General Information

1. Trade Marks Journal

This journal is published by the Registry of Trade Marks pursuant to Rule 86A of the Trade Marks Rules. It is published weekly on Fridays, unless otherwise directed by the Registrar.

2. Notice of Opposition

Any person who wishes to oppose any of the marks published may within two months from its publication date file a Notice of Opposition on Form TM11. Reasonable notice should be given to the Applicant beforehand, to provide the Applicant an opportunity to withdraw the application. Failure to give such notice will be taken into account when considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

3. Practice Directions and Circulars

The Registry has ceased our practice of publishing Practice Directions and Circulars in the Trade Marks Journal. Practice Directions and Circulars are available on our website at <https://www.ipos.gov.sg>. If you wish to receive our updates via email, you may subscribe to our mailing list by sending an email to news@ipos.gov.sg and letting us know the subject matter of interest (e.g. Trade Marks).

4. Information Contained in this Journal

The Registry of Trade Marks does not guarantee the accuracy of its publications, data records or advice nor accept any responsibility for errors or omissions or their consequences. Permission to reproduce extracts from this Journal must be obtained from the Registrar of Trade Marks.

Goods and/or Services:

Class 01

Chemical products, preparations and substances for use in science and industry; Chemical test papers (chemically treated or containing chemicals); test papers; sensitized papers; Indicators [chemicals] for scientific use; silica (chemically treated); cellulose powders; chemically treated cellulose; ion-exchange materials; buffer solutions; all for filtration, separation, analysis and testing in laboratories, industry, environmental and medical testing and research; Biochemical preparations for laboratory and scientific research, biological processing and the production of pharmaceuticals, namely, buffers, cell growth media, cell culture media, stem cell media as nutritional media for maintenance and growth of cells in culture, serum-free media, proteins and amino acids, media components in the nature of amino acids, sera, chemical and biochemical additives, buffers, buffer solutions, balanced salt solutions and distilled water; chemicals and chemical products for laboratory and scientific research, biological processing and the production of pharmaceuticals, namely, buffers, cell growth media, cell culture media, stem cell media as nutritional media for maintenance and growth of cells in culture, centrifugation media,

chemicals sera, serum-free media as nutritional media for maintenance and growth of cells in culture, proteins and amino acids, media components in the nature of sera, chemical and biochemical additives, buffers, buffer solutions, and distilled water; deionized water for laboratory, scientific and medical research; biological reagents to maintain embryonic stem cells and/or embryos in in-vitro culture for in-vitro scientific and medical research use; cell culture reagents for scientific research, medical research, and the production of pharmaceuticals; purified water for scientific research, medical research, and the production of pharmaceuticals, namely, water for injection; Eukaryotic cell nutrition media for scientific, research, or manufacture purposes; cell culture media for scientific, laboratory and research use; chemical nucleation preparations for scientific use; chemical preparations for industrial and scientific purposes; chemical preparations for use in chromatography; chemical products and preparations for life science purposes; chemical products for in-vitro use in analytical tests and in analytical processes; chemical products for in-vitro use in biochemical separation; chemical products for separation of molecules for industrial and scientific use; chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in-vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses

(other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for diagnosis for scientific or research purposes; Fluorescent agents for labelling and detecting nucleic acids and proteins; Fluorescent agents for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins; chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; Scintillants, namely, photographic chemicals; films and photosensitive materials, papers and

plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; Photographic emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; Chemicals for use as protein molecular weight markers for in vitro scientific and research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S- transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances

for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; Laboratory reagents, namely, silica beads for scientific research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; Scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions, all for the collection, transportation, storage and analysis of samples and specimens; Serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; resins designed and used in biopharmaceutical manufacturing; Process chromatography membranes [chemical preparation] used in biopharmaceutical manufacturing namely, for purification of biopharmaceuticals; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes; Cell culture media for manufacturing biopharmaceuticals designed and used for the growth and expansion of cells for cultivating human, animal, plant and microorganism cells; Diagnostic preparations, namely, polystyrene microspheres for laboratory use; Chromatography resin; PCR reagents; Cellulose esters for industrial and research purposes; Immunoassay reagents, other than for medical use; Assays for research purposes; Cell culture media for manufacturing biopharmaceuticals; Serum designed and used for the growth and expansion of cells for cultivating

human, animal, plant and microorganism cells; Nucleic acid and protein transfer media [media for use in separation techniques], particularly for laboratory and clinical use; media for chromatography columns for industrial purposes.

