Notice of Opposition

Any person who wishes to oppose any of the marks published may within two months from its publication date file a Notice of Opposition on Form TM11. Reasonable notice should be given to the Applicant beforehand, to provide the Applicant an opportunity to withdraw the application. Failure to give such notice will be taken into account when considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

3. Practice Directions and Circulars

The Registry has ceased our practice of publishing Practice Directions and Circulars in the Trade Marks Journal. Practice Directions and Circulars are available on our website at <https://www.ipos.gov.sg>. If you wish to receive our updates via email, you may subscribe to our mailing list by sending an email to news@ipos.gov.sg and letting us know the subject matter of interest (e.g. Trade Marks).

4. Information Contained in this Journal

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

Mark Clause(s):

The mark consists of the spoken word "AGODA" superimposed over musical sounds played by a marimba. Before the vocals come in, the background instrument, a marimba, plays a D on a quarter note, followed by a minor third dyad starting on F# on an eighth note, and then a major 6th dyad starting on a D on a quarter note. Starting after the major 6th, the word "Agoda" is sung over 3 tones. The first syllable is on a B natural sung on an eighth note. The second syllable is on an A natural sung over a quarter note. The third syllable is on a D natural, sung over another quarter note. Under the vocal, the marimba continues, playing another major 6th dyad starting on D on an eighth note, followed by another minor third dyad starting on F# on a quarter note, and then an octave on D on a quarter note. In musical notation, the mark is as shown in the representation attached to the application form.

Optical components, instruments and products for use with lasers, namely, optical lenses, partial optical reflectors, beamsplitters, mirrors; optical components and instruments for use with lasers, namely, optical glass, windows through which the laser light is transmitted, nozzles as part of a laser system, beam expander-condensers, waveplates for laboratory use, reflective phase retarders, polarizer-analyzer-attenuators (PAZ/PAG), thin film polarizers; electro-optical modulators; mid-wave and long wavelength infrared objectives; optical blanks; optical instruments and apparatus in the nature of optical receivers; optical data media in the nature of blank optical data carriers; optical devices used to capture light in the nature of objectives; photographic transparencies, single crystal semiconductor wafers or chips to serve as a substrate for epitaxial deposition of electronic or photonic material structures or for an infrared imaging or detection unit; laser collimators; semiconductor substrates and wafers; brewster windows [optical filters]; mechanical and optical assemblies in the nature of laser equipment and its parts namely, focusing heads, beam director components, beam enhancement tools, beam diagnostic instruments, and integrators, for cutting, welding and brazing materials for non-medical purposes; semiconductor diode chips, semiconductor diode arrays, surface-emitting semiconductor diodes, edge emitting semiconductor diodes; optical pumps [lasers, not for medical purposes]; laser modules; pump lasers [lasers not for medical use] and components therefor, namely bars and stacks; 980 pump laser modules for industrial use [lasers for industrial use]; pump laser modules for industrial use; pump lasers for optical amplifiers; high speed Datacom transceivers; vertical-cavity

surface-emitting lasers; lasers and components for fiber and direct diode laser systems; laser processing heads and fiber beam delivery systems and components for laser material processing, namely lasers, beam delivery systems, focusing optics, laser processing heads, motion control systems, sensors and feedback systems and beam shaping and modulation devices; scientific optical equipment, namely, laser cavities, laser crystals, polarization components, thin film polarizers, waveplates, polarization rotators, filter plates, filter units and lyot filters; prisms; coated optical mirrors; glass laser flow tubes [beam amplification instrument]; optical filters; optical lenses; components and subsystems for fiber optic communications, namely, tunable filters, sensors, monitors, chromatic dispersion compensators, polarization dispersion compensators, add/drop multiplexers, dynamic gain equalizers, tunable lasers and polarization controllers; electronic and optical communications instruments and components, namely, optical transmitters, optical receivers, optical data links, optical transceivers, cable television transmitters, digital transmitters, and communication link testers for testing communication links; components and subsystems for sensing and thermal imaging, namely, tunable optical detectors, tunable optical emitters, tunable optical filters, drive electronics for tunable optical detectors, tunable optical emitters, tunable optical filters, tunable optical sensors, infrared gas sensors, infrared chemical sensors, infrared biomedical sensors, focal plane arrays, wavelength translators, thermal cameras and optical amplifiers; Photonic processors, namely, channel processors for dense wavelength division multiplexing of telecommunications signals carried by optic fibers; silicon carbide wafers and wafer chucks, silicon carbide water cooled mirror [mirrors [optics]], green lasers, and fiber pigtailed laser diode modules, micro-optics for wave-length selective switches [switches [electric]], apparatus for converting thermal and electrical energy for cooling [electric converters], thermoelectric coolers for electronic devices, thermoelectric converters for electronic devices; optical windows [optical filters] for use with electrical components; optical reflector; spectroscopes; light filter for optical device; optical bread boards used as mounts for optical assemblies; phase and/or