Class 05

Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; Diagnostic preparations for medical purposes, diagnostic kits comprising diagnostic agents, preparations and substances for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; cellulose for pharmaceutical purposes; chemico-pharmaceutical preparations; Chemical nucleation preparations for medical use; Chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; Diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; Pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; Chemicals for medical use, in the form of substances, fluids or solutions, applied to media, and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; Nutritive substances for animal cells, viruses, and microorganisms, namely, for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; Medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Cell culture media, reagents and buffers for medical use, namely, for ex-vivo for the further manufacturing of cell and gene

therapies; Nutritive substances for micro organisms, reagents for medical and veterinary purposes, serums; Chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; Chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; Diagnostic preparations, namely, polystyrene microspheres for clinical or medical use; Cellulose esters for pharmaceutical purposes; Immunoassay reagents for medical use; sera.

Class 07

Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; Pharmaceutical processing industrial machine (bioreactor used for the production of biological material for medical treatment or clinical diagnosis); pharmaceutical processing industrial machine (mixer used for the production of biological material for medical treatment or clinical diagnosis); Precision positioning equipment [machines], namely, mechanical actuators, screw actuators, electrical motors for biopharmaceutical manufacture use; hydrodynamic cleaning apparatus for cleaning particulate matter from industrial substrates; Filtration units; Fermenters, namely, machines used for process fermentation in the pharmaceutical industry, for food and beverage production, and for manufacture of biopharmaceuticals; Machines parts, namely filter tubes for biopharmaceutical manufacture use and filter cartridges for filtering machines for biopharmaceutical use, gas generators, apparatus for chemical separation [machines] for biopharmaceutical manufacture use, electrochemical gas generators and separators [machines] for biopharmaceutical manufacture use, electrochemical gas compressors [machines] for biopharmaceutical manufacture use, membranes filters for use as parts of gas separators machines for biopharmaceutical manufacture use, filters for chemical processing; Agitating machines (for chemical processing); mixing or blending machines (for chemical processing) and other chemical processing machines and apparatus; Chemical processing machines and

apparatus for use in handling large scale bioprocess chemicals, and parts and fittings for the aforesaid goods; Computerized mixing machines comprising of pump station, control panel, tubing, mixing implement of media for bioprocess for biopharmaceutical manufacture use; parts and fittings of the aforesaid goods; Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; Pipe [fitted parts of machines] for chemical processing machines and apparatus for biopharmaceutical manufacture use; Machines and instruments [machines] for synthesizing deoxyribonucleic acid for preparations; Machines for use in the manufacture of oligonucleotides.

Class 09

Chromatography columns; Storage containers adapted for use in laboratories [laboratory equipment], namely, for storage of materials used in laboratories; Chromatographic and electrophoretic devices for scientific and laboratory use, as well as accessories adapted for the aforesaid, namely, racks, stands, fittings, and tanks for storage of pressurized materials; Laboratory apparatus; Laboratory filters, namely surface filters, depth filters, membrane strainers, including membranes and filters of hyperfiltration membranes, all of which are in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; Separation apparatus, namely filtering apparatus for laboratory use; Laboratory equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological

materials for medical therapeutic or clinical diagnostic research use; Laboratory equipment, namely, mixers for laboratory use, electronic controllers for use with mixers and bag assemblies for laboratory use in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold in combination for the purpose of producing biological materials for medical therapeutic or clinical diagnostic research use; Laboratory equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags adapted for laboratory and research use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic research use; Laboratory equipment, namely, liners of plastic adapted for laboratory use for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; Cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells, parts and accessories for use with such laboratory apparatus and instruments, namely trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; Laboratory apparatuses for molecular biology, namely filter

membranes for transfer of biological materials, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; Laboratory apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; Pre-packed columns for scientific use, for use in purification; Filtration membranes for laboratory use, namely, supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; Laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; Laboratory filters, namely, extraction thimbles; laboratory apparatus, namely, programmable electronically controlled stirrers; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and

surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; Radiology apparatus and instruments, other than for medical use, for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; Laboratory apparatus for microfabrication; Laboratory apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; Microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; Kit for the purification of proteins for in vitro laboratory use, other than for medical purposes, consisting primarily of pre-packed chromatography columns, and disposable dispenser syringes for laboratory use, sold as a unit with chemicals, pre-made buffer concentrates and instructional manual; nucleic acid purification filters; Laboratory apparatus for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes; Image acquisition (control) software featuring a unique noise reduction capture mode, offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels & western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other

proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; Filtration systems for laboratory use, namely, cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; Laboratory devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors for laboratory use; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; Electrical and scientific apparatus, namely automated DNA optical scanning equipment, not for medical use; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; Electromechanical control and measuring devices and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; Electromechanical control and measuring devices and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer

controlled devices for adjusting laser frequency of tunable lasers; Electromechanical valve actuators [electric switches], namely, high precision electric computer controlled valves [electric switches] for use in high precision flow applications; Precision positioning systems for scientific use comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing; precision positioning systems for scientific use comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; Laboratory apparatus, namely, filters and microporous membranes, holders, housings and supports therefor, none being made of metal; Units for filtration and separation purposes, and parts thereof, all for scientific or laboratory use; All for scientific or laboratory use; Filters and centrifuge separators for laboratory use; Filter or separator holders, housings and supports [laboratory apparatus]; Filtering units for laboratory use; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration

and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; Computer software for controlling chromatography processes and other liquid handling modules; Heat sealing laboratory apparatus for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; hybridization transfer membranes for non-medical scientific and research use; Kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, and disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use, sold as a unit with chemicals and premade buffer concentrates; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; Apparatus and instruments for protein purification purposes for laboratory use, namely, prepacked chromatography columns; Laboratory and clinical equipment, namely disposable plastic syringe filters, other than for medical or veterinary use; laboratory and clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; Laboratory and scientific research apparatus, namely, packed columns of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; Laboratory apparatus for use in laboratory sample preparation, namely, filters, filter-barrels, vials, caps [vial plugs] and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; Laboratory equipment and accessories used in electrophoretic processes; Laboratory equipment, namely, disposable column for small volume purification of monoclonal antibodies; Ultra filtration installations for laboratory use, namely, laboratory filtration systems, consisting of filter cartridge, manifold, pump, back

pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; Liquid chromatography apparatus for laboratory use and laboratory chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for laboratory use for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits, and the parts thereof; Liquid chromatography analyzers for laboratory use; Membrane filter cartridges for scientific and laboratory use for the separation of biomolecules in biopharmaceutical production; Apparatus for analysing laboratory samples, namely, multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; Plastic labware including filtration membranes for laboratory use, namely, lateral flow membrane; Laboratory equipment, namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; software and hardware for analyzing data and automating processes related to biomanufacturing equipment; Separating funnels for use in the life sciences, other than for medical purposes, and for biopharmaceutical manufacture use, laboratory filters, namely, soxhlet thimbles made from organic or inorganic fibre and filter, laboratory apparatus for separation via chemical means, namely, for use in separating biological material from other materials; Membrane filters for laboratory use; filter supports for single use as laboratory apparatus.

Class 10

Medical machines, namely, medical apparatus specially adapted for freezing and thawing cell therapy samples for medical purposes; medical instruments with integrated computer software used to analyze, harvest, culture, process, expand and

purify cells; Parts and accessories for use with such medical instruments namely, plastic cassettes, trays, cell culture bags, tubing and filters all for use therewith, all for medical or clinical use; apparatus and equipment for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; disposable containers for the collection and preservation and transport of blood; apparatus for the temperature-controlled mixing of additives with biological samples such as blood and cellular material; kits comprising disposable bags for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; bags, pouches and boxes for collecting and preserving biological samples such as blood and cellular material; Devices adapted for medical use, namely tubing, valves, clips, pipe clamps, caps, brooches, clamps and accessories being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; All the aforesaid devices being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; Medical apparatus for warming, cooling, cryoprotectant solution addition and mixing biological material such as cells, umbilical cord blood, bone marrow, peripheral blood, blood constituent, or any other blood-like material in order to cryo-prepare or thaw biological products; medical apparatus accessories, namely, disposable sets of interconnected medical containers and interconnectable medical containers for use in collecting, treating, analyzing and preserving biological samples such as blood and cellular material; medical apparatus accessories, namely, tubing, taps, clamps, stoppers and plugs, for interconnecting of and/or for fitting onto the aforementioned disposable sets of interconnectable medical containers and pouches for collecting and preserving biological samples such as blood and cellular material; Medical apparatus for freezing, namely, medical apparatus for controlled rate freezing cell therapy samples; medical apparatus, namely handheld devices containing a foam swab for obtaining buccal cells; thawing apparatus for medical purposes; Filter membranes,

pharmaceutical grade aqueous filters, sterile vent filters, filters for use in blood and plasma separation, inline gas or air filters used in respiratory filtration, filter capsules, molecular sieves, IV filters, encapsulated filter devices, pre-filters, multi layer filters, disposable filtration capsules, microporous membranes, hydrophilic membranes, hydrophobic membranes, hydrophobic filters, glass microfibre filters, filter cartridges, pleated filter cartridges, radiation sterilizable filtering materials, microaggregate transfusion filters, filter housings, all the aforesaid being filters for medical purposes; tubing sets for insufflation; ribbed or non-ribbed tubing; drain assemblies (tubing); Connectors for filters and tubing, luer needle fittings for medical use, barbs for medical use, sealing rings for medical use, clamps for medical use; All the aforesaid for medical, dental, veterinary purposes; Filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes for medical and pharmaceutical use; Blood plasma separating filters for medical and pharmaceutical use.