frequency modulator; optical inspection apparatus and instruments for industrial use; optical lamps, optical lanterns; optical prisms; cable for optical signal transmission; optical phase shifter; optical shutters; optical fiber; dispersion-shifted optical fiber; multiplexer; light regulators; filters for photography; optical sensors; amplifiers; amplifying automatic valves and amplifying glass tubes for scientific purposes; photoelectric sensors; data processing apparatus; raster image processor; semiconductor wafers; laser diode; photoelectric converters; heat regulating apparatus in the nature of automatic valves; photovoltaic devices and equipment for solar power generation, namely, solar panels; optical components and instruments for use with lasers, namely, beam expander-condensers; reflective phase retarders for use with lasers in the nature of mirrors used to bend laser beams; single crystal semiconductor wafer to serve as a substrate for epitaxial deposition of electronic material structures; single crystal semiconductor wafer to serve as a substrate for epitaxial deposition of photonic material structures; single crystal semiconductor wafer to serve as a substrate for an infrared imaging unit; single crystal semiconductor wafer to serve as a substrate for an infrared detection unit; single crystal semiconductor chip to serve as a substrate for epitaxial deposition of electronic material structures; single crystal semiconductor chip to serve as a substrate for epitaxial deposition of photonic material structures; single crystal semiconductor chip to serve as a substrate for an infrared imaging unit; single crystal semiconductor chip to serve as a substrate for an infrared detection unit; laser focusing heads in the nature of optical devices used to aim lasers; beam integrators; scientific optical equipment, namely, laser cavities not for medical purposes; optical devices that alter the polarization state of light waves, namely, birefringent filter plates and birefringent filter units; tunable filters for fiber optic communications; sensors for fiber optic communications; monitors for fiber optic communications; chromatic dispersion compensators for fiber optic communications; polarization dispersion compensators for fiber optic communications; drive electronics for tunable optical emitters; drive electronics for tunable optical filters; infrared wavelength

translators; semiconductor wafer chucks; optical reflectors; optical beam expander-condensers; optical waveplates; optical phase-retarders in the nature of mirrors used to bend laser beams; optical polarizer-analyzer-attenuators; optical thin film polarizers; mechanisms for coin-operated apparatus; cash registers, calculating machines, fire-extinguishing apparatus; optical products, namely, infrared lenses; correcting lenses; semiconductor substrates and wafers, silicon carbide wafers and wafer chucks, silicon carbide water cooled mirror [mirror [optics]]; optical products, namely, lenses, reflectors, mirrors, windows, beam expander-condensers, waveplates, phase retarders, polarizer-analyzer-attenuators, thin film polarizers and electro-optical modulators.

Class 35

Advertising; business management; business management; business administration; office functions; wholesale and retail store services relating to semiconductor diode chips, semiconductor diode arrays, surface-emitting semiconductor diodes, edge emitting semiconductor diodes, optical pumps, mechanisms for coin-operated apparatus, cash registers, calculating machines, fire-extinguishing apparatus; office work.

Class 37

Building construction and repair services; installation of building automation equipment.

Mark Clause(s):

The following claim is made in the International Registration: Colour(s) claimed:
Orange, purple and blue.

The trade mark is a movement mark consisting of a sequence of 34 images arranged from top to bottom, as depicted in the representation on the notification of international registration. The number in the lower right of each image indicates its position in the sequence and is not part of the trade mark. The sequence begins with two overlapping deformed elliptical shapes (orange and blue) rotating clockwise. As they continue to rotate, the shapes separate and transform into two circular forms before the circular shapes approach each other while continuing their rotation from Figures 11 to 21. The two circles subsequently change their forms while rotating, leading to a state in which the two deformed elliptical shape figures partially overlap from Figure 22 onwards. The sequence concludes with the shapes reverting to overlapping deformed ellipses in Figure 34. The mark consists of a single smooth sequence of movement over the duration of approximately two seconds.