Class 11

Filters, filter holders, filter valves, filter support screens, filter membranes for use in separating solid particles from liquid or gas, for commercial and industrial use; liquid chromatography apparatus for industrial use; columns for use in industrial chromatography procedures; cooling installations and machines; cooling installations for deep freezing; cooling installations for refrigerating; cooling installations for freezing; chromatography columns; parts of the aforesaid goods in this class; Membrane filters for industrial use; Biomolecule purification filtration apparatus for industrial use; Filters as well as filters for solutions for industrial and commercial purposes, namely surface filters, depth filters, strainers, including membrane filters and hyperfiltration membranes, all of which are in layers, fabrics and porous masses, such as sheets, strips, rods, filters, round socket filters, pleated filters and folding paper, high polymer materials, organic fibers, inorganic, synthetic and / or natural material sintered and / or metallic materials; Electrically operated combined cooling

circulator and thermostatic bath for use in heating and cooling liquids; apparatus for lighting, heating, steam generating, refrigerating, drying, ventilating, water supply and sanitary purposes; freezing apparatus for scientific research and laboratory purposes; Laboratory apparatus, namely, programmable electronically controlled hot plate; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation.

Class 16

Phase separating paper; chromatography paper, polyethelene-backed absorbant paper, and filter paper; lens cleaning tissue paper; General purpose bags of plastic for use in holding biological material and related reagents; Creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; Filter paper; Glass microfibre filter papers; Polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; Marketing and scientific material [printed matter]; instructional material; Instruction manuals; printed matter relating to purification in life sciences.

Class 37

Repair/maintenance and installation services; Servicing of scientific apparatus and instruments; advisory services relating to the aforesaid; Building, constructing and installing bioprocessing and biomanufacturing facilities for the life sciences industry; Repair, installation, modification or maintenance of scientific apparatus and instruments for use in the life science field.

Class 41

Training relating to the use, calibration, re-calibration and servicing of scientific apparatus and instruments; Training and education services in relation to scientific apparatus, instruments and associated software used in the life science field; Customer training and educational courses in the fields of chemicals,

pharmaceuticals, biotechnologicals, biochemical, life science and bioprocess equipment.

Class 42

Software as a service (SaaS) services featuring software for remote monitoring, managing, controlling, and securing of clinical, medical and laboratory equipment and data; laboratory and scientific research services in the field of cryochain technology, namely, cryogenics and cryopreservation technology; design and development services for the creation of bioprocessing and biomanufacturing facilities for the life sciences industry; Scientific, research and technological consultation in the chemical, pharmaceutical, biotechnological and biochemical fields; Software as a service featuring manufacturing execution system (MES) for the pharma and biotechnology industries; software as a service featuring software for managing pharmaceutical and biopharmaceutical manufacturing processes; Scientific image analysis services in the fields of biology, oncology, neurology, infectious disease, immunology and cell culture; scientific laboratory services; laboratory services, namely, stabilization of assays and reagents; software as a service (SAAS) services featuring software for customization and optimization of bioprocessing and biomanufacturing platforms for the production of biopharmaceuticals; providing an online portal featuring information on bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; scientific consulting services in the life sciences field; consulting services in relation to use of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; customization of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data;

providing temporary use of non-downloadable software namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; providing software installation, maintenance and repair in the fields of life science and bioprocess equipment; scientific research; Technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems; consultancy and advisory services for all of the aforementioned in the fields of life science and bioprocess equipment; Contract research and industrial process development services for bioprocess development and manufacturing in the field of biotechnology and pharmaceuticals; platform as a service featuring computer software platforms for use in optimization of life sciences and biomanufacturing processes; Software as a service services featuring software for use in optimization of life sciences and biomanufacturing processes; Cloud computing featuring software for use in optimization of life sciences and biomanufacturing processes; Laboratory services for treating biological samples such as blood and cellular material for medical purposes including medical testing and for preservation of the collected blood or other cellular materials in view of later testing, analysis or use.

Class 44

Medical or paramedical services for the collection, processing, analysis and preservation of biological samples such as blood and cellular products; blood bank services; Medical consultancy in the field of blood transfusion technology; Medical clinic services in connection with treatment based on blood components, and the saving and recovery of surgical blood; Medical services in association with cryogenics cold chain technology; Medical diagnostic services in the fields of biology, oncology, neurology, infectious disease, immunology and cell culture.

Goods and/or Services:

Class 07

Food and beverage processing and preparation machines and apparatus; filters, filter assemblies, filter housings, filter elements, in particular hollow fibre membrane filter modules, and component parts therefor, as parts of processing and preparation machines and apparatus for food and beverages.

Class 11

Filters, filter assemblies, filters and associated manifolds for use in connecting