Goods and/or Services:

Class 09

Downloadable and recorded computer software and hardware for use in semiconductor design and manufacturing; downloadable and recorded computer software and hardware for semiconductor integrated circuit design for use in semiconductor design, manufacturing, and testing; downloadable and recorded computer software and hardware for semiconductor design for use in tracking devices during the semiconductor design, manufacturing, assembly, and testing; downloadable and recorded computer software and hardware providing automated characterization and analysis of test chip and structures and cell library layouts in the field of semiconductor manufacturing; downloadable and recorded software for managing equipment sensor data, equipment control, and data analytics of

semiconductor design and manufacturing processes; downloadable and recorded software for managing equipment sensor data, equipment controls and data analytics of electronics design and manufacturing processes; downloadable and recorded computer software and hardware using analytics of semiconductor design manufacturing execution systems data to increase efficiencies in the manufacture of semiconductors; downloadable and recorded computer software and hardware using analytics of semiconductor design consumable parts and materials data to decrease costs in the manufacture of semiconductors; downloadable and recorded computer programs using artificial intelligence and machine learning for use in semiconductor design, manufacturing, assembly, and testing, to improve yields and increase efficiencies in the manufacture of semiconductors; downloadable software for development of machine learning and deep learning algorithms, pattern recognition, and modeling technologies for use in the field of semiconductor design, test and manufacturing; electrical measurement computer hardware for use in the field of semiconductor manufacturing; traceability computer hardware for use in the field of semiconductor manufacturing device tracking; test equipment, namely, electronic sensors for testing electronic circuits and devices; test structures and test chips, namely, semiconductor test chips; downloadable and recorded computer software for semiconductor test data analytics; downloadable and recorded computer software for use in operating semiconductor testing machines; downloadable and recorded computer software for driving or enabling semiconductor devices and signal processors, or extending their functionality; integrated circuit modules for electronic data transfer and wireless communication.

Class 37

Installation and maintenance of computer hardware and hardware systems; technical support services, namely, troubleshooting in the nature of repair of computer hardware.

Class 42

Software consulting, engineering, design and testing services in the field of the manufacture of semiconductors and for yield and performance improvement in the manufacture of semiconductors; analysis of technical data in the field of the manufacture of semiconductors and for yield and performance improvement in the manufacture of semiconductors; testing of semiconductors for quality control purposes; design of semiconductor test chips for others; providing technical support and consulting services, namely, troubleshooting in the nature of diagnosing computer hardware problems by providing design solutions in the field of integrated circuits and signal processing; providing technical information via temporary use of non-downloadable software for displaying models in the field of integrated circuits and signal processing solutions; providing temporary use of non-downloadable software for evaluating analog design circuitry, calibrating analog design circuitry, and driving analog design circuitry, featuring an online reference design library, circuit notes, and evaluation software code sets for IC design; cloud computing featuring software for processing data in the field of semiconductor design, test and manufacturing; providing temporary use of non-downloadable software for providing simulation, modeling and design tools for analog and mixed signal IC design; rental and leasing of computer hardware and computer peripherals; computer hosting services, namely, providing computer hardware, computer software, computer peripherals to others on a subscription or pay-per-use basis; providing virtual computer systems and virtual computer environments through cloud computing; providing on-line non-downloadable software using artificial intelligence for use in machine learning and data analysis in the field of semiconductor design, test and manufacturing; application service provider (ASP) featuring software using artificial intelligence for use in machine learning and data analysis in the field of semiconductor design, test and manufacturing; software as a service (SaaS) services featuring software for use in machine learning in the field of semiconductor design, test and manufacturing; software as a service (SaaS) services featuring

software that utilizes machine learning algorithms to discover patterns and perform analytics for use in machine learning in the field of semiconductor design, test and manufacturing; software as a service (SaaS) featuring cloud-based metrics and analytic algorithms for use in manufacturing processes, namely, for yield and performance improvement in the manufacture of semiconductors; software as a service (SaaS) services featuring software for sharing large and dimensional datasets for enterprise clients for the purpose of delivering automated data modeling, machine learning, predictive analytics, automated reasoning, diagnostics, optimization and recommendation services; software as a service (SaaS) services featuring software for use in developing, executing, monitoring, managing, and optimizing algorithms, business processes, and analytics in the fields of semiconductor design, test, process control, assembly and manufacturing; software as a service (SaaS) services, namely, hosting software for use by others for use in store, query, and sharing functionality for management of high dimensional big data sets, machine learning algorithms, and predictive models; providing temporary use of on-line non-downloadable software and applications using artificial intelligence for use in machine learning and data analysis in the field of semiconductor design, test, process control, assembly and manufacturing; providing temporary use of on-line non-downloadable cloud computing software using artificial intelligence for use in machine learning and data analysis in the field of semiconductor design, test, process control, assembly and manufacturing.
